GENERAL AGREEMENT ON
TARIFFS AND TRADE

RESTRICTED
DPC/C/W/30
21 February 1986

International Dairy Arrangement

COMMITTEE OF THE PROTOCOL REGARDING CERTAIN CHEESES

Summary Tables

In accordance with Rule 28 of the Rules of Procedure, the secretariat has prepared the attached summary tables of the information furnished in Table A of Questionnaire 3 in respect of cheeses. This document also contains a table showing cheese exports by destination.

For technical reasons, the format of the summary tables has been changed to show the averages for 1981-83 and the actual figures on the quarterly and annual basis for later years.

EXPLANATORY NOTES

(General Notes for all Summary Tables)

Symbols

The following symbols have been used with the following meanings in the statistical tables:

...	not available
-	nil or negligible
( )	provisional figures, subject to revision

Sources

The figures included in the statistical tables are primarily provided to the secretariat in replies to questionnaires regarding products covered by the Protocols. National and UN statistics were used when figures were otherwise unavailable.

Per capita consumption figures were calculated with population figures from UN, OECD, FAO and IMF sources.

Notes relating to data of individual countries

In some countries' statistics, figures relating to anhydrous milk fat are not kept separate from those relating to butter. They may therefore be included in the data relating to butter. The data shown with respect to consumption, relate to apparent consumption, as calculated by the secretariat. All totals include only the figures shown.

Certain countries have not been included in all the tables either because the quantity of trade has been nil or insignificant, or because figures have not been available.

Figures for Australia for skimmed milk powder also include partly skimmed milk powder, cream powder, skimmed milk powder and buttermilk powder mixtures, and skimmed milk powder modified. Whole milk powder export classification changed on 1 July 1984. Stocks are those held by manufacturers. Cheese stock figures only include Cheddar, Gouda and stirred curd/granular cheeses.

For Austria stocks include only products of domestic origin.

For Bulgaria partly skimmed milk powder is included in whole milk powder statistics. Cheese figures include Kashkaval.

For Canada butter figures refer to creamery butter only; whey butter is not included. Cheese figures include Cheddar and other whole milk cheeses.

EC stocks of skimmed milk powder and butter include public intervention stocks and private stocks. Cheese stocks include intervention stocks (public stocks for Grano-Padano and Parmigiano Reggiano) and stocks qualifying for aid for private storage. EC exports by region do not include intra-Community trade.

For Finland stock figures are referring to wholesale stocks for dairies.

For Japan figures refer to stocks of whole milk powder held by manufacturers, whereas for skimmed milk powder and butter, the data refer to stocks held by manufacturers as well as the Livestock Industry Promotion Corporation. Exports of skimmed milk powder in 1984, were food aid. Cheese production figures are estimates.

All stock figures for New Zealand include export and local market stocks. Government stocks are nil. Skimmed milk powder statistics include partly skimmed and cream powder. Exports of skimmed milk powder first half of 1985, do not include 28,614 tons for stock feed and other non-human consumption. Whole milk powder statistics include infants' food.

For Norway cheese figures include whey cheese and processed cheese.

Cheese figures for Poland include ripening and processed cheeses only.

Butter production figures for Sweden do not include "Bregott" (1982: 20,500 tons, 1983: 22,600 tons, 1984: 24,300 tons).

Butter figures for Switzerland include resolidified butter. Quarterly figures for cheese production are estimates. Processed cheeses are not included in the statistics. Cheese stock figures include Emmental, Gruyère, Sbrinz, Tilsit and Appenzell.

United States data on stocks of milk powders refer to CCC stocks. Stocks of skimmed milk powder and cheese are for 9 August 1985 (instead of 1 July 1985).

Regions of destination

Regions of destination are as previously defined. (See Fifth Annual Report, pages 82 and 83.)
