

OVERVIEW OF USAID TECHNICAL ASSISTANCE RESOURCE PUBLICATIONS: CONTRIBUTION BY THE UNITED STATES

- Since 2004, USAID has developed a series of Customs Handbooks to provide customs and border authorities with “best practices” in border management.
- The publications include: *Advance Ruling Guide, AEO Handbook, Establishing and Implementing a Customs Integrity Program, Establishing and Implementing a Customs Program Management Process, Risk Management Handbook, ICT Procurement Handbook, and a Post-Clearance Audit Handbook.*
- USAID is currently updating both the *AEO Handbook* and the *Risk Management Handbook* to reflect TFA obligations.
- USAID has also published *A Comprehensive Approach to Trade Facilitation and Capacity Building*, which provides a roadmap for sequencing the implementation of TFA provisions. This document has been translated into French and Spanish for wider audiences.
- All of these materials will eventually be available on the TFAFacility.org website.
