Addendum

ANNEXES

In the report of the Joint Working Group it was stated that annexes to the report contained in L/3391 would be issued after interested countries had had an opportunity to review drafts for Annex I which would be circulated as soon as the secretariat completed their preparation. The consolidated table of Annex I has been issued in provisional form in working papers of the COM.AG and COM.IND series for Chapters 1-24 and 25-99 respectively, and provisional Notes on Individual Items have also been circulated for the agriculture chapters. The remainder of the Notes will be issued in July, also for comments, which should be received within a month from the date of issue. Annexes II, IV and V¹ are issued herewith. Annex III will follow, along with a definitive version of Annex I, after comments have been taken into account.

¹Reference to Annex V - Notified Restrictions or Restraints Imposed or Maintained Pursuant to the Long-Term Arrangement Regarding International Trade in Cotton Textiles - should be added to the list of annexes on page 6 of L/3391.

ANNEX IV

Indicative List of Items of Particular Export Interest
to Developing Countries

Included in the list below are twenty-one products or product groups relating to some forty BTN headings in the inventory, selected by the Group on Residual Restrictions at its meeting in April 1969 for priority attention. These products were selected from a more comprehensive list of products of export interest to developing countries contained in document COM.TD/67 and Corrigenda. In addition, the list includes certain other items with respect to which developing countries indicated specific interest in the course of the meeting of the Joint Working Group. The notations used in the third column are the same as those used in the consolidated tables in Annex I.¹

The list should not be considered as exhausting the range of products of export interest to developing countries that could receive priority attention.

¹The symbol "C" indicates products in which developing countries in the Joint Working Group expressed specific interest in regard to the relaxation or elimination of restrictions maintained by consulting countries.

Products marked "D" relate to the six out of the twenty-one product groups discussed in the Group on Residual Restrictions, in November 1969. Information supplied by governments and other relevant background data and statistics compiled by the secretariat on restrictions related to these items are included in COM.TD/70, COM.TD/W/105 and COM.TD/W/107 and their Addenda and Corrigenda.

The symbol "E" indicates the remaining fifteen product groups selected by the Group on Residual Restrictions but not yet examined. Data on these fifteen product groups, compiled by the secretariat, have been circulated in COM.TD/W/118.

ANNEX V

Notified Restrictions or Restraints Imposed
or Maintained Pursuant to the Long-Term
Arrangement Regarding International Trade
in Cotton Textiles

The following is a list of those items notified to the Joint Working Party on Import Restrictions which were not discussed in view of the existence of a special forum to deal with the cotton textile problem. The list comprises only notified import restrictions and export restraints; hence, additional restrictions may exist on some or all imports of listed products into the countries shown. These notifications have also been deleted from the consolidated table. To the extent that the original notifications included non-cotton items, they remain on the list of restrictions in Annex I.

In general, apart from cases where products are further described in country boxes, the expression "ex" before the BTN number denotes only that non-cotton products are excluded from consideration here; all or substantially all the products in listed BTN sub-headings are subject to restriction in so far as they relate to cotton goods imported from the indicated sources. For the status of notifications on non-cotton articles of the same classes, see Annex I.

The symbol "XR" should be taken as an export restraint applied by Japan in all cases. The symbol "Susp(J&P)" denotes suspension of a restriction against Japan subject to that country operating an export restraint at an agreed level. "DL" followed by a country abbreviation also denotes a restraint applied to the goods of one country only, but "DL" alone refers to a restriction applicable, in form at least, to all countries or a group of countries.

¹List includes only notifications concerning countries parties to the Long-Term Arrangement. See also note at end of following table.

The following limitations to the coverage of this table should be noted:

- (a) Only restrictions of countries parties to the Long-Term Arrangement are shown.
- (b) For these countries, only restrictions included in the Joint Working Group exercise are covered, even though others may be included in the Inventory or may not have notified at all.
- (c) Only restrictions notified as pertaining to particular BTN classes are shown, whilst those relating to the whole or parts of several chapters are not shown; i.e., this table does not necessarily cover the cotton textile restrictions covered by the line in Annex I labelled "Chapters 50-62", except as such items may also appear under individual BTN four-digit headings.
