## TROPICAL PRODUCTS: INFORMATION ON THE COMMERCIAL POLICY SITUATION AND TRADE FLOWS

### Rice

#### Note by the Secretariat

#### Addendum

#### Introduction

1. Under the work programme of GATT adopted after the conclusion of the Tokyo Round in 1979, the Committee on Trade and Development was given a task to work on further trade liberalization in areas identified as being of special interest to developing countries, which included notably tropical products. In this connection, the secretariat provided during 1981 detailed data on the commercial policy situation and trade flows with respect to a number of tropical products. Data for rice were circulated as COM.TD/W/353 and this document was used as background material for the Consultations on Trade Liberalization (tropical products) held in March 1982.

2. The CONTRACTING PARTIES, meeting at the Ministerial level in November 1982, decided "to carry out, on the basis of the work programme pursued by the Committee on Trade and Development, consultations and appropriate negotiations aimed at further liberalization of trade in tropical products, including in their processed and semi-processed forms, and to review the progress achieved in eliminating or reducing existing obstacles to trade in tropical products at their 1984 Session." At its meeting on 8 March 1983, the Committee on Trade and Development agreed that the background documentation prepared for the 1982 Consultations on Trade Liberalization would be updated, for the purpose of carrying out the consultations and appropriate negotiations called for by the Ministers.

Column RATE

Percentage ad valorem or ad valorem equivalent of specific, mixed or compound rate is indicated with one decimal point. Ad valorem equivalent is based on imports in the year recorded.

Column NAT = nature of duty rate (blank for ad valorem rate)

- S for specific rate (e.g. \$4.00/kg);
- C for compound rate (e.g. \$4.00/kg + 10%);
- M for mixed rate (e.g. \$4.00/kg. or 10% whichever is greater);
- V for variable levy or variable component;.
- O for other natures.

Column BDG = binding status (blank for ordinary binding)

- C for ceiling binding;
- P for  $\partial$  rate partially bound at a ceiling rate, and partially at the prevailing rate;
- U for an unbound rate.

Column LIM = limitation code for GSP (blank for no limitation)

- C for ceiling or competitive need provisions;.
- Q for quota or similar limitations.

TRADE FLOW DATA

IMPORTS FROM (i) WORLD (= all sources) and (ii) GSP ORIGIN (= GSP beneficiary countries) are each sub-divided by TOT (= total imports irrespective of tariff treatment), MFN (= imports entitled to m.f.n. treatment), GSP (imports covered by GSP), LDC (imports entitled to LDC preference) and FTA, ZONE, PREF (= imports entitled to free trade area or other preferential agreements). It may be noted that "imports covered by GSP" do not take into account quantitative and origin rule limitations and non-utilization of GSP and that actual imports under GSP are smaller than imports recorded as GSP.

With respect to imports from world and imports according to different tariff treatment, names of five main suppliers appear in column MAIN SUPPLIERS and imports from four main suppliers are indicated at the bottom.

Import figures refer to the year 1980
