Fifty-Sixth Session  
25-26 June 1985

## PART IV CONSULTATIONS: BACKGROUND INFORMATION

### CANADA

#### Addendum

#### Table of Contents

	Page
Explanatory Notes	2
Annex 1: Selected items of export interest to developing countries subject to positive duties and/or import restrictions - tariffs, import restrictions and trade flow data at the tariff line level.	

TARIFF AND TRADE FLOW DATA AT THE TARIFF LINE LEVELExplanatory Notes

This annex covers (i) m.f.n. dutiable items not covered by GSP and (ii) GSP dutiable items, among tariff items in respect of which imports from developing countries accounted for more than 20 per cent of imports from all sources or exceeded US\$ 1 million in 1982, as well as some items of export interest to developing countries subject to import restrictions.

TARIFFSColumn TYPE OF DUTY

MFN-B: Base rate for the Tokyo Round (pre-Tokyo Round m.f.n. rate)  
 MTN-F: Final rate (post-Tokyo Round m.f.n. rate)  
 MTN-82: M.f.n. rate in 1982  
 GSP 1-B: GSP rate in 1983  
 GSP 1-F: GSP final rate to be implemented by 1987  
 LDC-B: Rate applying to least-developed countries in 1983  
 TEMP: Temporary rates applied in 1982  
 PREF1: British Preferential rate (BPT)  
 PREF2: Special tariff rate applying to New Zealand.

Column RATE

Ad valorem rate or ad valorem incidence of specific, mixed or compound rate is indicated with one decimal point. For example, if symbol 'S' appears in column 'NAT', the rate is ad valorem incidence of a specific rate. Ad valorem incidence is based on imports in the year recorded.

Column NAT = nature of duty rate (blank for ad valorem rate)

S for specific rate (e.g. \$4.00/kg.);  
 C for compound rate (e.g. \$4.00/kg. + 10%);  
 M for mixed rate (e.g. \$4.00/kg. or 10% whichever is greater);

Column BDG - binding status (blank for ordinary binding)

C for ceiling binding;  
 P for a rate partially bound at a ceiling rate, and partially at the prevailing rate;  
 U for an unbound rate.

Column LIM = Limitation code for GSP (blank for no limitation)TRADE FLOW DATA

IMPORTS FROM (i) WORLD (= all sources) and (ii) GSP origin (= GSP beneficiary countries) are each sub-divided by TOT (= total imports irrespective of tariff treatment), MFN (= imports entitled to m.f.n. treatment), GSP (imports eligible for GSP), LDC (imports eligible for special preferences for least-developed countries) and PREF (imports from BPT countries). It may be noted that "imports eligible for GSP" do not take into account origin rule limitations and non-utilization of GSP and that actual imports under GSP are smaller than imports recorded as GSP.

SHARE indicates percentage share of GSP origin in total imports.

Import figures refer to the year 1982.

Quantitative Restrictions

Quantitative import restrictions by Canada have been shown in the right-hand column. The following symbols have been used in this regard.

- DL Discretionary licensing - includes cases where global quotas may have been established, but not published.
- GQ Global quota - where restriction applies to goods of most, if not all, countries and where the amount of the quota is published.
- BQ Bilateral quota or quotas.
- ST State-trading.
