This document replaces the pages 403 to 415 of document COM.AG/W/68/Add.2/Part 2.

EXPLANATORY NOTES

1. The products subject to the various restrictions are shown in the list, and arranged by their respective BTN numbers.
2. The United States have indicated an interest in all items listed.
3. Type of restrictions: the following symbols are used in the list.

LBO conditionally liberalized; purchaser may import on a liberalized basis after purchasing certain specified quantities from countries with which Yugoslavia has bilateral trading agreements.

GDK imported within framework of global foreign exchange quota - that is purchased with foreign exchange allocations from Federal funds or purchasers own resources (e.g. retention quotas).

RK imports under commodity quota.

D import licence required.

1/ effective 20 June 1969, the Yugoslav Government requires special permits for the importation of these goods - these permits will complement, not replace, the existing system for obtaining foreign exchange. Thus after getting the permit, the importer must then meet the requirements of the foreign exchange category governing the item. Issuance of the permit does not constitute permission to buy foreign exchange.
