

TFA Committee (9-11 October 2018)

Agenda item 1. A

Thank you the US for putting this issue on the table again. Korea believes that transparency and sharing information on member's policy and system related to trade is the foundation TFA has built upon. So notification is a crucial tool and requirement to achieve the goal of TFA. In this regard appropriate review mechanism is necessary to monitor and encourage the notifications. And revisiting the notifications on which discussion has not been completed need to be allowed without unnecessary burden on the members. This could also contribute to help identify and resolve the obstacles members had faced. Korea is willing to engage in the discussion on this issue.
