# GENERAL AGREEMENT ON <br> TARIFFS AND TRADE 

## COMATTEE OF PEATIOIPETIEG COONTAISS

## Second Annual Report to CONTACTING PARTES

1. In compliance with the Decision of 26 November $1971^{1}$, the countries participating in the Protocol Relating to Trade Negotiations Among Develoring Countries subiat to the CONTRACTING PinTIES their second Annual Report ${ }^{2}$ concerning the operation of the Protocol. In adopting the Decision, the CONTHACTING PSilids considered that trade negotiations amons developing countries should have as their objective exrandins access on-more favourable terms for developing countries in one another's markets through an exchenge of tariff and trade concessions directed towards the expansion of their mutual trade. The CCiNTRACTING FAiTIES noted that the establishment of preferences amono developing countries could meke an inportant contribution to the expansion of trade among developing countries and to the attainment of the objectives of the General ioreement. They also noted that countries members of the Protocol intended to keep under review the jossibility of promoting negotiations for additions or enlargements to the schedules of concessions. The CONTRCTING FARTIES, in adopting the Decision, expressed the hope that all developing countries not participating in the arrangement will consider acceding to the Protocol.
2. The present report has three sections. Section one describes the activities of the Committee of Participating Countries during the period under review. Section two contains some coaments on the statistical information provided by participating countries on tradins relationships under the Frotocol and section three reproduces the tabuletions contaning the statistical infometion supplied by participating countries.

## 

## A. Entry into force and status of ratifications

3. The Protocol Relating to Trade Negotiations Anong Develoring Countries which vas signed by sixteen developing countries entered into effect on 11 February 1973

[^0]for the following participating countries: Brazil, India, Israel, Republic of Korea, Pakistan, Spain, Turkey and Yugoslavia. The Protocol has also entered into force for six additional participating countries: Tunisia ( 7 larch 1973), Egypt
(15 August 1973), Chile (19 May 1974), Mexico (29 August 1974), Greece
(1 November 1974) and Uruguay (10 September 1975). Ratification procedures have
not jet been completed by Peru and the Philippines.

## B. Compliance with Decision

4. Participating countries have fully observed the provisions of the Protocol and the terms of the Decision of the CONTHACTING PAilTIES of 26 November 1971. No contracting party has requested consultations with participating countries on the grounds that benefits accruing to it under the General hgreement may be or are being impaired unduiy as a result of the arrangements set out in the Protocol, nor has any contractin's party suggested that these arrangements are being applied inconsistently with the Decision of 26 November 1971. Consequently, no such matters have been brought before the CONTRACTING PAITISS as provided for in paragraph (d) of the Decision.

## C. Activities of the Comaittee

5. The Cormittee of Participating Countries provided for in the Protocol was established for the purpose of giving effect to those provisions of the Protocol involving joint action end, generally, with a view to facilitating the operation and furthering the objectives of the Protocol. During the period under review, the Committee has held sessions in December 1974 and in ipril, July and October 1975, under the Chairmenship of H. I. iir. I.S. Chadhe. (India) and Ir. HoJ. Choi (Republic of Korea) who each heid office for periods of six months in accordance with agreed procedures.
6. Winor changes to the schedule of concessions annexed to the Protocol introduced by Israel, Tunisia and Uruguay have been noted by the Cominttee of Participating Countries.
7. In the course of the year, the Cormittee of Particinating Countries has focussed considerable attention on the possibilities and scope for enlargement of the Protocol. The interest expressed by a number of developing countries in acceding or exploring possibilities for accession to the Protocol has been welcomed by the Committee and more general consideration has been given to the prospects and timins of a new round of negotiations among developing countries taking into account the 1971 Decision of the CONTRACTING PARTIZS. Further details, in this respect, are contained in the following paragraphs of the report.

## D." Enlargement of the Protocol

8. Pursuant to paragraph 14 of the Protocol, Paraguay and Bangladesh both requested accession without carrying out negotiations on terms agreed with the Committee, The delegation of Paraguay, in submitting details of its foreign trade régime, also exchanged views with nembers of the Committee concernins the background to its application. At its meeting in October 1975, the Coimittee of Participating Countries approved the texts of a Decision and Protocol for the Accession of Paraguay and agreed to put the matter to a vote by participating countries in accordance with parasraph 4 of the Protocol. The request for accession submitted by Bangladesh in cugust 1975 is being examined by the Comnittee with a view to reaching a decision at an early date.
9. Four other developing countries have indicated their interest in exploring possibilities for accession to the Protccol in accordance with the procedures drawn up by the Comaittee of Participatin Countries. So far, two of these countries have exchanged trade data and information with participating countries on products of export interest. Consultations between one such country and interested participating countries with a view to considering possibilities of exchanging concessions are expected to take place shortly. The other two developins countries heve indicated that lists of products of export interest to them in the markets of participating countries are being prepered.
10. A number of other developing countries have also indicated interest in the Protocol and have been provided with relevant information by the secretariat.

## II. STATISTTCAL DATA

11. It may be considered that having regard to the time involved in promulgating and implementing the necessary aduinistrative arrangements relating to the operation of the Protocol by participating couatries followin ratification in 1973 and later, the practical application of the arrangement is still in its formative stages. Nevertheless, there is evidence on the basis of available statistics, that trade among participating countries in products subject to tariff concessions increased during 1974, the latest period for which information on trade flows is available. While full details of trade in products subject to concessions are shown in Section III of the report, an attenpt has been made in the following table to provide a summery of certain aspects of this trade.
12. It will be noted fron the table that with respect to the nine participating countries ${ }^{1}$ which had rovided data at the time of preparation of this report, trade with other participatins countries in products included in the schedules of concessions increased from USill 5.3 aillion in 1972 to US 31.2 million in 1973 and US $\% 44.8$ million in 1574.
[^1]I/4238
Page 4
13. While the schedules of concessions at present embodied in the Protocol represent a modest initial effort by jarticipating countries to increase trade among themselves, the interest being exprassed by participating countries in exploring ways and ineans of enlarging the Protocol in terms of membership and coverage, and the interest already expressed by a number of developing countries. in accession or possible accession, suggests that a basis is developing for a meaningful enlarseinent of the arrangement. The Committee is of the view that in the light of its initial experience, the Protocol Relating to Trade Negotiations Among Developing Countries will make a valuable contribution to the expansion of trade among developing countries taking advantage of the complementarities existing in terms of production and trade flows of developing countries.

TABLE
Aggregate Trade in Products Subject to Concessinns Among Reporting Participating Countries

Imports into the Canary Islands and other auty-free zones are not included, the reason being that tariff concessions do not operate there because imports by them are not dutiable
$\frac{1}{4}$ In the absence of a detailed breakdown, the total figures are given for all phosphides except tin phosphide. $3 /$ In the absence of a detailed breakdown, the figures given are for the entire heading No. 33.06 .
4/ In the absence of a detailed breakdown, the figures given are for all industrial valves.
 IMPORTANT NOTES
In establishing the 1974 statistics for Spanish imports or products on which Spain has granted concessions under the protocol Relating to Trade Among Developing countries, the following remariks should be taken
 tatistics for 1974. The reason is that in the 1974 statistics of Spain's foreign trade a number of detailed breakdowns have been made precisely in order to take into account the
mons Developing Countries. Accordingly, any comparison between the flgures for 2972 and 1973 and those for 1971 1s not valid where the statistical breakdowns do not correspond.

Imports of the Items Included in the List of Concessions of Yugoslavia

${ }^{1}$ calendar year
2/Braz11, Egypt, India, Pakistan, Spain, Tunisia, Turkey - participating countries which ratified the Protoeol in 1974 have not been inciuded.
