WORKING PARTY 4 ON EUROPEAN COAL AND STEEL COMMUNITY

Statistical Note by the Secretariat

1. In response to the suggestion made in the Working Party, the Secretariat has prepared the attached statistics, extracted from the OEEC Statistical Bulletins, Series IV, the data on which are based on the SITC.
2. The data give an indication of the relative size of the trade in Coal and Steel of the members of the Community with outside countries.
3. The following SITC groups and items have been selected:-

281	Iron ore and concentrates
282	Iron and steel scrap
283-07	Manganese ore and concentrates
311-01	Coal (anthracite, bituminous, sub-bituminous, lignite)
311-02	Coke of coal and of lignite
311-03	Briquettes of coal, of lignite, of coke and of peat
681	Iron and steel
4. It should be noted that the SITC items selected, in some cases, include trade in products which do not fall under the jurisdiction of the Community.

It should also be noted that the year 1951 is not entirely representative of normal trade, as exceptional circumstances caused an abnormal movement of European steel towards the United States and of U.S. coal towards Europe.
