

# TRADE CAN INCENTIVISE THE DEVELOPMENT OF CLEAN AND AFFORDABLE ENERGY.

Trade and value chains underpinned by WTO rules have contributed to the dramatic **fall in the cost of generating solar and wind energy.**

\$560

Of the \$560 billion disbursed under Aid for Trade from 2006 to 2020, **around one-third has been allocated to environment-oriented projects with a focus on energy production infrastructure.**

WTO members have shared their experiences to reform fossil fuel subsidies through domestic, regional and international action. **A group of members are engaged in the Fossil Fuel Subsidies Reform initiative,** looking at avenues to rationalise and phase out inefficient fossil fuel subsidies.
