

GENERAL AGREEMENT ON TARIFFS AND TRADE

RESTRICTED

L/3672/Add.1
8 September 1972

Limited Distribution

Original: English

AGREEMENT ESTABLISHING AN ASSOCIATION BETWEEN THE EUROPEAN ECONOMIC COMMUNITY AND THE UNITED REPUBLIC OF TANZANIA, THE REPUBLIC OF UGANDA AND THE REPUBLIC OF KENYA

Questions and Replies

Addendum

With reference to the offer contained in the Report of the Working Party on the above Agreement (document L/3721, paragraph 7) to supply details of quantitative restrictions applied by the Partner States of the East African Community, the representative of the EAC has provided the following information. This material supplements the details provided in response to question 14 of document L/3672 which concerns questions and replies relating to the provisions of the Association Agreement.

KENYA

THE IMPORTS/EXPORTS AND ESSENTIAL SUPPLIES

(IMPORTS) ORDER 1968 WITH AMENDMENTS

When all the applications are scrutinized and found in order, the total yearly allocation of gold is then issued to goldsmiths on a half-yearly basis to dentists any time of the year according to their requirements

QUANTITATIVE RESTRICTIONS - TANZANIA

1. Under the Import Control Ordinance of Tanzania all imports into Tanzania are subject to licensing. Licences may be either "Open General Licences" published by notice in the Government Gazette or specific licences issued to importers authorizing the importation of particular commodities. Where particular commodities can only be imported under the authority of a specific licence issued to the importer, it does not follow that such commodities are subject to quantitative restrictions or measures having equivalent effect within the meaning of Article 6 of the Association Agreement.

2. At the time when the list of commodities the importation of which required specific licence was submitted to EEC, the only commodities subject to quantitative restrictions within the meaning of the Association Agreement were the following:

- (a) Beer
- (b) Shirts whose f.o.b. value was less than Shs. 250 per dozen
- (c) Margarine and ghee substitutes

These restrictions are imposed to meet the development needs of Tanzania, in particular the protection of local industries.

3. The importation of a large number of commodities into Tanzania is now confined to parastatal institutions to whom an exclusive right to import particular commodities has been granted. These institutions import on the basis of their estimates of demand in the Tanzania market and by reference to commercial criteria. The grant of an import licence to these institutions is largely a formality.

4. The Government of Tanzania has recently given further consideration to the particular commodities referred to in paragraph 3. The importation of these commodities is now confined to the State Trading Corporation and after consultation with the Corporation it has become apparent that there is no longer any need for formal restrictions on the issue of licences for the importation of these commodities by the Corporation. The restrictions have therefore been discontinued.

5. In cases where the importation of commodities required a specific licence, the criteria which the licensing authorities are enjoined to apply before imposing any restrictions are those set out in paragraph 2 of Article 6 of the Association Agreement. The licensing authorities have moreover been instructed that in the exercise of their discretionary powers under the Imports Control Ordinance they may not discriminate against the products of member States of the European Economic Community.

QUANTITATIVE RESTRICTIONS - UGANDA

ARTICLE 6 PARAGRAPHS 4 AND 6

LIST OF IMPORT RESTRICTIONS CURRENTLY IN FORCE IN UGANDA AS AT 1 MAY 1971

PART I GENERAL - THE ROLE OF STATE TRADING

There are four parastatal bodies directly involved in import trade.

These are: The National Trading Corporation, the Dairy Industry Corporation, the Export and Import Corporation, the Produce Marketing Board.

2. The National Trading Corporation (NTC) is concerned with the internal distribution of certain goods, both imported as well as those produced in Uganda. One of the main objectives of the National Trading Corporation is to act as a prime distributor of goods and to channel trade, mainly in consumer goods, through Uganda citizen wholesalers and retailers. Hitherto, trade has been almost exclusively dominated by non-citizen immigrants. The policy of successive governments

has been to transfer wholesale and retail trade, or a substantial portion of it, to indigenous citizens. The National Trading Corporation has the exclusive right to be the prime distributor of some twenty-five commodities, mainly consumer goods, which in some areas of the country are distributed exclusively through citizen traders and in others through citizens and non-citizens.

3. The Dairy Industry Corporation was established to regulate and protect Uganda's Dairy Industry. It has the exclusive right to import milk, cream, butter, ice-cream, ghee (clarified butter), cheese and dairy farm equipment. It may do this itself or through appointed agents. The Corporation will supplement dairy products produced in Uganda with such imports as are required to meet demand. Imports may come from any country without restriction and economic factors decide the country of origin. Most of the fresh dairy products are for obvious reasons imported from Kenya.

4. The Produce Marketing Board was established to regulate the production and distribution of all agricultural foodstuffs. It is responsible for the marketing of all local produce and to import foodstuffs when required to supplement local production.

5. The Export and Import Corporation of Uganda was established on 26 May 1970 and has, with certain exceptions, the exclusive right to import and export all goods from Uganda. It may do this either directly or through appointed agents. The exceptions are set out in Schedules I and II of Statutory Instrument No. 173 of 1970 and consist of goods, e.g. certain food and live animals, inedible crude materials, some mineral fuels and lubricants, animal and vegetable oils and fats, chemicals and certain manufactured goods. Schedule II lists certain organizations which may import specified goods without the prior approval in writing of the Export and Import Corporation. Except for those goods covered in Schedules I and II of the Statutory Instrument No. 173 of 1970 it is the Export and Import Corporation or its authorized agents which imports all goods into Uganda. These commodities will include matches, paper products, cotton, woollen and synthetic fabrics and products, iron and steel products, domestic appliances.

6. The only items subject to quantitative restrictions is passenger motor vehicles of tariff item No. 87.02. The overall quota is determined annually taking into account the balance-of-payments position. Individual quotas are allocated to manufacturers' representatives taking into account the price, quality and demand of each model. Last year's quota is Shs. 31,891,053; of this approximately cars valued at Shs. 1.18 billion came from the EEC.
