# GENERAL AGREEMENT ON TARIFFS AND TRADE

Multilateral Trade Negotiations

Group "Sector Approach"

## INFORMATION ON ORES AND METALS

### Addendum

#### Part I. General

I.1 - World production and exports of metals, quantities for selected years between 1963 and 1973.

I.2 - Development of world metal prices between 1963 and first quarter of 1975 (indices 1963 = 100):

- chart, annual data for 1963-1974
- chart, quarterly data for 1973-1975 I
- table (index numbers 1963 = 100).

I.3 - Value of imports of all ores and metals (category 08 of the Tariff Study) into the tariff study countries from all origins and by principal m.f.n. and GSP suppliers by level of m.f.n. duties in 1971.

I.4 - Value of imports of ores and concentrates, unwrought metals and metal semi-manufactures (sub-categories 08.01; 08.02; 08.03.01 and 08.03.02) into the tariff study countries from all origins and by principal m.f.n. and GSP suppliers by level of m.f.n. duties in 1971.

Note: The production figures for ores refer to mine production (content of utilizable ores or recoverable metal content); those for metals are defined as follows:

Steel: total production of crude steel (ingots and steel for castings), whether obtained from pig-iron or scrap.

Copper and lead: refineries' production, including output from old metal and scrap, lead including also antimonial lead made by lead refineries.

Primary aluminium: metal produced directly from alumina.

Nickel: primary metal and metal contained in ferronickel, nickel oxide sinter and monel metal smelted directly from ores.

Tin and zinc: smelter production excluding remelted metal produced by secondary smelters.

The world output of metals recovered from scrap, not included in the table, has been estimated by Metallgesellschaft as follows (thousand tons and percentage of total supply):

	1963		1967		1970		1973	
	'000 tons	%						
Aluminium	1,205	18	1,688	18	2,166	18	2,930	19
Tin	52	22	58	21	51	19	51	19
Zinc	691	16	790	16	884	15	973	15

The export data include ores, concentrates and mattes, on the one hand, and unrefined and refined metals on the other hand. Trade in scrap is not included in this table since comprehensive world totals are not available. In 1971, imports of scrap into major industrialized countries accounted respectively for about 6 per cent of world trade on iron ore and crude iron and steel, for about 5 per cent of copper ore and unwrought copper, for about 3 per cent of zinc and tin, and for less than 1 per cent of world trade in nickel, aluminium and zinc. Figures for ores and concentrates are in terms of metal content as reported in the specialized bulletins listed below; additional estimates made by the secretariat

from gross weight figures are indicated in the detailed tables. Except for steel, only unwrought metals are reported in this table. For iron and steel, the export data refer to the major countries reported in Table IV.4, which in 1967 accounted for about 97 per cent of world trade. The definitions of crude steel and of iron and steel semi-manufactures reported here, and in Tables II.4 and 5, differ slightly from those applicable to Table II.6 (for definitions see Part II). The world totals for zinc and tin also refer to major exporting countries only.

TABLE I.3

Value of imports of all ores and metals into the Tariff Study countries, from all origins and by principal m.f.n. and GSP suppliers, by level of m.f.n. duties in 1971

Apart from the adjustments mentioned in the general note, this table is the same as that published for category 08 in the Basic Documentation for the Tariff Study: Imports by Industrial Product Categories, Principal Suppliers and Level of Duty.

The first four lines of the table show total imports (m.f.n., preferential and other) of all ores and metals into each of the Tariff Study countries (see column headings) and into the eleven markets combined ("11 Tariffs"), distinguishing between imports from developed countries (DDC/DEV), imports from developing countries (DGC/PVD) and from countries in the Eastern trading area (ETA/EST).

On the subsequent lines, the table distinguishes the following trade flows, broken down according to the level of m.f.n. duty<sup>1</sup> (1st column):

- (i) total imports of m.f.n. origin (including imports from countries entitled to the GSP);
- (ii) the network of m.f.n. trade among the Tariff Study countries;
- (iii) imports from other principal suppliers listed in decreasing order of importance.

Since only imports of m.f.n. origin are reported, intra-community (EC) trade, trade between the EC and the EFTA countries as well as trade under other free-trade area or preferential agreements do not appear in this table; this applies even to products which do not enjoy the free-trade area or preferential treatment, such as certain commonwealth trade and certain EC imports from Mediterranean associates.

Tariff and trade data are based on the Tariff Study documentation. The m.f.n. duties considered are those generally in force as of 1 January 1973. The trade figures are expressed in thousands of United States dollars and refer to the year 1971 except for Australia (1971/72) and New Zealand (1970/71). For more detailed definitions and sources, see introductory notes to the tariff study publication mentioned above.

---

<sup>1</sup> Only those duty ranges carrying import values are reported. For the detailed information on duties applicable in this category, see I.5.

Table I.4

Value of imports of ores and concentrates, unwrought metals and metal semi-manufactures into the Tariff Study countries from all origins and by principal m.f.n. and GSP suppliers, by level of m.f.n. duties in 1971

The presentation of this table is the same as in Table I.3. It shows imports of all ores and metals broken down by the following stages of processing: ores and concentrates ("ores/minerais"), unwrought metals ("metal, unwr./brut") and metal semi-manufactures ("metal procts.").

The definition of the three stages of processing is as follows:

Ores and concentrates: BTN No. 26.01, 26.03, 28.20 and 73.03.

Unwrought metals: BTN No. 73.01, 73.02, 73.04-07, 74.01, 74.02, 75.01, 76.01, 77.01, 78.01, 79.01 and 80.01.

Metal semi-manufactures: BTN No. 73.08-18, 74.03-08, 75.02-05, 76.02-07, 77.02, 77.04, 78.02-05, 79.02-04, 80.02-05 and 81.01-04.
