Products may only be placed on the market or put into service when they confirm to prescribed technical requirements, when their conformity with technical requirements has been assessed according prescribed procedure, when they are marked on prescribed manner and when are followed with documents specified in technical regulations.

Article 2

Technical regulations for prescribing technical requirements shall be issued when this is necessary for the protection of public interest, especially for defence and safety of country, protection of human life and health and life and health of animals and plants, protection and development of environment and nature, protection of consumers and other users of products and protection of property.

Technical regulations shall be issued by the Minister in charge of Ministry responsible by Act with tasks concerning products production, marketing and putting into service.

Technical regulations shall be issued for particular products or groups of products, procedures and methods of production concerning these products and compulsory should content one or more of elements as:

1. technical requirements the products should have to meet;
2. procedure, method and state of affairs for evaluation the assessment of conformity according technical requirements;
3. requirements that the bodies involved in the procedure of assessment of conformity should meet (hereinafter: conformity assessment bodies);
4. documents that should accompany a product when placed on the market or put into service and
5. obligation for marking and method of marking the product.

During preparation of technical regulations, the last state of the art scientific and professional achievements shall be used, taking in consideration the needs and possibilities of the economy of the Republic of Macedonia, as well as the obligations arised from ratified international treaties, binding on the Republic of Macedonia.

**Article 3**

Some of the terms used in this Act, shall mean as follows:
1. "Product" shall mean any product as a result of specified processing activities;
2. "Technical regulation" shall mean a regulation laying down the characteristics of a product or its related production procedure and method. In this respect it may also comprise or treat exclusively terms, symbols, packaging, declaration and marking;
3. "Technical specification" shall mean a document that prescribes the technical requirements to be fulfilled by a product, and when appropriate, also the procedures for determination that the given requirements have been fulfilled;
4. "Placing on the market" shall mean the initial action of making a product available, for payment or free of charge, on the market of the Republic of Macedonia;
5. "Putting into service" shall mean first use of a product by the final user in the Republic of Macedonia;
6. "Supplier" shall mean the manufacturer, his authorized representative based in the Republic of Macedonia, the importer or any other natural or legal person who had placed the product on the market or ensured its putting into service;

7. "Conformity assessment procedure" shall mean any procedure applied, directly or indirectly, to determine that the specified requirements are fulfilled;

8. "Conformity assessment body" shall mean a laboratory independent of the supplier, a certification body, an inspection body or any other body involved in conformity assessment procedure;

9. "Conformity certificate" shall mean a document issued in compliance with the rules of the certification system, which provides confidence that the identified process, product or service is in compliance with specified standard or other normative document;

10. "Certification mark" shall mean mark of conformity, used or issued in compliance with rules of certification system, which shows provided confidence that a product, process or service is in compliance with specified standard or other normative document;

11. "Accreditation" shall mean expert procedure performed by Macedonian Accreditation Institute, on the base of established criteria, of determination if specified natural or legal person fulfills necessary conditions for granting an accreditation certificate, as a formal recognition of competence, to carry out specified tasks in the field of conformity assessment.

**Article 4**

It may be specified by a technical regulation that a product is presumed to be in conformity with the technical requirements, when it complies with the requirements of the standards adopted by Macedonian Standardization Institute.

In the cases concerning preceding paragraph, in technical regulation shall be declared a list of standards, on which base shall be assessed conformity of product with technical requirements.
Technical regulation of paragraph 1 of this Article shall be issued by the Minister responsible for issuing a particular regulation, in agreement with the Minister of Economy.

**Article 5**

Mandatory use of technical specifications may be prescribed by technical regulations. Technical specifications shall be issued by the Minister responsible for issuing technical regulations, on the base of proposal of the committee comprised of the scientists and experts from relevant field. Committee of paragraph 2 of this Article shall be appointed by the Minister responsible for pronouncing technical regulation. In addition of technical regulation of paragraph 1 of this Article, a list of technical specifications shall be issued and method and state of affairs of making available technical specifications to the public, shall be prescribed.

**Article 6**

Technical regulations shall specify the products for which, prior to placing them on the market or putting them into service, the supplier is required to:

1. ensure implementation of the procedures for assessment of conformity with the prescribed technical requirements;
2. issue or provide a declaration of certificate of conformity;
3. produce and keep technical documentation within the prescribed form and scope, and keep this documentation within the prescribed manner and time limits;
4. implement prescribed marks of conformity.

Prescribed conformity assessment procedures may be specified directly, in technical regulation, or indirectly, in technical specification or standard adopted by Macedonian Standardization Institute.
Products which are assessed as non-conforming to prescribed technical requirements, and products which in accordance of law or other regulation are exempted from marking with mark of conformity, shall not be marked with any mark of conformity or other mark, whose similarity with the prescribed mark of conformity would be such that they could mislead the consumers or create confusion on the market.

**Article 7**

In dependance of the degree of complexity of the product and estimated risk related to its use, implementation of one or several following procedures for conformity assessment of product, may be specified by a technical regulation:

1. The manufacturer's conformity assessment of the product;
2. Conformity assessment of the product performed by a conformity assessment body, either on a sample or on a statistically selected sample taken from the production process;
3. The manufacturer's management of the production process quality system, or
4. Evaluation of adequacy and supervision of the manufacturer's production process quality system, carried out by a conformity assessment body.

**Article 8**

In technical regulation shall be laid down the requirements to be fulfilled by conformity assessment body, especially concerned to:

- professionally trained staff, space and technical equipment;
- independence and impartiality in relation to the legal or natural persons directly or indirectly connected with the product under conformity assessment;
- business confidentiality;
- liability insurance for the work done, except in the case where liability is insured on a statutory basis by the State;
other conditions ensuring appropriate implementation of prescribed procedure.

**Article 9**

The legal or natural person wishing to obtain status of conformity assessment body, shall assign to the Ministry responsible for issuing technical regulation, request for assessment of the conditions prescribed in the technical regulation in accordance of Article 8 of this Act.

If it is assessed that the conditions for obtaining status of conformity assessment body, prescribed in technical requirement, are fulfilled, Minister responsible for issuing technical regulation, in accordance with prior provided agreement of the Minister of Economy and obtained opinion of the Macedonian Accreditation Institute, shall authorise, by decision, the legal or natural person to perform conformity assessments.

Macedonian Accreditation Institute is responsible, during evaluation of the opinion of paragraph 2 in this Article to respect the statements of technical regulation and the relevant accreditation criteria.

The decision of paragraph 2 of this Article shall be published in "Official Journal of the Republic of Macedonia".

The decision of paragraph 2 of this Article, shall be time limited.

**Article 10**

The legal or natural person designated as conformity assessment body shall permanently meet and maintain the requirements prescribed by technical regulation and relevant accreditation criteria defined by Macedonian Accreditation Institute.

Should relevant inspection body find that the body of paragraph 1 of this Article fail to meet particular requirement prescribed by technical regulation, the inspection body shall propose to the Minister responsible for issuing technical requirement to announce decision for withdrawing decision of paragraph of Article 9 of this Act.
Article 11

Assessment of conformity shall be performed by inspection or other state body, if it is defined in the technical regulation. Inspection or other state body of paragraph 1 of this Article when performing tasks of conformity assessments, has status of conformity assessment body.

Article 12
