COTTON TEXTILES 1962-68

SECTION V

Statistics Supplied by the International Federation of Cotton and Allied Textile Industries (IFCATI)

The data included in this section were compiled by IFCATI, on behalf of the GATT secretariat, from submissions by industry associations and its correspondents in the different countries. The material up-dates and, where necessary, revises a part¹ of the statistics supplied by IFCATI for inclusion in A Study on Cotton Textiles, published in 1966.

Contents

	<u>Page</u>
General Notes	2
TABLE A - Spinning: Machinery Changes	5
B - Spinning: Machinery Utilization	8
C - Weaving: Machinery Changes	13
D - Weaving: Machinery Utilization	16
E - Change in the Proportion of Automatic and Semi-Automatic Looms in Place	20
F - Average Count of Yarns Spun	23
J - Yarn Production and Sales	27
K - Yarn Consumption, Cloth Production and Sales	41

¹For the purposes of the present survey it was not possible for IFCATI to supply the data contained in Tables G, H and I included in the published Study. Some of that information is, however, provided in the Summary Tables prepared by the secretariat and included in Section III of Addendum I.

General Notes

1. Sources: The basic data have been obtained from replies received by the International Federation of Cotton and Allied Textile Industries (IFCATI) from industry associations and correspondents in the different countries. Where IFCATI has had supplementary information, these data have been used, in addition to those supplied for the purpose of the survey. The quality of the data vary from country to country. In view of the provisional character of some of the detailed statistical data contained in the tables, IFCATI does not consider all data in this survey necessarily as final in every respect.
2. Definitions of country groups: The sub-division of countries used in the tables is the same as that used throughout the paper with respect to countries party to the Long-Term Arrangement Regarding International Trade in Cotton Textiles (Group I, Group II and Japan) together with non-participating countries arranged in alphabetical order.
3. The scope of these statistics, except where specifically noted, is the cotton system of spinning on three and four cylinders and the cotton system of weaving on looms of eighteen inches or more in width. On this machinery it is possible to use cotton, artificial and synthetic fibres; artificial and synthetic fibres may only be used in the staple form in the spinning sector.

4. Machinery changes and utilization (Tables A to D)

Percentage change in machinery in place: When evaluating the change between 1939 and 1953, account has to be taken of the effects of the second world war and of the subsequent changes in the geographical sizes of some of the territories to which national data relate.

Shifts: Three bases have been taken for the evaluation of shift performance to satisfy numerous requirements. The two-shift base of 4,160 hours per annum has been the accepted norm for equipment utilization in the traditional centres of cotton manufacture. Many consider that a three-shift base of 6,200 hours is more suited to modern utilization levels and this was the annual hour basis which the International Federation of Cotton and Allied Textile Industries recently adopted. Even the three-shift base may not be the best basis for comparison for it is felt that all performances should be gauged against the maximum normally possible. This, according to United States investigation, appears to be 7,488 hours. Thus each nation's working hours have been expressed in terms of two shifts, three shifts and the maximum normally attainable. As regards capacity utilization, it should be noted that the figures relate to machinery in place and not to active machinery.

5. Proportion of automatic and semi-automatic looms in place (Table E)

The main advantage of the automatic loom is its considerable economy in the use of manpower. In addition, however, because of its greater speed, the automatic loom may have a larger output than the ordinary loom.

Semi-automatic looms: These are looms which have been ordinary non-automatic looms but which have been converted by the addition of automatic attachments. It should be noted that the increase in the proportion of automatic looms does not necessarily indicate an increase in the actual number of automatic looms but sometimes simply a decrease in the ordinary looms in place.

Trend in the proportion of automatic looms installed: The normal trend in industry is towards the modernization of equipment and this is why in most cases the proportion of automatic looms is shown to be steadily growing. The faster scrapping of automatic than ordinary looms or the faster installation of ordinary than automatic looms over a limited period is usually the explanation. Japan, with all looms belonging to independent weavers classed as "ordinary", is a special case.

6. Quality comparison (Table F)

Average count: The count of yarn is a measure of its fineness with (in Tex) the finer yarn having a lower count number than the thicker, or (in English counts) the finer having a higher count than the thicker yarn. The significance of this indication is that the thicker the yarn the less length there will be in a kilogramme; thus, when judging productivity by weight of output per spindle consideration must be given to the fineness of the yarn produced. Two count systems have been included: (i) Tex is the universal count system which is at present at an advanced stage of introduction; (ii) the English count system has until now been the most universally applied system and is still the system which is most widely used. A further count system for measuring yarn fineness exists, i.e., the metric count system which is used by some European countries; average count data given in accordance with this system have been converted into Tex and English counts.

Cloth measurement: Cloth, like yarn, varies in fineness so that in addition to the data showing loom output per annum, it would have been useful to have had a cloth measurement of a similar nature to the count measurement for yarn. It has, however, been found impossible to arrive at any method of calculating accurately an average cloth quality for each country; consequently no data on the subject are provided.

7. Production and sales (Tables J and K)

Yarn and cloth were classified into categories "cotton" or "artificial and synthetic" or "other" according to the general rule adopted under the Brussels Tariff Nomenclature and the United Nations Standard International Trade Classification. Under this scheme, yarn or cloth containing two or more different types of fibre was classified under the predominant fibre content. In the case of cloth, production data given are for total loom state cloth.

Domestic sales: In the case of vertically integrated firms, countries were asked to include deliveries to further processing sections in the total of domestic sales.

Yarn consumption: Table K denotes cotton weaving mill consumption of yarn; it excludes yarn which is used by small handloom operators, by other sectors of the textile industry and by industries outside the textile field.

Exports are deliveries outside national boundaries.

8. Symbols

- .. not available
- ... industry not established or established since the previous year of comparison
- nil or negligible
- [] national estimate
- * supplementary IFCATI information
- ** data not available, therefore data for the preceding year were used

9. When reading the statistical tables, the explanatory notes to each table should be taken into account and given full consideration.

NOTES : TABLES A AND B

NOTES : TABLEAUX A ET B

- (a) Austrian estimates for pc. change 1939-53
- (b) Spindle data for 1937 not 1939
- (c) 1954 data not 1953
- (d) 1938 spindle data not 1939
- (e) Data for 1939 refer to the territory of the German Empire of that year with the exception of Austria
- (f) Data concern mills affiliated to "Garen Centrale"
- (g) Percentage change 1938-53 applies to cotton spindles only. Rayon and synthetic staple spindle data are not available for 1938
- (h) Ring spindle equivalents. Actual spindles as follows :

1939 : 25,331,000 mule spindles	1964 : 964,000 mule spindles
10,178,000 ring spindles	5,113,000 ring spindles
1953 : 16,105,000 mule spindles	781,000 mule spindles
10,349,000 ring spindles	4,564,000 ring spindles
1960 2,024,000 mule spindles	683,000 mule spindles
6,806,000 ring spindles	4,409,000 ring spindles
1967 469,000 mule spindles	3,790,000 ring spindles

- (i) 1961 data not 1960
- (j) 1962 data not 1963
- (k) 53 weeks in the case of 1953 and 1964 data
- (l) Spindle and spindle hour data for years ending 31 July 1939 spindle data for January
- (n) 1939-60 only cotton yarn spindles; 1961-67 cotton and staple fibre yarn spindles
- (r) Shift data based on IFCATI survey of some of the major spinning companies

- (a) Situation autrichienne du pourcentage de changement 1939-53
 - (b) Nombre de broches en 1937, et non en 1939
 - (c) Donnes relatives à 1954, et non à 1953
 - (d) Nombre de broches en 1938, et non en 1939
 - (e) Les données de 1939 se rapportent au territoire de l'Empire allemand, moins l'Autriche, tel qu'il était constaté cette année-là
 - (f) Les chiffres se rapportent aux filatures affiliées à la "Garen Centrale"
 - (g) Le pourcentage de changement 1938-53 concerne les broches à coton seulement. On ne dispose pas de données pour les broches à rayonne et à fibres synthétiques en 1938
 - (h) Equivalent broches à anneau. Nombre de broches réel :

1939 : 25,331'000 broches mule	1964 : 964'000 broches mule
10,178'000 broches à anneau	5,113'000 broches à anneau
1953 : 16,105'000 broches mule	781'000 broches mule
10,349'000 broches à anneau	4,564'000 broches à anneau
1960 : 2'024'000 broches mule	683'000 broches mule
6'886'000 broches à anneau	4,409'000 broches à anneau
1967 : 3'790'000 broches à anneau	3'790'000 broches à anneau

 - (i) Données relatives à 1961, et non à 1960
 - (j) Données relatives à 1962, et non à 1963
 - (k) Pour 1953 et 1964, données de 53 semaines
 - (l) Chiffres concernant les broches et les heures/broche pour les périodes de 12 mois terminées au 31 juillet. Chiffres concernant les broches en janvier pour 1939
 - (n) Pour 1939-60, broches à coton seulement; pour 1961-67, broches à coton et à fibrene
 - (r) Données concernant les remplacements fondées sur une étude de l'IFCATI portant sur quelques grandes filatures
1. Spindles in place do not include spindles installed in units spinning 100% staple fibre yarn.
- Spindle shift data does not include spindles worked purely on staple fibre.

NOTES : TABLES A AND B

N.B. Machinery in place at the end of each year included in Table A may have some effect on the utilization figures. Some machinery may have been added or scrapped during the year and used for only part of the year in question which will tend to reflect a rather lower utilization figure in calculation than existed in fact.

NOTES : TABLEAUX A ET B

N.B. Le parc de machines en place à la fin de chaque année, qui est utilisé dans le tableau A peut avoir une certaine influence sur les chiffres d'utilisation. Des machines peuvent avoir été ajoutées ou mises au rebut dans le courant de l'année seulement, ce qui tend à faire ressortir des calculs un chiffre d'utilisation plutôt inférieur à la réalité.

NOTES : TABLES C AND D

- (a) Austrian estimate for percentage change 1939-53
- (b) 1954 data not 1953
- (c) Data for 1939 refer to the territory of the German Empire of that year with the exception of Austria.
- (d) Data do not include the "coarse" weaving sector
- (e) 1936 loom data not 1939
- (f) Loom data for 1937 not 1939
- (g) Excluding Belgium for loom change 1939-53
- (h) Data calculated on the bases of statistics supplied which refer only to weaving mills producing pure cotton cloth and which specifically exclude mills producing carpets, velvets, furnishing fabrics, chair coverings and household cloth
- (i) 1961 data not 1960
- (j) 1962 data not 1963
- (k) 53 weeks in the case of 1953 and 1964 data
- (l) Excluding automatic and semi-automatic looms in place in Northern Ireland
- (m) 1940 data not 1939
- (n) 1940-60 cotton, man-made fibre and wool looms : 1963 onwards
- (o) cotton and man-made fibre looms only
- (s) Shift data based on IFCATI survey of some of the major weaving companies
- (u) 1952 data not 1953
- (y) Belgium excluded from the EEC average for all years except 1963
- (II) 1938 data not 1939
- (IV) Hours worked by spinners/weavers only
- (V) 1953 data include tyre cord and fabric sectors. Loom data on active looms

NOTES : TABLEAU C ET D

- (a) Estimations autrichiennes des variations en pourcentage, 1939-53
- (b) Données de 1954, et non de 1953
- (c) Les chiffres de 1939 concernent le territoire de l'Empire allemand moins l'Autriche, à cette époque
- (d) Non compris le secteur des tissages "grossiers"
- (e) Nombre de métiers en 1936, et non en 1939
- (f) Nombre de métiers en 1937, et non en 1939
- (g) Non compris la Belgique en ce qui concerne les variations du nombre de métiers entre 1939 et 1953
- (h) Chiffres calculés sur la base des statistiques fournies qui concernent seulement les filatures produisant des tissus pur coton, à l'exclusion expresse des fabriques de tapis, velours, tissus d'aménagement, housses, et tissus de ménage
- (i) Données de 1961 et non de 1960
- (j) Données de 1962 et non de 1963
- (k) 53 semaines en ce qui concerne les chiffres pour 1953 et 1964
- (l) Non compris les métiers automatiques et semi-automatiques installés en Irlande du Nord
- (n) Données de 1940, et non de 1939
- (p) 1940-60 : métiers pour le tissage du coton, des fibres chimiques et de la laine. dès 1963 : métiers pour le tissage du coton et des fibres chimiques seulement
- (s) Données relatives aux équipes fondées sur l'étude de l'IFCATI concernant quelques-unes des principales sociétés de tissage
- (u) Données de 1952, et non 1953
- (y) La Belgique est exclue de la moyenne de la CEE pour toutes les années sauf 1963
- (II) Données de 1938, et non 1939
- (IV) Heures ouvrées par les filatures/tissages seulement
- (V) Les chiffres de 1953 comprennent également les secteurs des toiles pour pneumatiques. Les chiffres concernant le nombre de métiers sont basés sur le nombre de métiers actifs.

NOTES : TABLEAU E

- (a) Excluding automatic and semi-automatic looms in Northern Ireland
- (b) 1937 figure not 1939
- (c) The percentage shown as "automatic" covers only those looms with both warp and shaft-stop motion and cop or shuttle change motion. If one regards as "automatic" looms with only one of these, then almost all power looms are automatic
- (d) 1961 not 1960
- (e) 1963 not 1964
- (f) 1952 not 1953
- (g) Looms with automatic attachment are counted as ordinary
- (h) 1954 data, not 1953

- (a) Non compris les métiers automatiques et semi-automatiques en Irlande du Nord
- (b) Chiffres de 1937, et non de 1939
- (c) Le pourcentage indiqué pour les métiers automatiques ne porte que sur des métiers équipés à la fois de mouvements casse-chaine et casse-trame et de mécanismes de changement des cannettes et navettes. Si on classe comme "automatiques" des métiers qui n'ont qu'un de ces mécanismes, on doit alors considérer presque tous les métiers automatiques comme automatiques.
- (d) 1961, et non 1960
- (e) 1963, et non 1964
- (f) 1952, et non 1953
- (g) Les métiers équipés d'accessoires automatiques sont considérés comme métiers ordinaires
- (h) Données de 1954, et non de 1953

NOTES : TABLEAU J

- (a) Data are for years ending June 30th
- (b) Staple fibre yarn production data include some yarn spun on woollen and flax systems
- (c) Cotton yarn data include mixtures and "other" yarns
- (d) Staple fibre yarn data include mixture yarns
- (e) Includes yarn spun on any systems of machines
- (f) Staple fibre yarn production includes production of units using only
- (g) 1954 data not 1953
- (h) 1953 and 1964 data are for 53 weeks
- (i) Mixture yarn included under artificial and synthetic
- (j) Domestic sales arrived at by subtraction : production less exports
- (k) Yarn exports include thread and waste yarn
- (l) Coarse weaving data not included
- (m) Domestic sales include deliveries into stock
- (n) Production data are for the complete 3 and 4 cylinder spinning sectors
- (o) Domestic sales do not include sales within integrated mills
- (p) Yarn exports according to official data (Tariff Nos. 5505, 5605)
- (q) Includes export of these yarns produced outside the 3 and 4 cylinders cotton spinning systems
- (r) Some sales include deliveries of yarn to the hand-weaving, hosiery and sewing thread sectors but do not include sales to the mill sector which are recorded as consumption of yarn. Thus total sales equal domestic + consumption + exports.

NOTES : TABLEAU J

- (a) Exercices finissant le 30 Juin
- (b) Dans la production indiquée pour les fils de fibres discontinues entrent des fils obtenus sur métiers à laine et à lin
- (c) Dans les chiffres concernant les filées de coton entrent les fils élargis et "autres".
- (d) Les fils élargis sont comptés avec les fils de fibres discontinues
- (e) Y compris le fil obtenu sur n'importe quel type de machines
- (f) Dans la production de fils de fibres discontinues est comptée celle des établissements utilisant seulement ces fibres
- (g) Données de 1954 et non de 1953
- (h) Les chiffres de 1953 et de 1964 se rapportent à une période de 53 semaines
- (i) Les filés élargis sont comptés sous Art/Synth.
- (j) Ventes intérieures obtenues en déduisant les exportations de la production
- (k) Dans les exportations de fils sont comptés le fil couture et les déchets de fils
- (l) Non compris les tissus grossiers
- (m) Les ventes intérieures comprennent les quantités livrées pour stockage
- (n) Les données concernant la production se rapportent à l'ensemble des métiers à 3 et 4 tambours
- (o) Les ventes intérieures ne comprennent pas les ventes effectuées à l'intérieur des entreprises intégrées
- (p) Exportations de fils d'après les statistiques officielles (No 5505, 5605 du tarif) y compris les exportations de fils produits en dehors du réseau des métiers à filer le coton à 3 et 4 tambours.
- (q) Les ventes intérieures comprennent les livraisons de fil destinées aux tissages artisanaux (tissage à la main), à la houmèterie et aux fabricants de fil à coudre mais non les ventes au secteur industriel qui apparaissent sous la rubrique consommation de fil.

NOTES : TABLEAU J (cont'd)

NOTES : TABLEAU J (suite)

- (V) Figures for cotton and allied fibres
Export figures do not include cotton waste yarn spinning
or exports of yarn made by merchants
- (VI) Official customs export statistics
- (VII) Total yarn production = cotton, rayon and synthetic fibres
produced on all spindles irrespective of spindle type

N.B. In some cases data given in lbs. have been converted into metric tons by
dividing by 2,205

The total up to and including 1964 need not necessarily be the addition of the
cotton and art/synth. columns since it may include "other" yarn

- (V) Chiffres pour coton et fibres connexes
Est exclue des chiffres d'exportation la filature de déchets de coton
ainsi que les exportations de fils effectuées par le négos.
- (VI) Statistiques douanières officielles
- (VII) Production totale de filés = coton, fibres artificielles et synthétiques.
produit par toutes les broches de tous systèmes.

N.B. Dans certains cas, les grandeurs données en livres-poids ont été converties en tonnes
étrangères à raison de 2 205 livres par tonne

Le total jusqu'en 1964 inclus, n'est pas nécessairement la somme des chiffres des
colonnes "coton" et "Art/Synth.", car il peut y entrer d'autres filés

NOTES : TABLE K

- (a) Square yards converted to metric tons at 9,000 sq.yds. per metric ton
- (b) 1953 cotton cloth production data include flax, canvas. 1960 to 1963 include terry towelling
- (c) Data include only cotton and staple fibre cloth
- (d) Including in cotton cloth data blankets, dustiers, furnishing velvet, terry and table cloths, etc. Mixture cloth included in cotton cloth
- (e) Production data given are for deliveries ex mill and not pure production and include total woven fabrics including those further processed in the industry
- (g) Converted to tons at 6,500 square metres
- (h) 1954 data not 1953
- (i) Cloth production based on yarn consumption data
- (j) 1953, and 1964 data are for 53 weeks
- (k) Cotton cloth includes waste cloth; artificial and synthetic includes mixture cloth
- (l) Domestic sales calculated by subtraction
- (m) Pure cotton yarn or cloth only, whichever is applicable
- (n) Linen cloth produced by the industry is not included in domestic sales
- (o) Converted from linear yards into metric tons
- (p) Incomplete: coverage about 75 per cent of capacity
- (s) Cotton type cloth production figures for the whole Swedish textile industry are as follows :

NOTES : TABLEAU K

COT/W/115/Add.3
Page 52

- (a) Conversion à raison de 9 000 yards carrés par tonne métrique
- (b) Dans la production de tissus de coton en 1953 sont compris le lin et la grosse toile. Dans les chiffres pour 1960 à 1963 sont compris les tissus éponge
- (c) Tissus de coton et de fibres discontinues seulement.
- (d) Les données relatives aux tissus de coton comprennent les couvertures, chiffons à poussière, velours d'ameublement, tissus éponge, liné de table, etc. Les tissus mélangés sont comptés avec les tissus de coton
- (e) Livraisons de la fabrique et non production à proprement parler, et total des tissus tissés, y compris ceux qui subissent un complément d'ouvrage dans l'industrie
- (g) Conversion sur la base de 5 500 mètres carrés par tonne
- (h) Chiffres de 1954 et non de 1953
- (i) Production de tissus calculée d'après la consommation de filées
- (j) Les chiffres de 1953 et de 1964 portent sur 53 semaines
- (k) Avec les tissus de coton son compris les tissus de bourre. Les tissus mélangés sont compris avec les tissus en fibres artificielles et synthétiques
- (l) Ventes intérieures obtenues par soustraction
- (m) Filés ou tissus, selon le cas, de coton non mélangé seulement
- (n) Tissus de lin produits par l'industrie non compris dans les ventes intérieures.
- (o) Conversion en tonnes métriques de grandeurs exprimées en yards linéaires
- (p) Données incomplètes, couvrant environ 75 pour cent de la capacité
- (s) Les chiffres relatifs à la production de tissus genre coton pour l'ensemble de l'industrie textile suédoise sont les suivants :

CLOTH PRODUCTION/
PRODUCTION DE TISSUS

	Cotton/ Coton	Art/Synth. Art/Synth.	Total	Cotton/ Coton	Art/Synth	Total
1953	23,766	994	24,760	23,065	893	23,958
1960	22,609	1,943	24,552	20,419	1,628	22,047
1961	22,771	1,907	24,678	20,223	1,423	21,646
1962	21,606	2,532	24,138	19,193	1,876	21,069
1963	20,389	2,816	23,235	17,715	2,011	19,956
1964

NOTES : TABLEAU K (cont'd)

NOTES : TABLEAU K (suite)

- (t) Domestic sales includes deliveries into stock
- (v) Converted from lbs. at 2,205 lbs. per metric ton
- (x) No specification for sales or exports of fabrics made from synthetic yarn on the cotton weaving system
- (II) Cloth production shows as somewhat greater than yarn consumption in some years due to slightly different dates for data collection. The difference is also due in part to the addition to weight through sizing etc.
- (III) F.R. Germany cloth production data are for cotton and "other" cloth woven in cotton weaving mills not simply cotton and artificial and synthetic cloth
- (IV) Export data refer to the entire Swedish textile industry
- (V) Cloth production and exports data for whole national industry available for 1962 and placed in brackets
- (VI) Cloth sales data are for only about 45 per cent of the industry
- (VII) "Other" yarn consumed includes waste and schlauchcops
- (VIII) Yarn consumption data include mixtures under cotton yarn waste and schlauchcops yarn under "others"
- (IX) Trade data for the EEC as a whole, both domestic and foreign are not sufficient to allow completion of the relevant columns
- (X) Additional sales of 31,166 tons of cloth produced by the cotton industry were sold in 1964 but they do not fit into the categories of domestic sales or exports
- (XII) Artificial and synthetic cloth production data include the same cloth produced in exclusively man-made fibre mills
- (XIII) All cloth sales are within "artificial" firms for further processing
- (XIX) Yarn consumption data do not include consumption by the knitting industry
- (XX) Sales in total are given at 100 percent. However, in practice, some cloth remained in stock, e.g., Dec. 1953 : 9,575 tons, Dec. 1964 : 7,764 tons

(i) Dans les ventes intérieures sont comptées les quantités livrées pour stockage

- (v) Conversion à raison de 2 205 livres-poids par tonne métrique
- (x) Aucun détail distinct sur les ventes ou exportations de tissus de fils synthétiques fabriqués sur métiers à tisser le coton
- (II) La production de tissus pour certaines années apparaît légèrement supérieure à la consommation de fils, les données ayant été réunies à des dates un peu différentes. La différence provient aussi en partie de l'augmentation de poids due à l'apprêtage, etc.
- (III) La production de tissus indiquée pour la République fédérale d'Allemagne comprend les tissus de coton et "autres" tissus fabriqués dans les tissages de coton, et non pas simplement les tissus de coton et de fibres artificielles ou synthétiques
- (IV) Exportations de l'ensemble de l'industrie textile suédoise
- (VI) La production et les exportations de tissus de l'ensemble de l'industrie nationale sont connues pour 1962 et données entre parenthèses
- (VII) Les ventes de tissus sont celles d'environ 45 pour cent de l'industrie seulement
- (VIII) Dans la consommation d'"autres fils" entrent les déchets et "Schlauchcops"
- (IX) La consommation de fils comprend les mélanges sous "filles de coton" et les fils de déchets et Schlauchcops sous "autres"
- (XII) Les statistiques du commerce intérieur et extérieur de l'ensemble de la CEE ne suffisent pas pour que les colonnes correspondantes puissent être remplies
- (XV) 31 166 tonnes supplémentaires de tissus produits par l'industrie cotonnière ont été vendues en 1964, mais cette quantité ne s'inscrit pas dans la catégorie des ventes intérieures ni celle des exportations
- (XVI) La production de tissus de fibres artificielles et synthétiques comprend les tissus de cette catégorie fabriqués dans les tissages qui utilisent exclusivement des fibres chimiques
- (XVII) Toutes les ventes de tissus ont été réalisées aux fins de perfectionnement à l'intérieur d'entreprises intégrées verticalement
- (XIX) La consommation de fils ne comprend pas celle de la bonneterie
- (XX) Ventes totales à 100 pour cent. En pratique, il est toutefois resté du tissu en stock; par exemple en décembre 1953 : 9 575 tonnes; en décembre 1964 : 7 764 tonnes

NOTES : TABLEAU K (cont'd)

- (XII) 1953 includes tyre cord and fabric data.
- (XIII) Total cloth deliveries exceed total cloth production for f.o.b. Germany for 1963 by a marked quantity i.e. 28,099 tons. This is explained by : (i) the slight differences resulting from conversion of delivery data in square metres to metric tons ; (ii) the reduction of stocks between 1963 and 1964 ; (iii) the possible inclusion of some re-exports in the export data and some imported cloth in the home delivery data.
- (XIV) 1964 onwards data have been revised in accordance with a new basis for estimating weight. These figures are therefore not directly comparable with the data for the previous years. However, data for 1964 calculated on the previous basis of estimating weight are included in brackets.
- (XV) Total Belgium cloth export data include all cloth whether cotton, artificial or synthetic and whether or not it is produced on the looms installed in cotton mills.
- (XVI) Information does not include units weaving 100 % artificial and synthetic cloth. Yarn consumption does not include hosiery, sewing thread yarn, tyrecord etc. Production figures derived from the formula 10 metres = 1 kg. Cloth deliveries converted from linear measure.
- (XVII) Official customs export statistics
- (XVIII) Yarn consumption = consumption by cotton weavers. Total cloth production = production of cotton, spun rayon and spun synthetics fabrics, by all weavers in Japan.

NOTES : TABLEAU K (suite)

- (XXI) Les données pour 1953 comprennent les tissus câblés et toiles pour pneumatiques.
- (XXII) Les livraisons totales de tissus dépassent dans des proportions appréciables (28 099 tonnes) la production totale de tissus de la République fédérale d'Allemagne en 1963. Cela s'explique comme suit : 1) légères différences résultant de la conversion en tonnes métriques des quantités livrées, données en mètres carrés; 2) diminution des stocks entre 1963 et 1964;
- (XXIII) Inclusion possible de quelques réexpéditions dans les données relatives aux exportations et de quelques importations de tissus dans le chiffre des livraisons sur le marché intérieur.
- (XXIV) Les chiffres de 1964 ont été révisés selon une nouvelle formule d'estimation du poids; ils ne sont donc pas directement comparables avec ceux des années précédentes. Toutefois, des données pour 1964, calculées selon l'ancienne formule d'estimation, sont indiquées entre parenthèses.
- (XXV) Les exportations totales de tissus de la Belgique comprennent tous les tissus, qu'il s'agisse de coton, de fibres artificielles ou de fibres synthétiques et qu'ils soient produits ou non sur les métiers d'entreprises de tissage du coton.
- (XXVI) Sont exclus les métiers tissant 100 % des tissus en fibres artificielles et synthétiques. La bonneterie n'est pas comprise dans les chiffres concernant la consommation de filés, ni le fil à coudre, ni les tissus pour preu. Les chiffres de production sont basés sur la formule 10 mètres = 1 kg. Les chiffres concernant les ventes de tissus sont calculés sur la base d'une mesure linéaire.
- (XXVII) Statistiques douanières officielles.
- (XXVIII) Consommation de filés = consommation des tissages de coton.
- (XXIX) Production totale de tissus = production de tissus en coton, fibres artificielles et synthétiques par tous les tissages au Japon.
