TARIFFS

Get tariff data

The WTO website now offers sophisticated options for researching members' customs duty rates and in many cases imports. One, the new **Tariff Analysis Online**, draws on two databases to offer tariff rates on products defined at the highest level of detail, import statistics and the ability to analyse these interactively. Another, the **Tariff Download Facility**, provides standardized tariff statistics, in slightly less detail but with the ability to compare between countries immediately.

Welcome to the Tariff Download Facility

This database contains comprehensive information on Most- Favoured-Nation (MFN) applied and bound tariffs at the standard codes of the Harmonized System (HS) for all WTO Members. When available, it also provides data at the HS subheading level on non-MFN applied tariff regimes which a country grants to its export partners. This information is sourced from submissions made to the WTO Integrated Data Base (IDB) for applied tariffs and imports and from tl Schedules (CTS) database for the bound duties of all WTO Members.

The information contained in this database complements the summar World Tariff Profiles . The Tariff Download Facility allows flexible sele reporters, years and products and download in various formats.

Users interested in more detailed information and analytical features (Tariff Analysis Online).

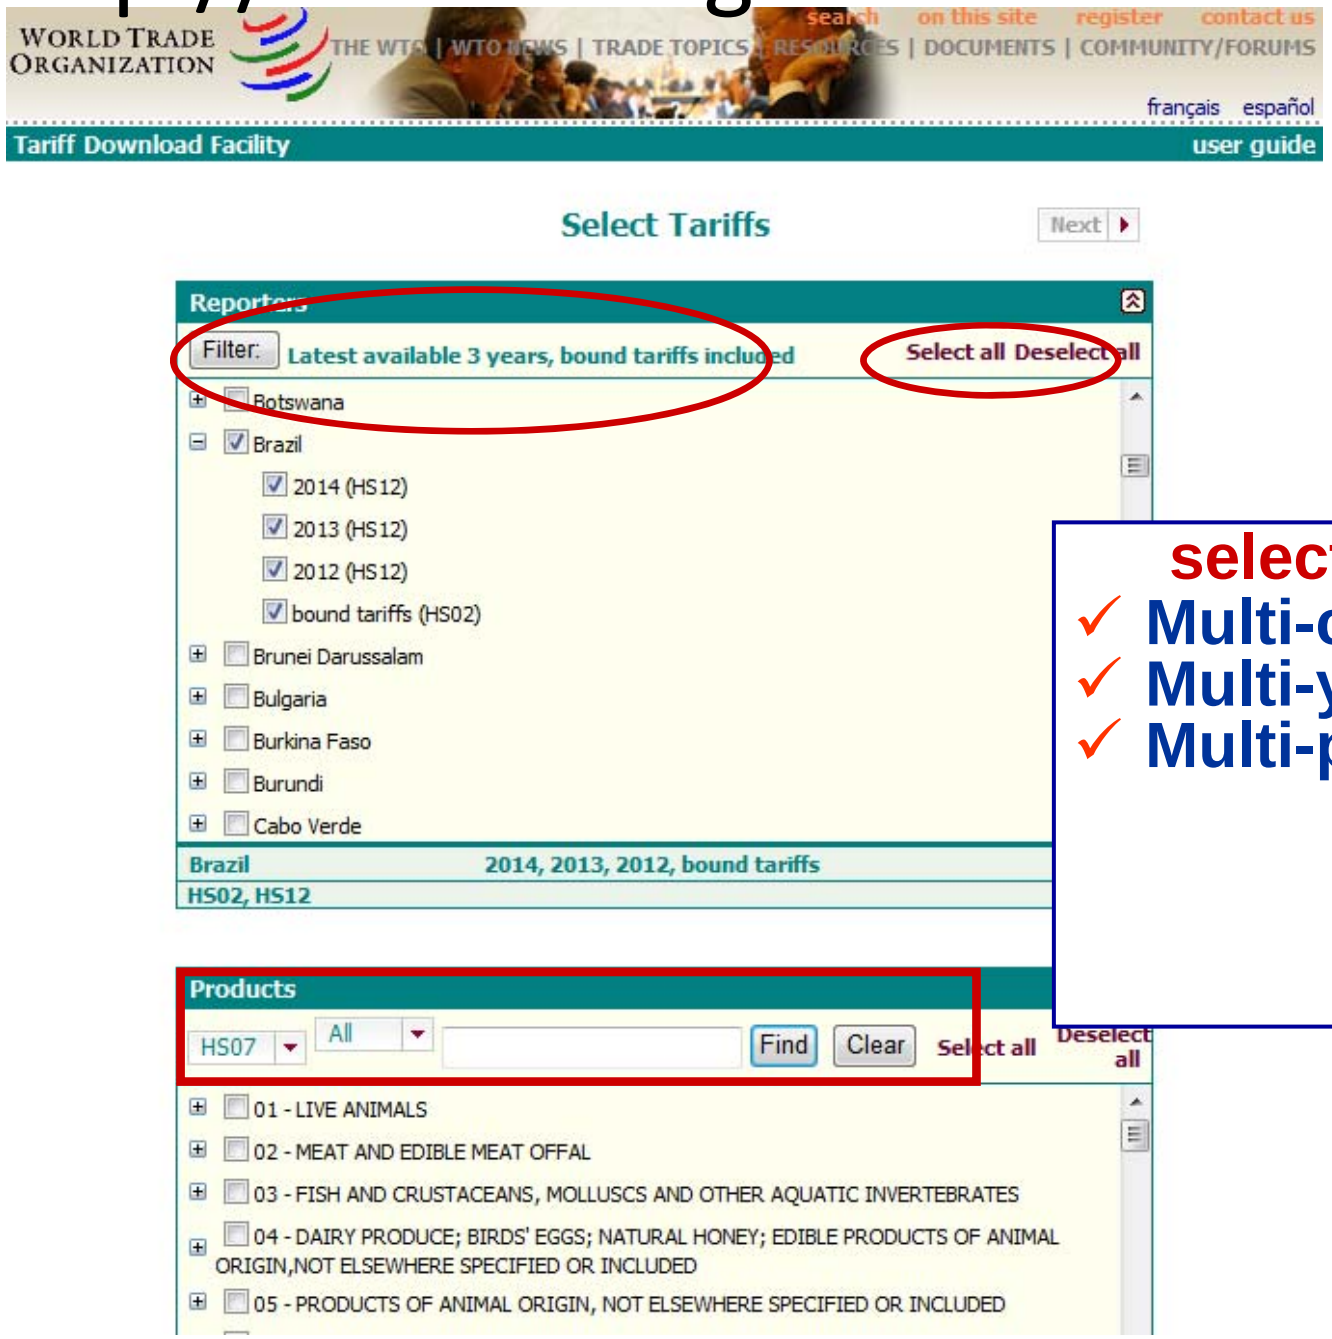

Additional information on Regional Trade Agreements (RTAs) can be Information System for those RTAs that have been notified to the WT
