TEXTILES AND CLOTHING - TRADE STATISTICS

The statistics in this document cover the years 1983 to 1987. They are presented in three sections. Section 1 summarizes trade in textiles and clothing for all members of the Arrangement for which data are available. Detailed statistics on the imports of textiles and clothing into each developed member of the Arrangement broken down by areas and countries of origin, expressed in dollar values and percentage shares are also presented. Section 2 focuses on trade in cotton textiles and clothing. Section 3 is a new section devoted to trade in wool textiles and clothing.

The Secretariat has also prepared more detailed annual statistics on trade in a number of textile products (e.g. yarns, fabrics, made-up articles and various clothing items) by origin and destination, value and quantity, for all member countries who report trade data to the UN Statistical Office. These statistics, in addition to the data on production (by individual textile and clothing products), employment (in absolute figures), investment and value added collected under the Textile Committee's statistical reporting scheme, are available to delegations on request.
