STATISTICS ON TEXTILES AND CLOTHING

Part 1: Production, Employment and Trade, 1973-1979

Introduction

The statistics which have been compiled for the major review are circulated in three parts. This part summarizes the statistics on output, employment and trade reported in Parts 2 and 3. Part 2 (document COM.TEX/W/77) refers to production, employment, value added and investment. Part 3 (document COM.TEX/W/78) contains detailed trade statistics.

The statistics contained in this Part are in two Sections: Section 1, contains production and employment indices for textiles and clothing and all manufacturing. Section 2 summarizes the trade data compiled for the major review.

Explanatory Notes

The production indices are those published in national statistical publications or in the UN Monthly Bulletin of Statistics and OECD Indicators of Industrial Activity. They have been converted by the secretariat to a common base year (1973 = 100). The employment indices for all manufacturing have been obtained from the same sources. Those for textiles and clothing have been calculated from the data reported by member countries in reply to the textiles questionnaire.

As far as possible, the following definitions have been used:

Textiles - ISIC¹ major group 321. This includes spinning, weaving and finishing; the manufacture of made-up textile goods except wearing apparel; knitting mills; the manufacture of carpets and rugs; cordage rope and twine industries; the manufacture of textiles not elsewhere specified. All materials are included.

Clothing - ISIC major group 322. This includes the manufacture of wearing apparel, except footwear. All materials are included.

Manufacturing - ISIC major group 3.

Notes to these tables as well as the explanatory notes to Part 2 (COM.TEX/W/77) indicate the departures from the definitions adopted and the difference in data coverage.

Lack of sufficient comparability, not only at the international level, but also as between production and employment at the national level, has limited the number of countries for which productivity indicators can be calculated and the extent to which comparative assessment of these calculations can be made.

The trade statistics have been compiled from the United Nations trade tapes. The product categories are defined in terms of the Standard International Trade Classification (SITC) Rev.1.² The aggregates for textiles and clothing shown in Tables 4 to 20 exclude, in principle, products classified in SITC divisions 65 and 84, other than those of cotton wool and man-made fibres, to the extent they can be identified in the SITC Rev.1. For the products shown in Tables 21 to 30, exact descriptions together with their SITC and corresponding BTN numbers are shown in Part 3 (COM.TEX/W/78).

¹United Nations, "International Standard Industrial Classification of All Economic Activities" Rev.2, 1968.

²UN Statistical Papers Series M, No. 34.

Values are in millions of US dollars. Exports are valued f.o.b., imports are valued c.i.f., with the exception of Canada, Czechoslovakia and the United States where imports are f.o.b. As far as possible the data refer to special trade. Processing traffic and exports from bonded factories are not uniformly treated.

Data for the European Communities exclude intra-community trade. The statistics are aggregated from individual members' trade returns and are not strictly comparable with regard to system of trade (special/general) and definition of the trading partners.

The groupings of trading partner countries follow those adopted in earlier studies and are as follows:

Developed countries

Canada, United States
European Communities - Belgium-Luxembourg, Denmark, France, the
Federal Republic of Germany, Ireland, Italy, the Netherlands, the
United Kingdom
Austria, Finland, Iceland, Norway, Sweden, Switzerland
Japan
Australia, New Zealand, South Africa

Developing countries

Countries and territories in Latin America, South and East Asia, the
Middle East, Africa, Oceania and Southern Europe (including Romania)
not included in other areas

Eastern trading area

Albania, Bulgaria, Czechoslovakia, the Democratic Republic of Germany,
Hungary, Poland, the Soviet Union, China, Mongolia, North Korea and
Viet-Nam

The member countries of the Arrangement have been grouped as follows:

Developed members

European Communities, United States, Japan, Canada, Austria, Finland,
Sweden, Switzerland

Developing members

Turkey, Yugoslavia, Romania
Egypt, Israel, Ghana
Bangladesh, India, Pakistan, Sri Lanka, Hong Kong, Korea, Macao,
Singapore, Malaysia, Thailand, Indonesia, Philippines, Argentina,
Bolivia, Brazil, Colombia, Peru, Uruguay, Mexico, Dominican Republic,
El Salvador, Guatemala, Haiti, Jamaica, Trinidad and Tobago

Eastern trading area members

Czechoslovakia, Hungary, Poland.

^aData for the clothing industry exclude France.

^bTextiles and clothing combined.

Note: The adjusted employment index has been corrected for variations in hours worked by production workers. Where available this index has been used to calculate the ratio. The production indices are from Table 1. The employment indices have been calculated from the data reported by members of the Arrangement and circulated in Part 2 (COM.TEX/W/77). As may be seen from the explanatory notes to this document, the coverage of the production and the employment data is not fully comparable. Moreover, in certain cases the employment figures could not be adjusted for changes in hours worked. Ratios calculated from the two series can therefore only give rough indications and cannot be taken as a true productivity measure.
