ex 3003 A II a	Medical preparations containing penicillin	it.
ex 3003 B II a		
3102 B	Mineral or chemical nitrogenous fertilizers with the exception of natural sodium nitrate	DL

Notes

Significance of abbreviations in column 3 of the table:

EEC =	Quota for EEC member countries
DL =	Discretionary Licensing
BQ =	Bilateral quota
GQ =	Global quota

Sizes of quotas:

The size of a bilateral quota is determined in agreement with the most interested suppliers to assure a reasonable access to the market.

Discretionary licensing:

Discretionary licensing is administered in a liberal way with regard to suppliers who export on normal competitive conditions.

Areas of application:

The articles mentioned in the list are under licensing control for all GATT contracting parties. The liberal way in which the DL system is applied means that the restrictive effect of the control is hardly significant for normal imports.

Duration of restrictions:

In general it can be stated that it is the policy of the Netherlands Government to eliminate all the remaining quantitative restrictions as soon as circumstances permit. This result could be achieved in a short period if the Netherlands Government could be sure that no imports under exceptional conditions would take place.
