## IMPORT RESTRICTIONS OF CHILE

### List of Products Subject to Prior Deposits

At the last consultation held with Chile under paragraph 4(b) of Article XII (unrevised) the Chilean delegation undertook to supply the contracting parties at a subsequent date with a complete list of imports subject to prior deposits and surcharges at the various rates (see L/1462, paragraph 22).

The attached list has been received from the Chilean authorities.

### CENTRAL BANK OF CHILE DEPARTMENT OF FOREIGN TRADE

#### Technical Advisory Division

GENERAL RULES FOR THE IMPORTATION OF GOODS

Any physical person or body corporate may freely import an unlimited amount of any of the goods included in the List of Allowable Imports.

This List covers goods which are subject to an advance deposit or payment of the additional tax.

Goods subject to a deposit

The importation of goods is subject to the deposit, before shipment, at the Central Bank of Chile of the sum required calculated according to the c.i.f. value of the goods.

Deposit receipts shall be valid for 180 days for the shipment of goods.

At the end of the prescribed minimum of retention periods, and on production of the documents of shipment, the Central Bank of Chile may return to the commercial banks such sums as it may have received as deposits.

In the case of import deposits of over 200 per cent the amount which is in excess of 200 per cent may be returned to the commercial bank concerned at the end of the retention period of 90 days. The remainder shall be left on deposit until the sums of the required exchange are covered.

Goods liable to the additional tax

The importation of goods subject to payment of the additional tax must be declared at the Central Bank of Chile through the authorized banks before shipment of the goods, together with the declaration of their c.i.f. value.

Payment of the additional tax is based on the c.i.f. value of the goods and is effected directly at the customs upon entry.

Only new and unused goods may be imported under the additional tax system. Used goods are covered by the general rules for deposit operations.

Importation of used goods

The List of Allowable Imports, as established by Decree No. 5474, of the Ministry of Finance includes both new and used goods.

Used goods whatever the nature are subject to a deposit of 1,500 per cent of the c.i.f. value of equivalent new goods. New goods shall be deemed to mean those goods which are similar to the most recent production.

The deposit in force for the importation of similar goods is applied to goods which are imported into the rest of the country and have their origin in free zones, provided that the relevant documents presented to the respective local committees show that these goods were new when imported into these zones. In such instances, the c.i.f. value of equivalent new goods will be taken as the basis, except for machinery and equipment (excluding passenger or goods motor vehicles) in which case the corresponding deposit is applied on the basis of the real value of these goods on the date of their importation.

The following merchandise, when imported as used goods, shall be exempt from the above decision and shall be subject to the percentages indicated which shall be applied to the c.i.f. value of equivalent new goods.

Nominal deposit and immediate cover

Nominal deposit shall be deemed to mean the exemption granted to imports coming from certain specified countries in virtue of which only the value of these imports must be declared at the Central Bank of Chile, without having to deposit the corresponding sums usually required for deposits.

Immediate cover is effected when the Central Bank authorizes the commercial bank to make immediate use of the deposited amount in order to cover the exchange.

Under the nominal deposit system, the Central Bank of Chile accepts imports from Argentina, Brazil, Egypt, Spain, Greece, Portugal and Yugoslavia. Once the necessary declarations have been made the commercial banks are then authorized to open the corresponding credits.

The immediate cover and nominal deposit system is applied automatically to imports from those Latin American countries with which Chile has compensation account agreements, provided that the balances of these accounts, including full use of swing credit, are favourable to Chile. Immediate cover and nominal deposit are suspended exactly three months reckoned from the date when the balance has exceeded the established limits. These advantages come into effect again three months after the balances have been reduced and fall within the established limits.

Neither immediate cover nor nominal deposit is applied to goods liable to a deposit of more than 1,000%, nor to motor vehicles in general, with the exception of those vehicles paid for through the accounts of Spain and Egypt.

These exemptions are also accorded to imports from hard-currency countries which are paid through the accounts with Spain and Portugal, or when payment is made in Egyptian pounds. Such operations may be effected for goods liable to deposits of 1,000% or less.

In the case of cancellations effected through the accounts of Spain and Portugal, the approval of the currency authorities of the country concerned is required.

#### Decisions concerning specific items

Spare parts for industrial machines or apparatus should be considered as coming under the heading "parts and accessories for industry", without any distinction as between electrical or mechanical spare parts, when they are the spare parts of a specified machine. Circular No. 152 (27.8.59).

Industrial ammonium sulphate may be imported under the heading "chemical products, not elsewhere mentioned" (Section 9, 45-53), except when this product is used either in the manufacture of fertilizer or directly as such. Circular No. 157 (12.9.59).

Ticonium metal (alloys of lead and nickel)		10
Zinc, smooth in sheets or rolls	100 (30 days)	
Other metals, rolled or cast, and their alloys	1,500	

Group 56 - Metal wares for various purposes

Steel in rolls		200
Steel angles and sections, in rolls, with rectangular grooves and/or traction resistance of 150 kg. per sq. mm. and a cross-section of 20 to 30 sq. mm.	100	
Copper-clad steel wire		100
Steel wire with carbon content of 0.20% or more	100	
Semi-circular steel wire		10
Steel wire of rectangular cross-section		10
Steel wire, on reels, 0.037 in. diameter, covered with zinc and copper, for the manufacture of tyres		5
Tinned steel wire of less than 0.4 mm. thickness		20
Stainless steel wire		5
Steel wire for springs		100
Alpaca wire		100
Aluminium wire - 99.99% pure		100
Phosphor-bronze wire		100
Brass or bronze wire of special types		100
Nickel wire		10
Silver wire with special alloy core for soldering		5
Zinc wire		50
Corrugated, tempered and hardened wires of phosphor bronze or steel for the manufacture of brushes	100

Tinplate containers, coated with non-toxic varnish, to be imported exclusively under the regime of temporary admission	5	
Microbicide filters for clarifying water and their spare parts	200	
Swaged bronze pipe fittings for refrigerators		100
Cast iron fittings of over 18 in.diameter		50
Fittings of black and galvanized iron		20
Other fittings of iron, steel, brass or other metals or alloys	1,500	
Flexible strips for speedometers, in rolls	50	
Metal staples for stapling machines		100
Metal staples for industrial stapling machines of 1 mm. diameter wire		10
Metallic hooks and eyes, on cloth tape, for fasteners		20
Iron cramps		100
Razor blades		20
Implements and connexions for taps for liquid gas or gas under pressure in cylinders, with valves and control instruments	100	
Expansion joints for bronze piping		100
Sets of lids for iron drums, consisting of octagonal flanges of steel, whether zinc-coated, galvanized or of other alloys, with their corresponding bungs with or without rings of rubber or metal	200	
Liquid fuel lamps with incandescent mantles and their spare parts		10
Hurricane lamps	400	
Gas lamps for lighting and their spare parts	400	
Tubular steel keys for furniture locks		10
Taps, cocks, valves, with bodies of cast iron, bronze or copper, for use with water, steam or air, for household or industrial use or for distribution systems		150
Taps, cocks and valves of stainless steel or other materials, lined with porcelain, ceramic material, neoprene, rubber or the like		10
Valves not elsewhere mentioned		100
Metal safety razors		20
Juice extractors, mixers and grinders with motors of over 3/4 h.p.		100
Juice extractors, mixers and grinders, n.e.m.	1,500	
Domestic meat mincers and grain grinders and their spare parts	1,000

Surface plates		10
Materials for making utensils for liquefied gases: nickel discs, special heat and liquid-resistant packing and bi-metal springs for safety valves		20
Swivel chair attachments		10
Drinking water meters		10
Drinking water meters for household use, up to 1 in.		50
Maize grinders	1,500	
Sliding clips, seriated, for braces		50
Metal bolts, nuts and rivets		100
Steel nibs for writing and drawing		5
Aluminium door knobs		150
Ice-cream measuring scoops		50
Strong-room doors		20
Hard steel nails for footwear		10
Gas burners of the catalytic refractory plate type, and spare plates	200	
Paraffin-lamp and stove burners of the immersed wick type		20
Hinge-pins and hinges for swing doors, longer than 5 in., and spare parts		20
Pressure reducers for liquefied gas	100	
Complete automatic regulators for liquefied gas water-heaters, with thermocouple, pilot-light and hexagonal jacket		5
Netting of black tinned or galvanized wire with 30 meshes or more per linear inch		20
Netting of black tinned or galvanized wire with less than 30 meshes per linear inch	1,500	
Spare parts for umbrella frames		10
Spare parts for drinking water meters		10
Spare parts for pressure cookers	400	
Pricking wheels for tracing patterns		20
Pencil sharpeners	1,500	
Brass or sheet-iron seals for safety closures in drums		10
Special statistical control boards		50
Crown caps		100
