COUNCIL OF REPRESENTATIVES

Report on Work since the Thirty-Ninth Session

Corrigendum

On page 77, read second full paragraph as follows:

"The representative of Brazil pointed out that the GATT obligation to notify clearly did not apply to legislation or regulations of a general nature enacted by competent national bodies. Such obligations referred only to concrete trade measures taken under circumstances explicitly mentioned in the General Agreement and according to procedures established by competent organs of the GATT. He took note of the question by the representative of Sweden and said that he would transmit it to his authorities. He pointed out that the law had not yet entered into force, and that Sweden's request could be seen as a matter for information to be dealt with through bilateral channels."
