STATE-TRADING ENTERPRISES

Notifications Pursuant to Article XVII:4(a)

Addendum

SWITZERLAND

I. Enumeration of State-trading enterprises

The bodies and commodities listed below can be said to come under Article XVII:1(a) of the General Agreement:

- | | |
|--|---|
| 1. Federal Wheat Administration | Bread cereals (in part), bread flour |
| 2. Swiss Co-operative Society for Cereals and Feedingstuffs (GGF) | Bread cereals (in part), fodder cereals and feedingstuffs, oils and fats, oilseeds, skimmed milk powder |
| 3. BUTYRA, Swiss Butter Supply Board | Butter |
| 4. Federal Alcohol Administration | Alcohol (ethyl alcohol, alcohol of a strength of more than 75 per cent by volume) |
| 5. Agricultural Division of the Federal Department of Public Economy | Seed potatoes |

II. Reason and purpose for introducing and maintaining State-trading enterprises

The State-trading enterprises are exclusively concerned with imports of certain agricultural products.

They were established and are maintained in order to promote the general objectives of Swiss policy with respect to agriculture and supplies: (see also documents COM.II/2/Rev.1, COM.II/9, and L/1014/Add.29).

For the various products affected, the reason and purpose for introducing and maintaining these enterprises are as follows:

(a) Bread wheat

Under Article 23 bis of the Federal Constitution the Confederation is required to promote wheat cultivation in the country and to buy good quality wheat suitable for milling at a price permitting economic cultivation. The Confederation must also maintain sufficient wheat reserves to ensure national supplies. It supervises trade in and prices of wheat, bread flour and bread.

The legislative provisions relating to this Article of the Constitution are to be found in the Federal Law on National Wheat Supplies (wheat law) of 20 March 1959, as well as in the relevant regulations and decrees.

The Federal Wheat Administration is responsible for implementing these provisions.

Price supplements are levied in order to tax feed products derived from wheat in the same way as if they had been imported as such. For this purpose the Swiss Co-operative Society for Cereals and Feedingstuffs (see below) is the only body authorized to issue import permits, and does so without quantitative restrictions.

(b) Fodder cereals and feedingstuffs

Price supplements, the amount of which is fixed by the Federal Council, are levied on imports of feedingstuffs. The price supplements are designed:

- to improve the competitive capacity of domestic fodder production and in particular to encourage cultivation of fodder cereals;
- to encourage optimum use of feedingstuffs produced on the farm;
- to limit livestock production, in particular milk production, and to orientate production in general with a view to restraining the establishment of undertakings, whether of factory-type or not, raising livestock with the use of imported feedingstuffs.

Specialization and distribution of work in agriculture have to some extent modified these objectives. The principle of a certain self-sufficiency of feedingstuffs on the farm is not absolute, particularly in the pig and poultry sector.

Under the Agricultural Law, the price supplements are the only source of financing for the feed-grain premiums and for the valorization of colza.

Certain feedingstuffs are subject to quota. The Swiss Co-operative Society for Cereals and Feedingstuffs is responsible for levying price supplements and administering import quotas. It is a public institution comprising all importers of cereals, feedingstuffs and products from which feedingstuffs can be derived after processing. Its co-operation is also sought in the utilization of home-produced potato surpluses, its members being liable to take over surpluses.

Lastly, the Society has to help to build up reserve stocks for national economic defence.

In exceptional cases the Society itself may import goods directly.

The relevant legislation is to be found in the Agricultural Law of 3 October 1951, the Federal Decree of 17 December 1952/20 June 1958 regarding the Swiss Co-operative Society for Cereals and Feedingstuffs, the Federal Decree of 28 September 1956/28 September 1962 concerning measures for external economic defence, and the Federal Law on Alcohol of 21 June 1932, as revised in 1949.

(c) Edible fats and oils; oilseeds; skimmed milk powder

The Federal Assembly Decree of 29 September 1953 on milk, dairy products and edible fats (milk decree) provided for price supplements (GGF 1.3.1966) on imports of milk powder and edible fats and oils, including raw materials and semi-finished products used in the preparation of such oils and fats.

The proceeds from these price supplements are intended to reduce the price of domestic dairy products and edible fats and to widen their markets.

For purposes of levying the price supplements, importation of these commodities comes under the sole competence of the Swiss Co-operative Society for Cereals and Feedingstuffs (see (b) above).

(d) Butter

The Federal Assembly Decree of 29 September 1953, on milk, dairy products and edible fats (milk decree) based on the agricultural law of 3 October 1951, established the Swiss Butter Supply Board (BUTYRA) in order to ensure regular butter supplies throughout the country and to widen the market for the product. The Board comprises bodies and firms normally engaged in wholesale trade in butter.

BUTYRA takes over domestic butter which remains unsold in the free market, at a price corresponding to the guaranteed price for milk. It holds an import monopoly and levies a tax on imported butter, the proceeds being used to reduce the price of home-produced butter.

(e) Alcohol

The alcohol monopoly of the Confederation was primarily introduced for public health reasons.

This monopoly is based on Article 32 bis of the Federal Constitution, giving the Confederation the sole right to legislate in this field. The legislation is designed to reduce consumption and thus the importation and production of brandy. Pursuant to this Article, the Federal Assembly promulgated the Federal Law on Alcohol of 21 June 1932, which was revised in 1949.

The Law aims primarily at reducing alcohol consumption by encouraging the cultivation of dessert fruits and the non-alcoholic utilization of raw materials.

The Confederation has the exclusive right of preparing, importing and processing distilled beverages. The Federal Alcohol Administration operates this monopoly.

(f) Seed potatoes

In order to ensure adequate direct supplies and to control the choice of varieties, and also in order to combat the main potato diseases, the importation of seed potatoes is subject to control by the Agricultural Division, which takes appropriate measures.

The principal legislative provisions in this field are the agricultural law of 3 October 1951 and the alcohol law of 21 June 1932, as revised on 25 October 1949.

III. Description of the functioning of the State-trading enterprises

(a) Bread wheat

The Federal Wheat Administration purchases home-produced bread wheat and sells it to the commercial millers at a price corresponding to the cost price of foreign wheat of the same quality. Prices paid to domestic producers are fixed each year by the Federal Council, on the basis of average production costs, calculated for a period of several years, of efficient undertakings under normal conditions. The losses borne by the Wheat Administration as a result of its selling domestic wheat to commercial millers on the basis of world prices are made up by funds from the Federal Treasury. As a general rule, no long-term contracts are entered into for imports of bread wheat. The millers are required

to take over, in proportion to the wheat processed by them home-produced wheat bought by the Wheat Administration as well as foreign wheat from the Confederation's stockpiles.

The Administration can import wheat itself in order to build up or renew reserve stocks.

It has a monopoly over imports of bread flour, but invokes this right only when necessary to regulate price formation.

In addition, the Administration can issue permits to industries for imports of flour to be used for technical purposes, for the manufacture of products intended for export, and also for imports of hard wheat meal for the preparation of macaroni, spaghetti and similar products.

Import permits for wheat are issued without restriction by the Swiss Co-operative Society for Cereals and Foodstuffs on condition that importers undertake certain commitments with regard to the formation of stocks for ensuring national supplies. For purposes of levying the supplements mentioned under Section II(a), which are fixed by the Federal Council, importers are required to hand over the merchandise at the frontier to the Swiss Co-operative Society for Cereals and Feedingstuffs and to buy it back from the Society after the supplements have been levied.

Lastly, the Wheat Administration sees to it that Switzerland complies with its obligations under the International Wheat Agreement with regard to the origin of the goods.

(b) Fodder cereals and feedingstuffs

The Swiss Co-operative Society for Cereals and Foodstuffs is formally authorized to import, but does not carry out any imports itself. With the exception of imports of less than 20 kgs. (gross weight), all imports are subject to permits issued by the Society. Permits are issued to importers on condition that the latter comply with the Federal regulations on reserve stocks for ensuring national supplies and concerning the taking over of potato surpluses.

The Society grants its members individual quotas for feedingstuffs under quota restriction, within the framework of the global quota established by the Federal Council. The individual quotas are reviewed from time to time.

At the frontier the Society takes over the goods from importers and sells them back again after levying a fixed price supplement.

Members of the Society are obliged to acquire goods imported directly by the Society; in recent years, such purchases have amounted to approximately 2 to 6 per cent of the global quota.

(c) Edible fats and oils; oilseeds; skimmed milk powder

The Society for Cereals and Feedingstuffs has the exclusive right of importation. It does not carry out imports itself but controls them with a view to the levying of the price supplements, in the following manner:

Since in the case of oilseeds a price supplement is also levied on feedingstuffs (residues resulting from the extraction of oil), the same procedure is applied to oilseeds as to feedingstuffs: the Society issues import permits without quantitative restriction, the only requirements being that goods must be sold to the Society by importers at the frontier and then bought back again after the price supplement has been levied.

With respect to edible fats and oils and skimmed milk powder, the Society allows import permits to be issued without restriction by the Import/Export Service, subject to payment of the price supplements.

The Federal Council fixes these supplements, subject to subsequent approval by Parliament.

(d) Butter

BUTYRA takes over, at a price corresponding to the base price for milk, good quality domestic butter which is not purchased on the free market. It sells the butter at the wholesale price fixed by the Federal Council with the aid of funds made available for this purpose.

BUTYRA imports foreign butter to the extent that domestic production fails to meet requirements for the various qualities in demand. On imported butter, it levies a charge corresponding to the difference between the cost price (including overhead expenses) of imported butter and the wholesale price of domestic butter.

BUTYRA does not enter into long-term contracts.

(e) Alcohol

Although it has an import monopoly, the Federal Alcohol Administration imports only alcohol with a high alcoholic content and seed-fruit spirits. The import volume is determined in accordance with the requirements of the home market.

The Administration issues import permits, without quantitative restrictions, for brandy with an alcohol content of between 75 and 80 per cent by volume. Brandies, liqueurs and so forth of a strength of less than 75 per cent of alcohol by volume may be imported without permit. In both cases, however, a monopoly duty (fixed by the Federal Council) is levied.

The Alcohol Administration does not itself produce alcohol; it grants manufacture concessions to private persons. Alcohol proper (also called proof-spirit) is manufactured by industrial distilleries within quota limits. A concession must also be obtained by persons wishing to distil brandy, whether in a professional capacity or for their own use as home distillers.

Industrial distilleries may sell alcohol only to the Alcohol Administration, while brandy producers are allowed to place their goods directly in the home market after paying statutory taxes.

The prices for alcohol delivered to or sold by the Administration, are fixed by the Federal Council. A fiscal tax is included in the selling price of distilled beverages and of alcohol destined for the manufacture of pharmaceutical products, perfumery and toilet preparations, while alcohol intended for industrial uses is sold on the basis of the price of the imported product.

The Alcohol Administration does not enter into long-term contracts.

(f) Seed potatoes

The Agricultural Division issues import permits within the limits of a quota fixed according to quantity and variety on the basis of requirements, after consultation with the representatives of producers and the trade. Importers can be required to take over a certain proportion of home-produced seed potatoes.

IV. Imports, exports and domestic production

See annex.

V. Reasons why no foreign trade has taken place in the products concerned

None.

VI. Additional information

None.
