TEXTILE AND CLOTHING STATISTICS

The statistics in this document cover the period 1981 to 1984. They are presented in two sections. Section 1 summarizes developments in trade in textiles and clothing and also contains detailed statistics on the imports of textiles and clothing into each developed member of the Arrangement broken down by areas and countries of origin, expressed in dollar values and percentage shares. Section 2 focuses on trade in cotton textiles and clothing.

The Secretariat has also prepared more detailed annual statistics on trade in a number of textile products (e.g. yarns, fabrics, made-up articles and various clothing items) by origin and destination, value and quantity, for all member countries who report trade data to the UN Statistical Office. These statistics, in addition to the data on production (by individual textile and clothing products), employment (in absolute figures), investment and value added collected under the Textile Committee's statistical reporting scheme, are available to delegations on request.

EXPLANATORY NOTES

The trade data are compiled from the United Nations trade data¹ tapes. The product categories are defined in terms of the SITC Rev.1.

The aggregates for textiles and clothing exclude in principle products other than those of cotton, wool and man-made fibres to the extent they can be identified in the SITC Rev.1. In effect it has been possible to exclude from the SITC divisions 65 and 84 only yarns and fabrics other than cotton, wool and man-made fibres, bags and sacks of textile materials, floor coverings of vegetable plaiting materials and clothing of leather, rubber and fur. Cotton yarn refers to SITC sub-groups 651.3 and 651.4 and woven cotton fabrics to SITC Group 652. Data for cotton textiles and clothing have been compiled according to the SITC Revision 2. Cotton Textiles refer to yarns, fabrics and made-up articles of cotton (pure or mixed). Cotton clothing refers only to cotton outergarments and undergarments (pure or mixed).

Values are in current US dollars. Exports are valued f.o.b.; imports are in c.i.f. values with the exception of Canada, Czechoslovakia and Poland for which imports are expressed in f.o.b. values.

Data for the European Communities refer to the ten member States as listed below, and exclude intra-community trade. The statistics are aggregated from individual member States' submissions which are not strictly comparable with regard to definitions of trade (special/general) and of countries of origin (provenance) and destination.

The Chinese data are taken from "China's Cumstoms Statistics", denominated in RMBY. They have been converted to dollars at the official exchange rate quoted in the IMF "International Financial Statistics". Textiles and clothing refer to SITC Rev.2 divisions 65 and 84, unadjusted for non-MFA products.

The area definitions of trading partner countries listed below follow those adopted in previous reports, with the exception that statistics for China are now shown separately: since China switched from being a non-member to being a member of the Arrangement in January 1984, this change in the presentation of the statistics was necessary to maintain the continuity of statistical series for various groupings of members. The membership of the Arrangement is as at 30 June 1985.
