### Trends in Production and Trade and Policy Measures Affecting Them

#### Corrigendum

Additional information and corrections to some of the data contained in COT/W/115 and Addenda 1 to 3 have been notified, thus requiring amendment of the document as set out below.

#### A. Amendments to COT/W/115

- Page 5      Paragraph 19: The percentage decrease for Canada should be amended to 3 instead of 8.
- Paragraph 24: Austria should be deleted from the list of countries shown in that paragraph.
- Footnote 1: The footnote should be deleted in the light of the data recently supplied by Denmark (COT/W/115/Add.5).
- Page 25      Table 10: The number of spindles in Canada increased over the period 1960 to 1967 by about 0.4 per cent, so that it would be in position 16 and under A, instead of in position 17 under B. Japan's ranking in the list should be changed accordingly.
- Page 26      Table 11: Canada should appear in position 13 instead of 11, as employment between 1960 and 1967 registered a 3 per cent increase. Australia and Norway consequently move up one position each on the list.
