1/ The Emergency Tariff Act became effective on certain agricultural products on May 28, 1921, and continued in effect until September 22, 1922.

2/ The Generalized System of Preferences (GSP) for certain developing countries became effective Jan. 1, 1976; duty-free imports under these provisions during 1976-92 (in billion dollars) were: 1976--3.2; 1977--3.9; 1978--5.2; 1979--6.3; 1980--7.4; 1981--8.4; 1982--8.5; 1983--10.8; 1984--13.0; 1985--13.4; 1986--14.9; 1987--16.5; 1988--18.4; 1989--10.0; 1990--11.1; 1991--13.7; 1992--16.8.

3/ The Caribbean Basin Economic Recovery Act (CBERA) became effective Jan. 1, 1984; duty-free imports under these provisions during 1984-92 (in million dollars) were: 1984--577.7; 1985--497.6; 1986--689.8; 1987--906.1; 1988--847.2; 1989--915.3; 1990--1,022.7; 1991--1,120.7; 1992--1,528.7.

4/ Revised from previous publication due to Department of Commerce revisions.

Note.--The ratio of duties collected to the value of imports (sometimes referred to as the "average ad valorem equivalent") should be used with great reservation as a measure of the "height" of a country's tariff or of the tariff's restrictiveness of imports. Such a ratio for the schedule of duties as a whole (or even a ratio for most individual tariff categories) is heavily weighted by imports that enter either free of duty or at low unrestrictive rates; it is weighted less by imports that enter at high restrictive rates and not at all by imports that are precluded from entry. Moreover, an upward or downward trend in the "ratio" of duties collected may reflect alterations in the rates of duty applied, changes in the composition of imports from year to year, or changes in the prices of imported commodities. Also, presented dutiable values and calculated duties are overstated because they have not been adjusted to account for the nondutiable portion of imports entered under HTSUS provisions 9802.00.60 and 9802.00.80.

1/ Data reported for Germany represent combined exports to West Germany and East Germany.
2/ For 1986-87, data reported for Belgium include exports to Luxembourg, as the two countries were treated as a single entity for statistical purposes during this period. Effective with 1988 data, separate export figures were available for each country.
3/ Prior to 1992, exports to Russia and Ukraine were reported within statistics for the Soviet Union; separate data on U.S. exports to the individual successor states become available during 1992. Because a significant portion (28.7 percent) of U.S. exports to the former Soviet Union during 1992 were not allocated to a specific state, it also appears among the leading markets and presented figures for the successor states are understated.
4/ For 1986-87, data reported for Netherlands Antilles include exports to Aruba, as the two countries were treated as a single entity for statistical purposes during this period. Effective with 1988 data, separate export figures were available for each country.
5/ Exports to Yugoslavia were reported through May 1992; effective with June statistics, exports to its successor states were reported separately.

Note: Data before 1989 are estimated. Due to rounding, figures may not add to the totals shown.

1/ Revised from previous publication due to Department of Commerce revisions.
2/ Data reported for Germany represent combined imports from West Germany and East Germany.
3/ For 1986-87, data reported for Belgium include imports from Luxembourg, as the two countries were treated as a single entity for statistical purposes during this period. Effective with 1988 data, separate import figures were available for each country.
4/ Prior to 1992, imports from Russia and Ukraine were reported within statistics for the Soviet Union; separate data on U.S. imports from the individual successor states became available during 1992. Because a significant portion (24.6 percent) of U.S. imports from the former Soviet Union during 1992 were not allocated to a specific state, it also appears among the leading suppliers and presented figures for successor states are understated.
5/ Prior to June 1992, imports from Slovenia and Macedonia were reported within statistics for Yugoslavia; the 1992 figure presented for Yugoslavia represents imports during January-May.

Note: Data before 1989 are estimated. Due to rounding, figures may not add to the totals shown.

1/ Calculated duties for Japan and Grand total for 1987 have been adjusted due to $11 million overstatement in official statistics.
2/ Revised from previous publication due to Department of Commerce revisions.
3/ Calculated duties reported for Germany represent combined duties on imports from West Germany and East Germany.
4/ For 1986-87, data reported for Belgium include duties on imports from Luxembourg, as the two countries were treated as a single entity for statistical purposes during this period. Effective with 1988 data, separate import figures were available for each country.
5/ Prior to 1992, imports from Russia and Ukraine were reported within statistics for the Soviet Union; separate data on U.S. imports from the individual successor states became available during 1992. Because a significant portion (24.6) percent of U.S. imports from the former Soviet Union during 1992 were not allocated to a specific state, it also appears among the leading suppliers and presented duties for successor states are understated.
6/ Prior to June 1992, imports from Slovenia and Macedonia were reported within statistics for Yugoslavia; the 1992 figure presented for Yugoslavia represents calculated duties on imports during January-May.

Note: Data before 1989 are estimated. Due to rounding, figures may not add to the totals shown.
