IMPORT RESTRICTIONS

Note by the Director-General

The attached table revises the table on import restrictions of individual contracting parties which was contained in L/3260. The headnote to the original table still applies.

The differences between the original table and this version are accounted for by (1) a comprehensive annotation of notifications submitted to the Committees on Agriculture and Trade in Industrial Products, and (2) corrections and additions received from individual contracting parties.

Numbers which appear in the lower left-hand corner of individual country boxes refer to notifications in the Inventory of Non-Tariff Barriers of the Industrial Committee.

Restrictions maintained on health or sanitary grounds are not generally included in this table.

Import restrictions applied to products notified as being of export interest to developing countries and listed in COM.TD/67 and Corr.2 are identified with an asterisk. Cotton textiles and a few other items of export interest to developing countries are also indicated in the same way.

Certain submissions regarding modifications or additions which reached the secretariat after the deadline stipulated in GATT/AIR/785 could not be taken into account in the present table. An addendum containing these modifications will be issued separately.
