COMMITTEE OF THE PROTOCOL REGARDING CERTAIN MILK POWDERS

Summary Tables

Revision

In accordance with Rule 28 of the Rules of Procedure, the secretariat has prepared the attached summary tables of the information furnished in Table A of Quesionnaire 1 in respect of skimmed milk powder and whole milk powder. This document also contains tables showing exports of these two products by destination.

85-0529

Symbols

The following symbols have been used with the following meanings in the statistical tables:

... not available

\- nil or negligible

( ) provisional figure, subject to revision

NOTES

The statistical tables comprise no data other than those furnished to the secretariat in reply to the questionnaires regarding products covered by the Protocols.

As the figures have been rounded, the annual totals may not correspond exactly to the sum of the quarterly totals. Moreover, where the annual totals have been revised, but not the quarterly figures, larger differences may be noted. In such cases, the data are given in parentheses.

The definition of stocks may differ according to the country or group of countries considered. So far as possible, the definition has been given in the tables concerned.

The data shown in these tables in respect of consumption relate to apparent consumption, i.e.: stocks at beginning of period plus production plus total imports minus total exports plus stocks at end of period. The data on population, used for calculating per capita consumption, are taken from "Population and Vital Statistics Report - 1984 Special Supplement", published by UN in 1984.

[1] Partly skimmed and cream powder included with skimmed milk powder statistics.

[2] As less than three plants are manufacturing whole milk powder in any Canadian province, production statistics are not available, under regulations of the Statistics Act. Whole milk powder production is of minor importance in Canada's dairy industry.

[3] Including infants' food.

[4] 2,900 metric tons are partly skimmed milk powder.

[5] 2,300 metric tons are partly skimmed milk powder.

[6] 2,500 metric tons are partly skimmed milk powder.
