

**GENERAL AGREEMENT ON
TARIFFS AND TRADE**

RESTRICTED

COM.TEX/SB/1805*
12 November 1992

Special Distribution

Textiles Surveillance Body

ARRANGEMENT REGARDING INTERNATIONAL TRADE IN TEXTILES

Notification under Article 2:4

CHINA

The Textiles Surveillance Body received a notification from China on (a) the evolution of its textile industry; (b) the status of import restrictions maintained by it; and (c) the rationale for such restrictions.

This notification was made in accordance with China's obligations under Article 2:4 of the MFA.

During the TSB review, additional information was provided by China. This information is contained in the report of the TSB's ninth meeting of 1992. (COM.TEX/SB/1807)

In forwarding the text of this notification, the TSB draws the attention of participating countries on the need to read the attached text together with the report mentioned above.

¹The previous notifications by China are contained in COM.TEX/SB/985, 1080, 1392, 1430 and 1493.

²For the TSB's observations on this notification, see COM.TEX/SB/1807.

NOTIFICATION BY CHINA TO THE TSB ON IMPORTS
OF TEXTILES AND CLOTHING

(4 September 1992)

I. Overview on the development of China's textile industry

1. Domestic demand and production vs. imports

The experience of industrialized countries in economic development shows that the development of the textile industry is an inevitable process of industrialization. This industry stimulates the development of a wide range of related industrial sectors such as the machine-building, chemical products, dyeing stuff and the garment industry, etc. At present, China's textile industry is experiencing a period of relatively fast growth. Evident improvement of living standards as a result of economic reform and opening to the outside world has contributed to the substantial increase of textile consumption for clothing and industrial use. The growth of China's textile industry has not only increased domestic supply, but also boosted import demand. During the thirteen years between 1978 to 1991, textile imports increased from US\$1 billion to US\$6 billion, up six times. Meanwhile, textile exports expanded from US\$2.8 billion to US\$17.9 billion, an increase of 6.4 times (see Table 1). The development of the textiles industry has served as a demand pull for other industrial sectors, and has significantly contributed to the expansion of China's foreign trade.

2. The development of the man-made fibre industry vs. imports of man-made fibres

Given the fact that China has a population of 1.1 billion with only limited arable lands, the development of the man-made fibre industry is an important solution to the clothing supply problem. Therefore, the man-made fibre industry is listed as one of the priority industries in China's socio-economic development programme. The output of this sector is expected to reach 2.6 million tons by the year 2000. Demand for man-made fibres rises in parallel with the development of the textile industry as a whole. Consequently, China has become one of the biggest importers of both man-made fibre materials and man-made fibres in the world.

3. Wool

Wool production is located in the remote underdeveloped regions where some 40 million people live from about thirty minority nationalities including Mongolians, Khazaks and Tibetans. These are the dry and frigid zones with disadvantageous habitat. A substantial part of the herdsmen are leading a nomadic life. The inhabitants there live on sheep-raising. Wool accounts for 60-70 per cent of total income. In 1990, there were some 112.8 million head of sheep, producing annually 80,000 tons of wool.

At present, China's wool spinning capacity is 2.5 million spindles, consuming about 200,000 tons of wool per year. Domestic wool makes up about 40 per cent of the total consumption. The annual import volume is about 120,000 tons (see Table 20). The rate of market penetration of imported wool is very high (60 per cent).

4. The structural adjustment of the textile industry

In response to demand shift in both the domestic and world markets, China's textile industry has been undergoing major structural adjustments. In respect of textile production and development, in the period from 1983 to 1988, the emphasis was on increasing output so as to meet domestic consumers' basic needs. With the continuous rising of people's living standards, demand begins to shift toward ornamental consumption. Along with the development of science and technology, demand for industrial textiles for use in transport, construction and other sectors increases rapidly. To adapt to changes in both domestic and foreign markets, readjustment has been undertaken in the textile industry in product formation, pattern of production and industrial deployment. Specifically the restructuring is three-fold:

- (i) Reform the planning system and push textile enterprises to the marketplace. So far, of the fourteen textile product categories, only man-made fibres are still subject to the mandatory production plan, whereas the development, production and sales of all other products are freely determined by production enterprises themselves in the light of market demand;
- (ii) support and encourage the development of rural and township textile manufacturing in raw material production regions in order to reduce material and labour cost. Between 1986 to 1990, the total output value of State-owned and urban collective-owned enterprises increased by only 45.8 per cent as against 143 per cent for township enterprises, the latter accounts at present for one third of the nation's total output (see Table 3);
- (iii) place investment priority on the man-made fibre sector and technological transformation (see Table 4).

II. The state of imports of textiles and clothing

China's accession to the MFA was followed by rapid expansion of import and export of textiles and clothing. From 1984 to 1991, textiles and clothing imports increased from US\$1.6 billion to US\$6 billion, up 2.7 times (see Table 1). In 1990, 25 per cent of China's textile imports originated in Europe, North America and Australia. The proportion will come up to 40 per cent if trans-shipments via Hong Kong are included (see Table 5). Another important cause for the rapid increase of imports was the extension of the economic system reform from the rural area to the urban areas leading to the liberalization of imports.

III. Import administration of textiles and clothing

1. Tariff

On 1 January 1992, China unilaterally reduced import duties on twenty-two HS lines of textiles (see Table 6). During the period of restructuring beginning in 1988, China imposed regulatory duties on eight HS lines of textile raw materials. With the conclusion of restructuring, all regulatory duties on all HS lines were eliminated as from 1 April 1992 (see Table 7).

2. Quotas

Over a long period of time, the purchases and sales of cotton were monopolized by the State. Cotton production and sales were subject to relatively strict planning. The rural reform beginning in 1988 brought about fundamental changes in the structure of production and marketing. With the introduction of a contractual responsibility system linking remuneration to output in the rural area, market forces began to operate. The peasants' initiatives were brought into play and cotton output increased rapidly.

As for cotton consumption, demand for cotton increased slowly as a result of increased production and import of man-made fibres. Consequently, cotton stocks increased leading to a sharp decline in prices, which affected cotton growers' incomes. In order to eliminate stock and guarantee a stable income for cotton growers, China began to implement the quota system in 1989, designating specialized companies to conduct the cotton import business.

3. Licensing

(i) The system

- Product coverage: at present, fifty-three categories of products are subject to import licensing. Wool, man-made fibres, man-made fabrics and man-made fibre garments are covered involving 202 HS tariff items. The inclusion of textiles began in 1982 (see Table 8).
- Approving authorities: import of wool, polyacrylic and man-made fabrics are subject to approval by the State Planning Commission, while other man-made fibres are subject to approval by State Planning Commission local offices and garments of man-made fabrics are approved by the Ministry of Commerce.
- Issuing authorities: the Ministry of Foreign Economic Relations and Trade (MOFERT) is the authority who issues licences. It also delegates the power to MOFERT's special commissioner's offices and local foreign economic relations and trade departments to issue some of the import licences.

- Formalities and procedures: when applying for import licences, the applying unit must present to the licence-issuing authority the documentation issued by the above-mentioned authorities. The applicant also has to fill in the Application Form for Import Licence (see Table 9). Upon the receipt of the above-mentioned applications, the issuing authority is obliged to issue licences within three working days to those who have fulfilled the above-mentioned procedures.
- Validity: an import licence shall remain valid for one year, with the possibility of a six-month extension.

(ii) Trading rights

Importation of certain categories of textiles are handled by designated corporations. Currently, there are fifty-one designated import corporations dealing in imports of wool, and seventy-two corporations importing man-made fibres.

(iii) Justifications for licensing applied to wool

Due to the fluctuation in the domestic and international markets, an import surge occurred in the first half of 1986. With a view to guaranteeing people's livelihood in the border and underdeveloped areas, and ensure orderly importation, import licensing for wool was introduced on 20 September 1986. However, after the introduction of import licensing, imports were still increasing rampantly and continued to sustain a high level until 1988 when total annual imports reached 187,411 tons, exceeding the total annual demand of 148,651 tons for the year. Stocks cumulated to 238,760 tons (see Table 2), resulting in a sharp decline of wool prices. The herdsmen were threatened with a hopeless state of destitution. This erratic market fluctuation had a very negative effect on trade. The jump of stock-piles led to a sharp decline of imports in 1989 and 1990. In order to ensure the stable life of the people of the underdeveloped regions and the orderly import of wool, a licensing requirement was placed in 1986.

Due to poor natural endowment and remote geographic location, it is hardly possible to develop new avenues of employment within a short time. Licensing requirements will remain for the time being in order to ensure orderly import. Medium and long-term trends of imports will be on the rise in spite of the licensing requirements.

(iv) Justifications for licensing applied to man-made fibres

The man-made fibre industry was a newly established industry during the 1980s. The development of this industry has not only increased supply but also created a tremendous demand. The industry has a comparatively long construction cycle. Some

projects have just begun to make a small margin of profit while others are still under construction, so not yet in operation. Generally, the man-made fibre industry is still in the stage of establishment. In order to promote the development of the industry, China imposed import licensing administration since 1982 to ensure the orderly importation.

With a view to ensuring the balance of domestic production and imports, the import licensing system has to be maintained. Presently, products under the import licensing system include polyacrylonitrile staple fibre, orlon, fabrics of man-made fibre and garments of man-made fibre.

The production capacity of polyamide is 877,000 tons, actual output was 680,000 tons in 1991 and annual demand is 750,000-800,000 tons with annual imports of 160,000 tons, about 20 per cent of the annual demand. Because of dispersed investment, small scale of operation, low productivity and poor competitiveness, the industry is currently undergoing structural readjustment with emphasis on expanded investment and technology renovation, with a view to sharpening competitive edge.

The production capacity of orlon was 128,000 tons, production output was 130,000 tons in 1991, annual demand is 400,000 tons, with annual imports of 330,000 tons, 82.5 per cent of the total demand. During the Seventh Five-Year Plan, Y 5 billion has been invested to increase the production capacity to some 200,000 tons, which will be put into operation in the Eighth Five-Year Plan. Before these newly-invested projects turn out profits, it is still necessary to maintain a certain control of imports.

The present production capacity of visco staple fibre is 236,000 tons and annual import is 100,000 tons. In the Eighth Five-Year Plan, Y 2.5 billion will be invested for technology renovation and expanding the existing production capacity.

Importation of man-made fibre is under automatic licensing. Generally, application for import licences get approved. As a result, imports have occupied a sizeable share of the domestic market (the specific data has been given in foregoing paragraphs).

(v) Reform of the licensing system

The Chinese delegation made it clear in the meeting of the Working Party on China that China committed herself to eliminate two thirds of products under import licensing within three years' time. The phase out will include man-made fibres, man-made fabrics and man-made fabric garments.

Textile imports for export processing are not subject to import quotas, nor import licensing.

All those raw materials and parts imported for export processing are exempted from import licensing or import quotas, but put under customs supervision. In the case of sales in the domestic market, import duties have to be paid.

The imports of wool for processing were put under automatic import licensing in 1989, but not under quotas. Licensing requirements for wool processing was abolished as from 1 September 1992.

IV. Foreign exchange administration

The Government holds roughly 20 per cent of all foreign exchange earnings. This portion of foreign exchange is allocated in the light of the priority order under national industrial policies and basic needs of the population. Besides the foreign exchange allocated to them, enterprises may obtain foreign exchange through export retention and from swap markets. The foreign exchange in the hands of enterprises is at their own disposal, without limitation. Foreign exchange control does not have a direct impact upon the import of textiles.

TABLE 1Value of China's Imports and Exports of Textiles and Clothing

(100 million dollars)

Year	Exports	Imports	Imports subject to licence	
			Value	Ratio
1978	28.32	10.60		
1979	38.51	13.69

5404		Synthetic monofilament of 67 decitex or more and of which no cross-sectional dimension exceeds 1 mm; strip and the like (for example, artificial straw) of synthetic textile materials of an apparent width not exceeding 5 mm.
5404	1000	Monofilament
5407		Woven fabrics of synthetic filament yarn, including woven fabrics obtained from materials of heading No. 5404
5407	1000	Woven fabrics obtained from high tenacity yarn of nylon or other polyamides or of polyester
5407	2000	Woven fabrics obtained from strip or the like
5407	4100	Unbleached or bleached
5407	4200	Dyed
5407	4300	Of yarns of different colours
5407	4400	Printed
		Other woven fabrics, containing 85% or more by weight of textured polyester filament
5407	5100	Unbleached or bleached
5407	5200	Dyed
5407	5300	Of yarns of different colours
5407	5400	Printed
5407	6000	Other woven fabrics, containing 85% or more by weight of non-textured polyester filaments
5407	7100	Unbleached or bleached
5407	7200	Dyed
5407	7300	Of yarns of different colours

TABLE 8 (Cont'd)

HS	No.	Product Description
5407	7400	Printed Other woven fabrics, containing less than 85% by weight of synthetic filaments, mixed mainly or solely with cotton
5407	8100	Unbleached or bleached
5407	8200	Dyed
5407	8300	Of yarns of different colours
5407	8400	Printed Other woven fabrics
5407	9100	Unbleached or bleached
5407	9200	Dyed
5407	9300	Of yarns of different colours
5407	9400	Printed
5408		Woven fabrics of artificial filament yarn, including woven fabrics obtained from materials of heading No. 5405
5408	1000	Woven fabrics obtained from high tenacity yarn, of viscose rayon Other woven fabrics, containing 85% or more by weight artificial filament or strip or the like
5408	2100	Unbleached or bleached
5408	2200	Dyed
5408	2300	Of yarns of different colours
5408	2400	Printed Other woven fabrics
5408	3100	Unbleached or bleached
5408	3200	Dyed
5408	3300	Of yarns of different colours
5408	3400	Printed
Ch 55		
5501		Synthetic filament tow
5501	1000	Of nylon or other polyamides
5501	2000	Of polyester
5501	3000	Acrylic or modacrylic
5501	9000	Other
5502		
5502	0000	Artificial filament tow
5503		Synthetic staple fibres, not carded, combed or otherwise processed for spinning
5503	1000	Of nylon or other polyamides
5503	2000	Of polyester

TABLE 8 (Cont'd)

HS	No.	Product Description
5503	3000	Acrylic or modacrylic
5503	4000	Of polypropylene
5503	9000	Other
5504		Artificial staple fibres, not carded, combed or otherwise processed for spinning
5504	1000	Of viscose rayon
5504	9000	Other
5506		Synthetic staple fibres, not carded, combed or otherwise processed for spinning
5506	1000	Of nylon or other polyamides
5506	2000	Of polyester
5506	3000	Acrylic or modacrylic
5506	9000	Other
5507		Artificial staple fibres, carded, combed or otherwise processed for spinning
5507	0000	
5509		Yarn (other than sewing thread) of synthetic staple fibre, not put up for retail sale
		Containing 85% or more by weight of staple fibres of nylon or other polyamides
5509	1100	Single yarn
5509	1200	Multiple (folded) or cabled yarn
		Containing 85% or more by weight of acrylic or modacrylic staple fibres
5509	2100	Single yarn
5509	2200	Multiple (folded) or cabled yarn
		Containing 85% or more by weight of acrylic or modacrylic staple fibres
5509	3100	Single yarn
5509	3200	Multiple (folded) or cabled yarn
		Other yarn, containing 85% or more by weight of synthetic staple fibres
5509	4100	Single yarn
5509	4200	Multiple (folded) or cabled yarn
		Other yarn, of polyester staple fibres
5509	5100	Mixed mainly or solely with artificial staple fibres
5509	5200	Mixed mainly or solely with wool or fine animal hair
5509	5300	Mixed mainly or solely with cotton
5509	5900	Other
		Other yarn, of acrylic or modacrylic staple fibres
5509	6100	Mixed mainly or solely with wool or fine animal hair

TABLE 8 (Cont'd)

HS	No.	Product Description
5509	6200	Mixed mainly or solely with cotton
5509	6900	Other
		Other yarn
5509	9100	Mixed mainly or solely with wool or fine animal hair
5509	9200	Mixed mainly or solely with cotton
5509	9900	Other
5510		Yarn (other than sewing thread) of artificial staple fibres, not put up for retail sale Containing 85% or more by weight of artificial staple fibres
5510	1100	Single yarn
5510	1200	Multiple (folded) or cabled yarn
5510	2000	Other yarn, mixed mainly or solely with wool or fine animal hair
5510	3000	Other yarn, mixed mainly or solely with cotton
5510	9000	Other yarn
5512		Woven fabrics of synthetic staple fibres, containing 85% or more by weight of synthetic staple fibres Containing 85% or more by weight of polyester staple fibres
5512	1900	Other Containing 85% or more by weight of acrylic or modacrylic staple fibres
5512	2100	Unbleached or bleached
5512	2900	Other
5512	9100	Unbleached or bleached
5512	9900	Other
5513		Woven fabrics of synthetic staple fibres, containing less than 85% by weight of such fibres, mixed mainly or solely with cotton, of a weight not exceeding 170 g/m ²
5513	1110	Unbleached
5513	1120	Bleached 3-thread or 4-thread twill, including cross twill, of polyester staple fibres
5513	1210	Unbleached
5513	1220	Bleached Other woven fabrics of polyester staple fibres
5513	1310	Unbleached
5513	1320	Bleached

TABLE 8 (Cont'd)

HS	No.	Product Description
5513	1900	Other woven fabrics Dyed
5513	2100	Of polyester staple fibres, plain weave
5513	2200	3-thread or 4-thread twill, including cross twill, of polyester staple fibres
5513	2300	Other woven fabrics of polyester staple fibres
5513	2900	Other woven fabrics Of yarns of different colours
5513	3100	Of polyester staple fibres, plain weave
5513	3200	3-thread or 4-thread twill, including cross twill, of polyester staple fibres
5513	3300	Other woven fabrics of polyester staple fibres
5513	3900	Other woven fabrics Printed
5513	4100	Of polyester staple fibres, plain weave
5513	4200	3-thread or 4-thread twill, including cross twill, of polyester staple fibres
5513	4300	Other woven fabrics of polyester staple fibres
5513	4900	Other fabrics
5514		Woven fabrics of synthetic staple fibres containing less than 85% by weight of such fibres, mixed mainly or solely with cotton, of a weight exceeding 170 g/m ² : Unbleached or bleached Of polyester staple fibres, plain weave
5514	1110	Unbleached
5514	1120	Bleached 3-thread or 4-thread twill, including cross twill, of polyester staple fibres
5514	1210	Unbleached
5514	1220	Bleached Other woven fabrics of polyester staple fibres
5514	1310	Unbleached
5514	1320	Bleached
5514	1900	Other woven fabrics Dyed
5514	2100	Of polyester staple fibres, plain weave
5514	2200	3-thread or 4-thread twill including cross twill, of polyester staple fibres
5514	2300	Other woven fabrics of polyester staple fibres
5514	2900	Other woven fabrics Of yarns of different colours

TABLE 8 (Cont'd)

HS	No.	Product Description
5514	3100	Of polyester staple fibres, plain weave
5514	3200	3-thread or 4-thread twill, including cross twill, of polyester staple fibres
5514	3300	Other woven fabrics of polyester staple fibres
5514	3900	Other woven fabrics Printed
5514	4100	Of polyester staple fibres, plain weave
5514	4200	3-thread or 4-thread twill, including cross twill, of polyester staple fibres
5514	4300	Other woven fabrics of polyester staple fibres
5514	4900	Other woven fabrics
5515		Other woven fabrics of synthetic staple fibres: Of polyester staple fibres
5515	1100	Mixed mainly or solely with viscose rayon staple fibres
5515	1200	Mixed mainly or solely with man-made filaments
5515	1300	Mixed mainly or solely with wool or fine animal hair
5515	1900	Other Of acrylic or modacrylic staple fibres
5515	2100	Mixed mainly or solely with man-made filaments
5515	2200	Mixed mainly or solely with wool or fine animal hair
5515	2900	Other Other woven fabrics
5515	9100	Mixed mainly or solely with man-made filaments
5515	9200	Mixed mainly or solely with wool or fine animal hair
5515	9900	Other
5516		Woven fabrics of artificial staple fibres: Containing 85% or more by weight of artificial staple fibres
5516	1100	Unbleached or bleached
5516	1200	Dyed
5516	1300	Of yarns of different colours
5516	1400	Printed Containing less than 85% by weight of artificial staple fibres, mixed mainly or solely with man-made filaments
5516	2100	Unbleached or bleached
5516	2200	Dyed
5516	2300	Of yarns of different colours
5516	2400	Printed Containing less than 85% by weight of artificial staple fibres, mixed mainly or solely with wool or fine animal hair
5516	3100	Unbleached or bleached
5516	3200	Dyed
5516	3300	Of yarns of different colours

TABLE 8 (Cont'd)
