DECREE No 1894
OF THE GOVERNMENT OF THE REPUBLIC OF KAZAKHSTAN

CONCERNING THE IMPLEMENTATION OF DECREE N 2201 OF THE PRESIDENT OF THE REPUBLIC OF KAZAKHSTAN, DATED APRIL 17, 1995

The 29h of December, 1995

For the purposes of implementing Decree N 2201 of the President of the Republic of Kazakhstan, dated April 17, 1995 «Concerning the Measures for the Implementation of Edict Having Authority of Law of the President of the Republic of Kazakhstan «Concerning Licensing», the Government of the Republic of Kazakhstan Decrees:

1. That the following shall be approved:

the List of state bodies (licensors) which are authorised to issue licenses including those in form of patent in relation to types of activities which are subject to licensing, in accordance with Supplement 1;

Pro-forma licences and patent in accordance with Supplement 2 and 3. Pro-forma licences and patents for specific licensed types of activities shall be approved by the authorised bodies (licensors) and their contents must comply with the indicated Pro-formas;

the List of types of activities to be licensed for which the expert evaluation of the bodies for sanitary, ecological, mining and technical supervision is required, in accordance with Supplement 4;

Pro-forma applications to obtain the licence (patent) in accordance with Supplements N 5 and 6.

2. That the state bodies indicated in Supplement 1 to this Decree when elaborating the procedure and terms for licensing of specific types of licensed activities stipulated in paragraph 2 of Decree N 1127 of the Cabinet of Ministers of the Republic of Kazakhstan, dated August 16, 1995 «Concerning the Approval of Regulations Concerning the Procedure for Payment of Licence Levy for the Right to Engage In Certain Types of Activities» shall define the following:

Qualification requirements to licensed types of activities and the list of organisations to approve those;

the Procedure and terms of work remuneration and service remuneration in relation to preparation and formulation of materials when licensing;

the List of types of work and services which are included into licensed types of activities;

the Procedure for delegating the powers associated with licensing to the relevant sectoral territorial bodies of administration, including those which are part of local executive bodies of the provinces and the city of Almaty;

the Procedure for protection of interests of Kazakhstani manufacturers in the domestic market.

3. That elaboration of the Procedure and Terms of the licensing of types of activities the licensing whereof is carried out by local executive bodies of the provinces and the city of Almaty, shall be delegated to the central executive bodies in accordance with their scope of authority.

First Deputy Prime Minister
of the Republic of Kazakhstan
N. Isingarin

Supplement N 1 to
Decree N 1894 of the
Government of the
Republic of Kazakhstan,
dated December 29, 1995

The List of State Bodies (Licensors)
Authorised to Issue Licences Including Those In Form of Patent
In Relation to the Types of Activities Which Are Subject to Licensing

N	The Authority Body	Type of Activities to be Licensed
1	The Ministry of Defence of the Republic of Kazakhstan	Development, manufacture, repair and marketing of weapons and munitions thereto, military equipment, spare parts, component elements and instruments thereto, provided they are not used in any other sectors as well as special-purpose materials and equipment relating to their manufacture, elaboration, manufacture and marketing of explosive and pyrotechnic materials and items involving those, manufacture and marketing of combat, toxic substances and means of protection therefrom. Liquidation (destruction, utilisation, burial) and processing of discharged military and technical items
2	The National Air Space Agency attached to the Ministry of Sciences and New Technologies of the Republic of Kazakhstan	All types associated with the use of cosmic space, including creation, manufacture, operation, repair and modernisation of rocket and cosmic equipment, utilisation of surface, infrastructure to provide for it functioning (test-site, command and controls compound, test-base, etc.) Utilisation of orbits of geostationary communication satellites
3	The Ministry of Transport and communications of the Republic of Kazakhstan	Utilisation of radio frequency range, conveyance of passengers and freights by railway, marine, river, aviation and automobile transport. Airport activities relating to services to aircraft, passengers and freights at airports. Activities in the sphere of postal communications and telecommunications except for technological and inside business designation as well as courier services, operation of national main and international lines of communications.
4	Agency for Atomic Energy attached to the Ministry of Science and New Technologies of the Republic of Kazakhstan	Production, transport, processing and marketing of uranium and other fission materials as well as items made thereof. Manufacture and marketing of production containing radioactive substances in quantities which exceed the quota allowed for their use without use of specific means of protection. Development manufacture of marketing of roentgen, instruments and equipment with the use of radioactive substances and isotopes.
5	The Ministry of Energy and the Coal Industry of the Republic of Kazakhstan	Production, transmission and distribution of electric and thermal energy. Manufacture, repairs and operation of boilers, vessels and pipelines which operate under pressure. Manufacture and repairs of explosion protected electric equipment.

6	The Ministry of Construction, Housing and Development of Territories of the Republic of Kazakhstan	Designing and construction of industrial exposure and fire risk and mining production: facilities, main pipe, gas and oil lines, lifted devices as well as boilers, vessels and pipelines operating under pressure. Installation of drilling, oil and gas industry, geological prospecting, mining equipment, explosion protected electric equipment, equipment and control systems, accident prevention systems and alarms, lifting devices as well as boilers, vessels and pipelines operating under pressure. Construction and installation work associated with gasification of residential and utility facilities. Designing and construction of items of alarm and fire systems and fire prevention automated equipment. Installation, repairs and servicing of passenger elevators. Designing in construction of national main and international communication lines. Designing research, expert and construction and installation operations, operations associated with production of building materials, items and modules.
7	The Ministry of the Industry and Trade of the Republic of Kazakhstan	Operation of industrial explosion and fire risk and mining production facilities as well as lifting installations, manufacture and repairs of chemical, drilling, mining equipment, equipment and control system, anti-accident protection and alarm system, lifting devices. Performance of mining survey work in the utilisation of the subsurface, processing, storage of precious metals and precious stones, manufacture of jewellery items. Processing of mineral raw materials.
8	The Ministry of the Oil and Gas Industry of the Republic of Kazakhstan	Operation of main oil and gas pipelines Manufacture and repairs of oil and gas industries equipment. Manufacture, operation and repairs of systems of gasification of housing and utility facilities
9	The Ministry of Geology and Protection of the Subsurface of the Republic of Kazakhstan	Manufacture and repairs of geological prospect and equipment.
10	The Ministry of Internal Affairs of the Republic of Kazakhstan	Production, repairs and marketing of hunting and sports firearms and munitions thereto, as well as chemical means of self-defence. Adjustment and technical services to the system of fire and security alarm systems and fire prevention automated equipment. Development of individual means of self-defence. Rendering to non-governmental entities of legal services relating to detective and security activities.
11	The Ministry of Health Protection of the Republic of Kazakhstan	Disinfection, deodoration of production of residential and civil facilities. Manufacture and marketing of pharmaceuticals (except for growing, collecting and selling of pharmaceuticals of animal origin, plans and herbs) Engagement in medical and medicinal activities.
12	The State Technical Commission for Protection of Information of the Republic of Kazakhstan	All types of activities associated with technical protection of state secrets of the Republic of Kazakhstan, including development, manufacture, installment, adjustment, repair and services to technical means of information protection, protected technical items for data processing

13	The Main Department for Geodesics and Cartography of the Republic of Kazakhstan	Performance of topographic and geodesic and cartographic and survey work and marketing of topographic, geodesic and cartographic products
14	Committee for Standardisation, Metrology and Certification of the Republic of Kazakhstan	Manufacture, audit and repairs, marketing and leasing of measurement instruments. Manufacture of alcohol products Production of material and graphic items which epitomise the state symbols of the Republic of Kazakhstan as defined in the Constitution.
15	The Customs Committee of the Republic of Kazakhstan	Activities associated with the customs regime (as stipulated in the Customs Legislation) Rendering of customs services
16	The Ministry of Education of the Republic of Kazakhstan	Activities of educational establishments which provide secondary, secondary vocational and higher education with the right to issue diplomas in specific professions.
17	The Ministry of Justice of the Republic of Kazakhstan	Rendering of legal services. Forensic expert activities
18	The Ministry of Finance of the Republic of Kazakhstan	Audit activities.
19	The State Insurance Supervision of the Republic of Kazakhstan	Insurance activities.

Supplement N 4 to
Decree N 1894 of the
Government of the
Republic of Kazakhstan,
dated December 29, 1995

The List of Types of Licensed Work and Services in Respect Whereof the Conclusion of the Bodies of Sanitary, Ecological and Mining Supervision Shall Be Required

I. The List of Types of Licensed Work and Services for Which Conclusion of the Sanitary Supervision Shall be Required

1. Designing, manufacture, repairs and marketing of armaments and munitions thereto, cryptographic means for protecting information, special technical items for performance of specific operative and investigative efforts, military equipment, components, spare parts and instruments unless they are used in other sectors as well as special material and equipment for their manufacture.
2. Elaboration, manufacture and marketing of explosive and pyrotechnic substances and items involving them.
3. Development of individual means of protection.
4. All types activities associated with the use of cosmic space including creation, manufacture, maintenance, repairs and modernisation of rocket and cosmic equipment, utilisation of surface infrastructure for securing its functioning (or test side, command and controls compound, test base, etc.).
5. Manufacture, transport and processing and marketing of uranium and other fission materials as well as items made thereof.
6. Manufacture and marketing of products containing radioactive substances in quantities exceeding the quota allowed for their use without necessity to use special means of protection.
7. Production and marketing of combat toxic substances and means of protection therefrom.
8. Liquidation (destruction, utilisation, burial and reprocessing of discharged military items).
9. Manufacture of chemical means of self-defence.
10. Disinfection and deodoration of production and housing and civic items.
11. Development, manufacture and marketing of roentgen equipment, instruments and equipment with the use of radioactive substances and isotopes.
12. Manufacture and marketing of pharmaceuticals (except for growing and selling pharmaceuticals of animals, plants and herbs).
13. Manufacture of building materials.
14. Manufacture of alcohol products.
15. Activities of public catering outlets.
16. Use of radio frequency range.
17. Conveyance of passengers and freights by the railway, marine, river, aviation and automobile transport.
18. Airport activities associated with servicing of air craft, passengers at airports.

19. Manufacture and repair of chemical, drilling, mining equipment and machinery.

20. Procurement and processing of secondary resources and wastes containing precious metals and precious stones.

21. Processing of precious metals, precious stones.

22. Manufacture, repairs of means of measurement.

II. The List of Types of Licensed Work and Services for Which Conclusion of the Bodies of Ecological Supervision in Required

1. Elaboration, manufacture and marketing of explosives and pyrotechnic substances and items with their use.

2. All types of activities associated with use of cosmic space, including creation, manufacture, operation, repairs and modernisation of rocket and cosmic equipment, use of surface infrastructure for providing for its functioning (test side, command and controls compound, test-base, etc.).

3. Manufacture, transport, processing and marketing of uranium and other fission materials as well as items made thereof.

4. Manufacture and marketing of products containing radioactive substances and quantities which exceed the norm of allowed for their use without using special means of protection.

5. Manufacture and marketing of combat, toxic substances and items for protection therefrom.

6. Liquidation (destruction, utilisation, burial) and processing of discharged military and technical resources.

7. Designing, construction and operation of industrial, mining and fire risk and mining production facilities, main oil and gas pipelines.

8. Airport activities associated with servicing aircraft, passengers and freights at airport.

9. Procurement and processing of secondary resources and waste containing precious metals and precious stones.

10. Work associated with manufacture of construction materials items and structure and modules.

11. Maintenance and operation of petrol refill stations.

12. Designing construction and operation of national main and international communication lines.

13. Development, manufacture, repair and marketing of armaments and munitions thereto, cryptographic means of protecting information, special technical devices for performing special-purpose operative and investigative efforts, military equipment, spare parts, components and instruments thereto unless they are used in other sectors as well as special-purpose materials and equipment for their manufacture.

14. Development of individual means for self-defence.

15. Manufacture of mine survey operations when using the subsurface.

16. Designing, installation, adjustment and technical servicing of means of fire prevention alarm systems and fire prevention automated systems.

17. Manufacture of alcohol products.

III. The List of Types of License to Work and Services for Which the Conclusion Shall be Required from Mining Supervision

1. Elaboration, manufacture and marketing of explosive and pyrotechnic substances and items involving those.
2. Designing, construction and operation of industrial explosion and fire-risk and mining production facilities, main oil and gas pipelines, [underground] facilities as well as boilers, vessels and pipelines which operate under pressure.
3. Manufacture, installation, repair of chemical, drilling, oil and gas industry, geological and mining equipment, explosion-protective electrotechnic equipment, machinery and systems for controls, accident prevention and alarm systems, lifting equipment as well as boilers, vessels and pipelines which operate under pressure.
4. Manufacture, repair and construction work associated with gasification of residential and utility facilities.
5. Installation, repair and servicing of passenger elevators.
6. Performance of mine survey operations when utilising the subsurface.
7. Processing of precious metals and precious stones and of mineral raw materials.
