Acceptance of conformity assessment results: examples for consumer products regulated by Inmetro
Geneva, February 2020

Marcos Borges
Directorate of Conformity Assessment

presented by Lea Contier de Freitas, TBT Enquiry Point
Inmetro’s regulatory scope

product safety mostly, not covered by other regulatory agencies (health, telecommunications, vehicles...)

Current regulatory stock

167 regulations with associated conformity assessment schemes
Number of CA programmes in place in the period 2000 - 2015

Source: Chamusca; Sampaio; Silva (Inmetro, 2015)
Acceptance of CA results

Foreign test results widely accepted in self declaration and certification schemes

provided

• testing laboratory is accredited by an ILAC member and
• tests are conducted according to requirements established in the regulation

Many examples: products for children; domestic appliances (electrical safety); medical devices and products etc.

Most tests of photovoltaic panels, for instance, are performed abroad, after laboratories adjusted tests to be conducted at 60 Hz and not 50 Hz.
Acceptance of CA results

For certification schemes:

Foreign CA results are accepted according to the following conditions:

- foreign CB must be accredited by an IAF member;
- foreign CB must have an MoU signed with a national CB;
- MoU may cover acceptance of assessments and testing;
- national CB issues the certificate, assuming full responsibility for the entire certification process.
Acceptance of CA results

For certification schemes:

Foreign certification bodies can coordinate certification processes in Brazil if:

• they are accredited by Inmetro/Cgcre in the specific scope;
• they are legally established in the country (legal documentation, office, staff with technical competence);
• all documents are written in Portuguese.
In the near future, *an increase in the acceptance of foreign conformity assessment results will be expected*, considering that Inmetro’s regulation will be fully revised to focus on essential requirements instead of prescriptive instructions that hinder innovation and competitiveness.
Thank you for your attention
