DATA ON TRADE FLOWS AND TRADE MEASURES ON SELECTED AGRICULTURAL PRODUCTS

Introduction

1. The data on trade flows and trade measures in this paper in principle relate to products included in the first twenty-four chapters on the Brussels Nomenclature. Products which prima facie will be covered by negotiations in Commodity Groups, such as the Group on Cereals, on Meat, on Dairy Products, or in the Group on Tropical Products, are not included in the list, with some exceptions for practical reasons.
2. Under each entry information is provided on four lines. The top line indicates the value of imports, the second line indicates the value of exports; the data are in United States million dollars and relate, in general, to 1960.
3. The third line indicates the level of tariff protection. For items subject to a duty of more than 5 per cent ad valorem the symbol T has been inserted; duties of 5 per cent or less are shown by the symbol t; for zero duties 0 has been inserted. Bound duties are shown by underlining; where the binding applies only to part of the position appearing in the product description, a dotted line has been used. Specific duties, regardless of their level, are shown by the letter S. In cases where either an ad valorem or a specific duty applies, the symbol T/S has been used; where such duties are used in conjunction the symbol S + T has been used.
4. The fourth line shows various non-tariff measures which may be presumed to affect trade. The following symbols have been used:
 - R = import restrictions (including quota restrictions, minimum import prices, conditional import systems, etc.)
 - Mo = monopoly operation or State trading
 - Mb = production and/or trade is subject to regulation by a marketing board
 - ML = product is subject to regulation under "marketing law"
 - Lv = imports are subject to variable or fixed levy
 - Sp = subsidy on production

Se = subsidy on exports

Sc = subsidy on consumption

Ps = price support measures

Dp = deficiency payments.

Where the initial letter is not capitalized (for example "sp") only part of the item or items concerned benefit from the non-tariff measure mentioned (for example a subsidy on production). An asterisk refers to an explanatory note in the Appendix.

5. The statistical data relate to the value of imports from all origins and exports to all destinations; for the European Economic Community both total trade and trade excluding intra-EEC trade is shown. They refer to the year 1963 except for New Zealand (1962/63) and South Africa (1962). The values are in million dollars; imports are in general at c.i.f. values and exports at f.o.b. values. It should, however, be noted that in the case of Australia, Canada, South Africa, New Zealand, the United States imports are valued f.o.b.; United States exports exclude shipments for relief and charity by individuals and private agencies.

The sources used are: national trade returns, 1963 World Trade Annual prepared by the Statistical Office of the United Nations and, for the EEC, Tableaux analytiques by the Statistical Office of the European Communities. For a number of countries it was necessary to convert the data classified according to national trade nomenclatures into the BTN. The reclassification involved certain arbitrary decisions as regards the allocation of certain commodities or commodity groups, in particular in cases where the published statistics were not sufficiently detailed. It was furthermore not possible to obtain data for all the headings listed. As the totals were in general obtained by addition of the figures shown, they may underestimate the value of trade involved in the case of countries for which complete data were not available.

Data on Trade Flows and Trade Measures on Selected Agricultural Products

T Ad Valorem duty of more than 5 per cent
t Ad Valorem duty of 5 per cent or less
S Specific duty
O Zero duty
--- Underlining denotes bound duty
--- Broken underlining denotes that the duty on part of the item is bound
- Trade less than \$50,000
