## Second chapter

Administration and implementation

Responsibilities of the technical consultative committee  
the inspection and analysis organ.

Article (3) for the purpose of implementing the provisions of this law, a technical advisory committee is formed in the Ministry chaired by the competent Deputy Minister and representatives of authorities and ministries. A decree by the Minister shall be issued defining its members based on a nomination from the concerned ministries.

Article (4): the Technical Committee may form a sub committee or committees from its members to perform any action whenever it is deemed necessary and therefore it has the right to use whoever it deems

suitable to provide advice, provided that he does not have the right to vote when attending meetings.

Article 5: the Technical Advisory Committee is entrusted with the following:

- 1- Provide advice to the Minister on issues which may arise during the implementation of this law and its complementary regulations.
- 2- Monitoring the implementation of this Law and its implementing Regulation provided that it does not contradict laws in effect.
- 3- Coordination of control and supervision work over food with other competent bodies.
- 4- Perform any other duties assigned to it by the Minister in implementing this law.

Article (6): The committee shall meet at least once every two months, and the Minister or the Chairman of the Committee may call for it to convene if necessary. The convening of the Committee will only be correct if more than half of its members attend and it takes its decisions by absolute majority, if the votes are tied; the casting vote shall be that of the Chairman.

Article (7): the environmental health organs in the Ministry and administrative units shall assume the tasks and duties of monitoring and supervision in accordance with the provisions of this Law and its Implementing Regulation.

Article (8): The personal of the control and supervision organ shall be considered Law Enforcement Officers and the Minister shall, subject to an approval by the Minister of Justice, issue a decree defining them.

Article (9). As a means to implementing the provisions of this law, competent employee shall exercise the following authority:

- a) Enter places and general stores which are suspected of containing any item or food that is prepared or preserved or stored or packaged and he may test the item and take a sample of it pursuant to the provisions of this law and laws in effect.

- b) Stop, inspect or seize any means of transport suspected of transporting any food or items covered by this law and may take samples to conduct tests and analyze them in the official laboratory subject to Paragraph (c) of Article (11).
- c) Open and inspect any suspected package or package suspected of containing any item or food that is pertinent to implementing the provisions of this law and may take photographs of them or write a summary reporting the facts in violation of the Law.
- d) Inspect the record books, receipts related to the item or food pertaining to the implementation of this law and may take copies of them or may summarize the facts in violation of the law.
- e) Any item or food suspected of violating this law may be seized and remain in seizure until tests and laboratory analysis determine the degree of its fitness for human consumption subject to Paragraph (c) of Article (11).

Article (10). In case of seizure of any suspected item or food, the following steps should be followed:

- a) Destroy or dispose of the items or food violating the provisions of this law in accordance with the instructions of the Competent Employee and subject to the approval of the owner.
- b) In the case that the owner or the person in charge of the work refuse to respond to the directives of the Competent Employee which rules that the item or food in violation of the provisions of this law should be destroyed or disposed of, the Competent Employee shall then, write a summary of the facts in violation of this law and work towards referring the item or food to the official laboratory to define the if it is suitable for human consumption or not.

Article (11): a) any item or food or sample taken for the purpose of testing, analysis or determination of the result should be sent to the official laboratory within a period not exceeding (24) hours. In all cases, it shall be transported by methods specified in the Implementing regulation of this Law.

- b) The (Competent Authority) shall lift the seizure and permit the circulation of the item or food, if it is proven by writing, based on the

result of laboratory testing, its fitness for human consumption and that it is not in violation of this law.

- c) In case of seizure and storage of any item or food, the same is carried out in the same place or site in which it was seized in cases where storage conditions are available; otherwise, it shall be transported to another place or site where required storage conditions are available.
- d) Any one who removes changes or alters the place or site or food subject to seizure or intervenes, in the same, in any way without reference to, or permission from the competent authority shall be liable to punishment under this law.

#### Article (12)

- a- If it is evident from the result of the laboratory tests that the item or food is not fit for human consumption, the Competent Authority shall take the necessary procedures to work towards destroying it, or disposing of it in the presence of a representative of the Attorney General and shall refer the violator to the Office of the attorney General.
- b- If it is evident from the result of the laboratory test that the item or food is counterfeit, the Competent Authority should prevent its circulation and refer the violation to the Office of the Attorney General, provided that disposal of the item or food is carried out in manner determined by the competent court.

Article (13) the competent Employee or the appointee to the official Laboratory shall have no interest or relation in the circulation of the item or food being seized that requires testing and analysis.

Article (14) the administration of the official laboratory or the specialist in conducting tests and analysis of the taken sample sent to them should write the necessary certificate or in the speed practically possible, and the result shall be presented in accordance with the forms approved for this purpose and duly presented to the body or authority in the formal methods specified by the Regulation.

15- The results of the tests conducted by the officially Accredited Laboratory are considered the ones that are relied on, in case of opposition, the test is redone and the result becomes final... subject to the provisions of Paragraph (b) of Article (9) and no violation to the same.

### Chapter Three
