DRAFT TERMS OF REFERENCE OF WORKING PARTY ON THE TARIFF STUDY

Text Proposed by the European Economic Community

On the basis of the documentation that has been prepared and such other material as may be found useful, the Working Party should carry out an objective analysis of the tariff situation as it will exist when all Kennedy Round concessions have been fully implemented and should analyze: (a) the variations in tariff rates as between and within categories and as between countries, and (b) the differentials in duties according to the degree of processing, with a view to providing the Committee on Trade in Industrial Products with the necessary elements for carrying out its terms of reference in the tariff field.

The Working Party should report to the Committee by the end of this year.
