Explanatory Notes	2
Annex 1: Selected items of export interest to developing countries subject to positive duties and/or import restrictions - tariffs, import restrictions and trade flow data at the tariff line level	5

ANNEX IExplanatory Notes

This annex covers (i) m.f.n. dutiable items not covered by GSP, (ii) GSP dutiable items and (iii) GSP duty-free items subject to country exclusions, among Swiss tariff items in respect of which imports from developing countries and territories accounted for more than 20 per cent of imports from all sources or exceeded US\$1 million in 1982. Data on tariff treatment (MFN, GSP, etc.) and the corresponding trade flows in 1982 are provided together with information on quantitative import restrictions.

TARIFFSColumn TYPE OF DUTY

MTN-B:	Base rate for the Tokyo Round (pre-Tokyo Round m.f.n. rate)
MTN-F:	Final rate (post Tokyo-Round m.f.n. rate)
MFN 82:	M.f.n. rate applicable in 1982
GSP1-B:	GSP rate in force as of 1 July 1983
LDC-B:	Rate applicable to designated least-developed countries
FTA:	Rate applying to EFTA countries
ZONE:	Rate applying to the EEC according to agreement between EEC and EFTA
PREF1:	Preferential rate applying to Spain, recorded separately for agricultural products only.

Column RATE

Ad valorem incidence of specific rate based on imports in 1982 is indicated with one decimal point.

Column NAT = nature of duty rate (blank for ad valorem rate)

S for specific rate (e.g. Sw F 4.00/kg.).

Column BDG = binding status (blank for ordinary binding)

C for ceiling binding;
P for a rate partially bound at a ceiling rate, and partially at the prevailing rate;
U for an unbound rate.

Column LIM = limitation code for GSP (blank for no limitation)

C for country exclusion in Chapters 50-64.

TRADE FLOW DATA

IMPORTS FROM (i) WORLD (= all sources) and (ii) GSP origin (= GSP beneficiary countries) are each sub-divided by TOT (= total imports irrespective of tariff treatment), MFN (= imports entitled to m.f.n. treatment), GSP (= imports covered by GSP), LDC (imports entitled to special preferences for least-developed countries), FTA and ZONE (= imports entitled to free-trade arrangements with EFTA and EEC respectively), and PREF (= preferential imports of certain processed agricultural products from Spain). It may be noted that "imports covered by GSP" do not take into account non-utilization of GSP and that actual imports under GSP are smaller than imports recorded as GSP covered.

With respect to imports from world and imports according to different tariff treatment, names of five main suppliers appear in column MAIN SUPPLIERS. See the following list of country name abbreviations.

The following symbols have been used in regard to quantitative import restrictions:

- BQ Bilateral quota or quotas
- GQ Global quota - where restriction applied to goods of most, if not all, countries and where the amount of the quota is published
- LL Liberal licensing - where maintaining countries consider their licensing regime to be a purely formal requirement involving no restriction
- SR Seasonal restrictions
- ST State-trading
