Canada’s Plan for Affordable Energy, Good Jobs, and a Growing Clean Economy (Budget 2023)

• The Government of Canada is reinforcing its plan for a clean economy that delivers prosperity, middle class jobs, and more vibrant communities across Canada.

• Proposed investments will help Canada fight climate change, retool the economy, and build the net-zero industries of tomorrow in a way that supports workers.
At least US $100 trillion in global investment required by 2050 to decarbonize the global economy and reach international net-zero emissions.

Major economies are moving at an unprecedented pace to secure investment, retool their economies, and build the net-zero industries of tomorrow.

Scale of investment should bring significant opportunities for businesses and investors.

Investment Required in Clean Growth (percentage of global total)

- **Canada 1.7%**
- **UK 2.6%**
- **US 17%**
- **Japan 3.9%**
- **Germany 3.5%**
- **France 2.5%**
- **Italy 2.1%**
- **China 24%**
- **India 6.9%**
- **Others 36%**

Our strategy and tools to accelerate private investment

Three tiers of federal financial incentives underpinned by Canada’s pollution pricing system and regulatory framework.

1. Targeted Programming
   - Programming to support clean energy and decarbonization projects, and to develop innovative clean technologies

2. Strategic Financing
   - Innovative financing and investment tools to attract private capital and accelerate deployment of key technologies

3. Investment Tax Credits
   - Tax credits for investments in:
     - Clean Electricity
     - Clean Hydrogen
     - Clean Technology Manufacturing
     - CCUS
     - Deployment of Clean Technologies

4. Carbon Pollution Pricing and Regulatory Framework
   - Ensures there is a price incentive to reduce GHG emissions and innovate. Requires reductions in carbon intensity for certain activities and products
Canada’s 2023 budget proposes investments in key areas of our economy

Core Challenge: Securing investment critical to the net-zero transition

- **Clean Electricity**
  - $7.3 billion from 2022-23 to 2027-28 to accelerate the supply and transmission of clean electricity.

- **Reliable Transportation and Resilient Infrastructure**
  - $921 million from 2022-27-28 to ensure that Canada’s transportation and supply chain systems are resilient and reliable for Canadians and Canadian businesses.

- **A Growing, Clean Economy**
  - $11.1 billion from 2022-23 to 2027-28 to encourage businesses to invest in Canada’s clean economy and create good-paying jobs for Canadian workers.

- **Investing in Tomorrow’s Technology**
  - $759 million from 2022-23 to 2027-28 to encourage business innovation in Canada.

- **Investing in Canadian Workers**
  - $107 million from 2023-24 to 2027-28 and inclusion of labour requirements for investment tax credits to ensure that workers will share in Canada’s economic prosperity.

**Cost of Our Plan**

The Government of Canada proposes new investments in clean growth totalling $20.9 billion over the next 5 years.
