GENERAL AGREEMENT ON TARIFFS AND TRADE

Textiles Committee

TEXTILE AND CLOTHING STATISTICS

The statistics in this document cover the period 1978 to 1983 with some data for the first quarter of 1984. They are presented in three sections. Section 1 summarizes developments in production, employment and trade in textiles and clothing. Section 2 contains detailed statistics on the imports of textiles and clothing into each developed member of the Arrangement broken down by areas and countries of origin, expressed in dollar values and percentage shares. Section 3 focuses on trade in cotton textiles and clothing.

The secretariat has also prepared more detailed annual statistics on trade in a number of textile products (e.g. yarns, fabrics, made-up articles and various clothing items) by origin and destination, value and quantity, for all member countries who report trade data to the UN Statistical Office. These statistics, in addition to the data on production (by individual textile and clothing products), employment (in absolute figures), investment and value added collected under the Textile Committee's statistical reporting scheme, are available to delegations on request.

EXPLANATORY NOTESPRODUCTION

The production indices are those published in national statistical publications or in the UN, Monthly Bulletin of Statistics, Yearbook of Industrial Statistics and OECD, Indicators of Industrial Activity. They have been converted by the secretariat to a common base year (1973 = 100).

EMPLOYMENT

The employment indices for all manufacturing have been obtained from the UN and OECD sources mentioned above. Those for textiles and clothing have been calculated from the data reported by member countries under the Textiles Committee's statistical reporting scheme.

As far as possible, the following definitions have been used:

Textiles ISIC¹ major group 321. This includes spinning, weaving and finishing; the manufacture of made-up textile goods except wearing apparel; knitting mills; the manufacture of carpets and rugs; cordage rope and twine industries; the manufacture of textiles not elsewhere specified. All materials are included.

Clothing ISIC major group 322. - the manufacture of wearing apparel, except footwear. All materials are included.

Manufacturing ISIC major group 3.

Notes to the production and employment tables as well as the explanatory notes to document COM.TEX/W/77, Statistics on Textiles and Clothing, Part 2, indicate the departures from the definitions adopted and the differences in data coverage.

TRADE

The trade data are compiled from the United Nations trade data ² tapes. The product categories are defined in terms of the SITC Rev.1.

The aggregates for textiles and clothing exclude in principle products other than those of cotton, wool and man-made fibres to the extent they can be identified in the SITC Rev.1. In effect it has been possible to exclude from the SITC divisions 65 and 84 only yarns and fabrics other than cotton, wool and man-made fibres, bags and sacks of textile materials, floor coverings of vegetable plaiting materials and

¹United Nations, International Standard Industrial Classification of All Economic Activities, Rev.2, 1968.

²United Nations, Standard International Trade Classification, Revised, Series M, No. 34.

clothing of leather, rubber and fur. Cotton yarn refers to SITC sub-groups 651.3 and 651.4 and woven cotton fabrics to SITC Group 652. Data for cotton textiles and clothing have been compiled according to the SITC Revision 2. Cotton Textiles refer to yarns, fabrics and made-up articles of cotton (pure or mixed). Cotton clothing refers only to cotton outergarments and undergarments (pure or mixed).

Values are in current US dollars. Exports are valued f.o.b.; imports are in c.i.f. values with the exception of Canada, Czechoslovakia and Poland for which imports are expressed in f.o.b. values.

Data for the European Communities refer to the ten member States as listed below, and exclude intra-community trade. The statistics are aggregated from individual member states' submissions which are not strictly comparable with regard to definitions of trade (special/general) and of countries of origin (provenance) and destination.

The area definitions of trading partner countries follow those adopted in earlier studies. In addition, the principal countries or areas not members of the Arrangement are individually reported. For reasons of statistical convenience the membership of the Arrangement has been treated as constant throughout and refers to the membership as at the Textiles Committee meeting of December 15 1983. Details are as follows:
