COMMITTEE OF PARTICIPATING COUNTRIES

Draft Second Annual Report to CONTRACTING PARTIES

1. In compliance with the Decision of 26 November 1971¹, the countries participating in the Protocol Relating to Trade Negotiations Among Developing Countries submit to the CONTRACTING PARTIES their second annual Report² concerning the operation of the Protocol. In adopting the Decision, the CONTRACTING PARTIES considered that trade negotiations among developing countries should have as their objective expanding access on more favourable terms for developing countries in one another's markets through an exchange of tariff and trade concessions directed towards the expansion of their mutual trade. The CONTRACTING PARTIES noted that the establishment of preferences among developing countries could make an important contribution to the expansion of trade among developing countries and to the attainment of the objectives of the General Agreement. They also noted that countries members of the Protocol intended to keep under review the possibility of promoting negotiations for additions or enlargements to the schedules of concessions. The CONTRACTING PARTIES, in adopting the Decision, expressed the hope that all developing countries not participating in the arrangement will consider acceding to the Protocol.

¹BISD Eighteenth Supplement, pages 26-28

²The first Annual Report was circulated as L/4091 and Addenda.

2. The present report has three sections. Section one describes the activities of the Committee of Participating Countries during the period under review. Section two contains some comments on the statistical information provided by participating countries on trading relationships under the Protocol and section three reproduces the tabulations containing the statistical information supplied by participating countries.

I. COMMITTEE OF PARTICIPATING COUNTRIES

A. Entry into force and status of ratifications

3. The Protocol Relating to Trade Negotiations Among Developing Countries which was signed by sixteen developing countries entered into effect on 11 February 1973 for the following participating countries: Brazil, India, Israel, Republic of Korea, Pakistan, Spain, Turkey and Yugoslavia. The Protocol has also entered into force for six additional participating countries: Tunisia (7 March 1973), Egypt (15 August 1973), Chile (19 May 1974), Mexico (29 August 1974), Greece (1 November 1974) and Uruguay (10 September 1975). Ratification procedures have not yet been completed by Peru and the Philippines.

B. Compliance with Decision

4. Participating countries have fully observed the provisions of the Protocol and the terms of the Decision of the CONTRACTING PARTIES of 26 November 1971. No contracting party has requested consultations with participating countries on the grounds that benefits accruing to it under the General Agreement may be or are being impaired unduly as a result of the arrangements set out in the Protocol,

nor has any contracting party suggested that these arrangements are being applied inconsistently with the Decision of 26 November 1971. Consequently, no such matters have been brought before the CONTRACTING PARTIES as provided for in paragraph (d) of the Decision.

C. Activities of the Committee

5. The Committee of Participating Countries provided for in the Protocol was established for the purpose of giving effect to those provisions of the Protocol involving joint action and, generally, with a view to facilitating the operation and furthering the objectives of the Protocol. During the period under review, the Committee has held sessions in December 1974 and in April, July and October 1975, under the Chairmanship of H.E. Mr. I.S. Chadha (India) and Mr. H.J. Choi (Republic of Korea) who each held office for periods of six months in accordance with agreed procedures.

6. Minor changes to the schedule of concessions annexed to the Protocol introduced by Israel, Tunisia and Uruguay have been noted by the Committee of Participating Countries.

7. In the course of the year, the Committee of Participating Countries has focussed considerable attention on the possibilities and scope for enlargement of the Protocol. The interest expressed by a number of developing countries in acceding or exploring possibilities for accession to the Protocol has been welcomed by the Committee and more general consideration has been given to the

prospects and timing of a new round of negotiations among developing countries taking into account the 1971 Decision of the CONTRACTING PARTIES. Further details, in this respect, are contained in the following section of the Report.

D. Enlargement of the Protocol

8. Pursuant to paragraph 14 of the Protocol, Paraguay and Bangladesh both requested accession without carrying out negotiations on terms agreed with the Committee. The delegation of Paraguay, in submitting details of its foreign trade régime, also exchanged views with members of the Committee concerning the background to its application. At its meeting in October 1975, the members of the Committee of Participating Countries decided [to be completed]. The request for accession submitted by Bangladesh in August 1975 is being examined by the Committee with a view to reaching a decision at an early date.

9. Four other developing countries have indicated their interest in exploring possibilities for accession to the Protocol in accordance with the procedures drawn up by the Committee of Participating Countries. So far, two of these countries have exchanged trade data and information with participating countries on products of export interest. Consultations between one such country and interested participating countries with a view to considering possibilities of exchanging concessions are expected to take place shortly. The other two developing countries have indicated that lists of products of export interest to them in the markets of participating countries are being prepared.

10. A number of other developing countries have also indicated interest in the Protocol and have been provided with relevant information by the secretariat.

II. STATISTICAL DATA

11. It may be considered that having regard to the time involved in promulgating and implementing the necessary administrative arrangements relating to the operation of the Protocol by participating countries following ratification in 1973 and later, the practical application of the arrangement is still in its formative stages. Nevertheless, there is evidence on the basis of available statistics, that trade among participating countries in products subject to tariff concessions increased during 1974, the latest period for which information on trade flows is available. While full details of trade in products subject to concessions are shown in Section III of the report, an attempt has been made in the following table to provide a summary of certain aspects of this trade.

12. It will be noted from the table that with respect to the eight participating countries¹ which had provided data at the time of preparation of this report, trade with other participating countries in products included in the schedules of concessions increased from US\$9.9 million in 1972 to US\$20.1 million in 1973 and US\$31.3 million in 1974.

13. While the schedules of concessions at present embodied in the Protocol represent a modest initial effort by participating countries to increase trade among themselves, the interest being expressed by participating countries in

¹Data provided by other participating countries will be circulated as addenda to this document.

exploring ways and means of enlarging the Protocol in terms of membership,
product coverage and the extension of concessions to the non-tariff field as
well as in the field of tariffs and the interest already expressed by a number
of developing countries in accession or possible accession suggests that a basis
is developing for a meaningful enlargement of the arrangement. The Committee is
of the view that in the light of its initial experience, the Protocol Relating to
Trade Negotiations Among Developing Countries will make a valuable contribution
to the expansion of trade among developing countries taking advantage of the
complementarities existing in terms of production and trade flows of developing
countries.

^{1/} Imports into the Canary Islands and other duty-free zones are not included, the reason being that tariff concessions do not operate there because imports by them are not dutiable.

^{2/} In the absence of a detailed breakdown, the total figures are given for all phosphides except tin phosphide.

^{3/} In the absence of a detailed breakdown, the figures given are for the entire heading No. 33.06.

^{4/} Whereas in the statistics for 1972 and 1973 six notes were included in the statistics, only four notes are included in the more recent statistics for 1974. The reason is that in the 1974 statistics of Spain's foreign trade a number of detailed breakdowns have been made precisely in order to take into account the concessions granted under the Protocol Among Developing Countries. Accordingly, any comparison between the figures for 1972 and 1973 and those for 1974 is not valid where the statistical breakdowns do not correspond.

^{5/} In the figures for the years 1972 and 1973 in document I/4001, imports by Peru, the Philippines and Uruguay were included by error among the figures for "participating countries". These three countries have not ratified the Protocol and are therefore not included in the data corresponding to 1974.

IMPORTANT NOTES

In establishing the 1974 statistics for Spanish imports of products on which Spain has granted concessions under the Protocol Relating to Trade Among Developing Countries, the following remarks should be taken into account:

1) In the statistics for 1972 and 1973 six notes were included at the end of the table concerning the absence of a detailed breakdown in the statistics, only four notes are included in the more recent statistics for 1974. The reason is that in the 1974 statistics of Spain's foreign trade a number of detailed breakdowns have been made precisely in order to take into account the concessions granted under the Protocol Among Developing Countries. Accordingly, any comparison between the figures for 1972 and 1973 and those for 1974 is not valid where the statistical breakdowns do not correspond.

2) In the figures for the years 1972 and 1973 in document I/4001, imports by Peru, the Philippines and Uruguay were included by error among the figures for "participating countries". These three countries have not
