

# GENERAL AGREEMENT ON TARIFFS AND TRADE

Committee on Agriculture

Original: English

## DEFINITION OF AGRICULTURAL PRODUCTS

### Addendum

The following notification was received from the Government of Denmark:

"During the discussions on 17 April 1964, in the Committee on Agriculture it was agreed that by 27 April, countries should send a list of the products within the first twenty-four Chapters of the Brussels Nomenclature which they think should be treated according to the rules governing industrial products during the forthcoming trade negotiations.

"Enclosed please find a list of products of this category which the Danish Government want to see treated under the negotiating rules for industrial products. The list has been established on the assumption that tropical products, like for instance those in Chapter 9 and items 1801 and 1802 will be dealt with in the Special Group for tropical products.

"In addition, with regard to a number of industrially processed products within Chapters 1 to 24, for instance preserved products and preparations of flour (Chapter 19), the Danish Government would like that part of the tariff protection which corresponds to the industrial protection to be treated under the negotiating rules for industrial products.

"The list should not be regarded as exhaustive, and, according to the Danish view, other products within the first twenty-four Chapters of the Brussels Nomenclature may be suited for treatment as industrial products."
