NON-DISCRIMINATORY MEASURES NOTIFIED BY
THE GOVERNMENT OF ITALY
UNDER PARAGRAPH 11 OF ARTICLE XVIII

Statement of Considerations submitted under Article XVIII:12

The Government of Italy, pursuant to paragraph 12 of Article XVIII, transmitted to the Secretariat on 29 July 1950, a memorandum setting forth the considerations in support of the maintenance of the measures it had notified under paragraph 11 of Article XVIII.

The circulation of this memorandum had to be postponed in order to enable the Italian Government to supply a certified text of the memorandum in one of the working languages.

Memorandum on non-discriminatory measures notified under paragraph 11 of Article XVIII of the General Agreement on Tariffs and Trade

Following the notification by the Head of the Italian Delegation to the Second Tariff Conference held by the Contracting Parties to the General Agreement on Tariffs and Trade, included in document GATT/CP.3/40/Add. 1 dated 9 June 1949 and addendum GATT/CP/49 of 16 January 1950, notification is hereby given under paragraph 12 of Article XVIII of the General Agreement that the Italian Government intends to maintain the measures referred to in the above mentioned notification.

The data and information requested in document GATT/CP.3/60/Rev. 1 in addition to those already transmitted in the two above mentioned documents will be found in the following pages.

Ib Radio-electric sets (transmitters or receivers), and parts thereof.

- a) The measure in question is the measure provided for in Article 2 of the Law No. 234 of 5 January 1931, governing the import of radio-electric equipment subject to the tax on radio sets. Consequently, any person wishing to import from abroad the above mentioned products must previously obtain the appropriate permit delivered by the relevant administration. The measures referred to above shall be maintained notwithstanding the provisions of paragraph 1 of Article XI of the GATT.
- b) These regulations apply to transmitters and receivers, valves and loud-speakers classified under one of the following items:

| Tariff Item Number | Description of products | Rate of duty ad valorem |
|--------------------|--|--|
| 1198 c) | Loud-speakers..... | 60% with a minimum rate of 500 lire each |
| 1200 | Transmitting apparatus for radio-telegraphy, radio-telephony and television, including transmitting-receiving apparatus, | |

| 1202 | Radio-electric apparatus, not elsewhere specified or included: a) for radio-guiding, radio- signalling, radio-goniometry, and the like: 1) radio-goniometers, weighing: alpha) up to 150 kilos beta) over 150 kilos 2) other, weighing: alpha) up to 70 kilos beta) over 70 kilos and up to 300 kilos gamma) over 300 kilos b) radio-sounders and detectors of obstacles by means of ultra- sound or electro-magnetic waves c) television cameras by direct transmission d) other | 25% 20% 30% 25% 20% 20% |
| 1204 | Thermoionic tubes, valves, and lamps: a) special tubes for radio-electric transmission..... c) gas-rectifiers - tubes, valves, lamps, weighing: | 25% |

| Tariff Item Number | Description of Products | Rate of duty ad valorem |
|-----------------------|---|---|
| 1204 (cont.) | 1) up to 200 grammes | 35% with a minimum rate of 150 lire each |
| | 2) over 200 grammes | 30% |
| | d) radio-electric tubes, valves, and lamps (for receiving, amplifying and vacuum rectifying "magic eyes" of all kinds for radios) ("indicatori di accordo di qualsiasi tipo")..... | 40% with a minimum rate of 200 lire each. |
| ex 1204 | d) Radio-electric tubes, valves and lamps (for receiving, amplifying, and vacuum rectifying, " "magic eyes" of all kinds for radios) ("indicatori di accordo di qualsiasi tipo") | 35% |
| 1206 | Electric tubes, valves and lamps, not elsewhere speci- fied or included, excluding those for lighting (electro- nic image analysers, secondary transmission tubes and electronic multipliers, electro- meter tubes and photo- meters, tension or intensity- regulating tubes and similar)..... | 25% |
| | c) The text of the law has been submitted by the Head of the Italian delegation in Annecy and his letter of 27 August 1949 (docu- ment GATT/CP/49 of 16th January 1950) | |
| | d) Imports statistics for the years 1934/1938 and 1948/1949 (see Annex A). <u>Note:</u> The statistical data given have been compiled on the basis of the tariff nomenclature in force until 14th July 1950. | |
| | e) The new tariff rates which came into force on 15th July 1950, for the same product, are those mentioned in sub- paragraph b) above. | |

Conclusion - For the time being it is not envisaged to amend these regulations which are part of a general framework of technical measures enabling the competent authorities to watch the qualitative improvement and evolution of the industrial production of the above mentioned products. It is also intended thus to secure the necessary controls in a production sector which is part of national defence.

For the foregoing considerations, it is not envisaged for the time being to relax the application of the provisions in question.

II. SYNTHETIC ORGANIC DYES AND INTERMEDIATE PRODUCTS

Under decree law No. 122 of 18 January 1934 there was instituted a National Committee of the Synthetic Organic Dyes Industry which is empowered to give an opinion as to the measures to be taken in connection with any matter concerning the manufacture of, or trade in, synthetic organic dyes.

Subsequently under a ministerial decree of 29 August 1934 prohibiting the import of certain commodities, the importation of dyestuffs and intermediate products was prohibited and allowed only under a special release from this prohibition. Under the provisions of this decree the Finance Minister had authority to deliver import licences upon the advice of the National Committee set up in pursuance of Decree law No. 122 of 18 January 1934.

After the end of the war the regulations governing the import of dyestuffs were amended in conformity with the underlying principles of Decree law No. 122 of 18 January 1934.

The aforesaid regulations are not of a prohibitive nature as they provide for considerable imports of dyestuffs from all the principal suppliers, as indicated in the statistical data in the annexes.

Furthermore, it must be stressed that similar measures in this domain have long been in force in other countries and that therefore the maintenance of the above mentioned legislative measures appears to be justified.

On the basis of the statistical data given in the following pages the production of synthetic organic dyes reached the figures of 125.218 cw., 78,832 cw. and 78.356 cw. for the years 1937, 1948 and 1949 respectively, on the basis of the compilations of the Central Statistical Institute.

Import figures appear in Annex B (Note: Statistical figures have been compiled on the basis of the Customs tariff in force until 14th July 1950).

As regards intermediate products for the manufacture of dyestuffs it has not been possible to supply statistics as these products were not specifically mentioned in the former tariff and were therefore classified under many tariff items.

The general tariff rate of duty applicable to synthetic dyes was 30 per cent ad valorem. The recent tariff negotiations conducted between Italy and Switzerland have resulted in rates of duty ranging between 15 per cent and 20 per cent, whereas the rate of duty applicable to lacquers is 30 per cent ad valorem and those applicable to intermediate products range between 15 per cent and 20 per cent ad valorem.

Considering the nature of the provisions in question and in view of the fact that the reasons which justified their adoption still exist, considering further that the industry of organic dyes and intermediate products is indirectly of interest to national defence, it is not envisaged for the time being to revoke these regulations.

III: SEED OILS

Subsequent to, and in confirmation of, the notification of 7 June 1949 concerning the manufacturing tax on seed oils, it is indicated that this charge, which is of a fiscal nature, but more particularly of an economic and protective character, cannot be reduced or eliminated.

Indeed the production of olive oil (which enjoys an indirect protection resulting from the above mentioned tax on seed oils) is of considerable importance to Italy within the general framework of the national agricultural economy; this requires the effective protection of a balanced market for this product, through measures intended to regulate and control the effect that national production of seed oils may have on the situation of olive oil.

These needs, on which was based the sequence of well-known provisions starting with the law of 1881 and culminating in the latest ministerial decree of 1941, still exist, but they raise very delicate points in the present economic period of production and trade readjustment in sectors related to the domain of agriculture. Any relaxation or concession in this field might have very serious consequences, as the problem fundamentally affects the very structure of several agricultural concerns the situation of which it would be practically impossible to readjust for economic, financial and technical reasons.

For the above reasons the maintenance of these measures must be regarded as essential; furthermore in view of the present situation it is not possible to express any opinion as to the possibility of any modification to the existing legislation being adopted in the near future.

Annex C shows the statistical data relating to imports of seed oils.
