CUSTOM INSPECTION, PROCESSING AND SERVICING FEES

TAXES AND CHARGES FOR SENSITIVE PRODUCT CATEGORIES

Quarantine requirement

Requirement to detain or isolate animals, plants or their products on arrival at a port or place for an infectious or contagious disease, or contamination. Example: Live dogs must be quarantined. Plants need to be quarantined to terminate or restrict the spread of harmful organisms.

Quarantine Act 1908

Summary

17 Vessels or installation subject to quarantine (1). The following vessels shall be subject to quarantine: (a) every overseas vessel until practice has been granted or until it has been released from quarantine; (b) every vessel (whether an Australian vessel or not) which arrives at a port from an overseas country or territory which is subject to quarantine restrictions.

Quarantine Act 1908

Compilation No. 42

Compilation date: 1 July 2015
Included amendments up to: Act No. 41, 2015
Registered: 26 August 2015

About this compilation

This compilation

This is a compilation of the Quarantine Act 1908 as made and in force on 1 July 2015 (the compilation date). This compilation was prepared on 24 August 2015. The notes at the end of this compilation (the endnotes) include information about amending legislation and the amendment history of provisions of the compiled law.

Uncommenced amendments

The effect of uncommenced amendments is not shown in the text of the compiled law. Any uncommenced amendments affecting the law are accessible on ComLaw (www.comlaw.gov.au). The details of amendments made as at, but not commencing at, the compilation date are set out in the endnotes. For more information on uncommenced amendments, see the series page on ComLaw for the compiled law:

Application, saving and transitional provisions for provisions and amendments

If the operation of a provision or amendment of the compiled law is affected by an application, saving or transitional provision that is not included in this compilation, details are included in the endnotes.

Modifications

If the compiled law is modified by another law, the compiled law operates as modified but the modification does not amend the text of the law. Accordingly, this compilation does not show the text of the compiled law as modified. For more information on any modifications, see the series page on ComLaw for the compiled law.

Self repealing provisions

If a provision of the compiled law has been repealed in accordance with a provision of the law, details are included in the endnotes.
Potential Regulatory Changes

Notification summary: G/SPS/N/AUS/469

Date: 06/07/2019

Description:
As notified on 2 April 2019 (G/SPS/N/AUS/469/Add.1), on 15 April 2019, only seed lots imported under Phase 3 (PCR) conditions will be permitted entry into Australia. In response to comments from stakeholders and recent test results, Australia has previously approved PCR primers and updated its protocols to ensure that they can be used to detect the presence of ToBRFV, which is now published on the department’s website: [http://www.agriculture.gov.au/imports/goods/plant-material/seeds-for-sowing/emergency-measures-tobrfv](http://www.agriculture.gov.au/imports/goods/plant-material/seeds-for-sowing/emergency-measures-tobrfv). PCR primers will be considered where evidence of efficacy of the test is provided, on a case-by-case basis.

Committee on Sanitary and Phytosanitary Measures

NOTIFICATION OF EMERGENCY MEASURES

Addendum

The following communication, received on 7 June 2019, is being circulated at the request of the Delegation of Australia.

Amendment of Phase 3 emergency measures for imported tomato and capsicum seeds to mitigate the increased risk posed by Tomato Yellow Leaf curl virus (TYLCV).

As notified on 2 April 2019 (G/SPS/N/AUS/469/Add.1), from 15 April 2019, only seed lots imported under Phase 3 (PCR) conditions will be permitted entry into Australia.

In response to comments from stakeholders and recent test results, Australia has reviewed the previously approved PCR primers and updated the approved list. This has resulted in the removal of primers used by Lie et al. (2018) and the inclusion of a new primer set (effective 7 June 2019). Australia has also finalised its PCR protocol with recommended primers for the detection of ToBRFV, which is now published on the department’s website: [http://www.agriculture.gov.au/imports/goods/plant-material/seeds-for-sowing/emergency-measures-tobrfv](http://www.agriculture.gov.au/imports/goods/plant-material/seeds-for-sowing/emergency-measures-tobrfv). Other PCR primers and protocols will be considered where evidence of efficacy of the test is provided, on a case-by-case basis.

This addendum concerns:
- Modification of final date for comments
- Modification of content and/or scope of previously notified regulation
- Withdrawal of regulation
- Change in period of application of measure
- Other

Agency or authority designated to handle comments: [ ] National Notification Authority, [ ] National Enquiry Point.
