

## VETERINARY LAW OF THE REPUBLIC OF TAJIKISTAN

This Law shall determine the legal, social, organizational, financial and economic basis for veterinary and be aimed at ensuring veterinary-sanitary and epizootic welfare, human protection from disease common to animals and human beings, food and raw materials of animals and vegetable origin safety, veterinary drugs, feed and supplementary feed for animals.

### CHAPTER 1. GENERAL PROVISIONS

#### Article 1. Basic Definitions

The terms used in this Law shall have the following meaning specified below:

- Agents of animal diseases shall mean viruses, bacteria, rickettsia, Chlamydia, micoplasma, prions, simplest fungi, worms, mites and insects;
- Veterinary certification of (veterinary-sanitary) shall mean activity specifying the compliance of conditions of production, storage, import, export of objects subject to state veterinary inspection with the requirements set by the authorized state veterinary body;
- Raw materials of animal origin shall mean everything that is taken from animals for industrial processing;
- Veterinary (field of veterinary) shall mean special scientific knowledge and practical experience aimed at protection, examination of diseases and animals' intoxication, diagnosis, treatment and liquidation of sources of animal diseases, ensuring the compliance of objects of state veterinary inspection with requirements of this Law as well as protection of the population from diseases common to animals and humans;
- Veterinarian shall mean a person having the relevant veterinary education;
- State registration of veterinary drugs shall mean entering veterinary drugs into the State Register of Veterinary Drugs and issuing registration certificates for them by the authorized state veterinary body in a manner provided by the legislation of the Republic of Tajikistan;
- Veterinary-sanitary safety shall mean the status of objects of state veterinary inspection not constituting danger to animal and human health under normal conditions of use;
- Market shall mean a specially equipped market place, including market place of animals, products, raw materials of animal origin, veterinary drugs, feed and feed additives;
- Goods subject to control of the state veterinary inspection shall mean animals, including wild, domestic animals, animal products and raw materials, plant products, veterinary drugs, feed, feed additives, collection of items produced from raw materials of animal origin;
- Disinsectization shall mean elimination of arthropod ticks, which transmit infectious agents (parasitic) diseases of animals;
- Disinfestation shall mean elimination of rodents, which transmit infectious agents (parasitic) diseases of animals;
- Feed additives shall mean organic and inorganic substances including microelements, vitamins, meat-and-bone meal tankage, animal blood, fish oil, seashells, bentonite, waste of plants processing products of animal and plant origin added to animal feed;

- Quarantine shall mean legal regime providing the system of veterinary and administrative activities aimed at restriction and termination of economic ties and suspension of movement of goods subject to control by the state veterinary inspection bodies between epizootic focus, unfavorable area and territory of veterinary-sanitary welfare for the purpose of liquidation of epizootic focus and preventing the spread of disease;
- Veterinary rules (veterinary-sanitary rules) shall mean normative and legal act providing procedure of taking veterinary measures based on veterinary standards approved by the authorized state veterinary body, which is binding on natural persons and legal entities carrying out veterinary activity;
- Special processing of animal products shall mean processing of products of animals with certain infectious diseases making them acceptable for the use by humans;
- Special slaughter shall mean slaughter of animals suffering from certain infectious disease in specially equipped places and enterprises;
- Epizootic source shall mean the limited territory or premises where the sources of infectious agents, transfer factors and animals susceptible to diseases are located;
- Veterinary drugs shall mean biological, vegetable, chemical, pharmaceutical, disinfectant substances for disinsectization, disinfestation, diagnosis, prevention and treatment of animal diseases, as well as tools, equipment, materials and special means of transport;
- Genetic material shall mean sperm, ovicell, animal embryos and pupae of bees, fertilized eggs, hatching eggs, cell culture, the products of genetic engineering technology, breeding material - gametes, zygotes (cocoon, silkworm pupa);
- Plant products shall mean raw materials of plant origin used by humans or animals as food;
- Meat products shall mean industrial products made from animal flesh for use of humans and animals;
- Animal products shall mean raw material of animal origin and industrial products made thereof as well as the selection of animals and industrial products made thereof;
- Trade in animal products shall mean production, stocking, processing and marketing of animal products, any other way of transfer of products of animal origin with or without payment, export and import of animal products or any other activity, which results in animal products being delivered to other persons or consumers;
- Dairy products shall mean industrial products made from milk of animals for the use of humans and animals;
- Epizootological monitoring shall mean a system of collecting quantitative data on occurrence of animal diseases, quality of anti-epizootic, veterinary-sanitary , zoo-hygienic measures, as well as the quality and safety of food, feed and feed additives in order to identify their compliance with mandatory requirements and standards in a timely manner;
- Organoleptic examination shall mean the evaluation of quality of products through the senses;
- Extermination of animals and animal products shall mean the slaughter, burning or burial of animals and products thereof suffering from certain infectious diseases the list of which is determined by the authorized state veterinary body, which may be a factor of infection of animals and humans, as well as products derived from healthy animals that do not meet veterinary sanitary requirements;

- Destruction of veterinary drugs shall mean burning of veterinary drugs that do not meet the state standards or those whose time of use has expired;
- Infectious disease-problem area shall mean a territory where the epizootic focus is located;
- Biological stimulants shall mean all biologically active natural and synthetic substances;
- Veterinary objects subject to control by state veterinary inspection shall mean animals, gamete and somatic cells of animals, products and raw materials of animal and plant origin, veterinary drugs, feed and feed additives, microorganisms and their strains, apparatus, instruments, veterinary instruments, transport means, containers, packaging material, territory, premises for the growing of animals, production and processing, sores, slaughterhouses, warehouses for products and raw materials of animal origin, which may be factors of animal diseases transmission as well as the activity of legal entities and natural persons involved in cultivation, storage, transport, storage, processing, sale and use of objects subject to control of the state veterinary inspection body;
- Laboratory of veterinary sanitary examination shall mean legal entity or a specialized unit of a legal entity carrying out veterinary-sanitary examination of products and raw materials of animal and plant origin in markets and other sites;
- Animal waste shall mean spoils and animal products unsuitable for the use by humans;
- Veterinary drug testing shall mean testing of veterinary drug under laboratory or production conditions in a manner prescribed by the authorized state veterinary body for the purpose of determining its immunobiological, therapeutic and toxic properties and epidemiological effectiveness, lack of consequences of effects and safety of the drug for possible use in veterinary practice;
- Veterinary-sanitary examination shall mean verification of conformity of animal products and raw materials of animal origin with veterinary standards, a set of organoleptic, biochemical, microbiological, parasitological, toxicological and radiological examinations;
- Registration testing of veterinary drugs shall mean a set of methods used in a manner provided by the authorized state veterinary body to determine the compliance of veterinary drugs with requirements of the veterinary related legislation of the Republic of Tajikistan;
- Veterinary certificate shall mean an international document issued by the authorized state body at the state border of the exporting country confirming the compliance of exported goods with the requirements of importing country, which states veterinary and sanitary safety of goods being under control of the state veterinary inspection, welfare of an area or production site;
- Certificate of conformity shall mean a document issued on the basis of the rules of the certification system, which confirms the compliance of certified products with requirements of normative acts;
- Certification shall mean the process of confirmation of the fact of conformity of products with the set requirements;
- Disinfection shall mean removal or destruction of infectious agents in the environment, premises, transport, which is carried out with the help of veterinary drugs in a manner provided by the authorized state veterinary body;
- Veterinary activity shall mean an area of responsibility of natural persons and legal entities aimed at protection of health of animals, protection of humans from diseases

- common for both animals and humans, production of high-quality goods of animal origin based on veterinary-sanitary requirements;
- State Register of Veterinary Drugs shall mean the list of veterinary drugs passed the state registration and allowed for the production, importation and use in the Republic of Tajikistan issued by the authorized state veterinary body;
  - Strain of microorganism shall mean genetically homogeneous population of microorganisms with a stable specific forms and biological properties;
  - Animals shall mean all mammals, birds, reptiles, amphibians, bees, fish and other animals that are kept in captivity or those free-living in nature;
  - Farm animals shall mean animals that are kept or bred for the purpose of production of animal products;
  - Domestic animals (pets) shall mean animals and birds kept at home for non-commercial purposes;
  - Veterinary documents shall mean veterinary-sanitary conclusion, veterinary certificate, warrant, reference issued by veterinary inspectors for the items subject to state veterinary inspection;
  - Veterinary measures (works and services) shall mean a set of anti-epizootic, veterinary-sanitary procedures aimed at prevention of emerging, spread or liquidation of animal diseases, including their prevention, treatment or diagnosis, neutralization (disinfection) seizure and elimination of animals affected by infectious diseases, which constitute a danger to animals and human health, ensuring safety of products and raw materials of animal and plant origin, including animals identification procedures;
  - Livestock shall mean bovine animals, buffalo, sheep, goats, horses, donkeys, camels, yaks and others;
  - Veterinary certificate shall mean a one-time document issued by the authorized state veterinary body confirming that the animal is healthy and vaccinated or that goods subject to control of the state veterinary inspection originate from infectious animal diseases free area;
  - Certificate of quality and safety of products and raw materials of animal origin, veterinary drugs and items shall mean a document in which the manufacturer attests the compliance of each production lot and raw materials of animal origin, veterinary drugs and items with normative technical act;
  - Veterinary passport shall mean a document the format of which is determined by the authorized state veterinary body, which indicates the holder, type, sex, colour, age, individual number of an animal, terms and type of veterinary treatments for the purpose of prevention, treatment, diagnosis of animal diseases;
  - Epizootic shall mean massive spread of infectious animal diseases within the territory of one or several administrative-territorial units;

## Article 2. Veterinary Legislation of the Republic of Tajikistan

The veterinary legislation of the Republic of Tajikistan shall be based on the Constitution of the Republic of Tajikistan and shall consist of this Law, other normative and legal acts of the Republic of Tajikistan and international legal acts recognized by Tajikistan.

### Article 3. Veterinary Related Competences of the Government of the Republic of Tajikistan

The competences of the Government of the Republic of Tajikistan shall include the following:

- Determination of the single state veterinary policy;
- Development and implementation of state programs aimed at ensuring veterinary-sanitary safety and protection of population from diseases common to animals and humans;
- Establishment of a procedure on reimbursing the cost of exempted or exterminated animals, products and raw materials of animal origin by the state veterinary inspection body in connection with constituting danger to animal and human being health;
- Approval of resolutions of the state authorized veterinary body;
- Appointing of the head of authorized state veterinary body (Chief State Veterinary Inspector, a representative of the Republic of Tajikistan in International Office of Epizootics);
- Establishment and approval of a status of the Fund for Anti-epizootics Measures;
- Approval of regulations on uniforms of officers carrying out state veterinary control;
- Coordination of the activity of local authorities and local government bodies to ensure veterinary-sanitary safety;
- Establishment of the state authorized veterinary body of the Republic of Tajikistan;
- Maintenance of state registers of potentially dangerous for the animals of chemical, biological, radioactive substances, production and consumption waste as well as certain types of feed products and feed additives, for the first time imported into the territory of the Republic of Tajikistan;
- Ensuring safety of the territory of the Republic of Tajikistan from infectious animal diseases;
- Introduction and abolition of restrictive measures (quarantine) within the territory of the Republic of Tajikistan;
- Introduction and abolition of veterinary-quarantine control at the crossing points through state border of the Republic of Tajikistan;
- Implementation of international cooperation of the Republic of Tajikistan and making international contracts by the Republic of Tajikistan to ensure the epidemiological safety;
- Exercise of other powers provided by the legislation of the Republic of Tajikistan;

### Article 4. Powers of the State Authorized Veterinary Body

The powers of the state authorized veterinary body (hereinafter referred to as the authorized body) shall include the following:

- Maintenance of state registers and accreditation of natural persons and legal entities importing animals, products of animal origin, feed products and feed additives into the territory of the Republic of Tajikistan;
- Implementation of the single state veterinary policy;
- Development and establishment of rules, veterinary-sanitary measures, normative and legal acts related to veterinary based on the legislation of the Republic of Tajikistan and international legal acts;

- Approval of procedure of transportation (movement) of goods subject to control of the state veterinary inspection within the territory of the Republic of Tajikistan;
- Approval of a procedure of veterinary-sanitary certification and acquisition of veterinary-sanitary permission to export meat and meat products, milk and dairy products, raw materials of animal origin from the Republic of Tajikistan and import of such products into the Republic of Tajikistan;
- Approval of veterinary-sanitary requirements for storage and processing of meat and meat products, milk and dairy products, fish and fish products and eggs;
- Approval of regulations of veterinary-sanitary laboratories;
- Approval of rules of marking, certification and types of individual animal passports;
- Protection of population health from disease common to animals and humans;
- Approval of procedure (methods, techniques) of carrying out veterinary-sanitary examination;
- Approval of rules of submission of statistical veterinary reports;
- Protection of the territory of the Republic of Tajikistan from introduction of infections and spread of animal diseases quarantine agents as well as import of products, which contain biological stimulants, antibiotics, hormonal agents used for speeding up the growth and development of animals, products having increased radiation and genetically modified products, from the territory of other states or quarantine zones;
- Issuing of permissions for export, import and transit of goods subject to control of the state veterinary inspection with taking into account of epizootic situation;
- Control over veterinary-sanitary safety of products, processing, storage, transportation and marketing of objects subject to control of the state veterinary inspection body;
- Development and approval of the manner of transportation (movement) of goods subject to control of the state veterinary inspection body;
- Veterinary-sanitary examination of products and raw materials of animal and plant origin to ensure the state control over quality and their safety;
- Organization of testing and control over veterinary drugs, feed and feed additives, their registration testing as well as maintenance of State Register of Veterinary Drugs;
- Development, approval and submission of target-oriented programs to prevent and liquidate the infectious animal diseases;
- Maintenance and carrying out epizootic monitoring of animal diseases, including wild animals;
- Maintenance of state procurement, transportation (delivery) and use of veterinary drugs in a manner provided for in the normative and legal acts of the Republic of Tajikistan;
- Development and submission of republican programs aimed at training of veterinary specialists, production of medicines for diagnosing, preventive measures and treatment of animals, organization of scientific research of veterinary related problems;
- Monitoring the compliance of veterinary related normative and legal acts by local executive authorities and public officers, enterprises, agencies, other organizations and economic entities irrespective of their subordination and types of ownership, public associations, international organizations, citizens of the Republic of Tajikistan, foreign citizens and person without citizenship, owners of animals, products and raw materials of animal and plant origin;
- Organization of implementation of veterinary-instructive work among the population;

- Participation in state commissions regarding acceptance of live-stock facilities and organizations for manufacturing, procurement (slaughter) of animals, processing of products and raw materials of animal origin;
- Organization of implementation and control over identification and registration of domestic animals, pets, products and raw materials of animal origin, including movement of animals;
- Presentation of the Republic of Tajikistan in veterinary related international organizations in a manner provided for in the legislation of the Republic of Tajikistan as well as organization of the cooperation with them;
- Providing binding instructions on carrying out anti-epizootic and veterinary-sanitary measures to all entities subject to control of the state veterinary inspection irrespective of the type of ownership;
- Taking measures, if there are infectious diseases, aimed at elimination of animals, extermination or decontamination of products and raw materials of animal origin, special processing or utilization and determination of compensation procedure for damages incurred by the owner at the expense of state budget or insurance companies;
- Prohibition of sale of products of animal origin, as well as processing of raw materials of animal and plant origin not meeting veterinary and sanitary requirements, protective means, diagnosis and treatment of animals, feed additives that do not meet the quality requirements until the situation is corrected, as well as filing complaints related to violation to court;
- In case of incompliance of microorganism strain with its passport, storage procedure of microorganisms in veterinary laboratories, scientific-research institutes and enterprises to process the products and raw materials of animal origin, suspension of their use and filing of a complaint to court;
- In case of violation of veterinary legislation, issuing of an instructions, order and making the appropriate decision;
- Taking measures aimed at minimization, interim injunction or termination of the activity of enterprises, agencies, organizations and other entities being under control of the state veterinary inspection, in case of infringement of veterinary-sanitary norms and rules which may threaten human life and health or to cause other grave consequences and filing of a complaint to court;
- Establishment of a procedure of maintaining (annulment) of quarantine within the territory of the Republic of Tajikistan, relevant territories, districts, cities, economic entities and entities carrying out other activity as well as establishment of crossing points through state border of the Republic of Tajikistan, determination of conditions for the implementation of quarantine, other restrictive veterinary-sanitary measures and the list of infectious animal diseases for which the quarantine is carried out, disposal of animals and (or) seizure of products of animal origin, in a manner provided for by the authorized body and by other normative and legal acts of the Republic of Tajikistan;
- Appointment and termination of appointment of heads of the organizations subordinated to the authorized veterinary body in accordance with the legislation of the Republic of Tajikistan;
- Imposing of administrative penalties;
- Exercising of other powers provided for in normative and legal acts of the Republic of Tajikistan.

## CHAPTER 2. STATE VETERINARY REGULATION

### Article 5. Basic Principles of the State Veterinary Related Policy

1. Veterinary related state policy shall be implemented by the authorized body of the Republic of Tajikistan.
2. Veterinary related state policy shall be based on the following principles:
  - Ensuring the independence of the state veterinary supervision;
  - Mandatory implementation of normative and legal acts adopted by the authorized body of the Republic of Tajikistan by all state bodies, enterprises, agencies, organizations irrespective of their administrative subordination and type of ownership as well as by all executive officers, citizens and persons without citizenship;
  - Ensuring state veterinary supervision of production, storage, processing and sale of objects subject to control of the state veterinary inspection body;
  - Ensuring state veterinary supervision of transportation of goods subject to control of the state veterinary inspection body by road, air, railway transport;
  - Support of measures for promotion of state and private sector veterinary services;
  - Provide the authorized veterinary body with required financial resources;
  - Observance of unity of interests of the state, legal entities and natural persons in the veterinary area;
  - Determination of conditions for compensation of value of animals, products and raw materials of animal origin constituting danger to human and animal health exempted and eliminated by the state veterinary inspection bodies in a manner provided by the Government of the Republic of Tajikistan;
  - Approval, upon submission by the authorized body, of the list of infectious animal diseases, preventive measures, diagnosis and liquidation of which is carried out at the expense of republican budget;
  - Coordination of veterinary related activities of local executive government authorities and self-government bodies of communities and settlements;
  - State support of scientific research in development of new methods for diagnosis, preventive measures and treatment of animal disease;
  - Ensuring transparency in the process of development, adoption and application of veterinary-sanitary measures;
  - Development of international veterinary related cooperation.

### Article 6. Development and Adoption of Veterinary-Sanitary Measures

1. Veterinary-sanitary measures shall be adopted and developed based:
  - To the extent required for protection of life and health of humans and animals;
  - Taking into account scientific principles and available scientific data, international standards, guidelines and recommendations;
  - On the assessment of risk to human and animal life and health realized in accordance with strategies of sectoral international organizations;
  - On the avoidance of arbitrary and unjustified discrimination among countries with identical and similar conditions, including discrimination among local zonal territories and animal production sectors and zonal territories and animal production sectors of other countries;

2. When assessing the threat to human and animal life and health in the process of development and adoption of veterinary-sanitary measures, the authorized body shall take into account the following:
  - Scientific data, manufacturing process and methods of supervisory control, selection and testing of samples, the existence of specific diseases, availability of zones (districts) free from infectious diseases or zones (districts) with low level of spread of infectious diseases, relevant conditions of environment, quarantine and other measures;
  - Economic indicators, including determination of losses in production and trade in case of penetration (occurrence), rooting and spread of infectious disease;
  - Costs for carrying out control and liquidation of infectious disease;
  - Effectiveness and cost of other approaches aimed at risk minimization;
3. Upon availability of satisfactory scientific evidences for objective evaluation of the threat or in case of emergency circumstances, the authorized body shall have the right to take interim veterinary-sanitary measures based on the available data, including data of sectoral international organizations and information on veterinary-sanitary measures in other countries.
4. Veterinary-sanitary measures taken shall be in compliance with veterinary-sanitary conditions of a region in which goods subject to veterinary-sanitary examination had been manufactured or a region for which such goods are intended. In the course of evaluation of veterinary-sanitary conditions, the authorized body shall also take into account animal health status in the Republic of Tajikistan and in the exporting country, the existence of diseases, existence of national plans of inspection and eradication of diseases, existence of disease-free regions or regions with low level of disease incidence as well as criteria and guiding principles of relevant sectoral international organizations.
5. Veterinary-sanitary measures taken may provide higher level of protection of human and animal life and health than the level achieved in accordance with measures based on international standards, guidelines and recommendations if they are scientifically justified and if such a level of protection is deemed to be the appropriate one.
6. In the process of taking veterinary-sanitary measures, including interim measures taken in emergency circumstances, the authorized state veterinary body shall follow the occurrence of new scientific data.

#### Article 7. Veterinary-Sanitary Measures in the Absence of International Standards, Guidelines and Recommendations

1. If there are no international standards, guiding principles and recommendations or if veterinary-sanitary measures do not meet the international standards, instructions and recommendations, or if such measure may have an impact on trade, then the authorized body shall:
  - Publish a notification of intention to apply a measure at the initial stage of its preparation;
  - Inform the interested parties, in accordance with international legal acts, about goods which are subject to such measure and submit rationale for taking the proposed measure;
  - Upon request of competent bodies of other countries submit the language of normative-legal act introducing the proposed measure with an indication of differences with international standards, instructions and recommendation in accordance with the international legal acts;

- Set a deadline for submission of opinions and carry out consultations upon request of interested parties;
2. Notification on goods subject to such measure with the rationale for its application shall be submitted at least 75 days prior to beginning of its application.

#### Article 8. Providing the Information

The authorized body shall, through single data center, provide the information, documents and data in accordance with international legal acts related to the following:

- Proposed and adopted veterinary-sanitary measures;
- Measures of control, inspection and certification of products and quarantine procedures;
- Procedures for assessment of risk and methods of determination of appropriate level of animal health protection in the Republic of Tajikistan;
- Membership and participation in international and regional meetings, animal health protection system, existence and content of bilateral and multilateral agreements and contracts;

#### Article 9. Equivalence of Veterinary-Sanitary Measures

1. Veterinary-sanitary measures approved in other country shall be considered as equivalent to measures applied in the Republic of Tajikistan if the authorized body establishes that measures applied in another country ensure the protection of human and animal life and health equal to that required in the Republic of Tajikistan or higher.
2. Decree on recognition of equivalency of veterinary-sanitary measures shall be published.

#### Article 10. Quality Standards of Veterinary Activities, Works and Services

1. Quality standards of veterinary activities (works and services) shall be established in a manner provided by the authorized body as well as international standards recognized by Tajikistan and shall be binding on veterinary agencies, natural persons and legal entities carrying out veterinary related entrepreneurial activity throughout the Republic of Tajikistan.
2. Non-compliance with republican quality standards of veterinary activities (works, services) by entities carrying out veterinary activity may serve as a ground for bringing to administrative and criminal responsibility, termination of their activity or revocation of veterinary activity licenses in a manner established by the legislation of the Republic of Tajikistan.
3. Control over compliance with republican quality standards of veterinary activities (works and services) shall be carried out by the state authorized veterinary body of the Republic of Tajikistan.

#### Article 11. Departmental Veterinary-Sanitary Services

1. Ministries, agencies, enterprises, institutions and other organizations whose activity is connected with animal management and breeding, storage and sale of their products, feed and drugs intended for diagnostics, preventive measures and treatment of animals may

maintain manufacturing veterinary service at their own expense without using state budget funds. The procedure of management and structure of these services shall be determined by the stated authorities.

2. Departmental veterinary-sanitary services shall carry out their activity based on methodological guideline of the authorized body.

#### Article 12. Private Veterinary Activity Licensing

1. Private veterinary activity shall be carried out on the basis of license.
2. Veterinary activity license shall be issued in a manner provided for in the Law of the Republic of Tajikistan on Licensing of Certain Types of Activity.

### CHAPTER 3. STATE VETERINARY SUPERVISION

#### Article 13. State Veterinary Supervision

1. State veterinary supervision shall be carried out by the authorized body.
2. State veterinary supervision shall include the following tasks:
  - Control over the compliance with veterinary legislation by natural persons and legal entities;
  - Supervision over objects and goods subject to control of the state veterinary inspection body;
  - Control over conduction of organizational and economic activities, veterinary and preventive measures, by natural persons and legal entities, in objects subject to supervision of the state veterinary inspection body;
  - Control over production, storage, processing and marketing of products and raw materials of animal and plant origin, preventive measures, diagnostics and treatment of animal diseases, feed and feed additives in a manner provided for in the veterinary legislation of the Republic of Tajikistan;
  - Control over transportation of goods subject to supervision of the state veterinary inspection body by road, air, and railway transport;
  - Control over compliance of veterinary-sanitary requirements for building and refurbishment of livestock premises, meat and milk processing enterprises as well as construction and refurbishment of plants, warehouses and other objects subject to control of the state inspection body;
  - Control over compliance of procedure for keeping of microorganisms in veterinary laboratories, scientific-research institutions and processing enterprises for products and raw materials of animal origin;
  - Control over procurement, storage, transportation (delivery) and use of veterinary drugs purchased at the expense of the state budget in a manner provided for in the legislation of the Republic of Tajikistan;
  - Control over storage and use of the republican reserves of veterinary drugs;
  - Control the routes of animals transport, pasture territories, animal watering points, procedures and forms of their identification;
  - Control over veterinary measures aimed at protection of the territory of the Republic of Tajikistan from bringing infections and spread of animal disease quarantine agents, including exotic animal diseases from other countries;

- Control over keeping veterinary records and accounting and their submission in a manner provided for in the legislation of the Republic of Tajikistan.

#### Article 14. Principles of the State Veterinary Supervision and Control

1. Procedures of the state veterinary supervision and control shall be implemented:
  - Immediately, without any delay and discrimination with regard to imported goods relative to similar domestic products;
  - Only on the basis of facts and information, which are required for carrying out procedure;
  - Providing the applicant with the information about time limits for completion of the procedure, possible shortcomings of the application, stages and results of the proceedings;
  - Ensuring the protection of confidential information;
  - By taking samples only the amount necessary for carrying out control and certification procedures.
2. If changes in specification of products occur subsequent to the veterinary inspection and control, the procedure of inspection and control of the modified products shall be performed to only to the extent necessary to determine that the product meets the relevant requirements despite the changes.

#### Article 15. State Border and Transport State Veterinary Control

1. The state border and transport state veterinary control body shall be established and performed for the purpose of preventing the spread and introduction of animal infectious diseases, diseases common to animals and humans as well as products of animal and plant origin not meeting veterinary-sanitary requirements of the Republic of Tajikistan.
2. Work place of the state border and transport state veterinary control body shall be located at the customs zone.
3. Passage through the customs border of the Republic of Tajikistan of goods being subject to the state veterinary inspection body shall be permitted only upon checking the compliance of goods with supporting veterinary documents. In specific cases, the sample or the copy of goods shall be taken for laboratory tests.
4. Customs clearance of goods subject to control of the state veterinary inspection body may be completed only upon the completion of such a control.
5. Import and transit of goods subject to control of the state veterinary inspection from other epizootic problem-free countries through the territory of the Republic shall be permitted in case of compliance with veterinary rules and requirements set by the authorized body.
6. Transport means entered into the Republic of Tajikistan from countries facing epizootic problems shall be subject to mandatory certification in accordance with the veterinary legislation of the Republic of Tajikistan.
7. Veterinary inspectors of veterinary inspection posts shall wear special veterinary uniform when performing their duties at state border and transportation.
8. Natural persons and legal entities whose activities are connected with import (export and transit) of goods subject to control of the state veterinary inspection body shall reimburse for expenses associated with conduction of veterinary-sanitary examination and disinfection to departments, posts and other organizations and bodies of the state veterinary inspection at the state border and transportation of the Republic of Tajikistan.

Article 16. State Veterinary Control of Goods Subject to Control of the State Veterinary Inspection Body During the Transportation (Movement) within the Territory of the Republic of Tajikistan

1. Objects subject to control by the state veterinary inspection body shall be subject to mandatory state veterinary supervision during the transportation (movement) within the territory of the Republic of Tajikistan;
2. State veterinary supervision of objects subject to control of the state veterinary inspection during the transportation (movement), loading and unloading shall be carried out by veterinary inspectors of the territories where loading and unloading takes place, and those of the territories where the route of transportation (movement) pass.
3. Transport (movement) route of farm animals (cattle transport route) shall be determined by the local executive government bodies in coordination with main state veterinary inspectors of relevant administrative territories.
4. Transportation (movement) of animals without veterinary certificate, individual number and veterinary passport shall be prohibited.

Article 17. State Veterinary Control of Trade Outlets

1. State veterinary control in markets and other places where trade in animals, products and raw materials of animal and plant origin is organized shall be mandatory.
2. Sale of objects and goods subject to control of the state veterinary inspection body imported into the Republic of Tajikistan shall be permitted only upon being subject to veterinary-sanitary examination and acquisition of the relevant certificate from the authorized body of a city or a region where these goods are being marketed.
3. Goods shall be subject to examination only upon mandatory submission of a document identifying the owner and the goods compliance with supporting veterinary documents.
4. State laboratories of veterinary-sanitary examination in markets shall have stamp for marking of meat and other products of slaughter of animals and poultry, label for marking the quality of products, registration books and other documents.
5. State laboratories of veterinary-sanitary examination shall have the following rights:
  - Examine, seize, eliminate or send for special processing animals, products and raw materials of animal and plant origin;
  - Suspend the sale of animals, products and raw materials of animal and plant origin constituting danger to human and animal health, or seize, eliminate or send to special processing in accordance with this Law;
  - Determine the compliance of goods subject to the state veterinary inspection body with veterinary standards and issue examination report;
  - Organize neutralization (decontamination), processing or elimination of products and goods subject to control of the state veterinary inspection body, which do not meet the requirements of normative and legal acts of the Republic of Tajikistan;
6. The procedure for veterinary-sanitary examination, suspension of sale, seizure, elimination or sending to special processing of dangerous products and goods subject to control of the state veterinary inspection body shall be determined by this Law.
7. Sale of foodstuffs of non-industrial production in the markets shall be permitted only after performing veterinary-sanitary examination in competent laboratories and acquisition, by

sellers, of conclusion of the state veterinary inspection body in the market confirming the compliance of the similar foodstuff with veterinary rules and standards.

8. Sale of products and raw materials of animal and plant origin in places not designated for it and the sale of products that were not subject to veterinary-sanitary examination shall be prohibited. In case of non-compliance with this requirement, products and raw materials of animal and plant origin shall be confiscated, destructed or sent to special processing in a manner provided for in this Law.
9. Responsible persons of trade outlets shall be liable for submitting permission for the marketing of products not subject to veterinary-sanitary examination.
10. Marketing of animals without veterinary certification, individual number and veterinary passport shall be prohibited.

#### Article 18. State Veterinary Control Related to Game Hunting

Hunting organizations shall equip the area for processing the game shot in accordance with veterinary-sanitary requirements and ensure conducting of veterinary-sanitary examination of game intended to be used as food.

#### Article 19. Rights and Responsibilities of State Veterinary Inspectors

1. State veterinary inspectors shall be independent when performing their activity and follow the requirements of the legislation of the Republic of Tajikistan.
2. State veterinary inspectors shall have the following rights:
  - Enter without obstacles (upon presentation of the official ID) of objects subject to control in the relevant territory, obtain information required for determining the epizootic status, revealing causes of animal diseases and evaluation of veterinary-sanitary quality of products and raw materials of animal origin.
3. The main state veterinary inspector of the Republic of Tajikistan may, along with rights and powers provided for in this Law, in exceptional circumstances, make relevant proposals and suggestions to the Government of the Republic of Tajikistan.
4. The competence of the Main State Veterinary Inspector of the Republic of Tajikistan and his/her Deputy shall include the following:
  - Organization and implementation of the state veterinary inspection in the Republic of Tajikistan.
  - Issuing of binding acts for the purpose of performing state veterinary inspection within the territory of the Republic of Tajikistan.
5. Public officers carrying out state veterinary inspection shall be provided with uniform having appropriate marks of distinction.

#### Article 20. Social and Legal Protection of Veterinary Workers

1. Veterinary workers shall be subject to mandatory state insurance in case of injury or work-related disease obtained in the process of performing official duties, fight against infectious diseases and direct manipulation with animals.
2. Veterinary-related specialists shall be provided with special means of transport when performing their official duties.
3. When working in the sources of infectious animal diseases, the salaries shall be paid in double amount at the expense of Anti-epizootic Measures Fund.

## Article 21. Procedure for Performing Control over Activity of Veterinary-Related Economic Entities

Control over the activity of economic entities, irrespective of the form of ownership and departmental subordination, shall be carried out for the purpose of state control over compliance with veterinary legislation in accordance with Law of the Republic of Tajikistan on Control over Activity of Economic Entities in the Republic of Tajikistan.

### CHAPTER 4. VETERINARY FINANCING

#### Article 22. The Sources for Financing of the Veterinary and the Veterinary Supervision

Veterinary and veterinary supervision in the Republic of Tajikistan Financing shall be funded from the following sources:

- Budget funds of all levels;
- Target-oriented veterinary funds;
- Income from entrepreneurial activity of veterinary organizations;
- Financing of veterinary-related innovative projects by investors;
- Bank and other credits;
- Grant and humanitarian aid and charitable funds of natural persons and legal entities;
- Other sources not in violation of the Legislation of the Republic of Tajikistan.

#### Article 23. Budget-related Financing of Veterinary of the Republic of Tajikistan

1. The authorized body and its lower organizational units shall be funded directly from the state budget.

3. With regard to animals whose owners did not meet the requirements of veterinary inspectors to subject these animals to compulsory vaccination referred to in paragraph 2 of this Article, their marketing, transportation or moving, slaughter and processing for meat and meat products, marketing (sale) of meat and meat products without fulfillment of veterinary-sanitary restrictions set by veterinary legislation shall not be permitted. Owners of the animals failing to meet this requirement, shall be liable in accordance with the legislation of the Republic of Tajikistan.
4. When making animal insurance agreements insurance companies shall include the requirement for compulsory animal vaccination provided for in paragraph 2 of this Article into insurance contract. The owners who fail to meet such a requirement shall not be compensated.

#### Article 36. Financing the Diagnostics and Immunoprophylaxis and Other Anti-epizootic Measures

1. Financing the diagnostics, immunoprophylaxis and other anti-epizootic measures shall be carried out at the expense of the state budget of the Republic of Tajikistan, special veterinary funds and funding sources in accordance with the legislation of the Republic of Tajikistan.
2. Planning of costs for funding anti-epizootic measures (including diagnosis and immunoprophylaxis expenses) shall be fulfilled based on financial costs standards for these purposes set by the Government of the Republic of Tajikistan and shall be indicated in subsection "Anti-epizootic measures fund".
3. Supply of immunobiological drugs for the purpose of conducting diagnostic testing and immunobiological drugs for vaccination against animal diseases included in the list of animal diseases as well as diagnostics and specific preventive measures for all natural persons and legal entities irrespective of forms of ownership shall be fulfilled at the expense of the state budget on a fee free basis.
4. Supply of drugs for animal immunization based on epizootic indicators and immunization against diseases not included to the list mentioned shall be fulfilled at the expense of the

local budgets of the Republic of Tajikistan, special veterinary funds, animals' owners and other funding sources attracted for the stated purposes.

#### Article 37. Rendering Fee-Based Veterinary Services

1. Veterinary organizations and individual entrepreneurs operating in veterinary related area may, in accordance with the legislation of the Republic of Tajikistan, render fee-based veterinary services to natural persons and legal entities. Veterinary related works and services rendered by natural persons and legal entities shall be subject to payment by animals' owners irrespective of source of obtaining veterinary drugs (state budget, grants, humanitarian and donor funds and etc.).
2. The list of types of fee-based veterinary services and the manner of providing them shall be approved by the Government of the Republic of Tajikistan.
3. Veterinary organizations, legal entities and individual entrepreneurs operating in veterinary area irrespective of the form of ownership, shall be responsible for keeping statistical veterinary records and submit reports to higher veterinary related state authorities and to the state authorized statistical agencies of the Republic of Tajikistan.
4. Funds obtained by state veterinary bodies, agencies and other state veterinary organizations through rendering fee-based veterinary services shall be directed to develop the veterinary of the Republic of Tajikistan through veterinary development funding system in a manner established by the legislation of the Republic of Tajikistan.

### CHAPTER 7. SCIENTIFIC SUPPORT TO VETERINARY

#### Article 38. Interaction of Scientific Organizations and Authorized Bodies

1. Tajik Academy of Agricultural Sciences, institutions of professional education in coordination with the authorized state veterinary body of the Republic of Tajikistan shall determine the priority directions of scientific developments of the application-oriented nature and coordinate programs aimed at protection of animal health and state veterinary inspection and shall develop, submit and approve the concepts for development of veterinary and veterinary science.
2. Tajik Academy of Agricultural Sciences, institutions of professional education in coordination with the authorized state veterinary body shall carry out comprehensive examination of industrial-scientific programs, national veterinary related target programs, provide their recommendations for applying into practice and efficient use of veterinary science achievements.
3. The state authorized veterinary body of the Republic of Tajikistan shall determine the priority directions of the scientific-research work regarding the veterinary challenges of the region and shall finance the programs of such research works in an amount approved in its budget.

#### Article 39. Professional Development and Training of Veterinary Workers

1. Professional development and training of veterinary workers shall be determined by the authorized state veterinary body of the Republic of Tajikistan.
2. Directors of the authorized veterinary bodies, veterinary organizations and agencies shall create the required conditions for professional development of veterinary workers.

#### Article 40. Veterinary Related Production Activity

1. Veterinary related production activity shall mean the activity aimed at production of drugs intended for diagnostics, preventive measures and treatment of animals, production of veterinary and veterinary-zootechnical items and veterinary equipment.
2. Management of production and purchase of drugs intended for diagnostics, preventive measures and treatment of animals as well as production of veterinary and veterinary-zootechnical items and veterinary equipment shall be fulfilled in accordance with the legislation of the Republic of Tajikistan.

#### Article 41. State Support of Veterinary Related Production Activity

For the purpose of ensuring the epizootic welfare in the Republic of Tajikistan the state support of veterinary industry and production of drugs intended for diagnostics, preventive measures and treatment of animals shall be fulfilled within the framework of budget financing by attracting grants of international organizations and special funds for rendering services.

### CHAPTER 8. FINAL PROVISIONS

#### Article 42. Settlement of Disputes Related to Veterinary Related Activity

Disputes arising from veterinary related activity shall be settled before the court in accordance with the legislation of the Republic of Tajikistan.

#### Article 43. Liability for Violations of this Law

Natural persons and legal entities shall be liable for violations of this Law in accordance with the legislation of the Republic of Tajikistan.

#### Article 44. Repeal of the Veterinary Law of the Republic of Tajikistan

The Veterinary Law of the Republic of Tajikistan of December 28 2003 (Akhbori Majlisi Oli of the Republic of Tajikistan, 2003., No.12, article 701; 2005., No.12, article 632; 2007, No.7, article 688) shall cease to be effective.

#### Article 45. The manner of Entering Into Force of this Law

This Law shall enter into force upon its official publication.

President of the Republic of Tajikistan  
Dushanbe, December 29, 2010  
No.674

Emomali Rahmon
