GENERAL AGREEMENT ON TARIFFS AND TRADE

Committee on Trade in Agriculture

Original: English

INFORMATION ON MEASURES AFFECTING TRADE

Submitted by:

UNITED STATES

This supersedes and updates the information contained in document AG/FOR/US/1, dated 12 September 1983.

84-1377

GENERAL NOTE

The information submitted by the United States covers products in CCCN chapters 1-24 (except chapter 3, which the United States does not treat as agricultural). It also covers wool, mohair and cotton in 53.01, 53.02 and 55.01.

The nature and extent of most US domestic farm programs are described in L/5102/Add.15, and up-dated in L/5449/Add.8 and L/5449/Add.8/Suppl.1. They are also described in L/5469, which is the latest report on programs under the US waiver. Dairy and meat programs are further described in DPC/INV/2/Add.5 and IMC/INV/13. Related export and import measures are included in these same documents. The policies described in these documents are also covered in the AG/DOC series. Generally only one reference is cited in this table.

Food aid programs and export control authority are described in AG/DOC/5/US/1.

Sanitary and phyto-sanitary regulations are included only to the extent that other countries have indicated an interest in them. Licensing is included when it is used as an import control measure, but not when it refers to health, safety or other special regulations in which no interest has been expressed. Grading and quality standards are not included.

Information on tariff rates is estimated based in most cases on the ad valorem equivalent of rates in force in 1982. It should be noted that the United States does not employ the CCCN system of tariff classification, and in a few cases it was not possible to identify the U.S. tariff positions corresponding to certain CCCN numbers. The symbol "OP" refers to the immediate implementation in 1980, for the least developed countries, of Tokyo Round tariff cuts which will not be fully implemented for other countries until 1987.

Bilateral supply agreements are in effect with the USSR and the Peoples Republic of China, with product coverage of wheat and corn.

The stocking requirement entered under 10.01 (wheat) pertains to the commitment of 4 million tons to the International Emergency Wheat Reserve.

In fulfil ment of obligations under the international agreements governing sugar and coffee, the United States limits imports from non-member countries. The United States has needed no special measures to enable it to respect the minimum export prices established by the International Dairy Agreement.

The Commodity Credit Corporation (CCC) is a Federal Corporation within the Department of Agriculture which was created to stabilize, support and protect farm income and prices. CCC programs included the export credit guarantee program (GSM-102) and the blended credit program, which combines credit guarantees and interest free government credit (GSM-5).
