EXPLANATORY NOTES

1. The products subject to the various kinds of restrictions are listed and classified in the order of the BTN headings under which they fall.
2. Canada has indicated an interest in BTN items 10.05, 20.02, 20.04, 20.06, 21.04, 21.05 and 21.07; the United States has indicated an interest in all the products listed.
3. Type of restriction:

The entry on Open General Licence of all goods other than those on the Negative List is permitted from all countries of the world, except the following countries, all imports from which are subject to licensing:

Albania, Bulgaria, China, Czechoslovakia,
Democratic Republic of Germany, Hungary,
North Korea, Poland, Romania, USSR and
Yugoslavia.

Although all imports from Czechoslovakia, Poland and Yugoslavia are subject to licence, in practice licences are granted freely for imports of goods not on the Negative List as it applies to other countries.

The following symbols are used in the list:

- P: Prohibition
- L: Licensing
- GQ: Global quota
- BQ: Products subject to bilateral or regional agreements

4. There are certain items not on the Negative List imports of which are not freely allowed on grounds of health or public safety and welfare. Products containing saccharine or other artificial sweetening agents may not be imported without a recommendation by the Ministry of Health.
5. Trinidad and Tobago is a party to the Caribbean Free Trade Association (CARIFTA). The Agreement provides that "Subject to anything to the contrary in any agricultural marketing arrangements made pursuant to paragraph 6 of Annex A¹ and laid down in a Protocol between the Parties to this Agreement, a member Territory shall not apply any quantitative restrictions on imports of goods from any other part of the Area" (Article 13, paragraph 1).

¹Annex A, paragraph 6 states:

"Marketing agreements for an agreed list of agricultural commodities should be sought to come into effect at the same time as the commencement of free trade and the territories in the region should examine the possibility of restricting imports from extra-regional sources of agricultural products that are produced within the region and are available for satisfying regional demand."

The Protocol laying down marketing arrangements for sugar states that any member Territory in which sugar is produced may apply quantitative restrictions on imports into that Territory of sugar from any other part of the area. The Protocol laying down agricultural marketing arrangements¹ states:

"Para. 3: Subject to paragraphs 4 and 5, imports of any commodity into a member Territory shall be from within the Area.

Provided that, during a period of three years commencing with the date of the coming into operation of this Protocol, imports of any commodity into a member Territory from outside the Area may, in the aggregate for each of those years, amount to not more than 30 per cent of the imports of such commodity into that member Territory from outside the Area during the year 1966.

Para. 4: (1) Imports of any commodity into a member Territory from outside the Area, not being allowed under the proviso to paragraph 3, are permissible by prior sanction of the secretariat at the member Territory's request made through notification thereof by its Government to the secretariat.

(2) The secretariat shall give such sanction only when a deficit in reference to the commodity in question has been declared to exist in the said member Territory under sub-paragraph (4) of paragraph 6."

6. Comments: Except where otherwise stated, the comments in this column are taken from document L/2749/Add.7.

7. References: L/2749/Add.7; L/3074.
