OECD book launch

Trade Facilitation and the Global Economy

26 June 2018
Average trade facilitation performance

Source: www.compareyourcountry.org/trade-facilitation
In the short term, full implementation of the TFA would increase trade in all sectors, especially in intermediates.
.. and lower costs of inputs, enhancing GVC linkages

Intermediate inputs costs, by sector and income group (% change to the base, short term)
By lowering input costs and raising efficiency, trade facilitation increases output across all regions.
In the developing world, trade facilitation raises labour income over the longer term
Countries at all levels of development experience welfare gains

- High income non-OECD countries
- OECD countries
- Upper middle income
- Lower middle income
- Low income countries
- Rest of the World
