Explanatory Notes

Data in tables refers to calendar years. Consumption in tables 1-6 has been calculated on the basis of adding production to imports and deducting exports. The consumption figures may therefore include quantities utilized for processing and subsequently exported in processed form. No information has been available concerning stocks. Production figures include quantities subsequently used for processing.

Notes explicatives

Les données figurant dans les tableaux ont trait aux années civiles. Pour les tableaux 1 à 6, la consommation a été calculée en ajoutant la production aux importations et en déduisant les exportations. Les chiffres de consommation peuvent donc englober des quantités utilisées pour la transformation et exportées ensuite sous forme de produits transformés. On n'a disposé d'aucun renseignement en ce qui concerne les stocks. Les quantités utilisées pour la transformation ultérieure sont comprises dans les chiffres de production.
