Main Rules of Interpretation of the Commodity Classification of Foreign Economic Activity

Classification of commodities in the Commodity Classification of the Foreign Economic Activity (CC FEA) is being done according to the following Rules:

- **1.** The names of sections, chapters, and subchapters are provided for the sole purpose of convenience of using the CC FEA; for legal purposes, classification of commodities in the CC FEA is done on the basis of texts of headings and respective notes to sections or chapters, and, if otherwise is not required by the texts, in compliance with the following provisions:
- **2.** a) Any reference in the name of a heading to any commodity ought to be regarded also as a reference to such commodity when supplied as incomplete set or in unfinished form under the condition that, if presented as incomplete set or in unfinished form, this commodity features the main characteristics of a complete set or finished commodity, and also ought to be regarded as a reference to a complete or finished commodity (or classified in the given heading as complete or finished commodity because of the given Rule) presented in unassembled or disassembled form.
- b) Any reference in the name of a heading to any material or substance ought to be regarded also as a reference to mixtures or compounds of this material or substances with other materials or substances. Any reference to a commodity made of a definite material or substance ought to be regarded also as a reference to commodities fully or partly consisting of this material or substance. Classification of commodities consisting of more than one material or substance is done in compliance with provisions of Rule 3.
- **3.** In cases when, owing to Rule 2 (b), or for any other reasons, the commodities may be referred to two or more headings, classification of such commodities is being done as follows:
- a) Preference is given to the heading containing the most specific description of the commodity, rather than the headings with a more general description. However, when each of the two or more of the headings pertains to only part of materials or substances making part of the mixture or a multi-component item, or only to individual parts of the commodity presented in a retail-trade set, then the given headings should be regarded as equal to the given commodity, even if one of them provides a fuller or more precise description of the commodity.
- b) Mixtures, multi-component items consisting of various materials or made of various components and commodities presented in retail-trade sets which cannot be classified using provisions of Rule 3 (a) ought to be classified using the material or integral part which determine the main feature of the given commodities under the condition that this criteria is applicable.
- c) Commodities which cannot be classified using provisions of Rule 3 (a) or 3 (b) must be classified in the last heading in the ascending sequence of codes among headings equally acceptable for consideration when classifying the given commodities.
- **4.** Commodities which cannot be classified using provisions of the above Rules shall be classified in the heading corresponding to commodities closest (similar) to the considered commodities.
- **5.** In addition to the above provisions, the following Rules should be applied to the below commodities:
- a) Casings and housings for photo cameras, musical instruments, rifles, drawing appliances, necklaces, as well as similar containers (packages) of special shape and designed to store respective items or sets of items fit for continuous use and presented together with the items for which they are intended ought to be classified together with the items packed in it. The given Rule, however, does not apply to containers (packages) which, while forming an integral whole with the packed items, can attach an essentially different property to the latter.
- b) According to provisions of the above Rule 5 (a), packaging materials and packaging containers supplied together with commodities ought to be classified together, if they are of the type which is usually used to pack the given commodities. However, the given provision is not mandatory, if such packaging materials or packaging containers are clearly fit for repeated use.
- **6.** For legal purposes, commodity classification in a subheading of a heading shall be done in compliance with subheading titles and notes pertaining to subheadings, as well as provisions of the above rules under the condition that only subheadings of the same level can be comparable. For the purposes of the given Rule, respective notes to sections and chapters can also be applied, if otherwise is not stated in the context.

The Peculiarities of Applying Specific and Combined Kinds of the Rates of Import Customs Duties

When the computation is done of sums of the customs duties levied at specific rates set in euros per kilogram of the weight of a good there shall be used as computation base the weight of the good with the account taken of the primary packing thereof, i.e. the packing that is inseparable from the good prior to the consumption thereof and in which the good is put on retail sale.

Chapter 02 Meat and Edible Meat Offal

Note:

- **1.** This chapter does not cover:
- a) products unfit for human consumption of the kind described in Headings 0201-0208 or 0210;
- b) guts, bladders, or stomachs of animals (Heading 0504) or animal blood (Heading 0511 or 3002); or
 - c) animal fat other than products of Heading 0209 (Chapter 15).

Additional notes:

- **1A.** The following terms shall have the meanings hereunder assigned to them:
- a) "carcasses of bovine animals", for the purposes of Subheadings 0201 10 and 0202 10, whole carcasses of the slaughtered animals after having been bled, eviscerated, and skinned, imported with or without heads, with or without feet, and with or without other offals attached. Where carcasses are imported without heads, the latter must have been separated from the carcass at the atloido-occipital joint. When imported without feet, the latter must have been cut off at the carpo-metacarpal or tarso-metatarsal joints; "carcass" shall include the front part of the carcass comprising all bones and the scrag, with the neck and shoulder having more than 10 pairs of ribs;
- b) "Half-carcasses of bovine animals", for the purposes of Subheadings 0201 10 and 0202 10, the product resulting from the symmetrical division of the whole carcass through the center of each cervical, dorsal, lumbar, and sacral vertebra and through the center of the sternum and of the ischiopubeic symphysis; "half-carcass" shall include the front part of the half-carcass comprising all the bones and the scrag, with the neck and shoulder having more than 10 ribs;
- c) "Compensated quarters", for the purposes of Subheadings 0201 20 200 and 0202 20 100, portions composed of either:

forequarters comprising all the bones and the scrag, neck, and shoulder, and cut at the tenth rib, and hindquarters comprising all the bones, and the thigh and sirloin, and cut at the third rib, or

forequarters comprising all the bones and the scrag, neck and shoulder, and cut at the fifth rib, with the whole of the flank and breast attached; and hindquarters comprising all the bones and the thigh and sirloin, and cut at the eighth rib.

The forequarters and the hindquarters forming "compensated quarters" must be imported at the same time and in equal numbers, and the total weight of the forequarters must be the same as that of the hindquarters; however, a difference between the weights of the two parts of the consignment is allowed, provided that this does not exceed 5% of the weight of the heavier part (foreguarters or hindquarters);

- d) "unseparated forequarters", for the purposes of Subheadings 0201 20 300 and 0202 20 300: the front part of a carcass comprising all the bones and the scrag, neck, and shoulder, with a minimum of four pairs of ribs and a maximum of 10 pairs of ribs (the first four ribs must be whole, the others may be cut) with or without the thin flank;
- e) "separated forequarters", for the purposes of Subheadings 0201 20 300 and 0202 20 300: the front part of a half-carcass comprising all the bones and the scrag, neck, and shoulder, with a minimum of four ribs and a maximum of 10 ribs (the first four ribs must be whole, the others may be cut) with or without the thin flank;
- f) "unseparated hindquarters", for the purposes of Subheadings 0201 20 500 and 0202 20 500: the rear part of a carcass comprising all the bones and the thigh and sirloin, including the filet, with a minimum of three pairs of whole or cut ribs, with or without the shank, and with or without the thin flank;
- g) "separated hindquarters", for the purposes of subheadings 0201 20 500 and 0202 20 500: the rear part of a half-carcass comprising all the bones and the thigh and sirloin, including the filet, with a minimum of three whole or cut ribs, with or without the shank, and with or without the thin flank;
- h) 1. "crop" and "chuck and blade" cuts, for the purposes of Subheading 0202 30 500: the dorsal part of the forequarter, including the upper part of the shoulder, obtained from a forequarter with a minimum of four ribs and a maximum of 10 ribs by a cut along a straight line through the point where the first rib joins the first segment to the point of reflection of the diaphragm on the tenth rib;
- h) 2. "brisket" cut, for the purposes of Subheading 0202 30 500: the lower part of the forequarter comprising the brisket navel end and the brisket point end.

- **1B.** Products covered by Additional Notes 1A (a) to (g) to this chapter may be presented with or without the vertebral column.
- **1C.** In determining the number of whole or cut ribs referred to in Additional Note 1A, only those attached to the vertebral column shall be taken into consideration. If the vertebral column has been removed, only the wole or cut ribs which otherwise would have been directly attached to the vertebral column shall be taken into consideration.
 - **2A.** The following terms shall have the meanings hereunder assigned to them:
- a) "carcasses or half-carcasses", for the purposes of Subheadings 0203 11 100 and 0203 21 100: slaughtered pigs in the form of carcasses of domestic swine which have been bled and eviscerated and from which the bristles and hooves have been removed. Half-carcasses are derived from whole carcasses by division through the center of each cervical, dorsal, lumbar, and sacral vertebra, and through the center of the sternum and the ischio-pubic symphysis. These carcasses and half-carcasses may be with or without the head, feet, flare fat, kidneys, tail, or diaphragm. Half-carcasses may be with or without the spinal cord, brain, or tongue. Carcasses and half carcasses of sows may be with or without the udders (mammary glands);
- b) "hams" (legs), for the purposes of Subheading 0203 12 110, 0203 22 110, 0210 11 110 0, and 0210 11 310 0: the posterior (caudal) part of the half-carcass including the bones, with or without the foot, shank, rind, or subcutaneous fat.

The ham (leg) is separated from the rest of the half-carcass so that it includes, at the most, the last lumbar vertebra;

c) "fore-ends", for the purposes of Subheadings 0203 19 110, 0203 29 110, 0210 19 300 0, and 0210 19 600 0: the anterior (cranal) part of the half-carcass without the head, including bones, with or without the foot, shank, rind, or subcutaneous fat.

The fore-end is separated from the rest of the half-carcass so that it includes, at the most, the fifth dorsal vertebra.

The upper (dorsal) part of the fore-end, whether or not containing the blade-bone and attached muscles, (neck-end in fresh or collar in salted condition), is considered a cut of the loin, when it is separated from the lower (ventral) part of the fore-end, at the most by a cut just below the vertebral column:

d) "shoulders", for the purposes of Subheadings 0203 12 190, 0203 22 190, 0210 11 190 0 and 0210 11 390 0: the lower part of the fore-end whether or not containing the blade-bone and attached muscles, including the bones, with or without the foot, shank, rind, or subcutaneous fat.

The blade-bone and attached muscles presented separately shall remain classified in this Subheading as a part of the shoulder.

e) "loins", for the purposes of Subheadings 0203 19 130, 0203 29 130, 0210 19 400 0, and 0210 19 700 0: the upper part of the half-carcass, extending from the first cervical vertebra to the caudal vertebrae, including the bones, with or without the tenderloin, blade-bone, subcutaneous fat or rind.

The loin is separated from the lower part of the half-carcass by a cut just below the vertebral column.

- f) "bellies", for the purposes of Subheadings 0203 19 150, 0203 29 150, 0210 12 110 0 and 0210 12 190 0: the lower part of the half-carcass situated between the ham (leg) and the shoulder, commonly known as "streaky", with or without the bones, but with the rind and subcutaneous fat.
- g) "bacon sides", for the purposes of Subheading 0210 19 100 0: the pig half-carcass without the head, cheek, chap, feet, tail, flare fat, kidney, tenderloin, blade bone, sternum, vertebral column, pelvic bone, and diaphragm;
- h) "spencers", for the purposes of Subheading 0210 19 100 0: the bacon side without the ham, whether or not boned;
- i) "three-quarter sides", for the purposes of Subheading 0210 19 200 0: the bacon side without the fore-end, whether or not boned;
- k) "middles", for the purposes of Subheading 0210 19 200 0: the bacon side without the ham and the fore-end, whether or not boned.

The given Subheading also includes cuts of middles containing tissues of loin and belly in natural proportion to the entire middles.

2B. The parts of the cuts defined in Item 2A(f) fall within the same Subheadings only if they contain the rind and subcutaneous fat.

If the cuts falling within Subheadings 0210 11 110 0 and 0210 11 190 0, as well as 0210 11 310 0, 0210 11 390 0, 0210 19 300 0, and 0210 19 600 0, are derived from a bacon side from which the bones indicated under Paragraph 2A(g) have already been removed, the lines of cutting shall follow those defined under Paragraph 2A (b), (c), (d) accordingly; in any case, these cuts or parts thereof shall contain bones.

2C. Subheadings 0206 49 200 and 0210 99 490, shall include, in particular, heads or halves of heads of domestic swine, with or without the brains, cheeks, or tongues and parts thereof.

The head is separated from the rest of the half-carcass as follows:

- by a straight cut parallel to the cranium; or
- by a cut parallel to the cranium up to the level of the eyes and then inclined to the front of the head, thereby causing the chaps to remain attached to the half-carcase.

The cheeks, snouts, and ears as well as the meat attached to the head, particularly to the rear part, are considered parts of heads. However, the cuts of boneless meat of the fore-end presented alone (jowls, chaps or chaps jowls together), fall within Subheading 0203 19 550, 0203 29 550, 0210 19 500 0, or 0210 19 810 0 as the case may be.

2D. For the purposes of Subheadings 0209 00 110 0 and 0209 00 190 0, "subcutaneous pig fat" shall have the meaning of the fatty tissue which accumulates under the rind of the pig and adheres to it, irrespective of the part of the pig from which it comes; in any case, the weight of the fatty tissue shall exceed the weight of the rind.

Those subheadings also include subcutaneous pig fat from which the rind has been removed.

- **2E.** For the purposes of Subheadings 0210 11 310 0, 0210 11 390 0, 0210 12 190 0, and 0210 19 600 0 to 0210 19 890 0, products in which the water/protein ratio in the meat (protein nitrogen content x 6.25) is 2.8 or less shall be considered as "dried or smoked".
- **3A.** For the purposes of Heading 0204, the following terms shall have the meanings hereunder assigned to them:
- a) "carcasses", for the purposes of Subheadings 0204 10, 0204 21, 0204 30, 0204 41 and Subheadings 0204 50 110 0 and 0204 50 510 0: whole carcasses of the slaughtered animals after having been bled, eviscerated, and skinned, imported with or without the heads, with or without the feet, and with or without the other offals attached. Where carcasses are imported without the heads, the latter must have been separated from the carcass at the atloido-occipital joint. When imported without the feet, the latter must have been cut off at the carpo-metacarpal or tarso-metatarsal joints;
- b) "half-carcasses", for the purposes of Subheadings 0204 10, 0204 21, 0204 30, 0204 41 and Subheadings 0204 50 110 0, 0204 50 510 0: the product resulting from the symmetrical division of the whole carcass through the center of each cervical, dorsal, lumber, and sacral vertebra and through the center of the sternum and of the ischio-pubic symphysis;

Chapter 04 Dairy Produce; Birds' Eggs; Natural Honey; Edible Products of Animal Origin, Not Elsewhere Specified or Included

- 1. The expression "milk" means full cream milk or partially or completely skimmed milk.
- 2. For the purposes of Heading 0405:
- a) the term "butter" means natural butter, whey butter or recombined butter (fresh, salted, or rancid, including canned butter) derived exclusively from milk, with a milkfat content of 80% or more but not more than 95% by weight, a maximum milk solids not-fat content of 2% by weight and a maximum water content 16% by weight. Butter does not contain added emulsifiers but may contain sodium chloride, food colours, neutralizing salts and cultures of harmless lactic-acid-producing bacteria;
- b) the expression "dairy spreads" means a spreadable emulsion of the water-in-oil type, containing milkfat as the only fat in the product, with a milkfat content of 39% or more but less than 80% by weight.

- **3.** Products obtained by the concentration of whey and with the addition of milk or milkfat are to be classified as cheese in Heading No. 0406 provided that they have the three following characteristics:
 - a) a milk fat content, by weight of the dry matter, of 5% or more;
 - b) a dry matter content, by weight, of at least 70% but not exceeding 85 %; and
 - c) they are moulded or capable of being moulded.
 - **4.** This Chapter does not cover:
- a) products obtained from whey, containing by weight more than 95% lactose, expressed as anhydrous lactose calculated on the dry matter (Heading No. 1702); or
- b) albumins (including concentrates of two or more whey proteins, containing by weight more than 80% whey proteins, calculated on the dry matter) (Heading No. 3502) or globulins (Heading No. 3504).

Subheading notes:

- 1. For the purposes of Subheading 0404 10, the expression "modified whey" means products consisting of whey constituents, i.e., whey from which all or part of the lactose, proteins or minerals have been removed, whey to which natural whey constituents have been added, and products obtained by mixing natural whey constituents.
- **2.** For the purposes of Subheading 0405 10 the term "butter" does not include dehydrated butter or ghee (Subheading 0405 90).

Additional notes:

- **1.** The duty rate applicable to mixtures falling within Headings Nos 0401 to 0406 shall be as follows:
- a) in mixtures where one of the components represents at least 90% of weight, the rate applicable to that component applies;
- b) in other mixtures, the rate applicable shall be that of the component which result in the bigbest amount of import duty.

Chapter 08 Edible Fruit and Nuts; Peel of Citrus Fruits or Melons

Notes:

- 1. This Chapter does not cover inedible nuts or fruits.
- **2.** Chilled fruits and nuts are to be classified under the same headings as the corresponding fresh fruits and nuts.
- **3.** Dried fruit or dried nuts of this Chapter may be partially rehydrated, or treated for the following purposes:
- a) for additional preservation or stabilization (e.g., by moderate heat treatment, sulphuring, the addition of sorbic acid or potassium sorbate);
- b) to improve or maintain their appearance (e.g., by addition of vegetable oil and small quantities of glucose syrup), provided that they retain the character of dried fruit or dried nuts.

Additional notes:

- 1. The content of various sugars expressed as sucrose (sugar content) of the products classified within this Chapter corresponds to the figure indicated by a refractometer at a temperature of 20°C and multiplied by the factor 0.95.
- **2.** For the purposes of Subheadings 0811 90 110 0, 0811 90 310 0 and 0811 90 850 0, "tropical fruits" means guavas, mangoes, mangosteens, papaws (papayas), tamarinds, cashew apples, lychees, jackfruit, sapodillo plums, passion fruit, carambola and pitaya.

Chapter 11 Products of the Milling Industry; Malt; Starches; Inulin; Wheat Gluten

Notes:

- **1.** This Chapter does not cover:
- a) roasted malt put up as coffee substitutes (Heading Nos 0901 or 2101);
- b) prepared flours, groats, meals or starches of Heading 1901;
- c) corn flakes and other products of Heading 1904;
- d) vegetables, prepared or preserved, of Heading Nos 2001, 2004 or 2005;
- e) pharmaceutical products (Chapter 30); or
- f) starches having the character of perfumery, cosmetic or toilet preparations (Chapter 33).
- **2A.** Products from the milling of cereals listed in the table below fall within this Chapter if they have, by weight on the dry product:
- a) a starch content (determined by the modified Ewers polarimetric method) exceeding that indicated in column (2); and
- b) an ash content (after deduction of any added minerals) not exceeding that indicated in column (3).

Otherwise, they fall within Heading 2302. However, germ of cereals, whole, rolled, flaked or ground is always classified in Heading 1104.

2B. Products falling within this Chapter under the above provisions shall be classified within Heading 1101 or 1102 if the percentage passing through a woven metal wire cloth sieve with the aperture indicated in column 4 or 5 is not less, by weight, than that shown against the cereal concerned.

Otherwise, they fall within Heading 1103 or 1104.

- **3.** For the purposes of Heading 1103, the terms "groats" and "meal" mean products obtained by fragmentation of cereal grains, of which:
- a) in the case of maize (corn) products, at least 95% by weight passes through a woven metal-wire cloth sieve with an aperture of 2 mm;
- b) in the case of other cereal products, at least 95% by weight passes through a woven metal wire cloth sieve with an aperture of 1.25 mm.

Additional note:

- **1.** For the purposes of Heading 1106, the terms "flour", "meal" and "powder" mean products obtained by milling or some other process from dried leguminous vegetables of Heading 0713, from sago or rots or tubers of Heading 0714 or from products Chapter 08, of which:
- a) in the case of dried leguminous vegetables, sago, roots, tubers and products of Chapter 08 (excluding nuts of Heading Nos 0801 and 0802), at least 95% by weight passes through a woven metal wire cloth sieve with an aperture of 2 mm;
- b) in the case of nuts of Heading Nos 0801 and 0802, at least 50% by weight passes through a woven metal wire cloth sieve with an aperture of 2.5 mm;

- **4.** Soap-stocks, oil foots and dregs, stearin pitch glycerol pitch, and wool grease residues fall within Heading 1522.

Subheadings note:

1. For the purposes of Subheadings 1514 11 and 1514 19, the term "rape oil (of rape or colza) low-containing erucic acid" means fixed oil containing less than 2% by weight of erucic acid.

Additional notes:

- **1.** For the purposes of Subheadings 1507 10, 1508 10, 1510 00 100 0, 1511 10, 1512 11, 1512 21, 1513 11, 1513 21, 1514 11, 1514 91, 1515 11, 1515 21, 1515 50 110 0, 1515 50 190 0, 1515 90 210 0, 1515 90 290 0, 1515 90 400 0 to 1515 90 590 0 and 1518 00 310 0:

 - decantation within the normal time limits;
- centrifugation or filtration, provided that, in order to separate the oils from their solid constituents, only mechanical force, such as gravity, pressure or centrifugal force, has been employed (excluding any adsorption filtering process or any other physical or chemical process);
- b) fixed vegetable oils, fluid or solid, obtained by extraction shall continue to be considered as "crude" when they cannot be distinguished, by their colour, odour or taste, nor by recognized special analytical properties, from vegetable oils and fats obtained by pressure:
- c) the expression "crude oils" shall be taken to extend to de-gummed soya bean oil and to cotton seed oil from which the gossypol has been removed.
- **2A.** Heading Nos 1509 and 1510 cover only oils derived solely from the treatment of olives the analytical characteristics of the acidic and sterol composition of which are as follows:

Heading Nos 1509 and 1510 do not cover chemically altered olive oil (in particular re-esterified olive oil) and mixtures of olive oil with other oils.

- **2B.** Subheading 1509 10 shall covers only olive oils defined in Sections I and II obtained solely using mechanical or other physical means under conditions, that do not lead to deterioration of the oil, and which have undergone no treatment other than washing, decantation, centrifugation or filtration. Olive oils obtained with the use of dissolvents, or chemical or biochemical reagents, or by way of re-ethirisation, as well as any mixtures with oils of other types, are eliminated from this subheading.
- I. For the purposes of Subheading 1509 10 100 0, "virgin lampante oil" whatever its acidity, means olive oil with:
 - a) a wax content not exceeding 300 mg/kg;
 - b) an erythrodiol and uvaol content not exceeding 4.5%;
 - c) a content in saturated fatty acids at the 2-position in the triglycerides not exceeding 1.5%;
- d) the sum of transoleic isomers not more than 0.10%, and the sum of translinoleic + translinolenic isomers not exceeding 0.10%;
 - e) a stigmastadiene content not exceeding 0.50 mg/kg; and
 - f) one or more of the following characteristics:
- 1) a content in volatile halogenated solvents not exceeding 0.20 mg/kg or more than 0.10 mg/kg for any one solvent;

- 2) organoleptic characteristics permitting to reveal defects exceeding permissible limits.
- II. For the purposes of Subheading 1509 10 900 0, "virgin oil" means olive oil having the following characteristics:
 - a) an acid content, expressed as oleic acid, not exceeding 2.0 g per 100 g;
 - b) a peroxide number not exceeding 20 meq O2/kg;
 - c) a wax content not exceeding 250 mg/kg;
- d) a content in volatile halogenated solvents not exceeding 0.20 mg/kg overall and not exceeding 0.10 mg/kg for each solvent;
 - e) a K270 extinction coefficient not higher than 0.250;
 - f) an extinction coefficient variation (delta K), in the 270 nm region, not higher than 0.01;
 - g) organoleptic characteristics permitting to reveal defects exceeding the permissible limits;
 - h) the erythrodiol and uvaol content not exceeding 4.5%;
 - i) a content in saturated fatty acids at the 2-position in triglycerides not exceeding 1.5%;
- j) the sum of transoleic isomers not exceeding 0.05% and the sum of translinolenic + translinoleic isomers not exceeding 0.05%;
 - k) a content in stigmastadien not exceeding 0.15 mg/kg.
- **2C.** Subheading 1509 90 covers olive oil obtained by the treatment of olive oils falling within Subheading 1509 10 100 0 and/or 1509 10 900 0, whether or not blended with virgin olive oil, having the following characteristics:
 - a) an acid content, expressed as oleic acid, not exceeding 1.0 g per 100 g;
 - b) wax content not exceeding 350 mg/kg;
 - c) a K270 extinction coefficient not exceeding 0.90;
 - d) an extinction coefficient variation (delta K) in the 270 nm region, not higher than 0.15;
 - e) an erythrodiol and uvaol content not exceeding 4.5%;
 - f) a content in saturated fatty acid at the 2-position in the triglycerides not exceeding 1.8%;
- g) the sum of transoleic isomers not exceeding 0.20% and the sum of translinoleic + translinolenic isomers not exceeding 0.30%.
- **2D.** For the purposes of Subheading 1510 00 100 0, "crude oils" means oils, particularly olive residue oil, with the following characteristics:
 - a) an erythrodiol and uvaol content exceeding 4.5%;
 - b) a content in saturated fatty acids at the 2-position in triglycerides not exceeding 2.2%;
- c) the sum of transoleic isomers not exceeding 0.20% and the sum of translinoleic + translinolenic isomers not exceeding 0.10%.
- **2E.** Subheading 1510 00 900 0 covers oils obtained by the treatment of oils falling within Subheading 1510 00 100 0, whether or not blended with virgin olive oil, and oils not having the characteristics of the oils referred to in additional notes 2B, 2C, and 2D to the given Chapter. The oils falling within the Subheading must have a content in saturated fatty acids at the 2-position in the triglycerides not exceeding 2.2%, the sum of translinoleic isomers lower than 0.4%, and the sum of translinoleic + translinolenic isomers lower than 0.35%.
 - 3. Subheadings 1522 00 310 0 and 1522 00 390 0 do not cover:
- a) residues resulting from the treatment of fatty substances containing oil having an iodine index lower than 70 or higher than 100;
- b) residues resulting from the treatment of fatty substances containing oil having an iodin index higher than 70 or lower than 100, of which the peak area representing the retention volume of betasitosterol is less than 93% of the total sterol peak area.

Section IV Prepared Foodstuffs; Beverages, Spirits and Vinegar; Tobacco and Manufactured Tobacco Substitutes

Note:

1. In this section the term "pellets" means products which have been agglomerated either directly by compression or by the addition of a binder in a proportion not exceeding 3% by weight.

Chapter 16 Preparations of Meat, of Fish or of Crustaceans, Molluscs, or Other Aquatic Invertebrates

Notes:

- **1.** This Chapter does not cover meat, meat offal, fish, crustaceans, molluscs or other aquatic invertebrates, prepared or preserved by the processes specified in Chapter 02 or 03 or Heading 0504.
- **2.** Food preparations fall in this Chapter provided that they contain more than 20% by weight of sausage, meat, meat offal, blood, fish or crustaceans, molluscs or other aquatic invertebrates, or any combination thereof. In cases where the preparation contains two or more of the products mentioned above, it is classified within headings of Chapter 16 corresponding to the component or components which predominate by weight. These provisions do not apply to the stuffed products of Heading 1902 or to the preparations of Headings 2103 or 2104.

Subheading notes:

- 1. For the purposes of Subheading 1602 10, the expression "homogenized preparations" means preparations of meat, meat offal or blood, finely homogenized, put up for retail sale as infant food or for dietetic purposes, in containers of a net weight not exceeding 250 g. For the application of this definition no account is to be taken of small quantities of any ingredients which may have been added to the preparation for seasoning, preservation or other purposes. These preparations may containing a small quantity of visible pieces of meat or meat offal. Subheading 1602 10 takes precedence over all other subheadings of Heading 1602.
- **2.** The fish and crustaceans specified in the subheadings of Headings 1604 or 1605 under their common names only, are of the same species as those mentioned in Chapter 03 under the same name.

Additional notes:

- 1. For the purposes of Subheadings 1602 31 110 0, 1602 32 110 0, 1602 39 210 0, 1602 50 100 0, 1602 90 610 0, 1602 90 720 0 and 1602 90 740 0, the term "uncooked" shall apply to products which have not been subjected to any heat treatment or which have been subjected to a heat treatment insufficient to ensure the coagulation of meat proteins in the whole of the product and which therefore, in the case of Subheadings 1602 50 100 0, 1602 90 610 0, 1602 90 720 0 and 1602 90 740 0 show traces of pinkish liquid on the cut surface when the product is cut along a line passing through its thickest part.
- **2.** For the purposes of Subheadings 1602 41 100 0, 1602 42 100 0 and 1602 49 110 0 to 1602 49 150 0, the expression "parts thereof" applies only to prepared or preserved meat which, due to the size and the characteristics of the coherent muscle tissue, is identifiable as having been obtained from hams, shoulders, loins, or collars of domestic swine, as the case may be.

Chapter 17 Sugars and Sugar Confectionery

Note:

- **1.** The Chapter does not cover:
- a) sugar confectionery containing cocoa (Heading 1806);
- b) chemically pure sugars (other than sucrose, lactose, maltose, glucose and fructose) or other products of Heading 2940; or
 - c) medicaments or other products of Chapter 30.

Subheading note:

1. For the purposes of Subheadings 1701 11 and 1701 12, "raw sugar" means sugar whose content of sucrose by weight, in the dry state, corresponds to a polarimeter reading of less than 99.5%.

Additional notes:

- **1.** For the purposes of Subheadings 1701 11 100, 1701 11 900, 1701 12 100 and 1701 12 900, "raw sugar" means sugar, not flavoured or coloured or containing any other added substances, containing, in the dry state, less than 99.5% by weight of sucrose determined by the polarimetric method.
- **2.** For the purposes of Subheading 1701 99 100, "white sugar" means sugar, not flavoured or coloured or containing any other added substances, containing, in the dry state, 99.5% or more by weight of sucrose, determined by the polarimetric method.

- $\bf 3.$ For the purposes of Subheadings 1702 30 100 0, 1702 40 100 0, 1702 60 100 0 and 1702 90 300 0, "isoglucose" means the product obtained from glucose or its polymers with a content by weight in the dry state of at least 10% fructose.
 - 4. "Inulin syrup" means:
- a) for the purposes of Subheading 1702 60 800 0, the immediate product, obtained by hydrolysis of inulin or oligofructoses, containing in the dry state exceeding 50% of fructose in free form or as sucrose.
- b) for the purposes of Subheading 1702 90 800 0, the immediate product, obtained by hydrolysis of inulin or oligofructoses, containing in the dry state at least 10% but not exceeding 50% of fructose in free form or as sucrose.

- **5.** For the purposes of Heading 2007, the expression "being cooked preparations" means products obtained by heat-treatment during the atmospheric distillation or a reduced-pressure distillation to increase the product viscosity.
- **6.** For the purposes of Heading 2009, the expression "juices, unfermented and not containing added spirit" means juices of an alcoholic strength by volume (see Note 2 to Chapter 22) not exceeding 0.5% vol.

Subheading notes:

- 1. For the purposes of Subheading 2005 10, the expression "homogenized vegetables" means preparations of vegetables, finely homogenized, put up for retail sale as infant food or for dietetic purposes, in containers of a net content not exceeding 250 g. For the application of this definition no account is to be taken of small quantities of any ingredients which may have been added to the preparation for seasoning, preservation or other purposes. These preparations may contain a small amount of visible pieces of vegetables. Subheading 2005 10 takes precedence over all other subheadings of Heading 2005.
- **2.** For the purposes of Subheading 2007 10, the expression "homogenized preparations" means preparations of fruit, finely homogenized, put up for retail sale as infant food of for dietetic purposes, in containers of a net content not exceeding 250 g. For the application of this definition no account is to be taken of small quantities of any ingredients which may have been added to the preparation for seasoning, preservation or other purposes. These preparations may contain a small amount of visible pieces of fruit. Subheading 2007 10 takes precedence over all other Subheadings of Heading 2007.
- **3.** For the purpose of Subheadings 2009 12, 2009 21, 2009 31, 2009 41, 2009 61 and 2009 71 the term "Brix value" means the direct reading of degrees Brix obtained from a Brix hydrometer or of refractive index expressed in terms of percentage sucrose content obtained from a refractometer, at a temperature of 20 °C or corrected for 20 °C if the reading is made at a different temperature.

Additional notes:

1. For the purposes of Heading 2001, vegetables, fruit, nuts and other edible parts of plants prepared or preserved by vinegar or acetic acid must have a content of free, volatile acid of 0.5% by weight or more, expressed as acetic acid. In addition mushrooms falling under Subheading 2001 90 500 0 should not have a salt content exceeding 2.5% by weight.

- **2.** (a) The content of various sugars expressed as sucrose (sugar content) of the products classified within this Chapter corresponds to the figure indicated by a refractometer at a temperature of 20°C and multiplied by the factor:
 - 0.93 in respect of products of Subheading 2008 20 to 2008 80, 2008 92 and 2008 99, or
 - 0.95 in respect of products of other headings.
- **2.** (b) The expression "Brix value", mentioned in the Subheadings of Heading 2009, corresponds to the figure indicated by a refractometer at a temperature of 20 °C.
- **3.** The products classified within Subheadings 2008 20 to 2008 80, 2008 92 and 2008 99 shall be considered as containing added sugar when the "sugar content" thereof exceeds by weight the percentages given hereunder, according to the kind of fruit or edible part of plant concerned:
 - pineapples and grapes: 13%,
 - other fruits, including mixtures of fruit, and other edible parts of plants: 9%.
- **4.** For the purposes of Subheadings 2008 30 110 0 to 2008 30 390 0, 2008 40 110 0 to 2008 40 390 0, 2008 50 110 0 to 2008 50 590 0, 2008 60 110 0 to 2008 60 390 0, 2008 70 110 0 to 2008 70 590 0, 2008 80 110 0 to 2008 80 390 0, 2008 92 120 0 to 2008 92 380 0 and 2008 99 110 0 to 2008 99 400 0, the following expressions shall have the meanings hereby assigned to them:
- "actual alcoholic strength by mass": the number of kilograms of pure alcohol contained in 100 kg of the product,
 - "% mas": the symbol for alcoholic strength by mass.
- **5.** (a) The added sugar content of products classified under Heading 2009 corresponds to the "sugar content" less the figures given hereunder, according to the kind of juice concerned:
 - lemon or tomato juice: 3;
 - grape juice: 15,
 - other fruit or vegetable juices, including mixtures of juices: 13.
- **5.** (b) The fruit juices with added sugar, of a Brix value not exceeding 67 and containing less than 50% by weight of fruit juices in their natural state obtained from fruits or by dilution of concentrated juice, lose their original character of fruit juices of Heading 2009.
- **6.** For the purposes of Subheadings 2009 60 510 0 and 2009 60 710 0, "concentrated grape juice (including grape must)" means grape juice (including grape must) for which the figure indicated by a refractometer at a temperature of 20°C is not less than 50.9%.

Chapter 22 Beverages, Spirits and Vinegar

Notes:

- **1.** This Chapter does not cover:
- a) products of this Chapter (other than those of Heading 2209) prepared for culinary purposes and thereby rendered unsuitable for consumption as beverages (generally heading 2103);
 - b) sea water (Heading 2501);
 - c) distilled or conductivity water or water of similar purity (Heading 2853);
 - d) acetic acid of a concentration exceeding 10% by weight of acetic acid (Heading 2915);
 - e) medicaments of Headings 3003 or 3004; or
 - f) perfumery or toilet preparations (Chapter 33).
- **2.** For the purposes of this Chapter and of Chapters 20 and 21, the alcoholic strength by volume shall be determined at a temperature of 20°C.
- **3.** For the purposes of Heading 2202, the term "non-alcoholic beverages" means beverages of an alcoholic strength by volume not exceeding 0.5%. Alcoholic beverages are classified within Headings 2203 to 2206 or Heading 2208 as appropriate.

Subheading note:

1. For the purposes of Subheading 2204 10, the expression "sparkling wine" means wine which, when kept at a temperature of 20°C in closed containers, has an excess pressure of not less than 3 bar.

Additional notes:

- **1.** Heading 2202 10 000 0 covers waters, including mineral waters and aerated waters, containing added sugar or other sweetening matter or flavored if they are used as drinkings.
 - 2. For the purposes of Headings 2204 and 2205 and Subheading 2206 00 100 0:
- a) "actual alcoholic strength by volume" means the number of volumes of pure alcohol contained at a temperature of 20 °C in 100 volumes of the product at that temperature;
- b) "potential alcoholic strength by volume" means the number of volumes of pure alcohol at 20 °C capable of being produced by total fermentation of the sugars contained in 100 volumes of the product at that temperature;
- c) "total alcoholic strength by volume" means the sum of the actual and potential alcoholic strengths:
- d) "natural alcoholic strength by volume" means the total alcoholic strength by volume of a product before any enrichment;
 - e) "% vol" is the symbol for alcoholic strength by volume.
- **3.** For the purposes of Subheading 2204 30 100 0, "grape must in fermentation" means the product derived from the fermentation of grape must, having an actual alcoholic strength by volume of more than 1% and less than three-fifths of its total alcoholic strength by volume.
 - 4. For the purposes of Subheadings 2204 21 to 2204 29:
- A. "Total dry extract" means the content in grams per litre of all substances in a product which, under the given physical conditions, do not volatilize. The total dry extract must be determined with a densimeter at 20°C;
- B(a). The presence in the products falling within Subheadings 2204 21 110 0 to 2204 21 990 0 and 2204 29 120 0 to 2204 29 990 0 of the quantities of total dry extract per litre indicated in I, II, III and IV does not affect their classification:
- I) products of an actual alcoholic strength by volume of not more than 13%: 90 g or less of total extract per litre;
- II) products of an actual alcoholic strength by volume of more than 13% vol but not more than 15% vol: 130 g or less of total dry extract per litre;
- III) products of an actual alcoholic strength by volume of more than 15% vol but not more than 18% vol: 130 g or less of total dry extract per litre;
- IV) products of an actual alcoholic strength by volume of more than 18% vol but not more than 22% vol: 330 g or less of total dry extract per litre.

Products of a total dry extract exceeding the maximum amount shown above in each category are to be classified in the next following category, except that if the total dry extract exceeds 330 g/l the products are to be classified in Subheadings 2204 21 990 0 and 2204 29 990 0;

- B(b). The above rules do not apply to products falling within Subheadings 2204 21 230 0, 2204 21 810 0, 2204 29 110 0 and 2204 29 770 0.
- **5.** Subheadings 2204 21 110 0 to 2204 21 990 0 and 2204 29 120 0 to 2204 29 990 0 shall be taken to include:
 - a) grape must with fermentation arrested by the addition of alcohol, that is to say a product:
 - having an actual alcoholic strength by volume of not less than 12% vol but less than 15% vol;
- and obtained by the addition to unfermented grape must having a natural alcoholic strength by volume of not less than 8.5% vol of a product derived from the distillation of wine;
 - b) wine fortified for distillation, that is to say a product:
- having an actual alcoholic strength by volume of not less than 18% vol but not more than 24% vol;
- obtained exclusively by the addition to wine containing no residual sugar of an unrectified product derived from the distillation of wine and having a maximum actual alcoholic strength by volume of 86% vol;
 - and having a maximum volatile acidity of 1.5 g/l, expressed as acetic acid;
 - c) liqueur wine, that is to say a product:
- having a total alcoholic strength by volume of not less than 17.5% vol and an actual alcoholic strength by volume of not less than 15% vol but not more than 22% vol;
- and obtained from grape must or wine, which must come from vine varieties approved in the third country of origin for the production of liqueur wine and have a minimum natural alcoholic strength of 12% vol;
 - by freezing;
 - or by the addition during or after fermentation:
 - of a product derived from the distillation of wine, or
- of concentrated grape must or, in the case of certain quality liqueur wines for which such practice is traditional, of grape must concentrated by direct heat, which apart from this operation, corresponds to the definition of concentrated grape must, or
 - of a mixture of these products.

However, certain quality liqueur wines may be obtained from unfermented fresh grape must which does not need to have a minimum natural alcoholic strength by volume of 12% vol.

- **6.** For the purposes of Subheadings 2204 30 920 0 and 2204 30 960 0, "concentrated grape must" means grape must for which the figure indicated by a refractometer at a temperature of 20°C is not less than 50.9%.
- **7.** Only vermouth and other wine of fresh grapes flavoured with plants or aromatic substances having an actual alcoholic strength by volume of not less than 7% vol shall be regarded as products falling within Heading 2205.
- **8.** For the purposes of Subheading 2206 00 100 0, the expression "piquette" means the product obtained by the fermentation of untreated grape marc macerated in water or by the extraction of fermented grape marc with water.
- **9.** For the purposes of Subheadings 2206 00 310 0 and 2206 00 390 0, the following are regarded as "sparkling":
 - fermented beverages in bottles with "mushroom" stoppers held in place by ties or fastenings,
- fermented beverages otherwise put up, with an excess pressure of not less than 1.5 bar, measured at a temperature of 20°C.
- **10.** For the purposes of Subheadings 2209 00 110 0 and 2209 00 190 0, the expression "wine vinegar" means vinegar obtained exclusively by acetous fermentation of wine and having a total acidity of not less than 60 g/l, expressed as acetic acid.

Heading 2309 includes products of a kind used in animal feeding, not elsewhere specified or included, obtained by processing vegetable or animal materials to such an extent that they have lost the essential characteristics of the original material, other than vegetable waste, vegetable residues and byproducts of such processing.

Subheading note:

1. For the purposes of Heading 2306 41, the term "rape or colza seeds low-containing erucic acid" means rape or colza seeds low-containing erucic acid as defined in Subheading Note 1 of Chapter 12.

Additional notes:

1. Subheadings 2303 10 110 0 and 2303 10 190 0 includes only residues from the manufacture of starch from maize and does not cover blends of such residues with products derived from other plants or products derived from maze otherwise than in the course of the production of starch by the wet process.

Their starch content may not exceed 28% by weight on the dry product, and their fat content cannot exceed 4.5% by weight on the dry product.

- **2.** Subheading 2306 70 000 0 includes only residues from the extraction of oil of germs of maize, containing the following components in specific quantity on the dry product:
 - a) products containing less than 3% of oil by weight:
 - a starch content of less than 45% by weight,
 - a protein content (nitrogen content x 6.25) not less than 11.5% by weight;
 - b) products containing not less than 3% and not exceeding 8% of oil by weight:
 - a starch content of less than 45% by weight,
 - a protein content (nitrogen content x 6.25) not less than 13% by weight.

Moreover, such residues shall not contain ingredients which are not obtained from maize grains.

Products containing components from parts of maize grains which have been added after processing and have not been subjected to the oil extraction process are excluded.

- **3.** For the purposes of Subheadings 2307 00 110 0, 2307 00 190 0, 2308 00 110 0 and 2308 00 190 0, the following expressions shall have the meanings hereby assigned to them:
- "actual alcoholic strength by mass": the number of kilograms of pure alcohol contained in 100 kg of the product,

- "potential alcoholic strength by mass": the number of kilograms of pure alcohol capable of being produced by total fermentation of the sugars contained in 100 kg of the product,
- "total alcoholic strength by weight": the sum of the actual and potential alcoholic strengths by mass,
 - "% mas": the symbol for alcoholic strength by mass.
- **4.** For the purposes of Subheadings 2309 10 110 0 to 2309 10 700 0 and 2309 90 310 0 to 2309 90 700 0, the expression "milk products" means the products falling within Headings 0401, 0402, 0404, 0405, 0406 and within Subheadings 0403 10 110 0 to 0403 10 390 0, 0403 90 110 0 to 0403 90 690 0, 1702 11 000 0, 1702 19 000 0 and 2106 90 510 0.
- **5.** Subheading 2309 90 200 0 includes only residues from the manufacture of starch from maize, and does not cover blends of such residues with products derived from other plants or products derived from maize otherwise than in the course of the production of starch by the wet process, containing:
- screenings from maize used in the wet process in a proportion not exceeding 15% by weight, and/or
- residues of maize steep-water, from the wet process, including residues of steep-water used for the manufacture of alcohol or of other starch derived products.

These products may also contain residues from the extraction of maize germ oil by the wet milling process.

Their starch content may not exceed 28% by weight on the dry product, their fat content may not exceed 4.5% by weight on the dry product and their protein content may not exceed 40% on the dry product.

Chapter 25 Salt; Sulphur; Earths and Stone; Plastering Materials, Lime and Cement

Notes:

1. Except where their context or Note 4 to this Chapter otherwise requires, the headings of this Chapter cover only products which are in the crude state or which have been washed (even with chemical substances eliminating the impurities without changing the structure of the product), crushed, ground, powdered, levigated, sifted, screened, concentrated by flotation, magnetic separation or other mechanical or physical processes (except crystallization), but not products which have been roasted, calcined, obtained by mixing or subjected to processing beyond that mentioned in each heading.

The products of this Chapter may contain an added anti-dusting agent, provided that such addition does not render the product particularly suitable for specific use rather than for general use.

- **2.** This Chapter does not cover:
- a) sublimed sulphur, precipitated sulphur or colloidal sulphur (Heading 2802);
- b) earth colours containing 70% or more by weight of combined iron evaluated as Fe2O3 (Heading 2821);
 - c) medicaments or other products of Chapter 30;
 - d) perfumery, cosmetic or toilet preparations (Chapter 33);
- e) setts, curbstones or flagstones (Heading 6801); mosaic cubes or the like (Heading 6802); roofing, facing or damp course slates (Heading 6803);

- g) cultured crystals (other than optical elements) weighing not less than 2.5 g each, of sodium chloride or of magnesium oxide, of Heading 3824; optical elements of sodium chloride or of magnesium oxide (Heading 9001);
 - h) billiard chalks (Heading 9504); or
 - i) writing or drawing chalks or tailors' chalks (Heading 9609).
- **3.** Any products classifiable within Heading 2517 and any other heading of the Chapter are to be classified within Heading 2517.
- **4.** Heading 2530 applies, inter alia, to: vermiculite, perlite and chlorites, unexpanded; earth colours, whether or not calcined or mixed together; natural micaceous iron oxides; meerschaum (whether or not in polished pieces); amber; agglomerated meerschaum and agglomerated amber, in plates, rods, sticks or similar forms, not worked after moulding; jet; strontianite (whether or not calcined), other than strontium oxide; broken pieces of pottery, brick or concrete.

Chapter 26 Ores, Slag and Ash

Notes:

- 1. This Chapter does not cover:
- a) slag or similar industrial waste prepared as macadam (Heading 2517);
- b) natural magnesium carbonate (magnesite), whether or not calcined (Heading 2519);
- c) sludge, from petroleum products storage, consisting of petroleum products (Heading 2710);
- d) basic slag of Chapter 31;
- e) slag wool, rock wool or similar mineral wools (Heading 6806);
- f) waste or scrap of precious metal or of metal clad with precious metal; other waste or scrap containing precious metals or precious metal compounds, of a kind used principally for the recovery of precious metal (Heading 7112); or
 - g) copper, nickel or cobalt mattes produced by any process of smelting (Section XV).
- **2.** For the purposes of Headings 2601 to 2617, the term "ores" means minerals of mineralogical species actually used in the metallurgical industry for the extraction of mercury, of the metals of Heading 2844 or of the metals of Sections XIV or XV, even if they are intended for nonmetallurgical purposes. Headings 2601 to 2617 do not, however, include minerals which have been submitted to processes not normal to the metallurgical industry.
 - 3. Heading 2620 applies only to:
- a) ash and residues of a kind used in industry either for the extraction of metals or as a basis for the manufacture of chemical compounds of metals, excluding ash and residues from the incineration of waste of the city economy (Heading 2621); and
- b) ash and residues containing arsenic and whether or not containing metals of a kind used either for the extraction of arsenic or metals, or for the manufacture of their chemical compounds.

Subheading notes:

- 1. For the purposes of subheading 2620 21, the expression "slimes of ethylated gasoline and slimes of ethylated antiknock mixture" means slimes obtained from storage tanks of ethylated gasoline and ethylated antiknock mixture (for example, tetraethyl lead) and containing mainly lead, compounds of lead and ferric oxide.
- **2.** Ash and residues containing arsenic, mercury, thallium or mixtures thereof of a kind used for the extraction of arsenic or those metals, or for the manufacture of their chemical compounds, are classified in subheading 2620 60.

Chapter 27 Mineral Fuels, Mineral Oils and Products of Their Distillation; Bituminous Substances; Mineral Waxes

Notes:

- **1.** This Chapter does not cover:
- a) separate chemically defined organic compounds, other than pure methane and propane, which are to be classified within Heading 2711;
 - b) medicaments of Headings 3003 or 3004; or
 - c) mixed unsaturated hydrocarbons of Headings 3301, 3302, or 3805.
- **2.** References in Heading 2710 to "petroleum oils and oils obtained from bituminous minerals" include not only petroleum oils and oils obtained from bituminous minerals but also similar oils, as well as those consisting mainly of mixed unsaturated hydrocarbons, obtained by any process, provided that the weight of the non-aromatic constituents exceeds that of the aromatic constituents.

However, the references do not include liquid synthetic polyolefins of which less than 60% by volume distils at 300°C, after conversion to 1013 mbar, when a reduced-pressure distillation method is used (Chapter 39).

- **3.** For the purposes of Heading 2710, "used oils" means waste containing mainly petroleum oils and oils obtained from bituminous minerals (described in Note 2 to this Chapter) whether or not mixed with water. Here there are included:
- a) oils unfit for further use as primary products (for example, used lubricating oils, used hydraulic oils and transformer oils);
- b) oils in the form of sludge from oil storage-tanks containing mainly those oils and additives of high concentration (for example, chemical substances) used in the manufacture of primary products; and
- c) oils in the form of water emulsions or mixtures with water formed, for example, as a result of oil leakage, in the process of the washing of an oil storage tank or used lubricating-cooling liquid applied in mechanical working.

Subheading notes:

- **1.** For the purposes of Subheading 2701 11, "anthracite" means coal having a volatile matter limit (on a dry, mineral-matter-free basis) not exceeding 14%.
- **2.** For the purposes of Subheading 2701 12, "bituminous coal" means coal having a volatile matter limit (on a dry, mineral-matter-free basis) exceeding 14% and a calorific value limit (on a moist, mineral-matter-free basis) equal to or greater than 5,833 kcal/kg.
- **3.** For the purposes of Subheadings 2707 10, 2707 20, 2707 30, 2707 40 and 2707 60, the terms "benzole", "toluole", "xylole", "naphthalene", and "phenols" apply to products which contain more than 50% by weight of benzene, toluene, xylene, naphthalene or phenols, respectively.
- **4.** For the purposes of Subheading 2710 11 the term "light oils and preparations" apply to oils of which 90% or more by volume (including losses) distils at temperatures of up to 210°C by the ASTM D 86 method.

Additional notes:

- d) "heavy oils" (Subheadings 2710 19 310 0 to 2710 19 990 0) means oils and preparations of which less than 65% by volume (including losses) distils at 250°C by the ASTM D 86 method or of which the distillation percentage at 250°C cannot be determined by that method;
- e) "gas oils" (Subheadings 2710 19 310 0 to 2710 19 490 0) means heavy oils as defined in Paragraph (d) of which 85% or more by volume (including losses) distils at 350°C (ASTM D 86 method);
- f) "fuel oils" (Subheadings 2710 19 510 0 to 2710 19 690 0) means heavy oils as defined in Paragraph (d) (other than gas oils as defined in Paragraph (e)) which, for a corresponding diluted colour C, have a viscosity V:
- not exceeding that shown in Line I of the following table when the sulphated ashes content is less than 1% by the ASTM D 874 method and the saponification index is less than 4 by the ASTM D 939-54 method,
- exceeding that shown in Line II when the pour point is not less than 10°C by the ASTM D 97 method.
- exceeding that shown in Line I but not exceeding that shown in Line II when 25% or more by volume distils at 300°C by the ASTM D 86 method, or if less than 25% by volume distils at 300°C, when the pour point is higher than 10°C below zero by the ASTM D 97 method. These provisions apply only to oils having a diluted colour C of less than 2.

The term "viscosity V" means the kinematic viscosity at 50°C expressed in 0,000001 m2/s-1 by the ASTM D 445 method.

The term "diluted colour C" means the colour of a product, as determined by the ASTM D 1500 method, after one part of such product has been mixed with 100 parts by volume of carbon tetrachloride. The colour must be determined immediately after dilution.

Subheadings 2710 19 510 0 to 2710 19 690 0 cover only fuel oils of natural colour.

These subheadings do not cover heavy oils defined in Paragraph (d) for which it is not possible to determine:

- the distillation percentage at 250°C by the ASTM D 86 method (zero shall be deemed to be a percentage),
 - the kinematic viscosity at 50°C by the ASTM D 445 method;
 - or the diluted color C by the ASTM D 1500 method.

Such products fall within Subheadings 2710 19 710 0 to 2710 19 990 0.

- **3.** For the purposes of Heading 2712, the expression "crude petroleum jelly" (Subheading 2712 10 100 0) shall be taken to apply to petroleum jelly of a natural color higher than 4.5 by the ASTM D 1500 method.
- **4.** For the purposes of Subheadings 2712 90 310 0 to 2712 90 390 0, the term "crude" shall be taken to apply to products:
- a) with an oil content of 3.5 or higher by the ASTM D 721 method, if their viscosity at 100°C is lower than 0,000009 m2/s-1 by the ASTM D 445 method;
- b) of a natural colour higher than 3 by the ASTM D 1500 method, if their viscosity at 100°C is 0,000009 m2/s-1 or higher by the ASTM D 445 method;
- **5.** For the purposes of Headings 2710, 2711 and 2712, the term "specific process" shall be taken to apply to the following operations:
 - a) vacuum distillation;
 - b) redistillation by a very thorough fractionation process;
 - c) cracking;
 - d) reforming;
 - e) extraction by means of selective solvents;
- f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralization with alkaline agents; decolorization and purification with naturally active earths, activated earth, activated charcoal or bauxite;
 - g) polymerization;
 - h) alkylation;
 - ij) isomerization;
- k) (in respect of the products of Subheadings 2710 19 310 0 to 2710 19 990 0 only) desulphurization with hydrogen resulting in a reduction of at least 85% of the sulphur content of the products processed (ASTM D 1266-59 T method);

- m) (in respect of products of Subheadings 2710 19 310 0 to 2710 19 990 0 only) treatment with hydrogen at a pressure of more than 20 bar and a temperature of more than 250°C with the use of a catalyst, other than to effect desulphurization, when the hydrogen constitutes an active element in a chemical reaction. The further treatment with hydrogen of lubricating oils of Subheadings 2710 19 710 0 to 2710 19 990 0 (for example hydrofinishing or decolorization) in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
- n) (in respect of products of Subheadings 2710 19 510 0 to 2710 19 690 0 only) atmospheric distillation, on condition that less than 30% of these products distills, by volume, including losses, at 300°C by the ASTM D 86 method. If 30% or more by volume, including losses, of such products distills at 300°C by the ASTM D 86 method, the quantities of products which may be obtained during the atmospheric distillation and which fall within Subheadings 2710 11 110 0 to 2710 11 900 0 or 2710 19 110 0 to 2710 19 290 0 shall be dutiable at the same rates as those provided for under Subheadings 2710 19 610 0 to 2710 19 690 0;

- a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;
 - b) presented together; and

c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.

Chapter 28 Inorganic Chemicals; Organic or Inorganic Compounds of Precious Metals, of Rare-Earth Metals, of Radioactive Elements or of Isotopes

Notes:

- 1. Except where the context otherwise requires, the headings of this Chapter apply only to:
- a) separate chemical elements and separate chemically defined compounds, whether or not containing impurities;
 - b) the products mentioned in (a) above dissolved in water;
- c) the products mentioned in (a) above dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport, and that the solvent does not render the product particularly suitable for specific use rather than for general use;
- d) the products mentioned in (a), (b) or (c) above with an added stabiliser (including an anti-caking agent) necessary for their preservation or transport;
- e) the products mentioned in (a), (b), (c) or (d) with an added anti-dusting agent or a colouring substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for specific use rather than for general use.
- **2.** In addition to dithionites and sulphoxylates stabilized with organic substances (Heading 2831), carbonates and peroxocarbonates of inorganic bases (Heading 2836), cyanides, cyanide oxides and complex cyanides of inorganic bases (Heading 2837), fulminates, cyanates and thiocyanates, of inorganic bases (Heading 2842), organic products included in Headings 2843 to 2846 and 2852, and also carbides (Heading 2849), only the following of compounds of carbon are to be classified in this Chapter:
- a) of oxides of carbon, hydrogen cyanide and fulminic, isocyanic, thiocyanic and other simple or complex cyanogen acids (Heading 2811);
 - b) halide oxides of carbon (Heading 2812);
 - c) carbon disulphide (Heading 2813);
- d) thiocarbonates, selenocarbonates, tellurocarbonates, selenocyanates, tellurocyanates, tetrathiocyanatodiamminochromates (reineckates) and other complex cyanates of inorganic bases (Heading 2842);
- e) hydrogen peroxide, solidified with urea (Heading 2847), carbon oxysulphide, thiocarbonyl halides, cyanogen, cyanogen halides and cyanamide and its metal derivatives (Heading 2853) other than calcium cyanamide, whether or not pure (Chapter 31).
 - 3. Subject to the provisions of Note 1 to Section VI, this Chapter does not cover:
 - a) sodium chloride or magnesium oxide, whether or not pure, or other products of Section V;
 - b) organo-inorganic compounds other than those mentioned in Note 2:
 - c) products mentioned in Note 2, 3, 4 or 5 to Chapter 31;
- d) inorganic products of kind used as luminophores, of Heading 3206; glass frit and other glass, in the form of powder, granules or flakes of Heading 3207;
- e) artificial graphite (Heading 3801); products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades, of Heading 3813; ink removers put up in packings for retail sale, of Heading 3824; cultured crystals (other than optical elements) weighing not less than 2.5 g each of the halides of the alkali or alkaline-earth metals of Heading 3824;
- f) precious or semi-precious stones (natural, synthetic or reconstructed) or dust or powder of such stones (Headings 7102 to 7105), or precious metals or precious metal alloys of Chapter 71);
- g) the metals, whether or not pure, metal alloys or cermets, including sintered metal carbides (metal carbides sintered with a metal), of Section XV; or
- h) optical elements, for example, of the halides of the alkali or alkaline-earth metals (Heading 9001).
- **4.** Chemically defined complex acids consisting of a non-metal acid of Sub-chapter II and a metal acid of Sub-chapter IV are to be classified in Heading 2811.
 - **5.** Headings 2826 to 2842 apply only to metal or ammonium salts or peroxysalts.

Except where the context otherwise requires, double or complex salts are to be classified in Heading 2842.

- **6.** Heading 2844 applies only to:
- a) technetium (atomic No. 43), promethium (atomic No. 61), polonium (atomic No. 84) and all elements with an atomic number greater than 84;
- b) natural or artificial radioactive isotopes (including those of the precious metals or of the base metals of Sections XIV and XV), whether or not mixed together;
- c) compounds, inorganic or organic, of these elements or isotopes, whether or not chemically defined, whether or not mixed together;

- d) alloys, dispersions (including cermets), ceramic products and mixtures containing these elements or isotopes or inorganic or organic compounds thereof and having a specific radioactivity exceeding 74 Bq/g (0.002 mCi/g);
 - e) spent (irradiated) fuel elements (cartridges) of nuclear reactors;
 - f) radioactive residues whether or not usable.

The term "isotopes", for the purposes of this note and of the wording of Headings 2844 and 2845, refers to:

individual nuclides, excluding, however, those existing in nature in the monoisotopic state,

mixtures of isotopes of one and the same element, enriched in one or several of the said isotopes, that is, elements of which the natural isotopic composition has been artificially modified.

- **7.** Heading 2848 includes copper phosphide (phosphor copper) containing more than 15% by weight of phosphorus.
- **8.** Chemical elements (for example, silicon and selenium) doped for use in electronics are to be classified within this Chapter, provided that they are in forms unworked as drawn, or in the form of cylinders or rods. When cut to the form of discs, wafers or similar forms, they fall within Heading 3818.

Additional note:

 Unless provided otherwise, the salts specified in subheadings include acid salts and basic salts.

Chapter 29 Organic Chemicals

Notes:

- 1. Except where the context otherwise requires, the headings of this Chapter apply only to:
- a) separate chemically defined organic compounds, whether or not containing impurities;
- b) mixtures of two or more isomers of the same organic compound (whether or not containing impurities), except mixtures of acyclic hydrocarbon isomers (other than stereoisomers), whether or not saturated (Chapter 27);
- c) the products of Headings 2936 to 2939 or the sugar ethers and sugar esters, and their salts, of Heading 2940 or products of Heading 2941, whether or not chemically defined;
 - d) the products mentioned in (a), (b) or (c) dissolved in water;
- e) the products mentioned in (a), (b) or (c) dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or transport, and that the solvent does not render the product particularly suitable for a specific use rather than for general use;
- f) the products mentioned in (a), (b), (c), (d) or (e) with an added stabiliser (including an anti-caking agent) necessary for their preservation or transportation;
- g) the products mentioned in (a), (b), (c), (d), (e) or (f) with added an anti-dusting agent or a colouring or odoriferous substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for a specific use rather than for general use;
- h) the following products, diluted to standard strengths, for the production of azo dyes: diazonium salts, couplers used for these salts and diazotizable amines and their salts.
 - 2. This Chapter does not cover:
 - a) goods of Heading 1504 or crude glycerol of Heading 1520;
 - b) ethyl alcohol (Heading 2207 or 2208);

- c) methane or propane (Heading 2711);
- d) the compounds of carbon mentioned in Note 2 to Chapter 28:
- e) urea (Heading 3102 or 3105);
- f) colouring matter of vegetable or animal origin (Heading 3203), synthetic organic colouring matter, synthetic organic products of kind used as fluorescent brightening agents or as luminophores (Heading 3204) or dyes or other coloring matter put up in forms or packings for retail sale (Heading 3212);
 - g) enzymes (Heading 3507);
- h) metaldehyde, hexamethylenetetramine or similar substances, put up in forms (for example, tablets, sticks or similar forms) for use as fuels, or liquid or liquefied-gas fuels in containers of kind used for filling or refilling cigarette or similar lighters and of a capacity not exceeding than 300 cm3 (Heading 3606);
- ij) products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades, of Heading 3813; ink removers put up in packings for retail sale, of Heading 3824; or
 - k) optical elements, for example, of ethylenediamine tartrate (Heading 9001).
- **3.** Goods which could be included in two or more of the headings of this Chapter are to be classified in that one of those headings which occurs last in numerical order.
- **4.** In Headings 2904 to 2906, 2908 to 2911 and 2913 to 2920, any references to halogenated, sulphonated, nitrated or nitrosated derivatives includes a reference to compound derivatives, such as sulphohalogenated, nitrohalogenated, nitrosulphonated or nitrosulphohalogenated derivatives.

Nitro or nitroso groups are not to be taken as "nitrogen-functions" for the purposes of Heading 2929.

For the purposes of Headings 2911, 2912, 2914, 2918 and 2922, "oxygen-function" is to be restricted to the functions (the characteristic organic oxygen-containing groups) referred to in Headings 2905 to 2920.

- **5a.** The esters of acid-function organic compounds of Sub-chapters I to VII with organic compounds of these sub-chapters are to be classified with that compound which is classified within the Heading which occurs last in numerical order in these subchapters.
- **5b.** Esters of ethyl alcohol with acid-function organic compounds of Sub-chapters I to VII are to be classified within the same heading as the corresponding acid-function compounds.
 - **5c.** Subject to Note 1 to Section VI and Note 2 to Chapter 28:
- 1) inorganic salts of organic compounds such as acid-, phenol- or enol-function compounds or organic bases, of Subchapters I to X or Heading 2942, are to be classified within the heading appropriate to the organic compound; and
- 2) salts formed between organic compounds of Sub-chapters I to X or Heading 2942 are to be classified within the heading appropriate to the base or to the acid (including phenol- or enol-function compounds) from which they are formed, whichever occurs last in numerical order in the chapter; and
- 3) coordination, or complex, compounds, except substances of subchapter XI or Heading 2941 are to be classified within the heading, whichever occurs last in numerical order in Chapter 29 among those suitable for fragments formed by "splitting" of all bonds of metal, except metal-carbon bonds.
- **5d.** Metal alcoholates are to be classified within the same Heading as the corresponding alcohols except in the case of ethanol (Heading 2905).
- **5e.** Halides of carboxylic acids are to be classified within the same heading as the corresponding acids.
- **6.** The compounds of Headings 2930 and 2931 are organic compounds the molecules of which contain, in addition to atoms of hydrogen, oxygen or nitrogen, atoms of other non-metals or metals (such as sulphur, arsenic, mercury or lead) directly linked to carbon atoms.

Heading 2930 (organo-sulphur compounds) and Heading 2931 (other organo-inorganic compounds) do not include sulphonated or halogenated derivatives (including compound derivatives) which, apart from hydrogen, oxygen and nitrogen, only have directly linked to carbon the atoms of sulphur or of a halogen which give them their nature of sulphonated or halogenated derivatives (or compound derivatives).

- **7.** Headings 2932 to 2934 do not include epoxides with a three-member ring, ketone peroxides, cyclic polymers of aldehydes or of thioaldehydes anhydrides of polybasic carboxylic acids, cyclic esters of polyhydric alcohols or phenols with polybasic acids, or imides of polybasic acids. These provisions apply only when the ring-position hetero-atoms are those resulting solely from the cycling function or functions here listed.
 - **8.** For the purposes of Heading 2937:
- a) the term "hormones" applies to releasing hormones or to factors stimulating the secretion of hormones, to hormone inhibitors and hormone antagonists (antihormones);
- b) the expression "used primarily as hormones" applies not only to derivatives of hormones and their structural analogues used primarily for hormonal effect, but also to such derivatives and structurals

analogues which are used primarily as intermediate products in the synthesis of substances of this Heading.

Subheading note:

- 1. Within any one heading of this Chapter, derivatives of a chemical compound (or group of chemical compounds) are to be classified in the same subheading as that compound (or group of compounds) provided that they are not more specifically covered by any other subheading and that there is no residual subheading named "other" in the series of subheadings concerned.
 - 2. Note 3 to Chapter 29 shall not apply to subheadings of this Chapter.

- a) give a transparent or translucent liquid or stable emulsion without separation of insoluble matter; and
 - b) reduce the surface tension of water to 4.5 x 10(-2) N/m (45 dyn/cm) or less.
- **4.** In Heading 3403, the expression "petroleum oils and oils obtained from bituminous minerals" applies to the products defined in Note 2 to Chapter 27.

Notes:

- 1. This Chapter does not cover waste or scrap.
- **2.** In this Chapter the word "photographic" relates to the process by which visible images are formed, directly or indirectly, by the action of light or other forms of radiation on photosensitive surfaces.

Additional Notes:

- **1.** In the case of sound films imported in two bands (the band bearing only the images and the band used for recording the sound), each band is to be classified in its approriate heading.
- **2.** The expression "newsreels" (Subheading 3706 90 510 0) shall be taken to apply to films of length of less than 330 m, and depicting current events of a political, sporting, military, scientific, literary, folkloric, touristic, society, etc., nature.

Chapter 38 Miscellaneous Chemical Products

Notes:

- 1. This Chapter does not cover:
- a) separate chemically defined elements or compounds with the exception of the following:
- 1) artificial graphite (Heading 3801);
- 2) insecticides, rodenticides, fungicides, herbicides, anti-sprouting products and plant-growth regulation, disinfectants, and similar products, put up as described in Heading 3808;
- 3) products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades (Heading 3813);
 - 4) certified standard materials, specified in Note 2 to this Chapter;
 - 5) products specified in Note 3(a) or 3(b) to this Chapter;
- b) mixtures of chemicals with foodstuffs or other substances with nutritive value, of a kind used in the preparation human foodstuffs (generally Heading 2106); or
- c) ash and residues (including slimes other than waste waters) containing metals, arsenic or mixtures thereof and filling requirements to Note 3(a) or 3(b) to Chapter 26 (Heading 2620);
 - d) medicaments (Heading 3003 or 3004); or
- e) spent catalysts of a kind used for the extraction of base metals of for the manufacture of chemical compounds of base metals (Heading 2620), spent catalysts of a kind used principally for the recovery of precious metal (Heading 7112), or catalysts consisting of metals or metal alloys in the form of, for example, finely divided powder or woven gauze (Section XIV or XV).
- **2A.** For the purposes of Heading 3822 the expression "certified standard materials" means standard materials that are provided with a certificate in which there are given the indices of the properties of the certified materials, the methods used for determining those indices, the errors in the measurement of each value, and that are fit for analytical, calibrating and standard purposes.
- **2B.** With the exception of goods of Chapter 28 or 29, in the classification of certified standard materials, Heading 3822 has preference before any other heading of the Nomenclature.
- **3.** Heading 3824 includes the following goods which are not to be classified in any other heading of the Nomenclature:
- a) cultured crystals (other than optical elements) weighing not less than 2.5 g each, of magnesium oxide or of the halides of the alkali or alkaline-earth metals;
 - b) fused oil; Dippel's oil;
 - c) ink removers put up in packings for retail sale;
 - d) stencil correctors and other correcting fluids put up in packings for retail sale; and
 - e) ceramic firing testers, fusible (for example, Seger cones).
- **4.** Throughout the Nomenclature the expression "municipal economy waste" means waste of the type collected from houses, hotels, restaurants, hospitals, shops, offices and the like, road and pavement garbage, and also waste from the construction and demolition of buildings. Usually municipal economy waste contains various materials, such as plastic, rubber, wood, paper, cloths, glass, metals, food waste, broken furniture and other damaged or discarded superfluous objects. However, the expression "municipal economy waste" does not cover:
- a) certain materials or objects separated from waste, such as waste of plastic, rubber, wood, paper, cloths, glass or metals and used batteries, which fall into their relevant headings of the Nomenclature;
 - b) industrial waste;
 - c) unusable pharmaceuticals described in Note 4K to Chapter 30; or
 - d) clinical waste described in Note 6a to this Chapter.
- **5.** In Heading 3825 the expression "sewage slime" means slime forming at city enterprises processing sewage and includes waste of preliminary processing, wash waters and unstabilised slime. Stabilised slime if it is fit for use as fertilisers is excluded (Chapter 31).
 - **6.** In Heading 3825 the expression "other waste" means:
- a) clinical waste, that is contaminated waste forming as a result of scientific research in the field of medicine or of diagnostic, therapeutic or other medical, surgical, dental or veterinary procedures that often contain pathogens and pharmaceuticals and require special decontamination procedures (for example, contaminated clothing or used gloves and syringes);
 - b) spent organic solvents;
 - c) spent solutions for pickling metals, hydraulic liquids, breaking fluids and antifreezes; and

d) other waste of the chemical and allied thereto branches of industry.

However, the expression "other waste" does not cover waste containing predominantly petroleum oils and oils obtained from bituminous minerals (Heading 2710).

Subheading notes:

- 1. Subheading 3808 50 includes only the goods of Heading 3808 containing one or more of these matters: aldrin (ISO); binapacryl (ISO); chlorinated camphene (ISO) (toxaphene); captafol (ISO); chlordane (ISO); chlordimeform (ISO); chlorbenzilate (ISO); DDT (ISO) (clophenotane (INN), (1,1,1-trichloro-2,2-bis(p-chlorophenyl)ethane); dieldrin (ISO, INN); dinoseb (ISO), its salts or esters; ethylene dibromide (ISO) (1,2-dibromoethane); ethylene dichloride (ISO) (1,2-dichloroethane); fluoro acetamide (ISO); heptachlor (ISO); hexachlorobenzene (ISO); 1,2,3,4,5,6-Hexachlorocyclohexane (HCH (ISO) including lindane (ISO, INN); mercury compounds; metamidophos (ISO); monocrotophos (ISO); oxirane (ethylene oxide); parathion (ISO); parathion methyl (ISO) (methyl parathion); pentachlorphenol (ISO); phosphamidon (ISO); 2,4,5-T (ISO) (2,4,5-trichlorophenoxyacetic acid), its salts and esters.
- **2.** For the purposes of subheadings 3825 41 and 3825 49 the expression "spent organic solvents" means waste predominantly containing organic solvents unfit in their existing form for further use as primary products irrespective of whether or not they are designed for the regeneration of solvents.

Section VII Plastics and Articles Thereof; Rubber and Articles Thereof

Notes:

1. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this Section and are intended to be mixed together to obtain a product of Section VI or VI, are to be classified in the heading appropriate to that product, provided that the constituents are:

- a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;
 - b) presented together; and
- c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.
- **2.** Except for the goods of Headings 3918 or 3919, plastics, rubber, and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall within Chapter 49.

Chapter 39 Plastics and Articles Thereof

Notes:

1. Throughout the Nomenclature the expression "plastics" means materials of Headings 3901 to 3914 which are have been capable, either at the moment of polymerisation or at some subsequent stage, of being formed under external influence (usually heat and pressure, if necessary with a solvent or plasticiser) by moulding, casting, extruding, rolling or other process into shapes which are retained on the removal of the external influence.

Throughout the Nomenclature any reference to "plastics" also includes vulcanised fiber. The expression, however, does not apply to materials regarded as textile materials of Section XI.

- 2. This Chapter does not cover:
- a) lubricating preparations of Headings 2710 or 3403;
- b) waxes of Headings 2712 or 3404;
- c) separate chemically defined organic compounds (Chapter 29);
- d) heparin or its salts (Heading 3001);
- e) solutions (other than collodions) consisting of any of the products specified in Headings 3901 to 3913 in volatile organic solvents when the weight of the solvent exceeding 50% of the weight of the solution (Heading 3208); stamping foils of Heading 3212;
 - f) organic surface-active agents or preparations of Heading 3402;
 - g) run gums or ester gums (Heading 3806);
- h) prepared additives for mineral oils (including gasoline) or for other liquids used for the same purposes as mineral oils (Heading 3811);
- ji) prepared liquids for hydraulic transmission based on polyglicols, silicones or other plastics of Chapter 39 (Heading 3819);
 - k) diagnostic or laboratory reagents on a backing of plastics (Heading 3822);
 - I) synthetic rubber, as defined for the purposes of Chapter 40, or articles thereof;
- m) saddlery of harness (Heading 4201) or trunks, suitcases, handbags or other containers of Heading 4202;
 - n) plaits, wickerwork or other articles of Chapter 46;
 - o) wall coverings of Heading 4814;
 - p) goods of Section XI (textiles and textile articles):
- q) articles of Section XII (for example, footwear, headgear, umbrellas, sum umbrellas, walking-sticks, whips, riding-crops or parts thereof);
 - r) imitation jewellery of Heading 7117;
 - s) articles of Section XVI (machines and mechanical or electric appliances);
 - t) parts of aircraft or vehicles of Section XVII;
 - u) articles of Chapter 90 (for example, optical elements, spectacle frames, drawing instruments);
 - v) articles of Chapter 91 (for example, clock or watch cases);
 - w) articles of Chapter 92 (for example, musical instruments or parts thereof);
- x) articles of Chapter 94 (for example, furniture, lamps and lighting fittings, illuminated signs, prefabricated buildings):
 - y) articles of Chapter 95 (for example, toys, games, sports requisites); or
- z) articles of Chapter 96 (for example, brushes, buttons, slide fasteners, combs, mouthpieces or stems for smoking pipes, cigaretteholders or the like, parts of vacuum flasks or the like, pens, propelling pencils).
- **3.** Headings 3901 to 3911 apply only to goods of a kind produced by chemical synthesis, falling in the following categories:
- a) liquid synthetic polyolefins of which less than 60% by volume distils at 300°C, after conversion to 1013 mbar when a reduced-pressure distillation method is used (Headings 3901 and 3902);
 - b) resins, not highly polymerised, of the coumarone-indene type (Heading 3911):
 - c) other synthetic polymers with an average of at least five monomer units;
 - d) silicones (Heading 3910);
 - e) resols (Heading 3909) and other prepolymers.

4. The expression "copolymers" covers all polymers in which no single monomer unit contributes 95% or more by weight to the total polymer content.

For the purposes of this Chapter, except where the context otherwise requires, copolymers (including co-polycondensates, co-polyaddition products, block copolymers and graft copolymers) and polymer blends are to be classified in the Heading covering polymers of that comonomer unit which predominates by weight over every other single comonomer unit. For the purposes of this Note, constituent comonomer units of polymers falling in the same Heading shall be taken together.

If no single comonomer unit predominates, copolymers or polymer blends, as the case may be, are to be classified in the Heading which occurs last in numerical order among those which equally merit consideration.

- **5.** Chemically modified polymers, that is those in which only appendages to the main polymer chain have been changed by chemical reaction, are to be classified in the Heading appropriate to the unmodified polymer. This provision does not apply to graft copolymers.
 - **6.** In Headings 3901 to 3914, the expression "primary forms" applies only to the following forms:
 - a) liquids and pastes, including dispersions (emulsions and suspensions) and solutions;
- b) blocks of irregular shape, lumps, powders (including moulding powders), granules, flakes, and similar bulk forms.
- **7.** Heading 3915 does not apply to waste, parings and scrap or a single thermoplastic material, transformed into primary forms (Headings 3901 to 3914).
- **8.** For the purposes of Heading 3917, the expression "tubes, pipes, and hoses" means hollow products, whether semi-manufactures or finished products, of a kind generally used for conveying, conducting or distributing gases or liquids (for example, ribbed garden hose, perforated tubes). This expression also includes sausage casings and other lay-flat tubing. However, except for the last mentioned, those having an internal cross-section other than round, oval, rectangular (in which the length does not exceed one-and-a-half times the width) or in the shape of a regular polygon are not to be regarded as tubes, pipes and hoses but as profile shapes.
- **9.** For the purposes of Heading 3918, the expression "wall or ceiling coverings of plastics" applies to products in rolls, of width not less than 45 cm, suitable for wall or ceiling decoration, consisting of plastics fixed permanently on a backing of any material other than paper, the layer of plastics (on the face side) being grained, embossed, coloured, design-printed or otherwise decorated.
- **10.** In Headings 3920 and 3921, the expression "plates, sheets, film, foil and strip" applies only to plates, sheets, film, foil and strip (other than those of Chapter 54), and to blocks of regular geometric shape, whether or not printed or otherwise surface-worked, uncut or cut into rectangles (including squares) but not further worked (even if when so cut they become articles ready for use).
- **11.** Heading 3925 applies only to the following articles, not being products covered by any of the earlier headings of Subchapter II:
- a) reservoirs, tanks (including septic tanks), vats and similar containers, of a capacity exceeding 300 liters;
 - b) structural elements used, for example, in floors, walls or partitions, ceiling or roofs;
 - c) gutters and fittings there for;
 - d) doors, windows and their frames and thresholds for doors;
 - e) balconies, balustrades, fencing, gates and similar barriers;
 - f) shutters, blinds (including venetian blinds) and similar articles and parts and fittings thereof;
- g) large-scale shelving for assembly and permanent installation, for example, in shops, workshops, warehouses;
 - h) ornamental architectural features, for example, flutings, cupolas, dovecotes;
- ij) fittings and mountings intended for permanent installation in or on doors, windows, staircases, walls or other parts of buildings, for example, knobs, handles, hooks, brackets, towel rails, switch-plates, and other protective plates.

Subheading notes:

- **1.** Within any one heading of this Chapter, polymers (including copolymers) and chemically modified polymers are to be classified according to the following provisions:
 - a) where there is a subheading named "Other" in the same series:
- 1) the designation in a subheading of a polymer by the prefix "poly" (e.g., polyethylene and polyamide-6,6) means that the constituent monomer unit or monomer units of the named polymer taken together must contribute 95% or more by weight to the total polymer content;
- 2) the copolymers named in Subheadings 3901 30, 3903 20, 3903 30, and 3904 30 are to be classified in those subheadings, provided that the comonomer units of the named copolymers contribute 95% or more by weight to the total polymer content;
- 3) chemically modified polymers are to be classified in the subheading named "Other", provided that the chemically modified polymers are not more specifically covered by another subheading;

- 4) polymers not meeting (1), (2) or (3) above, are to be classified in the subheading, among the remaining subheadings in the series, covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series of subheadings under consideration are to be compared;
 - b) where there is no subheading named "Other" in the same series:
- 1) polymers are to be classified in the subheading covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series under consideration are to be compared;
- 2) chemically modified polymers are to be classified in the subheading appropriate to the unmodified polymer.

Polymer blends are to be classified in the same subheading as polymers of the same monomer units in the same proportions.

2. For the purposes of Subheading 3920 43, the term "plasticisers" means secondary plasticisers.

Additional Note:

- **1.** In the case when textile fabrics, knitted, or crocheted woven, felt, or nonwoven fabrics are presented simply for the purpose of reinforcing, mitts, gloves or mittens, impregnated or covered with porous plastics, are referred to Chapter 39, even if they:
- are manufactured from textile fabrics, knitted, woven or crocheted (except for those referred to Heading 5903), felt, or nonwoven fabrics impregnated or covered with porous plastics, or
- are manufactured from non-impregnated or non-covered textile fabrics, knitted, woven or crocheted, felt, or nonwoven fabrics and were subsequently impregnated or covered with porous plastics. (Note 3c to Chapter 56 and Note 2a(5) to Chapter 59).

Chapter 40 Rubber and Articles Thereof

Notes:

1. Except where the context otherwise requires, throughout the Nomenclature the expression "rubber" means the following products, whether or not vulcanized or hard: natural rubber, balata, gutta-

percha, guayule, chicle and similar natural gums, synthetic rubber, factice derived from oils, and such substances reclaimed.

- 2. This Chapter does not cover:
- a) goods of Section XI (textiles and textile articles);
- b) footwear or parts thereof of Chapter 64;
- c) headgear or parts thereof (including bathing caps) of Chapter 65;
- d) mechanical or electric appliances or parts thereof of Section XVI (including electrical goods of all kinds), of hard rubber;
 - e) articles of Chapter 90, 92, 94 or 96; or
 - f) articles of Chapter 95 (other than sports gloves and articles of Headings 4011 to 4013).
- **3.** In Headings 4001 to 4003 and 4005, the expression "primary forms" applies only to the following forms:
- a) liquids and pastes (including latex, whether or not pre-vulcanized, and other dispersions and solutions);
 - b) blocks of irregular shape, lumps, bales, powders, granules, crumbs and similar bulk forms.
 - 4. In Note 1 to this Chapter and in Heading 4002, the expression "synthetic rubber" applies to:
- a) unsaturated synthetic substances which can be irreversibly transformed by vulcanization with sulphur into non-thermoplastic substances which, at a temperature between 18°C and 29°C, will not break on being extended to three times their original length and will return, after being extended to twice their original length, within a period of five minutes, to a length not greater than one-and-a-half times their original length. For the purposes of this test, substances necessary for the cross-linking, such as vulcanising activators or accelerators, may be added; the presence of substances as provided for by Note 5b (ii and iii) is also permitted. However, the presence of any substances not necessary for the cross-linking, such as extenders, plasticizers and fillers, is not permitted;
 - b) thioplasts (TM); and
- c) natural rubber modified by grafting or mixing with plastics, depolymerised natural rubber, mixtures of unsaturated synthetic substances with saturated synthetic high polymers, provided that all the above mentioned products comply with the requirements concerning vulcanisation, elongation and recovery in 4a.
- **5a.** Headings 4001 and 4002 do not apply to any rubber or mixture of rubbers which has been compounded, before or after coagulation, with:
- i) vulcanising agents, accelerators, retarders or activators (other than those added for the preparation of pre-vulcanised rubber (latex);
- ii) pigments or other coloring matter, other than those added solely for the purpose of identification;
- iii) plasticisers or extenders (except mineral oil in the case of oil-extended rubber), fillers, reinforcing agents, organic solvents or any other substances, except those permitted under 5b.
- **5b.** The presence of the following substances in any rubber or mixture of rubbers shall not affect its classification in Headings 4001 or 4002, as the case may be, provided that such rubber or mixture of rubbers retains its essential character as a raw material;
 - i) emulsifiers or anti-tack agents;
 - ii) small amounts of breakdown products of emulsifiers;
- iii) very small amounts of the following: heat-sensitive agents (generally for obtaining thermosensitive rubber latexes), cationic surface-active agents (generally for obtaining electro-positive rubber latexes), antioxidants, coagulants, crumbling agents, freeze-resisting agents, peptisers, preservatives, stabilisers, viscosity-control agents, or similar special-purpose additives.
- **6.** For the purposes of Heading 4004, the expression "waste, parings and scrap" means rubber waste, parings and scrap from the manufacture or working of rubber and rubber goods definitely not usable as such because of cutting-up, wear or other reasons.
- **7.** Thread wholly of vulcanized rubber, of which any cross-sectional dimension exceeds 5 mm, is to be classified as strip, rods or profile shapes, of Heading 4008.
- **8.** Heading 4010 includes conveyor or transmission belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber.
- **9.** In Headings 4001, 4002, 4003, 4005 and 4008, the expressions "plates", "sheets" and "strip" apply only to plates, sheets and strip and to blocks of regular geometric shape, uncut or simply cut to rectangular (including square) shape, whether or not having the character of articles and whether or not printed or otherwise surface-worked, but not otherwise cut to shape or further worked.
- In Heading 4008, the expressions "rods" and "profile shapes" apply only to such products, whether or not cut to length or surface-worked but not otherwise worked.

Additional Note:

- **1.** In the case when textile fabrics, knitted, or crocheted woven, felt, or nonwoven fabrics are presented simply for the purpose of reinforcing, mitts, gloves or mittens, impregnated or covered with porous rubber, are referred to Chapter 40, even if they:
- are manufactured from textile fabrics, knitted, woven or crocheted (except for those referred to Heading 5906), felt, or nonwoven fabrics impregnated or covered with porous rubber, or
- are manufactured from non-impregnated or non-covered textile fabrics, knitted, woven or crocheted, felt, or nonwoven fabrics and were subsequently impregnated or covered with porous rubber. (Note 3c to Chapter 56 and Note 4, the last paragraph to Chapter 59).

Chapter 48 Paper and Paperboard; Articles of Paper Pulp, of Paper or of Paperboard

- **1.** For the purposes of the given Heading, if otherwise is not specified in the text, the term "paper" applies to paperboard (regardless of the thickness or weight of 1 m2).
 - 2. This Chapter does not cover:
 - a) articles of Chapter 30;
 - b) stamping foils of Heading 3212;
 - c) perfumed papers or papers impregnated or coated with cosmetics (Chapter 33);
- d) paper or cellulose wadding impregnated, coated or covered with soap or detergent (Heading 3401) or with polishes, creams or similar preparations (Heading 3405);
 - e) sensitized paper or paperboard of Headings 3701 to 3704;
 - f) paper impregnated with diagnostic or laboratory reagents (Heading 3822);
- g) paper-reinforced stratified sheeting of plastics, or one layer of paper or paperboard coated or covered with a layer of plastics, the latter constituting more than half the total thickness, or articles of such materials, other than wall coverings of Heading 4814 (Chapter 39);
 - h) articles of Heading 4202 (for example, travel goods);
 - ij) articles of Chapter 46 (manufactures of plaiting material);
 - k) paper yarn or textile articles of paper yarn (Section XI);
 - I) articles of Chapter 64 or 65;
- m) abrasive paper or paperboard (Heading 6805) or paper- or paperboard-backed mica (Heading 6814) (paper and paperboard coated with mica powder are, however, to be classified in this Chapter);
 - n) metal foil backed with paper or paperboard (as a rule, Section XIV or Section XV);
 - o) articles of Heading 9209; or
- p) articles of Chapter 95 (for example, toys, games, sports requisites) or Chapter 96 (for example, buttons).

- **3.** Subject to the provisions of Note 7, Headings 4801 to 4805 include paper and paperboard which have been subjected to calendaring, super-calendaring, glazing or similar finishing, false water-marking or surface sizing, and also paper, paperboard, cellulose wadding and webs of cellulose fibers, colored or marbled throughout the mass by any method. Except where Heading 4803 otherwise requires, these headings do not apply to paper, paperboard, cellulose wadding or webs of cellulose fibers which have been otherwise processed.
- **4.** In this Chapter the expression "newsprint" means uncoated paper of a kind used for the printing of newspapers, of which not less than 50% by weight of the total fiber content consists of wood fibers obtained by a mechanical or chemi-mechanical process, unsized or very lightly sized, having a surface roughness Parker Print Surf (1 MPa) on each side exceeding 2.5 micrometres (microns), weighing not less than 40 g/m2 and not more than 65 g/m2.
- **5.** For the purpose of Heading 4802, the expression "paper and paperboard, of a kind used for writing, printing or other graphic purposes" and "non-perforated cards and non-perforated paper" applies only to paper and paperboard made mainly from bleached pulp or from pulp obtained by a mechanical or chemi-mechanical process and satisfying any of the following criteria:
 - For paper or paperboard weighing not more than 150 g/m2:
 - a) containing 10% or more of fibers obtained by a mechanical process, and:
 - 1) weighing not more than 80 g/m2; or
 - 2) coloured throughout the mass; or
 - b) containing more than 8% ash, and:
 - 1) weighing not more than 80 g/m2; or
 - 2) coloured throughout the mass; or
 - c) containing more than 3% ash having a brightness of 60% or more; or
- d) containing more than 3% but not more than 8% ash, having a brightness less than 60%, and a burst index equal to or less than 2.5 kPa x m2/g; or
- e) containing 3% ash or less, having a brightness of 60% or more, and a burst index equal to or less than 2.5 kPa x m2/g.
 - For paper or paperboard weighing more than 150 g/m2;
 - a) coloured throughout the mass; or
 - b) having a brightness of 60% or more, and
 - 1) a caliper of 225 micrometres (microns) or less; or
- 2) a caliper more than 225 micrometres (microns) but not more than 508 micrometers (microns) and an ash content more than 3%; or
- c) having a brightness of less than 60%, a caliper of 254 micrometres (microns) or less and an ash content more than 8%.

Heading 4802 does not, however, cover filter paper or paperboard (including tea-bag paper) or felt paper or paperboard.

- **6.** In this Chapter, "kraft paper and paperboard" means paper and paperboard of which not less than 80% by weight of the total fiber content consists of fibers obtained by the chemical sulphate or soda processes.
- **7.** Except where the terms of the headings otherwise require, paper, paperboard, cellulose wadding and webs of cellulose fibres answering a description in two or more of the Headings 4801 to 4811 are to be classified under that one of such headings which occurs last in numerical order in the Nomenclature.
- **8.** Headings 4801, and 4803 4809 apply only to paper, paperboard, cellulose wadding and webs of cellulose fibres:
 - a) in strips or rolls of a width exceeding 36 cm; or
- b) in rectangular (including square) sheets with one side exceeding 36 cm and the other side exceeding 15 cm in the unfolded state.
- **9.** For the purposes of Heading 4814, the expression "wallpaper and similar coverings" applies only to:
- a) paper in rolls, of a width of not less than 45 cm and not more than 160 cm, suitable for wall or ceiling decoration:
- i) grained, embossed, surface-coloured, design-printed or otherwise surface-decorated (e.g. with textile flock), whether or not coated or covered with transparent protective plastics;
 - ii) with an uneven surface resulting from incorporation of particles of wood, straw, etc.;
- iii) coated or covered on the face side with plastics, the layer of plastics being grained, embossed, coloured, design-printed or otherwise decorated; or
- iv) covered on the face side with plaiting materials, whether or not bound together in parallel strands or woven:
- b) borders and friezes, of paper, treated as above, whether or not in rolls, suitable for wall or ceiling decoration;

c) wall coverings of paper made up of several panels, in rolls or sheets, printed so as to make up a scene, design or motif when applied to a wall.

Products on a base of paper or paperboard, suitable for use both as floor coverings and wall coverings are to be classified within Heading 4823.

- **10.** Heading 4820 does not cover loose sheets or cards, cut to size, whether or not printed, embossed or perforated.
- **11.** Heading 4823 applies inter alia to perforated paper or paperboard cards for Jacquard or similar machines and paper lace.
- **12.** Except for the goods of Heading 4814 or 4821, paper, paperboard, cellulose wadding and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods fall within Chapter 49.

Subheading notes:

1. For the purposes of Subheadings 4804 11 and 4804 19, "kraftliner" means machine-finished or machine-glazed paper and paperboard, of which not less than 80% by weight of the total fibre content consists of wood fibres obtained by the chemical sulphate or soda process, in rolls, weighing more than 115 g/m2 and halving a minimum Mullen bursting strength as indicated in the following table or the linearly interpolated or extrapolated equivalent for any other weight.

/ Weight (g/m2)	Minimum Mullen bursting strength (kPa)
115	393
125	417
200	637
300	824
400	961

- **2.** For the purposes of Subheadings 4804 21 and 4804 29, "sack kraft paper" means machine-finished paper, of which not less than 80% by weight of the total fibre content consists of fibres obtained by the chemical sulphate or soda processes, in rolls, weighing not less than 60 g/m2 but not more than 115 g/m2 and meeting one of the following sets of specifications:
- a) having a mullen burst index of not less than 3.7 kPa x m2/g and a stretch factor of more than 4.5% in the cross direction and of more than 2% in the machine direction;
- b) having a minima for tear and tensile as indicated in the following table or the linearly interpolated equivalent for any other weight:

Weight g/m2 	Minimum (mN)	tear	Minimum tensile (kN/m)		
	Machine direction	Machine direction plus cross direction	direction	Machine direction plus cross direction	
60	700	1510	1.9	6

100	1230	2635	3.7	10.6	
115	1425	3060	4.4	12.3	

- **3.** For the purposes of Subheading 4805 11, "semi-chemical fluting paper" means paper, in rolls, of which not less than 65% by weight of the total fibre content consists of unbleached hardwood fibres obtained by a semi-chemical pulping process, and having a CMT 30 (Corrugated Medium Test with 30 minutes of conditioning) crush resistance exceeding $1.8 \text{ N} \times \text{m2/g}$ at 50% relative humidity, at 23°C .
- **4.** Subheading 4805 12 includes paper in rolls made chiefly from straw cellulose obtained by the semi-chemical pulping process with the weight of 1 m2 of 130 g or more and having CMT 30 (Corrugated Medium Test with 30 minutes of conditioning) crush resistance greater than 1.4 N x m2/g at 50% relative humidity and 23° C.
- **5.** Subheadings 4805 24 and 4805 25 include paper and paperboard obtained fully or chiefly from mass of regenerated paper or paperboard (waste and scrap). The testliner may also have a surface layer of dyed paper or paper obtained from bleached or unbleached non-regenerated mass. Such items have Mullen burst index of at least 2 kPa x m2/g.
- **6.** For the purposes of Subheading 4805 30, "sulphite wrapping paper" means machine-glazed paper, of which more than 40% by weight of the total fibre content consists of wood fibres obtained by the chemical sulphite process, having an ash content not exceeding 8% and having a Mullen burst index of not less than 1.47 kPa x m2/g.
- **7.** For the purposes of Subheading 4810 22, "light-weight coated paper" means paper, coated on both sides, of a total weight not exceeding 72 g/m2, with a coating weight not exceeding 15 g/m2 per side, on a base of which not less than 50% by weight of the total fibre content consists of wood fibres obtained by a mechanical process.

Chapter 49 Printed Books, Newspapers, Pictures and Other Products of the Printing Industry; Manuscripts, Typescripts and Plans

Notes:

- 1. This Chapter does not cover:
- a) photographic negatives or positives on transparent bases (Chapter 37);
- b) maps, plans or globes, in relief, whether or not printed (Heading 9023);
- c) playing cards or other goods of Chapter 95; or
- d) original engravings, prints or lithographs (Heading 9702), postage or revenue stamps, stamp-postmarks, first-day covers, postal stationery or the like of Heading 9704, antiques of an age exceding 100 years or other articles of Chapter 97.
- **2.** For the purposes of Chapter 49, the term "printed" also means reproduced by means of a duplicating machine, produced under the control of a computer, embossed, photographed, photocopied, thermocopied or typewritten.
- **3.** Newspapers, journals and periodicals, which are bound otherwise than in paper, and sets of newspapers, journals or periodicals comprising more than one number under a single cover are to be classified in Heading 4901, whether or not containing advertising material.
 - 4. Heading 4901 also covers:
- a) a collection of printed reproduction of, for example, works of art or drawings, with a relative text, put up with numbered pages in a form suitable for binding into one or more volumes;
 - b) a pictorial supplement accompanying, and subsidiary to, a bound volume; and
- c) printed parts of books or booklets, in the form of assembled or separate sheets or signatures, constituting the whole or a part of a complete work and designed for binding.

However, printed pictures or illustrations not bearing a text, whether in the form of signatures or separate sheets, fall within Heading 4911.

- **5.** Subject to Note 3 to this Chapter, Heading 4901 does not cover publications which are essentially devoted to advertising (for example, brochures, pamphlets, leaflets, trade catalogues, year books published by trade associations, tourist propaganda). Such publications are to be classified in Heading 4911.
- **6.** For the purposes of Heading 4903, the expression "children's picture books" means books for children in which the pictures form the principal interest and the text is subsidiary.

- **2A.** Goods classifiable in Chapters 50 to 55 or in Heading 5809 or 5902 and of a mixture of two or more textile materials are to be classified as if consisting wholly of that one textile material which predominates by weight over any other single textile material.

When not one textile material predominates by weight, the goods are to be classified as if consisting wholly of that one textile material which is covered by the heading which occurs last in numerical order among those which equally merit consideration.

- 2B. For the purposes of the above rule:
- a) gimped horsehair yarn (Heading 5110) and metallised yarn (Heading 5605) are to be treated as a single textile material the weight of which is to be taken as the aggregate of the weights of its components; for the classification of woven fabrics, metal thread is to be regarded as a textile material;
- b) the choice of the appropriate heading shall be effected by determining first the chapter and then the applicable heading within that chapter, disregarding any materials not classified in that chapter;
- c) when both Chapters 54 and 55 are involved with any other chapter, Chapters 54 and 55 are to be treated as a single chapter;
- d) where a chapter or a heading refers to goods of different textile materials, such materials are to be treated as a single textile material.
- **2C.** The provisions of Paragraphs 2A and 2B above apply also to the yarns referred to in Note 3 (A, B), 4 (A, B), 5 or 6 below.
- **3A.** For the purposes of this Section, and subject to the exceptions in Paragraph 3B below, yarns (single, multiple (folded) or cabled) of the following descriptions are to be treated as "twine, cordage, ropes and cables":
 - a) of silk or waste silk, measuring more than 20,000 decitex;
- b) of man-made fibers (including yarn of two or more monofilaments of Chapter 54) measuring more than 10,000 decitex;
 - c) of true hemp or flax:
 - i) polished or glazed, measuring 1,429 decitex or more; or
 - ii) not polished or glazed, measuring more than 20,000 decitex;
 - d) of coir, consisting of three or more plies;
 - e) of other vegetable fibers, measuring more than 20,000 decitex; or

- f) reinforced with metal thread.
- 3B. Exceptions:
- a) yarn of wool or other animal hair and paper yarn, other than yarn reinforced with metal thread;
- b) man-made filament tow of Chapter 55 and multifilament yarn without twist or with a twist of less than five turns per metre of Chapter 54;
 - c) silkworm gut of Heading 5006, and monofilaments of Chapter 54;
- d) metallised yarn of Heading 5605; yarn reinforced with metal thread is subject to Paragraph 3A (f) above; and
 - e) chenille yarn, gimped yarn, and loop wale-yarn of Heading 5606.
- **4A.** For the purposes of Chapters 50, 51, 52, 54 and 55, the expression "put up for retail sale" in relation to yarn means, subject to the exceptions in Paragraph 4B below, yarn (single, multiple (folded) or cabled) put up:
 - a) on cards, reels, tubes or similar supports, of a weight (including support) not exceeding:
 - i) 85 g in the case of silk, waste silk or man-made filament yarn; or
 - ii) 125 g in other cases;
 - b) in balls, hanks or skeins of a weight not exceeding:
 - i) 85 g in the case of man-made filament yarn of less than 3,000 decitex, silk or silk waste;
 - ii) 125 g in the case of all other yarns of less than 2,000 decitex; or
 - iii) 500 a in other cases:
- c) in hanks or skeins comprising several smaller hanks or skeins separated by dividing threads which render them independent one of the other, each of uniform weight not exceeding:
 - i) 85 g in the case of silk, waste silk or man-made filament yarn; or
 - ii) 125 g in other cases.
 - 4B. Exceptions:
 - a) single yarn of any textile material, except:
 - i) single yarn of wool or fine animal hair, unbleached; and
- ii) single yarn of wool or fine animal hair, bleached, dyed or printed, measuring more than 5,000 decitex:
 - b) multiple (folded) or cabled yarn, unbleached:
 - i) of silk or waste silk, however put up; or
 - ii) of other textile material except wool or fine animal hair, in hanks or skeins;
- c) multiple (folded) or cabled yarn of silk or waste silk, bleached, dyed, or printed, measuring 133 decitex or less; and
 - d) single multiple (folded) or cabled yarn of any textile material:
 - i) in cross-reeled hanks or skeins; or
- ii) put up on supports or in some other manner indicating its use in the textile industry (for example, on cops, twisting mill tubes, pirns, conical bobbins or spindles, or reeled in the form of cocoons for embroidery looms).
- **5.** For the purposes of Headings 5204, 5401 and 5508, the expression "sewing thread" means multiple (folded) or cabled yarn:
- a) put up on supports (for example, reels, tubes,) of a weight (including supports) not exceeding 1,000 grams;
 - b) dressed for use as sewing thread; and
 - c) with a final "Z" twist.
- **6.** For the purposes of this Section, the expression "high-tenacity yarn" means yarn having a tenacity, expressed in cN/tex (centinewtons per tex), greater than the following:
 - single yarn of nylon or other polyamides, or of polyesters: 60 cN/tex,
 - multiple (folded) or cabled yarn of nylon or other polyamides, or of polyesters: 53 cN/tex,
 - single, multiple (folded) or cabled yarn of viscose rayon: 27 cN/tex.
 - **7.** For the purposes of this Section, the expression "made up" means:
 - a) cut otherwise than into squares or rectangles;
- b) produced in the finished state, ready for use (or merely needing separation by cutting dividing threads) without sewing or other working (for example, certain dusters, towels, table cloths, scarf squares, blankets);
- c) hemmed or with rolled edges, or with a knotted fringe at any of the edges, but excluding fabrics the cut edges of which have been prevented from unravelling by whipping or by other simple means;
 - d) cut to size and having undergone a process of drawn thread work;
- e) assembled by sewing, gumming or otherwise (other than piece goods consisting of two or more lengths of identical material joined end to end and piece goods composed of two or more textiles assembled in layers, whether or not padded);
- f) knitted or crocheted to shape, whether presented as separate items or in the form of a number of items in the length.
 - **8.** For the purposes of Chapters 50 to 60:

- a) Chapters 50 to 55 and 60 and, except where the context otherwise requires, Chapters 56 to 59, do not apply to goods made up within the meaning of Note 7; and
 - b) Chapters 50 to 55 and 60 do not apply to goods of Chapters 56 to 59.
- **9.** The woven fabrics of Chapters 50 to 55 include fabrics consisting of layers of parallel textile yarns superimposed on each other at acute or right angles. These layers are bonded at the intersections of yarns by adhesive or by thermal bonding.
- **10.** Elastic products consisting of textile materials combined with rubber threads are classified in this Section.
 - 11. For the purposes of this Section, the expression "impregnated" includes "dipped".
 - 12. For the purposes of this Section, the expression "polyamides" includes "aramids".
- **13.** In this Section and wherever applicable throughout the nomenclature, the term "elastomer filaments" means a complex filament, including a monofilament, of synthetic textile material, other than texturised filament, which does not break in threefold tension as compared with its initial length and which in twofold tension as compared with its initial length returns, in a period of five minutes, to a length exceeding its initial length by not more than one and a half times.
- **14.** Unless the context otherwise requires, textile garments of different headings are to be classified in their own headings even if put up in sets for retail sale. For the purposes of this Note, the expression "textile garments" means garments of Headings 6101 to 6114 and Headings 6201 to 6211.

Subheading notes:

- **1.** In this Section, and where applicable, throughout the Nomenclature, the following expressions have the meanings hereby assigned to them:
 - a) "Unbleached yarn":

Yarn which:

- i) has the natural colour of its constituent fibers and has not been bleached, dyed (whether or not in the mass) or printed; or
 - ii) is of indeterminate colour (gray yarn), manufactured from garnetted stock.

Such yarn may have been treated with a colourless dressing or fugitive dye (which disappears after simple washing with soap) and, in the case of man-made fibers, treated in the mass with delustring agents (for example, titanium dioxide).

b) "Bleached yarn":

Yarn which:

- i) has undergone a bleaching process, is made of bleached fibers or, unless the context otherwise requires, has been dyed white (whether or not in the mass) or treated with a white dressing;
 - ii) consists of a mixture of unbleached and bleached fibers; or
 - iii) is multiple (folded) or cabled and consists of unbleached and bleached yarns.
 - c) "Coloured (dyed or printed) yarn":

Yarn which:

- i) is dyed (whether or not in the mass) other than white or in a fugitive colour or printed, or made from dyed or printed fibers:
- ii) consists of a mixture of dyed fibers of different colours or of a mixture of unbleached or bleached fibers with coloured fibers (marl or mixture yarns), or is printed in one or more colours at intervals to give the impression of dots;
 - iii) is obtained from slivers or rovings which have been printed; or
 - iv) is multiple (folded) or cabled and consists of unbleached or bleached yarn and coloured yarn.

The above definitions also apply mutatis mutandis to monofilament and to strip or the like of Chapter 54.

d) "Unbleached woven fabric":

woven fabric made from unbleached yarn and which has not been bleached, dyed or printed. Such fabric may have been treated with a colourless dressing or a fugitive dye.

e) "Bleached woven fabric":

Woven fabric which:

- i) has been bleached, or unless the context otherwise requires, dyed white or treated with a white dressing, in the piece;
 - ii) consists of bleached yarn; or
 - iii) consists of unbleached and bleached yarn.
 - f) "Dyed woven fabric":

Woven fabric which:

- i) is dyed in a single uniform colour other than white (unless the context otherwise requires) or has been treated with a coloured finish other than white (unless the context otherwise requires), in the piece; or
 - ii) consists of coloured varn of a single uniform colour.
 - g) "Woven fabric of yarns of different colours":

Woven fabric (other than printed fabric) which:

- i) consists of yarns of different colours or yarns of different shades of the same colour (other than the natural colour of the constituent fibers);
 - ii) consists of unbleached or bleached yarn and coloured yarn; or
 - iii) consists of marl or mixture yarns.
 - (In all cases, the yarn used in selvedges and piece ends is not taken into consideration).
 - h) "Printed woven fabrics":
- woven fabric which has been printed in the piece, whether or not made from yarns of different colours.

(The following are also regarded as printed woven fabrics; woven fabrics bearing designs made, for example, with a brush or spray gun, by means of transfer paper, by flocking, or by batik process).

The process of mercerization does not affect the classification of yarns or fabrics within the above categories.

The definitions set forth above in the notes to Subheadings 1d to 1h are, in the introduction of relevant amendments, applicable with respect to knitted or crocheted fabrics.

ij) "Plain weave":

A fabric construction in which each yarn of the weft passes alternately over and under successive yarns of the warp and each yarn of the warp passes alternately over and under successive yarns of the weft

- **2A.** Products of Chapter 56 to 63 containing two or more textile materials are to be regarded as consisting wholly of that textile material which would be selected under Note 2 to this Section for the classification of a product of Chapters 50 to 55 or of Heading 5809 consisting of the same textile materials.
 - **2B.** For the application of this rule:
- a) where appropriate, only the part which determines the classification under interpretative Rule 3 shall be taken into account;
- b) in the case of textile products consisting of a ground fabric and a pile or looped surface no account shall be taken of the ground fabric;
- c) in the case of embroidery of Heading 5810 and goods thereof, only the ground fabric shall be taken into account. However, embroidery without visible ground, and goods thereof, shall be classified with reference to the embroidering threads alone.

Chapter 52 Cotton

Subheading note:

1. For the purposes of Subheadings 5209 42 and 5211 42, the expression "denim" means fabrics of yarns of different colours, of 3-thread or 4-thread twill, including broken twill, warp faced, the warp yarns of which are of one and the same colour and the weft yarns of which are unbleached, bleached, dyed grey or coloured a lighter shade of the colour of the warp yarns.

- a) in balls or on cards, reels, tubes, or similar supports, of a weight (including support) not exceeding 200 grams;
 - b) in hanks or skeins of a weight not exceeding 125 grams;
- c) in hanks or skeins comprising several smaller hanks or skeins separated by dividing threads which render them independent one of the other, each of uniform weight not exceeding 125 grams.

1B. Exceptions:

- a) multiple or cabled yarn, unbleached, in hanks or skeins;
- b) multiple or cabled yarn, put up:
- i) in cross-reeled hanks or skeins; or

Chapter 54 Man-Made Filaments; Strip and the Like of Man-Made Textile Materials

Notes:

- **1.** Throughout the Nomenclature, the term "man-made fibres" means fibres and filaments of organic polymers produced by manufacturing processes, either:
- a) by polymerisation of organic monomers for the production of polymers, such as polyamides, polyesters, polyolefines or polyurethanes or by chemical modification of polymers produced by means of this process (for example, polyvinyl alcohol obtained by hydrolysis of polyvinil acetate); or
- b) by dissolution or chemical transformation of natural organic polymers (for example, cellulose), for the obtaining of polymers such as copper ammonia or viscose fibre, or by chemical modification of natural organic polymers (for example, cellulose, casein, or other proteins or alginic acid), for the obtaining of polymers such as cellulose acetate or alginates.

The terms "synthetic" and "artificial", used in relation to fibres, mean: synthetic: fibres as defined at 1a; artificial: fibres as defined at 1b. Strip and the like filaments of Heading 5404 or 5405 shall not be deemed man-made fibres.

The terms "man-made", "synthetic" and "artificial" shall have the same meanings when used in relation to "textile materials".

2. Headings 5402 and 5403 do not apply to synthetic or artificial filament tow of Chapter 55.

Chapter 55 Man-Made Staple Fibres

Note:

- **1.** Headings 5501 and 5502 apply only to man-made filament tow, consisting of parallel filaments of a uniform length equal to the length of the tow, meeting the following specifications:
 - a) length of tow exceeding 2 m;
 - b) twist less than five turns per metre;
 - c) measuring per filament less than 67 decitex;
- d) synthetic filament tow only: the tow must be drawn, that is to say, be incapable of being stretched by more than 100% of its length;
 - e) total measurement of tow more than 20000 decitex.

Tow of a length not exceeding 2 m is to be classified within Headings 5503 or 5504.

Chapter 56 Wadding, Felt, and Non-Wovens; Special Yarns; Twine, Cordage, Ropes and Cables and Articles Thereof

Notes:

- 1. This Chapter does not cover:
- a) wadding, felt or nonwovens, impregnated, coated or covered with substances or preparations (for example, perfumes or cosmetics of Chapter 33, soaps or detergents of Heading 3401, polishes, creams or similar preparations of Heading 3405, fabric softeners of Heading 3809) where the textile material is present merely as a carrying medium;
 - b) textile products of Heading 5811;
- c) natural or artificial abrasive powder or grain, on a backing of felt or nonwovens (Heading 6805);
 - d) agglomerated or reconstituted mica, on a backing of felt or nonwovens (Heading 6814); or
 - e) metal foil on a backing of felt or nonwovens (as a rule, Section XIV or XV).
- **2.** The term "felt" includes needleloom felt and fabrics consisting of a web of textile fibres the cohesion of which has been enhanced by a stitch-bonding process using fibers from the web itself.
- **3.** Headings 5602 and 5603 cover respectively felt and nonwovens, impregnated, coated, covered or laminated with plastics or rubber whatever the nature of these materials (compact or cellular).

Heading 5603 also includes non-wovens in which plastics or rubber forms the bonding substance.

Headings 5602 and 5603 do not, however, cover:

- a) felt impregnated, coated, covered or laminated with plastics or rubber, containing 50% or less by weight of textile materials or felt completely embedded in plastics or rubber (Chapter 39 or 40);
- b) non-wovens, either completely embedded in plastics or rubber, or entirely coated or covered on both sides with such materials, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39 or 40);

- c) plates, sheets or strip of cellular plastics or cellular rubber combined with felt or nonwovens, where the textile material is present merely for reinforcing purposes (Chapter 39 or 40).
- **4.** Heading 5604 does not cover textile yarn, or strip or the like of Heading 5404 or 5405, in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55); for the purpose of this provision, no account should be taken of any resulting change of colour.

Chapter 59 Impregnated, Coated, Covered or Laminated Textile Fabrics; Textile Articles of a Kind Suitable for Industrial Use

Notes:

- **1.** Except where the context otherwise requires, for the purposes of this Chapter, the expression "textile fabrics" applies only to woven fabrics of Chapters 50 to 55 and Headings 5803 and 5806, the braids and ornamental trimmings in the piece of Heading 5808 and knitted or crocheted fabrics of Heading 6002-6006.
 - 2. Heading 5903 applies to:
- a) textile fabrics, impregnated, coated, covered or laminated with plastics, whatever the weight per square metre and whatever the nature of the plastic material (compact or cellular), other than:
- 1) fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55, 58 or 60); for the purposes of this provision, no account should be taken of any resulting change in colour;
- 2) products which cannot, without fracturing, be bent manually around a cylinder of a diameter of 7 mm. at a temperature between 15°C and 30°C (usually Chapter 39):
- 3) products in which the textile fabric is either completely embedded in plastics or entirely coated or covered on both sides with such material, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change in colour (Chapter 39);
- 4) fabrics partially coated or partially covered with plastics and bearing designs resulting from these treatments (usually Chapters 50 to 55, 58 or 60);
- 5) plates, sheets or strip of cellular plastics, combined with textile fabric, where the textile fabric is present merely for reinforcement purposes (Chapter 39); or
 - 6) textile products of Heading 5811;
- b) fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with plastics, of Heading 5604.
- **3.** For the purposes of Heading 5905, the expression "textile wall coverings" applies to products in rolls, of a width of not less than 45 cm, suitable for wall or ceiling decoration, consisting of a textile

surface which has been fixed on a backing or has been treated on the back (impregnated or coated to permit pasting).

This Heading does not, however, apply to wall coverings consisting of textile flock or dust fixed directly to a backing of paper (Heading 4814) or to a textile backing (generally Heading 5907).

- **4.** For the purposes of Heading 5906, the expression "rubberised textile fabrics" means:
- a) textile fabrics impregnated, coated, covered or laminated with rubber:
- i) weighing not more than 1,500 g/m2; or
- ii) weighing more than 1,500 g/m2 and containing more than 50% be weight of textile material;
- b) fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with rubber, of Heading 5604;
- c) fabrics composed of parallel textile yarns agglomerated with rubber, irrespective of their weight per square metre.

This Heading does not, however, apply to plates, sheets or strip of cellular rubber, combined with textile fabric, where the textile fabric is present merely for reinforcement purposes (Chapter 40), or textile products of Heading 5811.

- **5.** Heading 5907 does not apply to:
- a) fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55, 58 or 60); for the purposes of this provision, no account should be taken of any resulting change in colour;
- b) fabrics painted with designs (other than painted canvas being theatrical scenery, studio back-cloths or the like):
- c) fabrics partially covered with flock, dust, powdered cork or the like and bearing desings resulting from these treatments. However, imitation pile fabrics remain classified in this Heading;
 - d) fabrics finished with normal dressings having a basis of amylaceous or similar substances;
 - e) wood veneered on a backing of textile fabrics (Heading 4408);
 - f) natural or artificial abrasive powder or grain, on a backing of textile fabrics (Heading 6805);
 - g) agglomerated or reconstituted mica, on a backing of textile fabrics (Heading 6814); or
 - h) metal foil on a backing of textile fabrics (as a rule, Section XIV or XV).
 - **6.** Heading 5910 does not apply to:
 - a) transmission or conveyor belting, of textile material, of a thickness of less than 3 mm; or
- b) transmission or conveyor belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord, impregnated, coated, covered or sheathed with rubber (Heading 4010).
- **7.** Heading 5911 applies to the following goods, which do not fall in any other heading of Section XI:
- a) textile products in the piece, cut to length or simply cut to rectangular (including square) shape (other than those having the character of the products of Headings 5908 to 5910), the following only:
- i) textile fabrics, felt and felt-lined woven fabrics, coated, covered or laminated with rubber, leather or other material, of a kind used for card clothing, and similar fabrics of a kind used for other technical purposes, including narrow fabrics made of velvet impregnated with rubber, for covering weaving spindles (weaving beams);
 - ii) bolting cloth:
 - iii) straining cloth of a kind used in oil presses or the like, of textile material or of human hair;
- iv) flat woven textile fabrics with multiple warp or weft, whether or not felted, impregnated or coated, of a kind used in machinery or for other technical purposes;
 - v) textile fabrics reinforced with metal, of a kind used for technical purposes;
- vi) cords, braids and the like, whether or not coated, impregnated or reinforced with metal, of a kind used in industry as packing or lubricating materials;
- b) textile articles (other than those of Headings 5908 to 5910) of a kind used for technical purposes (for example, textile fabrics and felts, endless or fitted with linking devices, of a kind used in paper-making or similar machines (for example, for pulp or asbestos-cement), gaskets, washers, polishing discs and other machinery parts).

Chapter 61 Articles of Apparel and Clothing Accessories, Knitted or Crocheted

Notes:

- 1. This Chapter applies only to made up knitted or crocheted articles.
- 2. This Chapter does not cover:
- a) goods of Heading 6212;
- b) worn clothing or other worn articles of Heading 6309; or
- c) orthopaedic appliances, surgical belts, trusses or the like (Heading 9021).
- 3. For the purposes of Headings 6103 and 6104:
- **a.** The term "suit" means a set of garments composed of two or three pieces made up, in respect of their outer surface, in identical fabric and comprising:
- one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made of the same fabric as the outer surface of the other components of the set and whose back is made of the same fabric as the lining of the suit coat or jacket; and
- one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces or bibs.

All of the components of a "suit" must be of the same fabric construction, colour, and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have a piping (a strip of fabric sewn into the seam) in a different fabric.

If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

The term "suit" includes the following sets of garments, whether or not they fulfil all the above conditions:

- morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;
- evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;
- dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps, revealing more of the shirt front), but has shiny silk or imitation silk lapels.

- **b.** The term "ensemble" means a set of garments (other than suits and articles of Heading 6107, 6108 or 6109), composed of several pieces made up in identical fabric, put up for retail sale, and comprising:
- one garment designed to cover the upper part of the body, with the exception of pullovers which may form a second upper garment in the sole context of twin sets, and of waistcoats which may also form a second upper garment, and
- one or two different garments designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

All of the components of an ensemble must be of the same fabric construction, style, colour and composition; They also must be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski suits, of Heading 6112.

- **4.** Headings 6105 and 6106 do not cover garments with pockets below the waist, with a ribbed waistband or other means of tightening at the bottom of the garment, or garments having an average of less than 10 stitches per linear centimetre in each direction counted on an area measuring at least 10x10 cm. Heading 6105 does not cover sleeveless garments.
- **5.** Heading 6109 does not cover garments with a drawstring, ribbed waistband or other means of tightening at the bottom of the garment.
 - **6.** For the purposes of Heading 6111:
- a) the expression "babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86 cm; it also covers babies' napkins;
- b) articles which are prima facie classifiable both within Heading 6111 and within other headings of this Chapter are to be classified within Heading 6111.
- **7.** For the purposes of Heading 6112, "ski suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (crosscountry or alpine). They consist either of:
- a) a "ski overall", that is one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or
- b) a "ski ensemble", that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:
- one garment, such as an anorak, wind-cheater, wind-jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and
- one pair of trousers whether or not extending above waist level, one pair of breeches or one bib and brace overall.

The "ski ensemble" may also consist of an overall similar to the one mentioned in Paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition, whether or not of the same colour; they also must be of corresponding or compatible

- **8.** Garments which are prima facie classifiable within both Heading 6113 and within other headings of this Chapter, excluding Heading 6111, are to be classified within Heading 6113.
- **9.** Garments of this Chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.

Garments which cannot be identifiable as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments.

10. Articles of this Chapter may be made of metal thread.

Additional notes:

1. For the application of Note 3b of this Chapter the components of an ensemble must be made up entirely in a single identical fabric, subject to compliance with the other conditions laid down in the said Note.

For this purpose:

- the fabric used can be unbleached, bleached, dyed, of yarns of different colours or printed;
- a pullover or waistcoat with ribbing is to be considered as a component of an ensemble even if there is no ribbing on the component intended to cover the lower part of the body, provided that the ribbing is not sewn on but produced directly by the knitting process.

Sets of garments are not regarded as ensembles when their components are made up in different fabrics, even if the difference is due only to their respective colours.

All the components of an ensemble must be presented together for retail sale as a single unit. Individual wrapping or separate labeling of each component of such a single unit does not influence its classification as an ensemble.

2. For the purposes of Heading 6109, the term "singlets" and "other vests" include garments, even if of a fancy design, worn next to the body, without collar, with or without sleeves, including those with shoulder straps.

These garments, which are intended to cover the upper part of the body, often possess many characteristics in common with those of T-shirts or with more traditional kinds of singlets and other vests of Heading 6109.

- **3.** Heading 6111 and Subheadings 6116 10 200 0 and 6116 10 800 0 cover gloves, mittens and mitts impregnated or coated with plastics or rubber, even if they:
- are made from woven fabrics, knitted or crocheted, impregnated or coated with plastics, of headings 5903 or 5906;
- are made from non-impregnated or uncoated fabrics, knitted or crocheted, and are subsequently impregnated or coated with plastics or rubber.

If a woven fabric, knitted or crocheted, serves only for reinforcement, then gloves, mittens or mitts, impregnated or coated with porous plastic or porous rubber, are included in Chapter 39 or 40, even if they are made from non-impregnated or uncoated fabrics, knitted or crocheted, and are subsequently impregnated or coated with porous plastic or porous rubber (Note 2a(5) and Note 4, the last paragraph, to Chapter 59).

Chapter 62 Articles of Apparel and Clothing Accessories, Not Knitted or Crocheted

Notes:

- 1. This Chapter applies only to made-up articles of any textile fabric other than wadding, excluding knitted or crocheted articles (other than those of Heading 6212).
 - 2. This Chapter does not cover:
 - a) worn clothing or other worn articles of Heading 6309; or
 - b) orthopaedic appliances, surgical belts, trusses, or the like (Heading 9021).
 - **3.** For the purposes of Headings 6203 and 6204:

- **a.** The term "suit" means a set of garments composed of two or three pieces made up, in respect of their outer surface, in identical fabric and comprising:
- one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer surface of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket; and
- one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swim-wear), a skirt or a divided skirt, having neither braces nor bibs.

All of the components of a "suit" must be of the same fabric construction, colour and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have a piping (a strip of fabric sewn into the seam) of a different fabric.

If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

The term "suit" includes the following sets of garments, whether or not they fulfil all of the above conditions:

- morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;
- evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;
- dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.
- **b.** The term "ensemble" means a set of garments (other than suits and articles of Heading 6207 or 6208) composed of several pieces made up in identical fabric, put up for retail sale, and comprising:
- one garment designed to cover the upper part of the body, with the exception of waistcoats which may also form a second upper garment; and
- one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

All of the components of an ensemble must be of the same fabric construction, style, colour and composition; they must also be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski suits, of Heading 6211.

- **4.** For the purposes of Heading 6209:
- a) the expression "babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86 cm; it also covers babies' napkins;
- b) articles which are prima facie classifiable both within Heading 6209 and within other headings of this Chapter are to be classified within Heading 6209.
- **5.** Garments which are prima facie classifiable both within Heading 6210 and within other Headings of this Chapter, excluding Heading 6209, are to be classified within Heading 6210.
- **6.** For the purposes of Heading 6211, "ski suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (crosscountry or alpine). They consist either of:
- a) a "ski overall", that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or
- b) a "ski ensemble", that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:
- one garment such as an anorak, wind-cheater, wind-jacket or similar articles, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and
- one pair of trousers whether or not extending above the waist level, one pair of breeches or one bib and brace overall.

The "ski ensemble" may also consist of an overall similar to the one mentioned in Paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

All of the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same colour; they also must be of corresponding or compatible size.

- **7.** Scarves and articles of the scarf type, square or approximately square, of which no side exceeds 60 cm, are to be classified as handkerchiefs (Heading 6213). Handkerchiefs of which any side exceeds 60 cm are to be classified within Heading 6214.
- **8.** Garments of this Chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.

Garments which cannot be identified as either men's or boys' garments are to be classified in the headings covering women's or girls' garments.

9. Articles of this Chapter may be made of metal thread.

Additional note:

1. For the application of Note 3b of this Chapter the components of an ensemble must be made up entirely in a single identical fabric, subject to compliance with the other conditions laid down in the said Note.

For this purpose the fabric used can be unbleached, bleached, dyed, of yarns of different colours or printed.

Sets of garments are not regarded as ensembles when their components are made up in different fabrics, even if the difference is due only to their respective colours.

All of the components of an ensemble must be presented together for retail sale as a single unit. Individual wrappings or separate labelling of each component of such a single unit does not influence its classification as an ensemble.

- **2.** Headings 6209 and 6216 cover gloves, mittens and mitts impregnated or coated with plastics or rubber, even if they:
- are made from textile fabrics (other than woven fabrics, knitted or crocheted), impregnated or coated with plastics, of headings 5903 or 5906;
- are made from non-impregnated or uncoated textile fabrics (other than woven fabrics, knitted or crocheted), and are subsequently impregnated or coated with plastics or rubber.

If a textile fabrics (other than woven fabric, knitted or crocheted), serves only for reinforcement, then gloves, mittens or mitts, impregnated or coated with porous plastic or porous rubber, are included in Chapter 39 or 40, even if they are made from non-impregnated or uncoated textile fabrics (other than fabrics, knitted or crocheted), and are subsequently impregnated or coated with porous plastic or porous rubber (Note 2a(5) and Note 4, the last paragraph to Chapter 59).

Chapter 64 Footwear, Gaiters, and the Like; Parts of Such Articles

Notes:

- **1.** This chapter does not cover:
- a) disposable foot or shoe coverings of flimsy material (for example, paper, sheeting of plastics) without applied soles. These products are classified according to their constituent material;
- b) footwear of textile material, without an outer sole glued, sewn or otherwise affixed or applied to the upper (Section XI);
 - c) worn footwear of Heading 6309;
 - d) articles of asbestos (Heading 6812);
 - e) orthopaedic footwear or other orthopaedic appliances, or parts thereof (Heading 9021); or
- f) toy footwear or skating boots with ice or roller skates attached; shin-guards or similar protective sportswear (Chapter 95).
- **2.** For the purposes of Heading 6406, the term "parts" does not include pegs, protectors, eyelets, hooks, buckles, ornaments, braid, laces, pompons or other trimmings (which are to be classified in their appropriate headings) or buttons or other goods of Heading 9606.
 - **3.** For the purposes of this Chapter:
- a) the terms "rubber" and "plastics" include woven fabrics or other textile products with an external layer of rubber or plastics being visible to the naked eye; for the purpose of this provision, no account should be taken of any resulting change in colour; and
 - b) the term "leather" refers to the goods of Headings 4107, 4112 to 4114.
 - 4. Subject to Note 3 to this Chapter:
- a) the material of the upper shall be taken to be the constituent material having the greatest external surface area, no account being taken of accessories or reinforcements such as ankle patches, edging, ornamentation, buckles, tabs, eyelet stays or similar attachments;
- b) the constituent material of the other sole shall be taken to be the material having the greatest surface area in contact with the ground, no account being taken of accessories or reinforcements such as spikes, bars, nails, protectors or similar attachments.

Subheading note:

- **1.** For the purposes of Subheadings 6402 12, 6402 19, 6403 12, 6403 19 and 6404 11, the expression "sports footwear" applies only to:
- a) footwear which is designed for a sporting activity and has, or has provision for the attachment of, spikes, sprigs, stops, clips, bars or the like;
- b) skating boots, ski-boots and cross-country ski footwear, snowboard boots, wrestling boots, boxing boots and cycling shoes.

Additional note:

1. Within the meaning of Note 4a, "reinforcements" is taken to mean all pieces of material (e.g., plastics or leather) attached to the external surface of the upper to give additional strength, whether or not also attached to the sole. After removal of reinforcements, the visible material must have the characteristics of an upper and not lining.

Account is to be taken of sections covered by accessories or reinforcements when deciding on the composition of the upper.

2. In the application of Note 4(b) for the purpose of classification there is not taken into account one or more layers of textile material which do not possess the properties that are usually required for use as soles (for example, resistance, durability, etc.).

Chapter 70 Glass and Glassware

Notes:

- 1. This Chapter does not cover:
- a) goods of Heading 3207 (for example, vitrifiable enamels and glazes, glass frit, other glass in the form of powder, granules or flakes);
 - b) articles of Chapter 71 (for example, imitation jewellery);
- c) optical-fibre cables of Heading 8544, electrical insulators (Heading 8546) or fittings of insulating material of Heading 8547;
- d) optical fibres, optically worked optical elements, hypodermic syringes, artificial eyes, thermometers, barometers or other articles of Chapter 90;
- e) lamps or lighting fittings, illuminated signs, illuminated name-plates or the like, having a permanently fixed light source, or parts thereof of Heading 9405;
- f) toys, games, sports requisites, Christmas tree ornaments or other articles of Chapter 95 (excluding glass eyes without mechanisms for dolls or for other articles of Chapter 95); or
 - g) buttons, fitted vacuum flasks, scent or similar sprays or other articles of Chapter 96.
 - 2. For the purposes of Headings 7003, 7004 and 7005:
- a) glass is not regarded as "worked" by reason of any process it has undergone before annealing;

- b) cutting to shape does not affect the classification of glass in sheets;
- c) the expression, "absorbent, reflecting or non-reflecting layer" means a microscopically thin coating of metal or of a chemical compound (for example, metal oxide) which absorbs, for example, infrared light or improves the reflecting qualities of the glass while still allowing it to retain a degree of transparency or translucency; or which prevents the light from being reflected on the surface of the glass.
- **3.** The products referred to in Heading 7006 remain classified in that heading whether or not they have the character of articles.
 - **4.** For the purposes of Heading 7019, the expression "glass wool" means:
 - a) mineral wools with a silica (SiO2) content not less than 60% by weight;
- b) mineral wools with a silica (SiO2) content less than 60% but with alkaline oxide (K2O or Na2O) content exceeding 5% by weight or a boric oxide (B2O3) content exceeding 2% by weight.

Mineral wools which do not comply with the above specifications fall within Heading 6806.

5. Throughout the Nomenclature, the expression "glass" includes fused quartz and other fused silica.

Subheading note:

1. For the purposes of Subheadings 7013 22, 7013 33, 7013 41 and 7013 91, the expression "lead crystal" means only glass with a minimum lead monoxide (PbO) content by weight of 24%.

Chapter 71 Natural or Cultured Pearls, Precious or Semi-Precious Stones, Precious Metals, Metals Clad with Precious Metal, and Articles Thereof; Imitation Jewellery; Coin

Notes

- **1.** Subject to Note 1a to Section VI and except as provided below, all articles consisting wholly or partly of:
- a) of natural or cultured pearls or of precious or semi-precious stones (natural, synthetic or reconstructed); or
 - b) of precious metal or of metal clad with precious metal, are to be classified in this Chapter.
- **2a.** Headings 7113, 7114 and 7115 do not cover articles in which precious metal or metal clad with precious metal is present as minor constituents only, such as minor fittings or minor ornamentation (for example, monograms, ferrules and rims), and Paragraph (b) of the foregoing Note 1 does not apply to such articles.
- **2b.** Heading 7116 does not cover articles containing precious metal or metal clad with precious metal (other than as minor constituents).
 - 3. This Chapter does not cover:
 - a) amalgams of precious metal, or colloidal precious metal (Heading 2843);
 - b) sterile surgical suture materials, dental fillings, or other goods of Chapter 30;
 - c) goods of Chapter 32 (for example, lusters);
 - d) supported catalysts (Heading 3815);
 - e) articles of Heading 4202 or 4203 referred to in Note 2B to Chapter 42;
 - f) articles of Heading 4303 or 4304;
 - g) goods of Section XI (textiles and textile articles);
 - h) footwear, headgear or other articles of Chapter 64 or 65;
 - ij) umbrellas, walking-sticks or other articles of Chapter 66;
- k) abrasive goods of Heading 6804 or 6805 or Chapter 82, containing dust or powder of precious or semi-precious stones (natural or synthetic); articles of Chapter 82 with a working part of precious or semi-precious stones (natural, synthetic or reconstructed); machinery, mechanical appliances or electrical goods, or parts thereof, of Section XVI. However, articles and parts thereof, wholly of precious or semi-precious stones (natural, synthetic or reconstructed), remain classified in this Chapter, except unmounted worked sapphires and diamonds for styluses (Heading 8522);
- I) articles of Chapter 90, 91 or 92 (scientific instruments, clocks and watches, musical instruments);
 - m) arms or parts thereof (Chapter 93);
 - n) articles covered by Note 2 to Chapter 95;
 - o) articles classified in Chapter 96 by virtue of Note 4 to that Chapter; or
- p) original sculptures or statuary (Heading 9703), collectors' pieces (Heading 9705) or antiques of an age exceeding 100 years (Heading 9706), other than natural or cultured pearls or precious or semi-precious stones.
 - **4a.** The expression "precious metal" means silver, gold and platinum.
- **4b.** The expression "platinum" means platinum, iridium, osmium, palladium, rhodium and ruthenium.

- **4c.** The expression "precious or semi-precious stones" does not include any of the substances specified in Note 2b to Chapter 96.
- **5.** For the purposes of this chapter, any alloy (including a sintered mixture and an inter-metallic compound) containing precious metal is to be treated as an alloy of precious metal if any one precious metal constitutes as much as 2%, by weight, of the alloy. Alloys of precious metal are to be classified according to the following rules:
 - a) an alloy containing 2% or more, by weight, of platinum is to be treated as an alloy of platinum;
- b) an alloy containing 2% or more, by weight, of gold, but no platinum, or less than 2%, by weight, of platinum, is to be treated as an alloy of gold;
 - c) other alloys containing 2% or more, by weight, of silver are to be treated as alloys of silver.
- **6.** Except where the context otherwise requires, any reference in the Nomenclature to precious metal or to any particular precious metal includes a reference to alloys treated as alloys of precious metal or of the particular metal in accordance with the rules given in Note 5 above, but not to metal clad with precious metal or to base metal or non-metals plated with precious metal.
- **7.** Throughout the Nomenclature the expression "metal clad with precious metal" means material made with a base of metal upon one or more surfaces of which there is affixed by soldering, brazing, welding, hot-rolling or similar mechanical means a covering of precious metal. Except where the context otherwise requires, the expression also covers base metal inlaid with precious metal.
- **8.** Subject to Note 1a to Section VI, goods answering to a description in Heading 7112 are to be classified in that Heading and in no other Heading of the Nomenclature.
 - **9.** For the purposes of Heading 7113, the expression "articles of jewellery" means:
- a) any small objects of personal adornment (gem-set or not) (for example, rings, bracelets, necklaces, brooches, ear-rings, watch-chains, fobs, pendants, tie-pins, cuff-links, dress-studs, religious or other medals and insignia); and
- b) articles of personal use of a kind normally carried in pockets, in the handbag or on the person (such as cigarette cases, powder boxes, chain purses, cachou boxes).

These articles may be joined or adorned with, for example, natural or cultivated pearles, precious or semiprecious stones, artificial or reconstructed precious or semiprecious stones, articles of tortoise shell, mother-of-pearles, ivory, natural or reconstructed amber, jets or corals.

- **10.** For the purposes of Heading 7114, the expression "articles of goldsmiths' or silversmiths' wares" includes such articles as ornaments, tableware, toilet-ware, smokers' requisites and other articles of household, office, or religious use.
- **11.** For the purposes of Heading 7117, the expression "imitation jewellery" means articles of jewellery within the meaning of Paragraph a) of Note 9 above (but not including buttons or other articles of Heading 9606, or dress-combs, hair-slides or the like, or hairpins of Heading 9615), not incorporating natural or cultured pearls, precious or semi-precious stones (natural, synthetic or reconstructed, nor (except as plating or as minor constituents) precious metal or metal clad with precious metal.

Subheading notes:

- **1.** For the purposes of Subheadings 7106 10, 7108 11, 7110 11, 7110 21, 7110 31 and 7110 41, the expressions "powder" and "in powder form" means products of which 90% or more by weight passes through a sieve with a mesh aperture of 0.5 mm.
- **2.** Notwithstanding the provisions of Chapter Note 4b, for the purposes of Subheadings 7110 11 and 7110 19, the expression "platinum" does not include iridium, osmium, palladium, rhodium or ruthenium.
- **3.** For the classification of alloys in the subheadings of Heading 7110, each alloy is to be classified with that metal, platinum, palladium, rhodium, iridium, osmium or ruthenium which predominates by weight over each other of these metals.

Subject to the preceding Paragraph and to Note 1 to Chapter 83, the articles of Chapter 82 or 83 are excluded from Chapters 72 to 76 and 78 to 81.

- **3.** Throughout the Nomenclature, the expression "base metals" means: iron and steel, copper, nickel, aluminium, lead, zinc, tin, tungsten (wolfram), molybdenum, tantalum, magnesium, cobalt, bismuth, cadmium, titanium, zirconium, antimony, manganese, beryllium, chromium, germanium, vanadium, gallium, hafnium, indium, niobium (columbium), rhenium and thallium.
- **4.** Throughout the Nomenclature, the term "cermets" means products containing a microscopic heterogeneous combination of a metallic component and a ceramic component. The term "cermets" includes sintered metal carbides (metal carbides sintered with a metal).
- **5.** Classification of alloys (other than ferro-alloys and master alloys as defined in Chapters 72 and 74):
- a) an alloy of base metals is to be classified as an alloy of the metal which predominates by weight over each of the other metals;
- b) an alloy composed of base metals of this Section and of elements not falling within this Section is to be treated as an alloy of base metals of this Section if the total weight of such metals equals or exceeds the total weight of the other elements present;
- c) in this Section the term "alloys" includes sintered mixtures of metal powders, heterogeneous intimate mixtures obtained by melting (other than cermets) and intermetallic compounds.
- **6.** Unless the context otherwise requires, any reference in the Nomenclature to a base metal includes a reference to alloys which, by virtue of Note 5 above, are to be classified as alloys of that metal.

7. Classification of composite articles:

except where the Headings otherwise require, articles of base metal (including articles of mixed materials treated as articles of base metal under the interpretative rules) containing two or more base metals are to be treated as articles of the base metal predominating by weight over each of the other metals.

For this purpose:

- a) iron and steel, or different kinds of iron or steel, are regarded as one and the same metal;
- b) an alloy is regarded as being entirely composed of that metal as an alloy of which, by virtue of Note 5. it is classified.
 - c) a cermet of Heading 8113 is regarded as a single base metal.
 - 8. In this Section, the following expressions have the meanings hereby assigned to them:
- a) "waste and scrap": metal waste and scrap from the manufacture or mechanical working of metals, and metal goods definitely not usable as such because of breakage, cutting-up, wear or other reasons.
- b) "powders": products of which 90% or more by weight passes through a sieve with a mesh aperture of 1 mm.

Chapter 72 Iron and Steel

Notes:

- **1.** In this Chapter and, in the case of Notes 1d, 1e, and 1f throughout the Nomenclature, the following expressions have the meanings hereby assigned to them:
- a) "pig iron": iron-carbon alloys not usefully malleable, containing more than 2% by weight of carbon and which may contain by weight one or more other elements within the following limits:

not more than 10% of chromium,

not more than 6% of manganese,

not more than 3% of phosphorus,

not more than 8% of silicon,

- a total of not more than 10% of other elements.
- b) "Spiegeleisen": iron-carbon alloys containing by weight more than 6% but not more than 30% of manganese and otherwise conforming to the specification at (a) above.
- c) "ferro-alloys": alloys in pigs, blocks, lumps or similar primary forms, in forms obtained by continuous casting and also in granular or powder forms, whether or not agglomerated, commonly used as an additive in the manufacture of other alloys or as de-oxidants, de-sulphurizing agents or for similar uses in ferrous metallurgy and generally not usefully malleable, containing by weight 4% or more of the element iron and one or more of the following:

more than 10% of chromium,

more than 30% of manganese.

more than 3% of phosphorus,

more than 8% of silicon.

- a total of more than 10% of other elements, excluding carbon, subject to a maximum content of 10% in the case of copper.
- d) "steel": ferrous materials other than those of Heading 7203, which (with the exception of certain types produced in the form of castings) are usefully malleable and which contain by weight 2% or less of carbon. However, chromium steels may contain higher proportions of carbon.
- e) "stainless steel": alloy steels containing, by weight, 1.2% or less of carbon and 10.5% or more of chromium, with or without other elements.
- f) "other alloy steel": steels not complying with the definition of stainless steel and containing by weight one or more of the following elements in the proportion shown:

 - 0.6% or more of silicon.
 - 0.05% or more of titanium,
 - 0.3% or more of tungsten (wolfram),
 - 0.1% or more of vanadium,

0.05% or more of zirconium.

- 0.1% or more of other elements (except sulphur, phosphorus, carbon and nitrogen), taken separately.
- g) "remelting scrap ingots of iron or steel": products roughly cast in the form of ingots without feeder-heads or hot tops, or of pigs, having obvious surface faults and not complying with the chemical composition of pig iron, spiegeleisen, or ferro-alloys;
- h) "granules": products of which less than 90% by weight passes through a sieve with a mesh aperture of 1 mm and of which 90% or more by weight passes through a sieve with a mesh aperture of 5 mm:
- ij) "semi-finished products": continuous cast products of solid section, whether or not subjected to primary hot-rolling, and other products of solid section, which have not been further worked than subject to primary hot-rolling or roughly shaped by forging, including blanks for angles, shapes or sections.

These products are not presented in coils.

k) "flat-rolled products": rolled products of solid rectangular (other than square) cross-section, which do not conform to the definition at (ij) above in the form of:

coils of successively superimposed layers, or

straight lengths, which if of a thickness less than 4.75 mm are of a width measuring at least ten times the thickness or if of a thickness of 4.75 mm or more are of a width which exceeds 150 mm and measures at least twice the thickness.

Flat-rolled products include those with patterns in relief derived directly from rolling (for example, grooves, ribs, chequers, tears, buttons, lozenges) and those which have been perforated, corrugated or polished, provided that they do not thereby assume the character of articles or products of other Headings.

Flat-rolled products of a shape other than rectangular or square, of any size, are to be classified as products of a width of 600 mm or more, provided that they do not assume the character of articles or products or other headings.

- I) "bars and rods, hot-rolled, in irregularly wound coils": hot-rolled products in irregularly wound coils, which have a solid cross-section in the shape of circles, segments of circles, ovals, rectangles (including squares), triangles or other convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). These products may have indentations, ribs, grooves or other deformations produced during the rolling process (reinforcing bars and rods);
- m) "other bars and rods": products which do not conform to any of the definitions at (ij), (k) or (l) above or to the definition of wire, which have a uniform solid cross-section along their whole length in the shape of circles, segments of circles, ovals, rectangles (including squares), triangles or other convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel).

These products may:

have indentations, ribs, grooves or other deformations produced during the rolling process (reinforcing bars and rods);

be twisted after rolling;

- n) "angles, shapes and sections": products having a uniform solid cross-section along their whole length which do not conform to any of the definitions at (ij), (k), (l) or (m) above or to the definition of wire.
 - Chapter 72 does not include products of Heading 7301 or 7302.
- o) "wire": cold-formed products in coils, of any uniform solid cross-section along their whole length, which do not conform to the definition of flat-rolled products;
- p) "hollow drill bars and rods": hollow bars and rods of any cross-section, suitable for drills, of which the greatest external dimension of the cross-section exceeds 15 mm but does not exceed 52 mm, and of which the greatest internal dimension does not exceed one half of the greatest external dimension. Hollow bars and rods of iron or steel not conforming to this definition are to be classified within Heading 7304.
- **2.** Ferrous metals clad with another ferrous metal are to be classified as products of the ferrous metal predominating by weight.
- **3.** Iron or steel products obtained by electrolytic deposition, by pressure casting or by sintering are to be classified, according to their form, their composition and their appearance, in the Headings of this Chapter appropriate to similar hot-rolled products.

Subheading notes:

- **1.** In this Chapter the following expressions have the meanings hereby assigned to them:
- a) "alloy pig iron": pig iron containing, by weight, one or more of the following elements in the specified proportions:

more than 0.2% of chromium, more than 0.3% of copper,

more than 0.3% of nickel.

more than 0.05% of bismuth.

- c) "silicon-electrical steel": alloy steels containing by weight at least 0.6% but not more than 6% of silicon and not more than 0.08% of carbon. They may also contain by weight not more than 1% of aluminium but no other element in a proportion that would give the steel the characteristics of another alloy steel;
- d) "high-speed steel": alloy steels containing, with or without other elements, at least two of the three elements: molybdenum, tungsten and vanadium with a combined content by weight of 7% or more, 0.6% or more of carbon and 3% to 6% of chromium;
 - e) "silico-manganese steel": alloy steels containing by weight:

not more than 0.7% of carbon.

0.5% or more but not more than 1.9% of manganese, and

- 0.6% or more but not more than 2.3% of silicon, but no other element in a proportion that would give the steel the characteristics of another alloy steel.
- **2.** For the classification of ferro-alloys in subheadings of Heading 7202, the following rule should be observed:

a ferro-alloy is considered as binary and classified under the relevant subheading (if it exists) if only one of the alloy elements exceeds the minimum percentage laid down in Note 1c to this Chapter; by analogy, it is considered, respectively, as ternary or quaternary if two or three alloy elements exceed the minimum percentage.

For the application of this rule the unspecified "other elements" referred to in Note 1c to this Chapter must each exceed 10% by weight.

Chapter 73 Articles of Iron or Steel

Notes:

- **1.** In this Chapter the expression "cast iron" applies to products obtained by casting in which iron predominates by weigh over each of the other elements and which do not comply with the chemical composition of steel as defined in Note 1d to Chapter 72.
- **2.** In this Chapter the word "wire" means hot- or cold-formed products of any cross-sectional shape, of which no cross-sectional dimension exceeds 16 mm.
