

RESTRICTED

MTN/TP/W/11
14 October 1975

Special Distribution

GENERAL AGREEMENT ON TARIFFS AND TRADE

Multilateral Trade Negotiations

Group "Tropical Products"

CONSOLIDATED LIST OF INITIAL REQUESTS

Note by the Secretariat

1. In an attempt to provide an overall view of requests for concessions on tropical products, the secretariat has consolidated, generally at the BTN four-digit level, the lists circulated in the MTN/TP/R series of documents up to 30 September 1975. It may be noted that requests for concessions on tropical products were mostly made at the level of the tariff line or part tariff line, thus the details shown in the attachment may not precisely reflect the situation with respect to a particular item for which a concession is being sought. For greater detail in this respect, delegations are invited to refer to the request lists submitted by the developing country participants concerned.
2. The tabulations bring together information in such a way as to make it possible to identify positions where different developing country participants have submitted requests for concessions under the same four-digit heading, together with an indication, by means of symbols, of the type of concessions being sought in the fields of tariffs and non-tariff measures.
3. The tabulations cover all requests for concessions submitted by participants without implying any judgement as to whether a particular product may or may not be considered a tropical product.
4. At the time of preparation of this note, requests for concessions submitted by thirty-one developing country participants had been addressed to other participants from which concessions are being sought. The attachment is subject to revision, addition, etc. in the light of modifications notified by participating countries and additional requests for concessions which may be presented.
5. Products contained in the request lists fall within 180 BTN four-digit headings, of which approximately 100 are in BTN Chapters 1-24. An examination of requests for tariff concessions shows that most requesting countries have submitted requests for concessions on an m.f.n. basis for selected products and many have asked for improvements in the GSP in respect of certain items. Some countries have requested the binding of the GSP at "zero" rate or tariff bindings in a special schedule of

preferential concessions for developing countries. The lists of three participants include requests for the binding of Commonwealth Preferential rates of duty. It may also be noted that in many cases, the requested rate of duty is "zero" either on an m.f.n. or a preferential basis and in a number of cases requests were made for the maximum possible reduction of m.f.n. duties taking into account such problems as those relating to tariff escalation in respect of semi-processed and processed products. The lists of a number of countries include requests for separate tariff classification in order to provide concessional treatment for certain items not at present separately classified in certain tariff schedules. Those of a few countries include requests for advance implementation of concessions.

6. Non-tariff measures most frequently referred to in the request lists are import restrictions, charges on imports (e.g. internal taxes, variable levies, etc.) and certain technical barriers (health and sanitary regulations, marking, packaging and labelling requirements, standards, etc.). Other requests in the field of non-tariff measures relate to State trading and customs entry procedures. In certain cases, preferential or differential treatment for developing countries has been requested with regard to the application of import charges, import restrictions, health and sanitary regulations and State trading.

SYMBOLS USED IN THE ATTACHED TABLE FOR INDICATING DIFFERENT TYPES OF REQUESTS FOR CONCESSIONS ON TARIFFS AND NON-TARIFF MEASURES

Tariffs

- No symbol - Requests for tariff concessions on an m.f.n. basis and requests where the type of tariff concession being sought is unspecified.
- + - Requests for improvements in the GSP.
- ++ - Requests for tariff concessions on an m.f.n. basis and/or for improvements in the GSP.¹ In certain of these cases, it is stated that the latter would be preferable.
- * - Requests for certain special types of tariff concessions e.g. binding of GSP at the present or at reduced rates of duty or bindings in a special schedule of preferential concessions for developing countries. It also indicates a number of requests for the binding of Commonwealth preferences.

Non-tariff measures

- 1 - Requests for concessions on State trading and government monopoly practices.
- 2 - Requests for concessions on customs and administrative entry procedures.
- 3 - Requests for concessions on standards, e.g. health and sanitary regulations, requirements concerning marking, labelling and packaging, marketing standards, the product content requirements.
- 4 - Requests for concessions on import restrictions, licensing requirements and export restraints.
- 5 - Requests for concessions on charges on imports, e.g. internal taxes, variable levies and import deposits.
- 6 - Requests for concessions on miscellaneous or unidentified measures.

¹Included in this category are not only the cases where the two different types of concessions have been requested as alternatives in respect of one tariff heading but also where the two types of requests have been made in respect of different BTN sub-headings which fall under the same BTN four-digit heading.
