

GENERAL AGREEMENT ON TARIFFS AND TRADE

RESTRICTED

TBT/W/68

17 February 1984

Special Distribution

Committee on Technical Barriers to Trade

LIST OF PRODUCTS COVERED BY THE NOTIFICATIONS UNDER THE AGREEMENT

Pursuant to a request of the Committee at its meeting on 17-18 May 1983 (TBT/M/13, paragraphs 18-21) the secretariat has prepared a list of products covered by the notifications under the Agreement. The list, which is circulated in the Annex in English only, is extracted from a computerized data base on TBT notifications established by the secretariat.

The list includes products that are the subject of proposed or adopted technical regulations or certification systems notified by Parties to the Agreement over the 1980 to 1983 period. It is based on descriptions of products as contained under item 4 of the notification format.

The products in the list are classified under respective Customs Co-operation Council Nomenclature (CCCN) headings at four-digit level. This classification is used for purposes of structuring the list of products into different groups. CCCN headings for a majority of the items are identified by the secretariat following the product descriptions in the notifications. In cases where the products in question belong to a sub-heading of the CCCN, the CCCN number is followed by an "EX" indicating a sub-position. Product descriptions that can be classified under several CCCN headings are reproduced under the first of these CCCN headings.

Reference is also made to respective TBT notification numbers (N) in order to enable the identification of the notification(s) relating to the products in question. The names of the parties making the notifications in question are also shown.

The computerized data base contains information on (a) articles of the Agreement under which notifications are made, (b) description of content of proposed or adopted technical regulations or certification systems as stated in the notifications under item 6 of the notification format, (c) objective and rationale of notifications as stated under item 7 of the notification format, (d) comment period provided, and (e) any reference to international or regional standards. Any of these supplementary elements of information can be added to the listing if desired.
