GENERALIZED SYSTEM OF PREFERENCES

Notification by Japan

Addendum

For the information of contracting parties the delegation of Japan has notified certain changes made in its GSP scheme for the 1978 fiscal year starting 1 April.

I. Agricultural products (CCCN chapters 1-24)

As a result of the revision of the CCC Nomenclature, CCCN heading Nos. 1514 and 2101 have been absorbed into Nos. 1515 and 2102 respectively. Thus, the number of items covered by the GSP scheme has been reduced from 77 to 75 at the level of CCCN four-digit headings without involving any substantial change.

II. Industrial products (CCCN chapters 25-99)

1. Table 1 below indicates some changes made in ceiling control between FY 1977 and FY 1978.

2. As a result of the revision of the CCC Nomenclature, silk fabrics containing more than 10 per cent by weight of silk, noil or other waste silk, which formerly fell only within CCCN heading 5009, now fall also within headings 5104, 5311 and 5607. Therefore, CCCN headings ex 5104, ex 5311 and ex 5607 should be added to the list of industrial products excluded from the GSP scheme.

3. As a result of the revision of the CCC Nomenclature, silk yarn containing more than 10 per cent by weight of silk, noil or other waste silk, which fell only within CCCN heading 5004, now falls also within heading 5101, and textile materials other than animal hair prepared for use in making wigs and the like, which fell within CCCN heading 6704, now fall within heading 6703. Therefore, CCCN headings ex 5101 and ex 6703 should be added to the list of selected products for which GSP rate is 50 per cent of MFN rate.

4. The amount of ceiling limitation for the 1978 fiscal year is indicated by product group in Table 2 below together with information on the type of ceiling control and GSP rate applicable to the relevant product group.

III. Rules of cumulative origin

The Japanese Government has introduced rules of cumulative origin for the ASEAN countries under its GSP scheme with effect from 1 April 1978, as follows:

1. In the existing rules governing the status of origin, judgement of whether a particular product is eligible for the status of origin is made in respect of each individual preference-receiving country. Whereas, in the rules of cumulative origin newly introduced by Japan for the ASEAN countries under its GSP scheme, with regard to a product produced in more than one country of ASEAN, the status of origin will be granted to such a product subject to the rules mentioned below:

(1) In the case of the goods which are produced in an ASEAN country (to be referred to as "A") wholly from the imported products mentioned in (i) and (ii) below or from both the products wholly produced in that country (A) and those imported products noted above, they shall be regarded as goods wholly produced in that country (A) and shall be given the status of product originated in that country (A);

(i) the following products imported from any other ASEAN country:

(a) products wholly produced in one of the ASEAN countries;

(b) products exported from Japan to any one of the other ASEAN countries;

(c) products produced wholly from those products mentioned in (a) and/or (b) above.

(ii) products exported from Japan directly to the country (A).

(2) In the case of the goods which are produced in an ASEAN country (A) from both any one of those products mentioned in (1) (i) and (ii) above and other products, those products mentioned in (1) (i) and (ii) above used as part of the materials shall be regarded as ones produced wholly in the country (A) when determining the status of origin in respect of the goods.

2. In order to qualify for preferential treatment under the rules of cumulative origin, the authority issuing the certificate of origin Form A of the exporting ASEAN country where the final working or processing of the product concerned was carried out, shall issue a "Cumulative Working/Processing Certificate" in addition to the said certificate. When the Japanese Customs Authorities have found any doubt in respect of certain entries in the "Cumulative Working/Processing Certificate", the said authority of the ASEAN country will be requested to give an explanation to clarify the doubt.

IV. Changes in Lists A and B of the rules of origin

Table 3 shows changes made in Lists A and B, as a result of the revision of the CCC Nomenclature, between FY 1977 and FY 1978.

Product Groups and Ceilings for FY 1978

Symbols used for indicating types of ceiling control and GSP rate

M = monthly control

D = daily control

Q = prior allotment

* = items for which ceiling control is flexibly administered

+ = items for which the maximum amount limitation of 50 per cent for a beneficiary is flexibly administered.

S = selected products for which GSP rate is 50 per cent of MFN rate.
(For other items GSP rate is zero).
