

Book Launch

Agriculture, Development and the Global Trading System: 2000-2015

Edited by Antoine Bouët and David Laborde

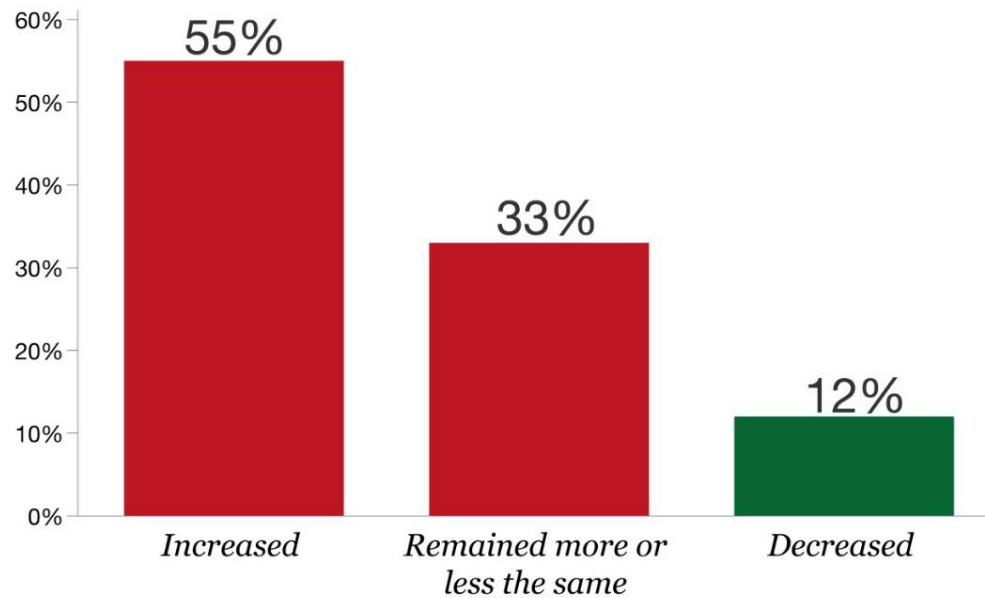

- An idea: Trade and (Sustainable) Development are linked
- A fact: A rule-based globalized world has delivered unmatched performance in terms of poverty reduction and food security achievements
- A general feeling: Globalization is a threat

General Feeling...

“In the last 30 years the proportion of the World population living in extreme poverty has...”

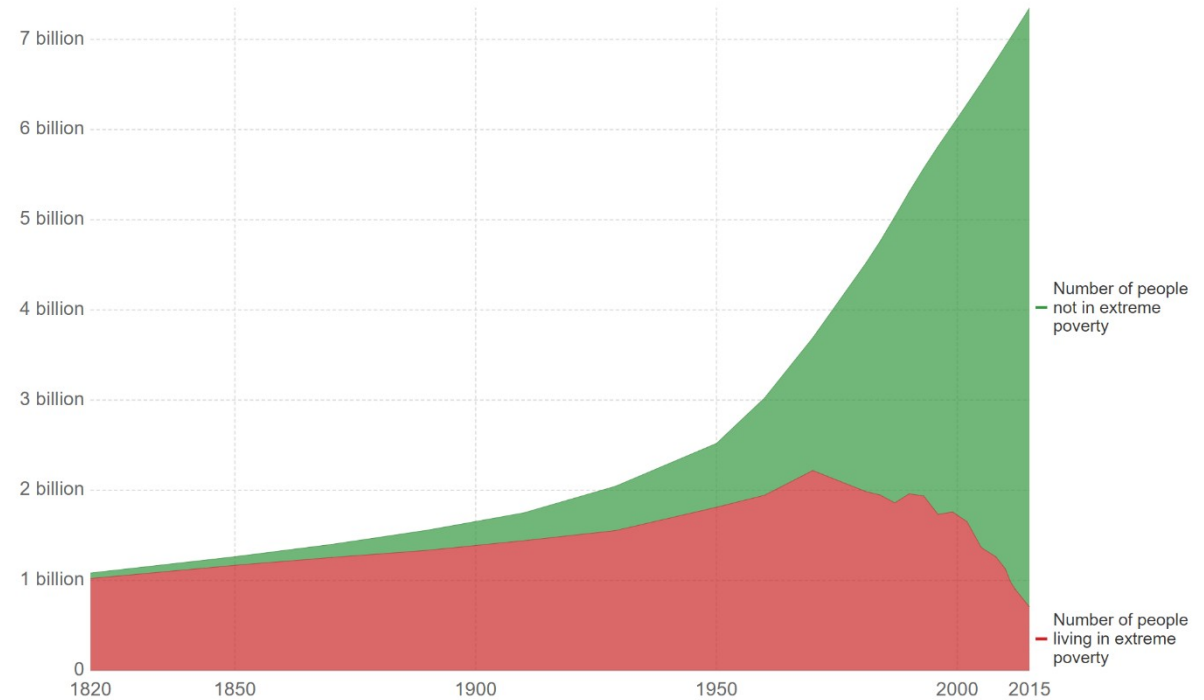

Data source: Gapminder – Ignorance Test for the UK, N=373 respondents that reported to have a university degree. The interactive data visualization is available at OurWorldInData.org. There you find the raw data and more visualizations on this topic.

...has fallen from 35% to 10% in 30 years

World population living in extreme poverty, 1820-2015

Extreme poverty is defined as living at a consumption (or income) level below 1.90 "international \$" per day. International \$ are adjusted for price differences between countries and for price changes over time (inflation).

The Study

Is Free Trade a popular idea?

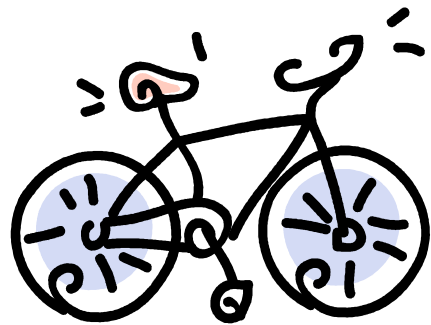

Source: Google (2016).

Two conclusions

- Make Trade, Not Wars (and avoid doing trade wars)
- Ideas and Policies evolve
 - There is no status quo in trade policy and international cooperation

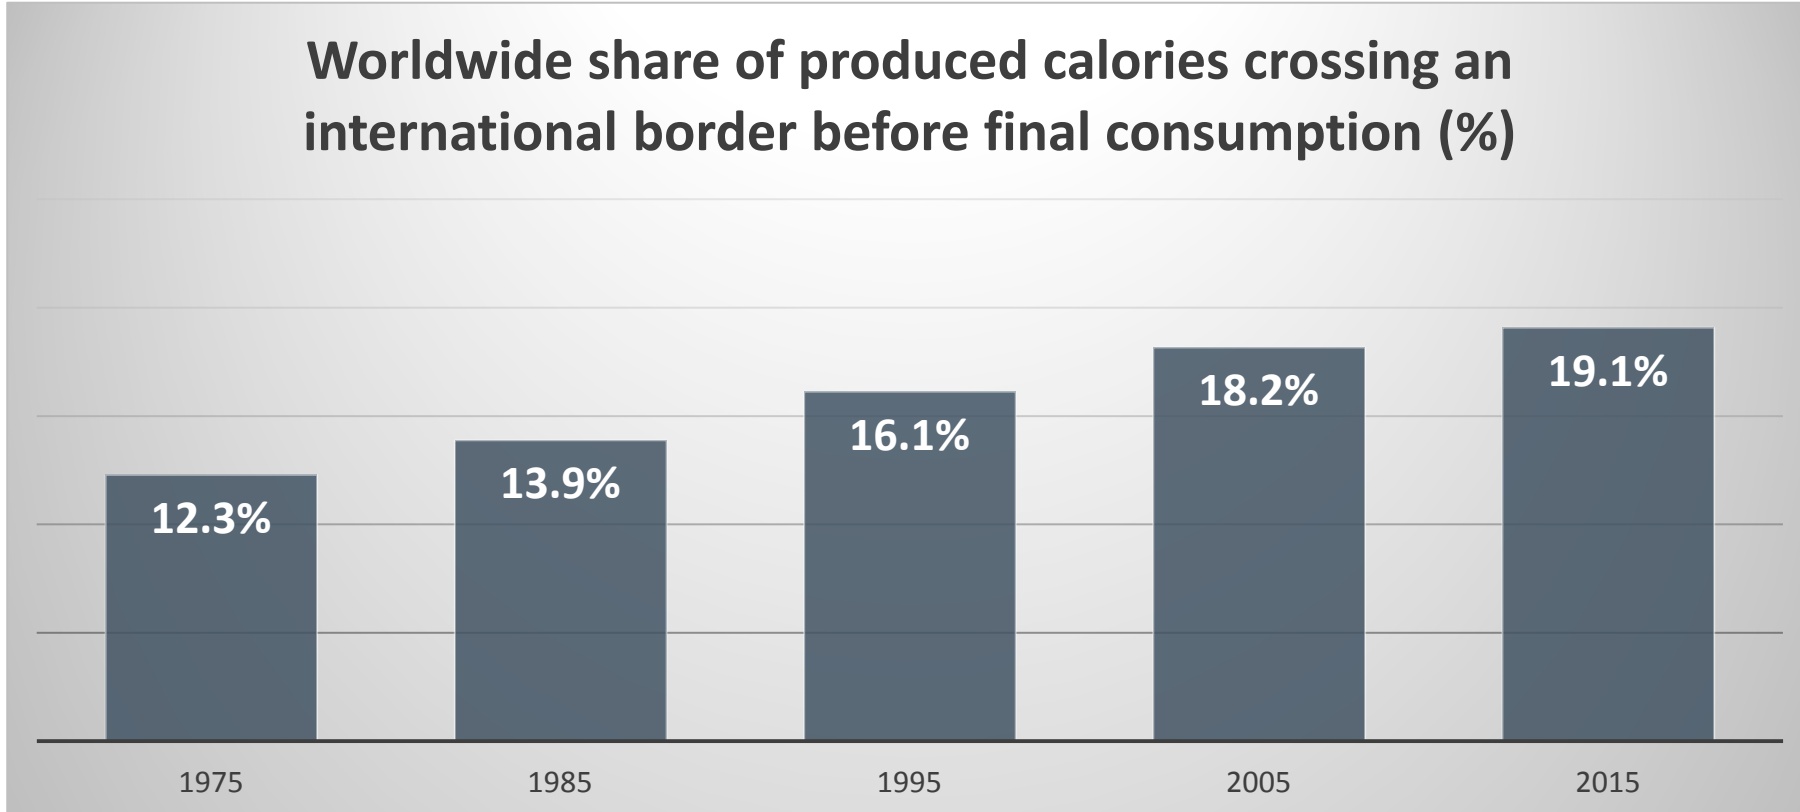

or

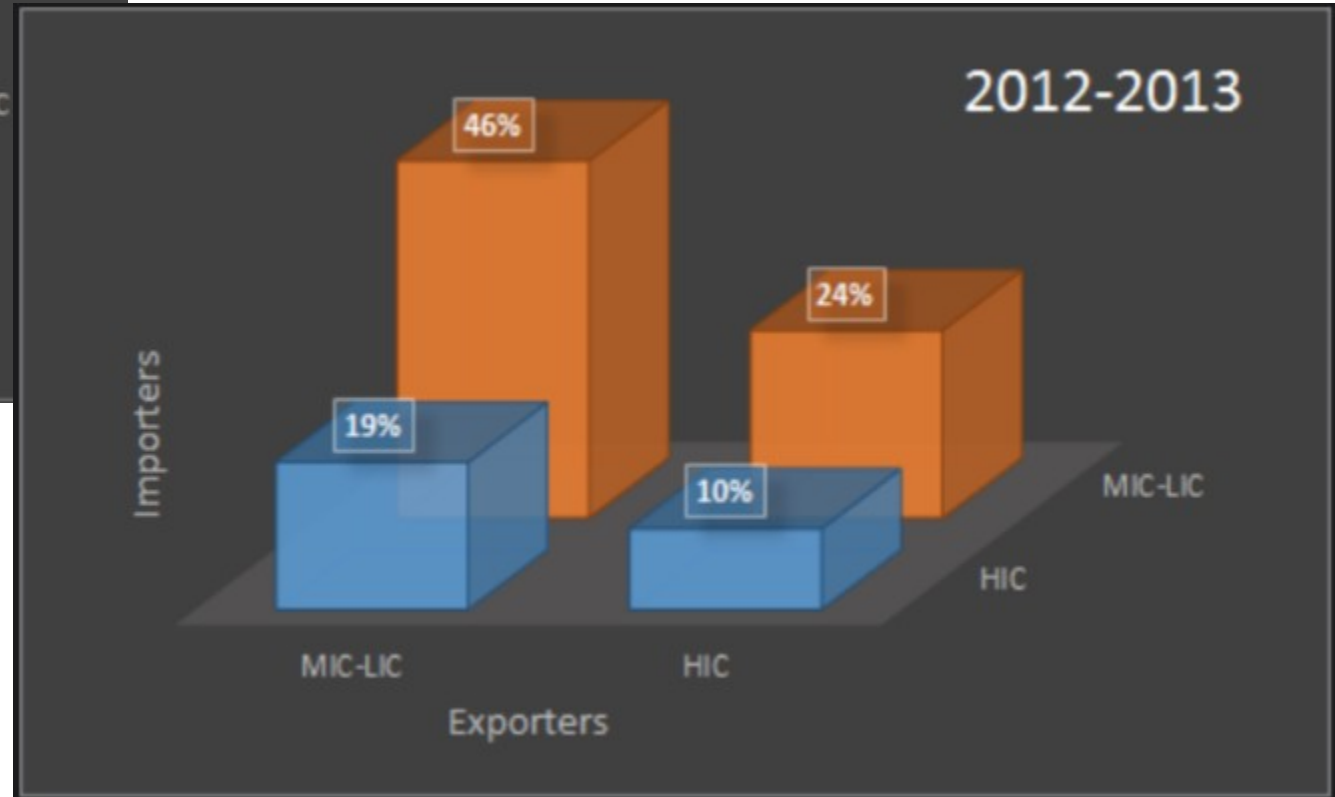

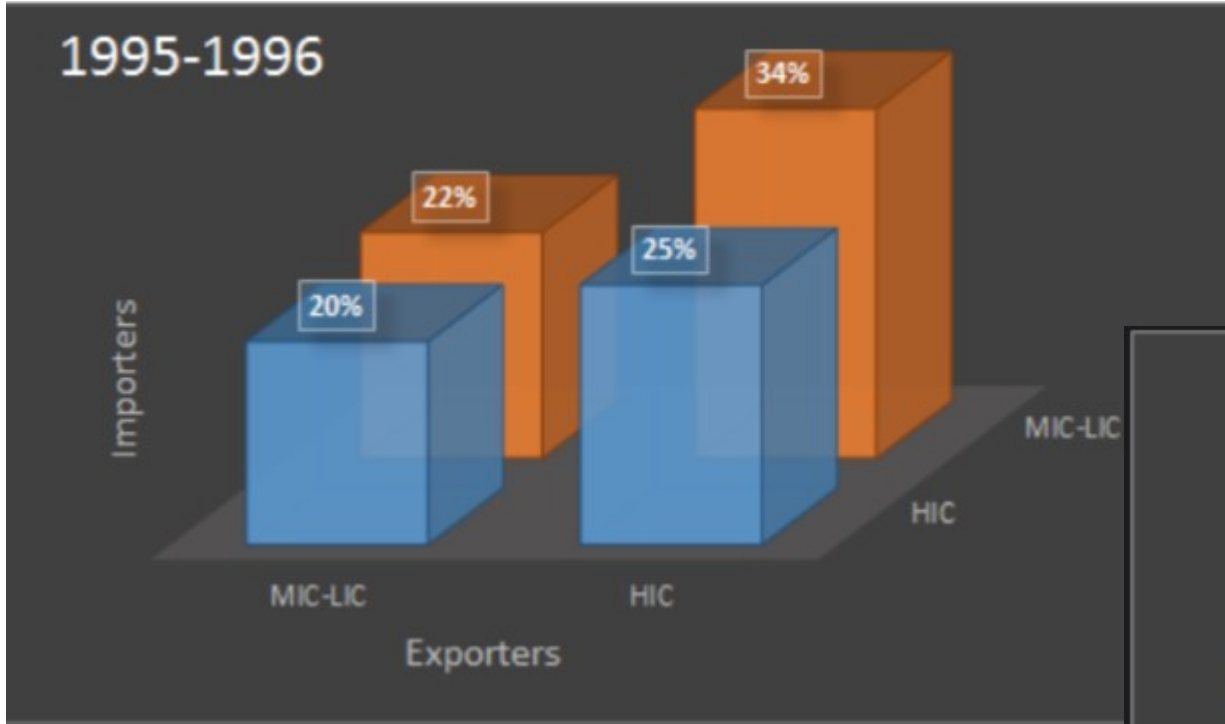

Globalization has also included Agricultural Markets

A new market structure: Trade share in calories

Address the issues, lot at stakes

- Cooperation through disciplines
- Government and their constituency
- Political economy within and between countries
- The value of well organized, healthy trading system, but in a changing world

13 Chapters

- What can the Doha Development Agenda Deliver, and how can it fail?
 - The dynamics, intricacies of negotiations but what we should learn for future round of negotiations
 - Role of emerging economies but also keep issues for the most vulnerable ones: cotton
- Successful and Failed trade instruments for Managing Price volatility

Table of Contents
