BLOCKCHAIN PROJECTS
DUTCH GOVERNMENT

**MINISTRY OF INTERIOR AFFAIRS**
Conducted research into the potential powerful combination of digital identity and Blockchain.

**MINISTRY OF JUSTICE**
Did research to the possibilities to use Blockchain for the execution of the judicial decisions of juvenile courts.

**COURT OF AUDIT**
Investigated whether the role as controller of 240 billion Euros of yearly expenditures by the central government would change as the result of blockchain based administrations.

**HUMAN ENVIRONMENT AND TRANSPORT INSPECTORATE**
Rethought the administrative and logistical process of transporting toxic waste from the Netherlands to another EU State.

**MINISTRY OF FOREIGN AFFAIRS**
Developed a blockchain based system for the tracking of working and ruling diplomats.

**HUMAN ENVIRONMENT AND TRANSPORT INSPECTORATE**
Created a blockchain process to make the financial and administrative process for subsidised public healthcare services more efficient.

**CIBG**
Did research into the ways to use blockchain as part of a register for medical instruments.

**THE INSPECTORATE OF THE MINISTRY OF EMPLOYMENT**
Created a use case for the improvement of data sharing with several other governmental organizations in order to improve detection of fraud, exploitation and organised crime within the chain of work and income.

**CHAMBER OF COMMERCE**
Developed the business case for a blockchain service to make it possible to quickly establish a temporary foundation.

**CITY OF THE HAGUE**
Developed a significantly improved (and highly automated) regulation for subsidies on electric vehicles.

**CITY OF AMSTERDAM**
Looked into more simple and efficient ways to apply for a personal healthcare budget than the current complex financial and administrative process.

**STICHTE VECHT**
Streamlined the process of requesting specific healthcare service (for example: wheel chair, stair lift) that requires data sharing with several other governmental organizations and healthcare organizations.

**JUSTID (JUDICIAL INFORMATION SERVICES)**
Worked out a proof of concept for a log of what information was shared with whom at what time during a criminal trial proceedings.

**CADASTRE, LAND REGISTRY AND MAPPING AGENCY**
Developed a use case for Blockchain based registration of ships with the Delft University of Technology.

**THE CITY OF ZUIDHORN**
Developed a prototype of a blockchain based service to make it easier to get subsidies from different aid organizations.

**HEALTHCARE INSTITUTE**
Built a prototype on Ethereum to create a clear overview of authorisations in the healthcare process.

**LEGAL AID BOARD**
Developed a use case for a faster, more secure automated process for the attribution of legal support.

**TAX AND CUSTOMS ADMINISTRATION**
Created a use case that makes it possible to redistribute (income) tax money as soon as it gets deducted from an employed income.

**PROVINCE OF NOORD-BRABANT**
Developed a use case that showed that it would be possible to reduce the time to get through the administrative and financial processes for subsidies from 13 weeks to 13 minutes.

**DRECHSTEDEN**
Created a use case for Blockchain to streamline the process of the assignment of parking licenses for disabled citizens.

**BAD ORGANISATION**
Rethought the permit system for organizers of larger events (concerts for example) which

**CITY OF UTRICHT**
Created a use case for the improvement of data sharing within the waste sector.

**CITY OF EINDHOVEN**
Developed a blockchain
EU report on blockchain and the GDPR

01 November 2018

New Business models with Blockchain for Good
Verifiable credentials for employees and students

Project Description

Certifications play a key role throughout life. To increase employee and student mobility we focus on 2 use cases that leverage blockchain:

- Student mobility: test that exchange students can successfully verify their credentials between Singapore and The Netherlands
- Employee wallet: test that graduated student can successfully verify their credentials when applying for a professional career role

- Dutch Ministry of Education leads the European blockchain program for diplomas of the DG Connect
- The Netherlands is the only country in Europe with a centralized register for diplomas, the most logical partner to collaborate between Asia and Europe.
- RABOBANK leads a nation-wide ecosystem initiative called the Career Wallet in NL, which is part of the Dutch Blockchain Coalition. It recently received a silver Stevie Award as most innovative HR technology application.
Known Traveller Project
BLING - Blockchain IN Government

13 partners working together on innovative customer services solutions

Could the technology of Blockchain provide a solution to governmental problems? Can public service delivery of the municipality be improved by means of this promising technology? Could governmental organisations increase their planning by implementing Blockchain?

The BLING project will, by combining the expertise of knowledge institutions and the playing field of municipalities and governmental organisations together with businesses and citizens, investigate what role Blockchain can be for governments.

Regulatory sandbox

The AFM and DNB want to offer more room for innovation, in order to enable market participants to roll out their innovative financial products, services or business models. Our regulatory sandbox is available to all financial enterprises wanting to roll out an innovative financial concept. This initiative can be used by both existing and new firms.

Our point of view

By focusing more on what rules are actually trying to achieve, we can create more room for innovation by avoiding unnecessary barriers.

How we can support you?

The regulatory sandbox is open to all innovations that contribute positively to a stable financial sector.

Report: Room for innovation

Ask your question regarding the regulatory sandbox
THANK YOU
